[F.M.M..FTW]

[Fergus Mor Mac Earca.FTW]

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]

Fiacha Srabhteine(?) was King of Connaught and the 120th Monarch of Ireland (reigned 285-322). He was so called from his having been fostered at Sunsrabhteine, in Connaught; of which province he was King before his elevation to the Monarchy. He was the third son of Carbry Liffechar, the 117th Monarch of Ireland. He married Aoife, daughter of the King of Gale, Goodhal. This Fiacha, after a thirty-seven year reign, was in the battle of Dubhcomar, in 322, and was slain by his nephews, the three Collas, to make room for Colla Uais, who seized on and kept the Monarchy for four years.

Notes for Octavius Augustus 1st. Roman Emperor:
Introduction

Gaius Octavius, subsequently known as Gaius Julius Caesar Octavianus and still later as Augustus or Caesar Augustus, was the first Roman emperor, following the republic, which had been finally destroyed by the dictatorship of Julius Caesar, his great-

uncle and adoptive father. His autocratic regime is known as the principate because he was the princeps, the first citizen, at the head of that array of outwardly revived republican institutions that alone made his autocracy palatable. With unlimited patience, skill, and efficiency, he overhauled every aspect of Roman life and brought durable peace and prosperity to the Greco-Roman world.

Gaius Octavius was born on September 23, 63 BC, of a prosperous family that had long been settled at Velitrae (Velletri), southeast of Rome. His father, who died in 59 BC, had been the first of the family to become a Roman senator and was elected to the high annual office of the praetorship, which ranked second in the political hierarchy to the consulship. Gaius Octavius' mother, Atia, was the daughter of Julia, the sister of Julius Caesar; and it was Caesar who launched the young Octavius in Roman public life. At the age of 12 he made his debut by delivering the funeral speech for his grandmother Julia. Three or four years later he received the coveted membership of the board of priests (pontifices). In 46 he accompanied Caesar, now dictator, in his triumphal procession after his victory in Africa over his opponents in the Civil War; and in the following year, in spite of ill health, he joined the dictator in Spain. He was at Apollonia (now in Albania), completing his academic and military studies when, in 44 BC, he learned that Julius Caesar had been murdered.

Rise to power.

Returning to Italy, he was told that in his will Caesar had adopted him as his son and had made him his chief personal heir. He was only 18 when, against the advice of his stepfather and others, he decided to take up this perilous inheritance and proceeded to Rome. Mark Antony (Marcus Antonius), Caesar's chief lieutenant, who had taken possession of his papers and assets and had expected that he himself would be the principal heir, refused to hand over any of Caesar's funds, forcing Octavius to pay the late dictator's bequests to the Roman populace from such resources as he could raise. Caesar's assassins, Brutus and Cassius, ignored him and withdrew to the east. Cicero, the famous orator who was one of Rome's principal elder statesmen, hoped to make use of him but underestimated his abilities.

Celebrating public games, instituted by Caesar, to ingratiate himself with the city populace, Octavius succeeded in winning considerable numbers of the dictator's troops to his own allegiance. The Senate, encouraged by Cicero, broke with Antony, called upon Octavius for aid (granting him the rank of senator in spite of his youth), and joined the campaign of Mutina

(Modena) against Antony, who was compelled to withdraw to Gaul. When the consuls who commanded the Senate's forces lost their lives, Octavius' soldiers compelled the Senate to confer a vacant consulship on him. Under the name of Gaius Julius Caesar he next secured official recognition as Caesar's adoptive son. Although it would have been normal to add "Octavianus" (with reference to his original family name), he preferred not to do so. Today, however, he is habitually described as Octavian (until the date when he assumed the designation Augustus).

Octavian soon reached an agreement with Antony and with another of Caesar's principal supporters, Lepidus, who had succeeded him as chief priest. On November 27, 43 BC, the three men were formally given a five-year dictatorial appointment as triumvirs for the reconstitution of the state (the Second Triumvirate--the first having been the informal compact between Pompey, Crassus, and Julius Caesar). The east was occupied by Brutus and Cassius, but the triumvirs divided the west among themselves. They drew up a list of "proscribed" political enemies, and the consequent executions included 300 senators (one of whom was Antony's enemy Cicero) and 2,000 members of the class below the senators, the equites or knights. Julius Caesar's recognition as a god of the Roman state in January 42 BC enhanced Octavian's prestige as son of a god.

He and Antony crossed the Adriatic and under Antony's leadership (Octavian being ill) won the two battles of Philippi against Brutus and Cassius, both of whom committed suicide. Antony, the senior partner, was allotted the east (and Gaul); and Octavian returned to Italy, where difficulties caused by the settlement of his veterans involved him in the Perusine War (decided in his favour at Perusia, the modern Perugia) against Antony's brother and wife. In order to appease another potential enemy, Sextus Pompeius (Pompey the Great's son), who had seized Sicily and the sea routes, Octavian married Sextus' relative Scribonia (though before long he divorced her for personal incompatibility). These ties of kinship did not deter Sextus, after the Perusine War, from making overtures to Antony; but Antony rejected them and reached a fresh understanding with Octavian at the treaty of Brundisium, under the terms of which Octavian was to have the whole west (except for Africa, which Lepidus was allowed to keep) and Italy, which, though supposedly neutral ground, was in fact controlled by Octavian. The east was again to go to Antony, and it was arranged that Antony, who had spent the previous winter with Queen Cleopatra in Egypt, should marry Octavian's sister Octavia. The peoples of the empire were overjoyed by the treaty, which seemed to promise an end to so many years of civil war. In 38 BC

Octavian formed a significant new link with the aristocracy by his marriage to Livia Drusilla.

But a reconciliation with Sextus Pompeius proved abortive, and Octavian was soon plunged into serious warfare against him. When his first operations against Sextus' Sicilian bases proved disastrous, he felt obliged to make a new compact with Antony at Tarentum (Taranto) in 37 BC. Antony was to provide Octavian with ships, in return for troops Antony needed for his forthcoming war against the empire's eastern neighbour Parthia and its Median allies. Antony handed over the ships, but Octavian never sent the troops. The treaty also provided for renewal of the Second Triumvirate for five years, until the end of 33 BC.

Military successes.

In the following year the balance of power began to change: whereas Antony's eastern expedition failed, Octavian's fleet, commanded by his former schoolmate, Marcus Agrippa, who, although unpopular with the influential nobles, was an admiral of genius, totally defeated Sextus Pompeius off Cape Naulochus (Venetico) in Sicily. At this point the third triumvir, Lepidus, seeking to contest Octavian's supremacy in the west by force, was disarmed by Octavian,
deprived of his triumviral office, and forced into retirement. Ignoring Antony's right to settle his own veterans in Italy and recruit fresh troops, Octavian discharged many legionaries and founded settlements for them. His deliberate rivalry with Antony for the eventual mastership of the Roman world became increasingly apparent. Octavian's marriage two years earlier had begun to win over some of the nobles who had previously been Antony's supporters. Octavian also launched elaborate religious and patriotic publicity, centring on the classical god of order, Apollo, in contrast to Antony's more un-Roman patron, Dionysus (Bacchus). In addition, Octavian had started to prefix his name with the designation "Imperator," to suggest that he was the commander par excellence; and now, although he continued to use his triumviral powers, he omitted all reference to them from his coins, gradually concentrating on the plain, emotive name "Caesar Son of a God."

But, if Octavian was to compete with Antony's military seniority, successes in a foreign war were necessary; and so Octavian between 35 and 33 BC fought three successive campaigns in Illyricum and Dalmatia (parts of modern Slovenia and Croatia) in order to protect the northeastern approaches of Italy. With the help of Agrippa, he also lavished large sums on the adornment of Rome. When Octavian fomented public clamour against Antony's territorial gifts to Cleopatra, it was clear that a clash between the two men was imminent.

In 32 BC the triumvirate had officially ended, and Octavian, unlike Antony, professed no longer to be employing its powers. Amid a virulent exchange of propaganda, Antony divorced Octavia, whereupon her brother Octavian seized Antony's will and claimed to find in it damaging proofs of Cleopatra's power over him. Each leader induced the populations under his control to swear formal oaths of allegiance to his own cause. Then, in spite of grave discontent aroused by his exactions in Italy, Octavian declared war--not against Antony but against Cleopatra.

Accompanied by her, Antony had brought up his fleet and army to guard strongpoints along the coast of western Greece; but in 31 BC Octavian dispatched Agrippa very early in the year to capture Methone, at the country's southwestern tip. His enemies were taken by surprise; and after Octavian himself arrived--leaving his Etruscan friend and adviser Maecenas in charge of Italy--he and Agrippa soon shut Antony's fleet inside the Gulf of Ambracia (Arta). At the Battle of Actium Antony tried to extricate his ships in the hope of continuing the fight elsewhere. Though Cleopatra and then Antony succeeded in getting away, only a quarter of their fleet was able to follow them. She and Antony fled to Egypt and committed suicide when Octavian captured the country in the following year. Executing Cleopatra's son Ptolemy XV Caesar (Caesarion)--whose father she had claimed was Caesar--he annexed Egypt and retained it under his direct control.

The seizure of Cleopatra's treasure enabled him to pay off his veterans and made him finally master of the entire Greco-Roman world. From this point on, by a long and gradual series of tentative, patient measures, he established the Roman principate, a system of government that enabled him to maintain, in all essentials, absolute control. Gradually reducing his 60 legions to 28, he retained approximately 150,000 legionaries, mostly Italian, and supplemented them by about the same number of auxiliaries drawn from the provinces. A permanent bodyguard (the Praetorians), based on the bodyguards maintained by earlier generals, was stationed partly in Rome and partly in other Italian towns. A superb network of roads was created to maintain internal order and facilitate trade; and an efficient fleet was organized to police the Mediterranean.
In 28 BC Octavian and Agrippa held a census of the civil population, the first of three during the reign. They also reduced the Senate from about 1,000 to 800 (later 600) compliant members; and Octavian was appointed its president.

Government and administration.

Remembering, however, that Caesar had been assassinated because of his resort to naked power, Octavian realized that the governing class would welcome him as the terminator of civil war only if he concealed his autocracy beneath provisions avowedly harking back to republican traditions. From 31 until 23 BC the constitutional basis of his power remained a continuous succession of
consulships, but in January 27 BC he ostensibly "transferred the State to the free disposal of the Senate and people," earning the misleading, though outwardly plausible, tribute that he had restored the republic. At the same time, he was granted a 10-year tenure of an area of government (provincia) comprising Spain, Gaul, and Syria, the three regions containing the bulk of the army. The remaining provinces were to be governed by proconsuls appointed by the Senate in the old
republican fashion. Octavian, however, believed that his supreme prestige --crystallized in the meaningful term auctoritas-- safeguarded him against any defiance by these personages; and he was indeed able, more or less indirectly, to influence their appointments, just as he was able (on the rare occasions when he regarded it as desirable) to influence the appointments to the consulships and other metropolitan offices that continued to exist in "republican" fashion.

Four days after these measures, his name Caesar, acquired through adoption in Julius' will, was supplemented by "Augustus," an appellation with an antique religious ring, believed to be linked etymologically with auctoritas and with the ancient practice of augury. The word augustus was often contrasted with humanus; its adoption as the title representing the new order cleverly indicated, in an extraconstitutional fashion, his superiority over the rest of mankind. With the aid of writers such as Virgil, Livy, and Horace, all of whom in their different ways shared the same ideas, he showed his patriotic veneration of the old Italian faith by reviving many of its ceremonials and repairing numerous temples.

Military operations continued in many frontier areas. In 25, recalcitrant Alpine tribes were reduced, and Galatia (central Asia Minor) was annexed. Mauretania, on the other hand, was transferred from Roman provincial status to that of a client-kingdom, for such dependent monarchies, as in the later republic, bore a considerable part of the burden of imperial defense. Augustus himself visited Gaul and directed part of a campaign in Spain until his health gave out; in
23 he fell ill again and seemed on the point of death. Feeling, amid reports of conspiracies, that new constitutional steps were necessary, he proceeded to terminate his series of consulships in favour of a power (imperium majus) that was separated altogether

from office and its practical inconveniences. This power raised him above the proconsuls; it was never referred to on the official coinage or in Augustus' political testament but was intended to be exercised mainly in emergencies and on personal visits. He was also awarded the power of a tribune (tribunicia potestas) for life. Earlier, he had accepted certain privileges of a tribune. The full power he now assumed carried with it practical advantages, notably the right to convene the Senate. But, more particularly, the office of a tribune, because of the ancient character of the annually elected tribunes of the people as defenders of the plebs, surrounded him with a "democratic" aura. This was, perhaps, needed all the more because Augustus himself--while admittedly supporting the interests of poorer people by a great extension of the right of judicial appeal--tended to back the established classes as the keystone of his system.

Agrippa, too, was granted superiority over proconsuls, presumably in order to ensure that the armies would be in safe hands in case one of Augustus' recurrent illnesses proved fatal. The next to die, however, was the emperor's young nephew Marcellus, who had been married to his daughter Julia and might eventually have been envisaged as his successor. In the same year, 23
BC, Agrippa was sent out to the east as deputy princeps; two years later he became Julia's second husband. Meanwhile Augustus himself travelled in Sicily, Greece, and Asia (22-19). Important reorganizations were put into effect wherever he went; and immense satisfaction was caused by an agreement in 20 BC with Parthia, under which the Parthians recognized Rome's protectorate over Armenia and returned the legionary standards captured from Crassus 33 years earlier. In 19 Agrippa completed the subjugation of Spain. In this year there was
some adjustment of Octavian's powers to allow him to exercise them more freely in Italy, and the two following years witnessed social legislation attempting to encourage marriage, regulate penalties for adultery, and reduce extravagance. In 17 there were resplendent celebrations of ancient ritual, known as the Secular Games, to purify the Roman people of their past sins and provide full religious inauguration of the new age.

Although the principate was not an office which could be automatically handed on, Augustus seemed to be indicating his views regarding his ultimate successor when he adopted the two sons of his daughter Julia, boys aged three and one who were henceforward known as Gaius Caesar and Lucius Caesar. Their father Agrippa, whose powers had been renewed along with his master's, returned to the east. But now Augustus also gave important employment to his stepsons--his wife Livia's sons by her former marriage --Tiberius and Drusus the elder.

Proceeding across the Alps, they annexed Noricum and Raetia, comprising large parts of what are now Switzerland, Austria, and Bavaria, and extended the imperial frontier from Italy to the upper Danube (16-15).

It was probably during these years that an executive, or drafting, committee (consilium) of the Senate was established in order to help Augustus to prepare senatorial business. His administrative burden was also lightened by the expansion of his own staff (knights, who could also now rise to a number of key posts, and freedmen) to form the beginnings of a civil service, which had never
existed before but was destined to become an essential feature of the imperial system. Gradually, too, a completely reformed administrative structure of Rome, Italy, and the whole empire was evolved. The financial system that made this possible was evidently far more effective than anything the empire had ever seen until then. The system was based on the central treasury (aerarium), but the details of its relationship with the treasuries of the provinces, and particularly
the provincia of Augustus, are still imperfectly understood, partly because, although the emperor proudly recorded his gifts to the central treasury, he did not report what funds passed in the opposite direction.

The taxation providing these resources apparently included two main direct taxes: a poll tax (tributum capitis), paid in some provinces by all adults and in others by adult males only, and a land tax (tributum soli). There were also indirect taxes, which (as in the past) were farmed out to contractors because their yield was unpredictable and the embryonic civil service lacked the resources to handle them. The republican customs dues continued; but its rates were low enough not to hamper trade, which, in the peaceful conditions created by Augustus, flourished in wholly unprecedented fashion. Industries did not exist on a very large scale, but commerce was greatly stimulated by a sweeping reform and expansion of the Roman coinage. Gold and silver pieces, their designs reflecting many facets of imperial publicity, were issued in great quantities at a
number of widely distributed mints. The Rome mint was reopened for this purpose from c. 20 BC. The absence of bronze token coinage, which had been sparse for many decades, was remedied by the creation of abundant mintages in yellow orichalcum and red copper. In the West the principal mint for these pieces, besides Rome, was Lugdunum (Lyon), whose coins displayed a view
of the Altar of Rome and Augustus that formed a model for other provincial capitals. The Roman citizen colonies of the West, many of them established by Augustus to settle his veterans, supplemented this output by their own local coinages, and in the

East, particularly Asia Minor and Syria, numerous Greek cities were also allowed to issue small change.

Expansion of the empire.

The death in 12 BC of Lepidus enabled Augustus finally to succeed him as the official head of the Roman religion, the chief priest (pontifex maximus). In the same year, Agrippa, too, died. Augustus compelled his widow, Julia, to marry Tiberius against both their wishes. During the next three years, however, Tiberius was away in the field, reducing Pannonia (Yugoslavia and Hungary) up to the middle Danube, while his brother Drusus crossed the Rhine frontier and invaded Germany as far as the Elbe, where he died in 9 BC. In the following year, Augustus lost another of his intimates, Maecenas, who had been the adviser of his early days and was an outstanding patron of letters.

Tiberius, who replaced Drusus in Germany, was elevated in 6 BC to a share in his stepfather's tribunician power. But shortly afterward he went into retirement on the island of Rhodes. This was attributed to jealousy of his stepnephew Gaius Caesar, who was introduced to public life with a great fanfare in the following year; and the same compliments were paid to his brother Lucius in 2 BC, the year in which Augustus received his climactic title "father of the country" (pater patriae). Gaius was sent to the East and Lucius to the West. Both, however, soon died. Tiberius returned home in 2, and in 4 Augustus adopted him as his son, who in turn was required to adopt Germanicus, the son of his brother Drusus. The powers conferred upon Tiberius made him almost Augustus' own equal in everything except prestige.

Tiberius' next task was to consolidate the invasion and provincial organization of Germany (4-5). An invasion of Bohemia was planned and had already been launched from two directions when news came in 6 that Pannonia and Illyricum had revolted. It took three years for the rebellion to be put down; and this had only just been completed when Arminius raised the Germans against their Roman governor Varus and destroyed him and his three legions. As Augustus could not readily replace the troops, the annexation of western Germany and
Bohemia was postponed indefinitely; Tiberius and Germanicus were sent to consolidate the Rhine frontier.

Although Augustus was now feeling his age, these years in association with Tiberius were marked by administrative innovations: the annexation of Judaea in AD 6 (its client king Herod the Great had died 10 years previously); the establishment at Rome (in the same year) of a fire brigade with police duties, supplemented seven years later by a regular police force (cohortes urbanae); the

creation of a military treasury (aerarium militare) to defray soldiers' retirement bounties from taxes; and the conversion of the hitherto occasional appointment of prefect of the city (praefectus urbi) into a permanent office (AD 13). When, in the same year, the powers of Augustus were renewed for 10 years--such renewals had been granted at intervals throughout the reign--Tiberius was made his equal in every constitutional respect. In April, Augustus deposited his will at the House of the Vestals in Rome. It included a summary of the military and financial resources of the empire (breviarium totius imperii) and his political testament known as the "Res Gestae Divi Augusti" ("Achievements of the Divine Augustus"). The best preserved copy of the latter document is on the walls of the Temple of Rome and Augustus at Ankara, Turkey (the Monumentum Ancyranum). In 14 Tiberius was due to leave for Illyricum but was recalled by the news that
Augustus was gravely ill. He died on August 19, and on September 17 the Senate enrolled him among the gods of the Roman state. By that time Tiberius had succeeded him as the second Roman emperor, though the formalities involved in the succession proved embarrassing both to himself and to the Senate because the "principate" of Augustus had not, constitutionally speaking, been heritable or continuous. Like other emperors, Tiberius assumed the designation "Augustus" as an additional title of his own. Agrippa Postumus, who had been named his co-heir but was later banished, was put to death. The order to kill him may already have been given by Augustus, but this is not certain.

Notes for Octavius Augustus 1st. Roman Emperor:
Introduction

Gaius Octavius, subsequently known as Gaius Julius Caesar Octavianus and still later as Augustus or Caesar Augustus, was the first Roman emperor, following the republic, which had been finally destroyed by the dictatorship of Julius Caesar, his great-uncle and adoptive father. His autocratic regime is known as the principate because he was the princeps, the first citizen, at the head of that array of outwardly revived republican institutions that alone made his autocracy palatable. With unlimited patience, skill, and efficiency, he overhauled every aspect of Roman life and brought durable peace and prosperity to the Greco-Roman world.

Gaius Octavius was born on September 23, 63 BC, of a prosperous family that had long been settled at Velitrae (Velletri), southeast of Rome. His father, who died in 59 BC, had been the first of the family to become a Roman senator and was elected to the high annual office of the praetorship, which ranked second in the political hierarchy to the consulship. Gaius Octavius' mother, Atia, was the daughter of Julia, the sister of Julius Caesar; and it was Caesar who launched the young Octavius in Roman public life. At the age of 12 he made his debut by delivering the funeral speech for his grandmother Julia. Three or four years later he received the coveted membership of the board of priests (pontifices). In 46 he accompanied Caesar, now dictator, in his triumphal procession after his victory in Africa over his opponents in the Civil War; and in the following year, in

spite of ill health, he joined the dictator in Spain. He was at Apollonia (now in Albania), completing his academic and military studies when, in 44 BC, he learned that
Julius Caesar had been murdered.

Rise to power.

Returning to Italy, he was told that in his will Caesar had adopted him as his son and had made him his chief personal heir. He was only 18 when, against the advice of his stepfather and others, he decided to take up this perilous inheritance and proceeded to Rome. Mark Antony (Marcus Antonius), Caesar's chief lieutenant, who had taken possession of his papers and assets and had expected that he himself would be the principal heir, refused to hand over any of Caesar's funds, forcing Octavius to pay the late dictator's bequests to the Roman populace from such resources as he could raise. Caesar's assassins, Brutus and Cassius, ignored him and withdrew to the east. Cicero, the famous orator who was one of Rome's principal elder statesmen, hoped to make use of him but underestimated his abilities.

Celebrating public games, instituted by Caesar, to ingratiate himself with the city populace, Octavius succeeded in winning considerable numbers of the dictator's troops to his own allegiance. The Senate, encouraged by Cicero, broke with Antony, called upon Octavius for aid (granting him the rank of senator in spite of his youth), and joined the campaign of Mutina (Modena) against Antony, who was compelled to withdraw to Gaul. When the consuls who commanded the
Senate's forces lost their lives, Octavius' soldiers compelled the Senate to confer a vacant consulship on him. Under the name of Gaius Julius Caesar he next secured official recognition as Caesar's adoptive son. Although it would have been normal to add "Octavianus" (with reference to his original family name), he preferred not to do so. Today, however, he is habitually described as Octavian (until the date when he assumed the designation Augustus).

Octavian soon reached an agreement with Antony and with another of Caesar's principal supporters, Lepidus, who had succeeded him as chief priest. On November 27, 43 BC, the three men were formally given a five-year dictatorial appointment as triumvirs for the reconstitution of the state (the Second Triumvirate--the first having been the informal compact between Pompey, Crassus, and Julius Caesar). The east was occupied by Brutus and Cassius, but the triumvirs divided the west among themselves. They drew up a list of "proscribed" political enemies, and the consequent executions included 300 senators (one of whom was Antony's enemy Cicero) and 2,000 members of the class below the senators, the equites or knights. Julius Caesar's recognition as a god of the Roman state in January 42 BC enhanced Octavian's prestige as son of a god.

He and Antony crossed the Adriatic and under Antony's leadership (Octavian being ill) won the two battles of Philippi against Brutus and Cassius, both of whom committed suicide. Antony, the senior partner, was allotted the east (and Gaul); and Octavian returned to Italy, where difficulties caused by the

settlement of his veterans involved him in the Perusine War (decided in his favour at Perusia, the modern Perugia) against Antony's brother and wife. In order to appease another potential enemy, Sextus Pompeius (Pompey the Great's son), who had seized Sicily and the sea routes, Octavian married Sextus' relative Scribonia (though before long he divorced her for personal incompatibility). These ties of kinship did not deter Sextus, after the Perusine War, from making overtures to Antony; but Antony rejected them and reached a fresh understanding
with Octavian at the treaty of Brundisium, under the terms of which Octavian was to have the whole west (except for Africa, which Lepidus was allowed to keep) and Italy, which, though supposedly neutral ground, was in fact controlled by Octavian. The east was again to go to Antony, and it was arranged that Antony, who had spent the previous winter with Queen Cleopatra in Egypt, should marry Octavian's sister Octavia. The peoples of the empire were overjoyed by the treaty, which seemed to promise an end to so many years of civil war. In 38 BC
Octavian formed a significant new link with the aristocracy by his marriage to Livia Drusilla.

But a reconciliation with Sextus Pompeius proved abortive, and Octavian was soon plunged into serious warfare against him. When his first operations against Sextus' Sicilian bases proved disastrous, he felt obliged to make a new compact with Antony at Tarentum (Taranto) in 37 BC. Antony was to provide Octavian with ships, in return for troops Antony needed for his forthcoming war against the empire's eastern neighbour Parthia and its Median allies. Antony handed over the ships, but Octavian never sent the troops. The treaty also provided for renewal of the Second Triumvirate for five years, until the end of 33 BC.

Military successes.

In the following year the balance of power began to change: whereas Antony's eastern expedition failed, Octavian's fleet, commanded by his former schoolmate, Marcus Agrippa, who, although unpopular with the influential nobles, was an admiral of genius, totally defeated Sextus Pompeius off Cape Naulochus (Venetico) in Sicily. At this point the third triumvir, Lepidus, seeking to contest Octavian's supremacy in the west by force, was disarmed by Octavian,
deprived of his triumviral office, and forced into retirement. Ignoring Antony's right to settle his own veterans in Italy and recruit fresh troops, Octavian discharged many legionaries and founded settlements for them. His deliberate rivalry with Antony for the eventual mastership of the Roman world became increasingly apparent. Octavian's marriage two years earlier had begun to win over some of the nobles who had previously been Antony's supporters. Octavian also launched elaborate religious and patriotic publicity, centring on the classical god of order, Apollo, in contrast to Antony's more un-Roman patron, Dionysus (Bacchus). In addition, Octavian had started to prefix his name with the designation "Imperator," to suggest that he was the commander par excellence; and now, although he continued to use his triumviral powers, he

omitted all reference to them from his coins, gradually concentrating on the plain, emotive name "Caesar Son of a God."

But, if Octavian was to compete with Antony's military seniority, successes in a foreign war were necessary; and so Octavian between 35 and 33 BC fought three successive campaigns in Illyricum and Dalmatia (parts of modern Slovenia and Croatia) in order to protect the northeastern approaches of Italy. With the help of Agrippa, he also lavished large sums on the adornment of Rome. When Octavian fomented public clamour against Antony's territorial gifts to Cleopatra, it was clear that a clash between the two men was imminent.

In 32 BC the triumvirate had officially ended, and Octavian, unlike Antony, professed no longer to be employing its powers. Amid a virulent exchange of propaganda, Antony divorced Octavia, whereupon her brother Octavian seized Antony's will and claimed to find in it damaging proofs of Cleopatra's power over him. Each leader induced the populations under his control to swear formal oaths of allegiance to his own cause. Then, in spite of grave discontent aroused by his
exactions in Italy, Octavian declared war--not against Antony but against Cleopatra.

Accompanied by her, Antony had brought up his fleet and army to guard strongpoints along the coast of western Greece; but in 31 BC Octavian dispatched Agrippa very early in the year to capture Methone, at the country's southwestern tip. His enemies were taken by surprise; and after Octavian himself arrived--leaving his Etruscan friend and adviser Maecenas in charge of Italy--he and Agrippa soon shut Antony's fleet inside the Gulf of Ambracia (Arta). At the Battle of Actium Antony tried to extricate his ships in the hope of continuing the fight elsewhere. Though Cleopatra and then Antony succeeded in getting away, only a quarter of their fleet was able to follow them. She and Antony fled to Egypt and committed suicide when Octavian captured the country in the following year. Executing Cleopatra's son Ptolemy XV Caesar (Caesarion)--whose father she had claimed was Caesar--he annexed Egypt and retained it under his direct control.

The seizure of Cleopatra's treasure enabled him to pay off his veterans and made him finally master of the entire Greco-Roman world. From this point on, by a long and gradual series of tentative, patient measures, he established the Roman principate, a system of government that enabled him to maintain, in all essentials, absolute control. Gradually reducing his 60 legions to 28, he retained approximately 150,000 legionaries, mostly Italian, and supplemented them by about the same number of auxiliaries drawn from the provinces. A permanent bodyguard (the Praetorians), based on the bodyguards maintained by earlier generals, was stationed partly in Rome and partly in other Italian towns. A superb network of roads was created to maintain internal order and facilitate trade; and an efficient fleet was organized to police the Mediterranean. In 28 BC Octavian and Agrippa held a census of the civil population, the first of three during the reign. They also reduced the Senate from about 1,000 to 800 (later 600) compliant members; and Octavian was appointed its president.

Government and administration.

Remembering, however, that Caesar had been assassinated because of his resort to naked power, Octavian realized that the governing class would welcome him as the terminator of civil war only if he concealed his autocracy beneath provisions avowedly harking back to republican traditions. From 31 until 23 BC the constitutional basis of his power remained a continuous succession of
consulships, but in January 27 BC he ostensibly "transferred the State to the free disposal of the Senate and people," earning the misleading, though outwardly plausible, tribute that he had restored the republic. At the same time, he was granted a 10-year tenure of an area of government (provincia) comprising Spain, Gaul, and Syria, the three regions containing the bulk of the army. The remaining provinces were to be governed by proconsuls appointed by the Senate in the old
republican fashion. Octavian, however, believed that his supreme prestige -- crystallized in the meaningful term auctoritas-- safeguarded him against any defiance by these personages; and he was indeed able, more or less indirectly, to influence their appointments, just as he was able (on the rare occasions when he regarded it as desirable) to influence the appointments to the consulships and other metropolitan offices that continued to exist in "republican" fashion.

Four days after these measures, his name Caesar, acquired through adoption in Julius' will, was supplemented by "Augustus," an appellation with an antique religious ring, believed to be linked etymologically with auctoritas and with the ancient practice of augury. The word augustus was often contrasted with humanus; its adoption as the title representing the new order cleverly indicated, in an extraconstitutional fashion, his superiority over the rest of mankind. With the aid of writers such as Virgil, Livy, and Horace, all of whom in their different ways shared the same ideas, he showed his patriotic veneration of the old Italian faith by reviving many of its ceremonials and repairing numerous temples.

Military operations continued in many frontier areas. In 25, recalcitrant Alpine tribes were reduced, and Galatia (central Asia Minor) was annexed. Mauretania, on the other hand, was transferred from Roman provincial status to that of a client-kingdom, for such dependent monarchies, as in the later republic, bore a considerable part of the burden of imperial defense. Augustus himself visited Gaul and directed part of a campaign in Spain until his health gave out; in
23 he fell ill again and seemed on the point of death. Feeling, amid reports of conspiracies, that new constitutional steps were necessary, he proceeded to terminate his series of consulships in favour of a power (imperium majus) that was separated altogether from office and its practical inconveniences. This power raised him above the proconsuls; it was never referred to on the official coinage or in Augustus' political testament but was intended to be exercised mainly in emergencies and on personal visits. He was also awarded the power of a tribune (tribunicia potestas) for life. Earlier, he had accepted

certain privileges of a tribune. The full power he now assumed carried with it practical advantages, notably the right to convene the Senate. But, more particularly, the office of a tribune, because of the ancient character of the annually elected tribunes of the people as defenders of the plebs, surrounded him with a "democratic" aura. This was, perhaps, needed all the more because Augustus himself--while admittedly supporting the interests of poorer people by a great extension of the right of judicial appeal--tended to back the established classes as the keystone of his system.

Agrippa, too, was granted superiority over proconsuls, presumably in order to ensure that the armies would be in safe hands in case one of Augustus' recurrent illnesses proved fatal. The next to die, however, was the emperor's young nephew Marcellus, who had been married to his daughter Julia and might eventually have been envisaged as his successor. In the same year, 23 BC, Agrippa was sent out to the east as deputy princeps; two years later he became Julia's second husband. Meanwhile Augustus himself travelled in Sicily, Greece, and Asia (22-19). Important reorganizations were put into effect wherever he went; and immense satisfaction was caused by an agreement in 20 BC with Parthia, under which the Parthians recognized Rome's protectorate over Armenia and returned the legionary standards captured from Crassus 33 years earlier. In 19 Agrippa completed the subjugation of Spain. In this year there was
some adjustment of Octavian's powers to allow him to exercise them more freely in Italy, and the two following years witnessed social legislation attempting to encourage marriage, regulate penalties for adultery, and reduce extravagance. In 17 there were resplendent celebrations of ancient ritual, known as the Secular Games, to purify the Roman people of their past sins and provide full religious inauguration of the new age.

Although the principate was not an office which could be automatically handed on, Augustus seemed to be indicating his views regarding his ultimate successor when he adopted the two sons of his daughter Julia, boys aged three and one who were henceforward known as Gaius Caesar and Lucius Caesar. Their father Agrippa, whose powers had been renewed along with his master's, returned to the east. But now Augustus also gave important employment to his stepsons--his wife Livia's sons by her former marriage --Tiberius and Drusus the elder.
Proceeding across the Alps, they annexed Noricum and Raetia, comprising large parts of what are now Switzerland, Austria, and Bavaria, and extended the imperial frontier from Italy to the upper Danube (16-15).

It was probably during these years that an executive, or drafting, committee (consilium) of the Senate was established in order to help Augustus to prepare senatorial business. His administrative burden was also lightened by the expansion of his own staff (knights, who could also now rise to a number of key posts, and freedmen) to form the beginnings of a civil service, which had never existed before but was destined to become an essential feature of the imperial system. Gradually, too, a completely reformed administrative structure of Rome, Italy, and the whole empire was evolved. The financial system that made this possible was evidently far more effective than anything the empire had ever

seen until then. The system was based on the central treasury (aerarium), but the details of its relationship with the treasuries of the provinces, and particularly the provincia of Augustus, are still imperfectly understood, partly because, although the emperor proudly recorded his gifts to the central treasury, he did not report what funds passed in the opposite direction.

The taxation providing these resources apparently included two main direct taxes: a poll tax (tributum capitis), paid in some provinces by all adults and in others by adult males only, and a land tax (tributum soli). There were also indirect taxes, which (as in the past) were farmed out to contractors because their yield was unpredictable and the embryonic civil service lacked the resources to handle them. The republican customs dues continued; but its rates were low enough not to hamper trade, which, in the peaceful conditions created by Augustus, flourished in wholly unprecedented fashion. Industries did not exist on a very large scale, but commerce was greatly stimulated by a sweeping reform and expansion of the Roman coinage. Gold and silver pieces, their designs reflecting many facets of imperial publicity, were issued in great quantities at a
number of widely distributed mints. The Rome mint was reopened for this purpose from c. 20 BC. The absence of bronze token coinage, which had been sparse for many decades, was remedied by the creation of abundant mintages in yellow orichalcum and red copper. In the West the principal mint for these pieces, besides Rome, was Lugdunum (Lyon), whose coins displayed a view of the Altar of Rome and Augustus that formed a model for other provincial capitals. The Roman citizen colonies of the West, many of them established by Augustus to settle his veterans, supplemented this output by their own local coinages, and in the East, particularly Asia Minor and Syria, numerous Greek cities were also allowed to issue small change.

Expansion of the empire.

The death in 12 BC of Lepidus enabled Augustus finally to succeed him as the official head of the Roman religion, the chief priest (pontifex maximus). In the same year, Agrippa, too, died. Augustus compelled his widow, Julia, to marry Tiberius against both their wishes. During the next three years, however, Tiberius was away in the field, reducing Pannonia (Yugoslavia and Hungary) up to the middle Danube, while his brother Drusus crossed the Rhine frontier and invaded Germany as far as the Elbe, where he died in 9 BC. In the following year, Augustus lost another of his intimates, Maecenas, who had been the adviser of his early days and was an outstanding patron of letters.

Tiberius, who replaced Drusus in Germany, was elevated in 6 BC to a share in his stepfather's tribunician power. But shortly afterward he went into retirement on the island of Rhodes. This was attributed to jealousy of his stepnephew Gaius Caesar, who was introduced to public life with a great fanfare in the following year; and the same compliments were paid to his brother Lucius in 2 BC, the year in which Augustus received his climactic title "father of the country" (pater patriae). Gaius was sent to the East and Lucius to the West. Both, however, soon died. Tiberius returned home in 2, and in 4 Augustus adopted him as his son, who in turn was required to adopt Germanicus, the son of his

brother Drusus. The powers conferred upon Tiberius made him almost Augustus' own equal in everything except prestige.

Tiberius' next task was to consolidate the invasion and provincial organization of Germany (4-5). An invasion of Bohemia was planned and had already been launched from two directions when news came in 6 that Pannonia and Illyricum had revolted. It took three years for the rebellion to be put down; and this had only just been completed when Arminius raised the Germans against their Roman governor Varus and destroyed him and his three legions. As Augustus could not readily replace the troops, the annexation of western Germany and
Bohemia was postponed indefinitely; Tiberius and Germanicus were sent to consolidate the Rhine frontier.

Although Augustus was now feeling his age, these years in association with Tiberius were marked by administrative innovations: the annexation of Judaea in AD 6 (its client king Herod the Great had died 10 years previously); the establishment at Rome (in the same year) of a fire brigade with police duties, supplemented seven years later by a regular police force (cohortes urbanae); the
creation of a military treasury (aerarium militare) to defray soldiers' retirement bounties from taxes; and the conversion of the hitherto occasional appointment of prefect of the city (praefectus urbi) into a permanent office (AD 13). When, in the same year, the powers of Augustus were renewed for 10 years--such renewals had been granted at intervals throughout the reign--Tiberius was made his equal in every constitutional respect. In April, Augustus deposited his will at the House of the Vestals in Rome. It included a summary of the military and financial resources of the empire (breviarium totius imperii) and his political testament known as the "Res Gestae Divi Augusti" ("Achievements of the Divine Augustus"). The best preserved copy of the latter document is on the walls of the Temple of Rome and Augustus at Ankara, Turkey (the Monumentum Ancyranum). In 14 Tiberius was due to leave for Illyricum but was recalled by the news that
Augustus was gravely ill. He died on August 19, and on September 17 the Senate enrolled him among the gods of the Roman state. By that time Tiberius had succeeded him as the second Roman emperor, though the formalities involved in the succession proved embarrassing both to himself and to the Senate because the "principate" of Augustus had not, constitutionally speaking, been heritable or continuous. Like other emperors, Tiberius assumed the designation "Augustus" as an additional title of his own. Agrippa Postumus, who had been named his co-heir but was later banished, was put to death. The order to kill him may already have been given by Augustus, but this is not certain.

After Caracalla's capture of King Vagharshak and his attempt to annex the country in 216, his successor, Macrinus, recognized Vagharshak's son Tiridates II (Khosrow the Great in Armenian sources) as king of Armenia (217).

Tiridates II's resistance to the Sasanids after the fall of the Arsacid dynasty in Persia (224) ended in his assassination by their agent Anak the Parthian (c. 238) and in the conquest of Armenia by Shapur I, who placed his vassal Artavazd on the throne (252).

Carbry Liffechar was the 117th Monarch of Ireland (reigned 267-284). He composed a poem in relation to the Gaelic language. A stanza:

Sweet tongue of our druids and bards of past ages;
Sweet tongue of our monarchs, our saints and our sages;
Sweet tongue of our heroes, and free-born sires,
When we cease to preserve thee our glory expires.

He was so called from having been nursed by the side of the Liffey, the river on which Dublin is built. After a seventeen year reign, he was slain at the Battle of Gaura, in 284, by Simeon, the son of Ceirb, who came from the south of Leinster to this battle fought by the militia of Ireland, who were called the Fiana (or Fenions). Carbry's line had monarchs of Ireland and Kings of Ulster.

Notes for Marcus Livius Drusus (Tribune 91 BC):
Marco Livio Druso. Polktico romano nacido hacia I24 a. de J. C. Orador elocuente y politico avanzado, fué elegido tribuno de la plebe en el 9I a. de J. C. Presentó un proyecto de reformas legislativas amplias, que pretendkan restaurar las antiguas relaciones económicas entre las clases sociales romanas. Y de otra parte intentó atraerse a Roma a los latinos y a los italiotas. Los proyectos de Druso no pudieron realizarse, y tal vez murió en las revueltas producidas en Roma, si no se dió muerte al ver fracasados sus proyectos.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 1, Pg 553

Drusus, Marcus Livius (b. c. 124 BC--d. 91 BC), son of the tribune of 122 by the same name; as tribune in 91, Drusus made the last nonviolent civilian attempt to reform the government of republican Rome. Drusus began by proposing colonial and agrarian reform bills. He then introduced a judiciary law that probably specified that the law courts, then controlled by the equites, or cavalry, should be
impaneled jointly from senators and equites and that all jurors should be liable to prosecution for corruption.

By this compromise Drusus sought to reconcile the equestrian and senatorial orders, which had come into conflict after the trial by equites of an honest governor who had refused to allow extortion of his province by publicans (contractors or tax collectors). Neither order was satisfied with Drusus' proposal, however, and opposition from all sides increased when he pushed for the enfranchisement of the Italian allies. The Senate declared his legislation invalid on technical grounds. Disturbances involving Drusus' supporters among the allies increased, and the reformer was murdered. His assassin was never discovered.

Cormac Ulfhada (MacArt) was the 115th Monarch of Ireland (reigned 226 to 266) and was called Ulfhada because of his long beard.  He was the wisest, most learned , and best of any of the Milesian race before him that ruled the Kingdom.  He ordained several good laws, and wrote several learned treatises, among them one on "Kingly Government" directed to his son Carbry Liffechar which is extant and extraordinary.

He was very magnificent in his housekeeping and attendants, having always 1150 persons in his daily retinue, constantly attending at his Great Hall at Tara, which was 300 feet long, 30 cubits high and 50 cubits broad, with 14 doors in it. His daily service of plates, flagons and drinking cups were of gold, silver and precious stones and his tables ordinarily consisted of 150 pieces, besides dishes, etc., which were all pure silver or gold.  He ordained that ten choice persons should constantly attend him and his successors, monarchs of Ireland, and never be absent from him, viz.:  1) a nobleman to be his companion; 2) a judge to deliver and explain the laws of the country; 3) a historian to declare and preserve the geneologies, acts and occurrences of the nobility and gentry; 4) A druid or magician to offer sacrifice and presage good or bad omens as his learning, skill or knowledge would enable him; 5) a poet to praise or dispraise every one according to his good or bad actions; 6) a physician to administer physic to the King and Queen and the rest of the (royal) family; 7) a musician to compose music and sing pleasant sonnets in the King's presence when thereunto disposed; 8), 9) and 10) three stewards to govern the King's house. This custom was observed by all succeeding monarchs down to Brion Boromha, the 175th Monarch of Ireland and the 60th down from Cormac, without any alteration only that since they received the Christian Faith they changed the druid for a prelate in the church. He was to all mankind very just and so upright in his actions, judgements and laws, that God revealed unto him the light of his Faith seven years before his death.  From thence forward he refused his druids to worship their idol gods, and openly professed that he would no more worship any but the true God of the Universe, the Immortal and Invisible King of Ages.  Whereupon the druids sought and effected his destruction (God permitting it) by their adjurations of damned spirits, choking him as he sat at dinner eating of salmon, some say by the bone of the fish sticking in his throat, in 266, after a reign of 40 years.

Cormac married Eithne Ollamhgha, daughter of Dunlang, King of Leinster, son of Eana Niadh.  He died at Cleitoch, on the Boyne River.  Before his death he gave directions that, instead of at Burgh, a famous burial place of the Irish pre-Christian kings, he should be buried at Ross-Na-Ri, near Sloane, both in the County of Meath, and that his face should be toward the East, through respect for the Saviour of the World, whom he knew to have been born and crucified.

Notes for TiberiusSempronius Gracchus, Tribune:
[Claudia.FTW]

Gracchus, Tiberius Sempronius (b. 169-164 BC?--d. June 133 BC, Rome), Roman tribune (133 BC) who sponsored agrarian reforms to restore the class of small independent farmers and who was assassinated in a riot sparked by his senatorial opponents. His brother was Gaius Sempronius Gracchus.

Born into an aristocratic Roman family, Tiberius Sempronius was heir to a nexus of political connections with other leading families--most notably with the Cornelii Scipiones, the most continuously successful of the great Roman houses--through his mother, Cornelia, daughter of the conqueror of Hannibal, and through his sister Sempronia, wife of Scipio Aemilianus, the destroyer of Carthage. He was equally associated with the great rivals of the Scipios, the Claudii Pulchri,
through Tiberius' wife, Claudia, daughter of Appius Claudius Pulcher, the contemporary head of the house.

He was educated in the new Greek enlightenment that had been adopted by the more liberal families after the Roman conquest of the Hellenistic kingdoms, and this gave form and clarity to his natural talent for public speaking. The Stoic teacher Blossius had special influence with Tiberius, but the central Stoic doctrine of duty merely enhanced his natural determination and obstinacy. Other Greek associates may have instructed him in the democratic theory that later coloured his speeches.

As a Roman aristocrat, Tiberius began a normal military career, serving as a junior officer with distinction under Scipio Aemilianus in the war with Carthage (147-146 BC), and in due course went as quaestor, or paymaster, with the consul Mancinus to the protracted colonial warfare in Spain (137 BC). There his personal integrity and family reputation enabled him to save a Roman army from total destruction at Numantia by an honourable compact with the Spanish tribesmen.

But, at the insistence of Aemilianus, the agreement was disavowed by the Senate at Rome, and Mancinus, the defeated consul, though not his staff and his troops, was returned to his captors. This setback alienated Tiberius from the Scipionic faction in the Senate and drew him closer to his Claudian friends.

His military experience had shown him the latent weakness of Rome. Its manpower was stretched to the limit to maintain its hegemony over the Mediterranean world, while its sources in Italy were beginning to contract. The primitive subsistence economy that in past centuries had nourished a large population of poor peasants was being eroded by new factors, notably the development of large estates owned by magnates enriched in the imperialist wars and devoted to cash crops worked by slaves and day labourers. The landowning peasantry, who alone were thought useful for military service, were declining in numbers, while the landless citizenry were increasing.

Tiberius sought a solution of the manpower problem in a large-scale revival of the traditional Roman policy, abandoned only in the last 30 years, of settling landless men on the extensive public lands acquired by the Roman state during the former conquest of Italy. Much of this land had fallen irregularly but effectively into the hands of the Roman gentry, who regarded it wrongly as their private property. Tiberius, with the support of a small but powerful group of consular senators, primarily of the Claudian faction, who shared his concern and also looked for political advantage from sponsoring such a scheme, concocted a bill for the redistribution of the public lands to landless labourers in plots of viable size. The novelty lay only in the scale of the scheme, which was not limited to a defined area of land or number of persons, and in the institution of a permanent executive of land commissioners. Opposition from vested interests was certain, but Tiberius hoped to pacify it by a generous provision allowing the great occupiers of public land to retain large portions in private ownership.

To implement this measure Tiberius secured the legislative office of tribune, for 133 BC, which was not an essential part of a senatorial career. Tribunes at this period normally legislated in the People's Assembly on the advice of the Senate, but more than once in recent years tribunes had passed reformist measures without senatorial approval. Tiberius in 133 had the support of the sole consul in Rome--Publius Mucius Scaevola, who had helped to draft the agrarian bill--and of
several other leading senators, mostly of the Claudian faction, whose authority could be expected to deflate opposition while hordes of peasants flocked to Rome to use their votes. When, after lengthy public debate, the bill was presented to the voters, the tribune Octavius used his right of veto to stop the proceedings in the interest of the great occupiers. When he refused to give way, Tiberius vainly sought belated approval from the Senate. That should have been the end of the matter, but Tiberius, convinced of the necessity of his bill, devised a novel method of bypassing the veto: a vote of the Assembly removed Octavius from office, contrary to all precedent. The bill was then passed. But the deposition of Octavius alienated many of Tiberius' supporters, who saw that it undermined the authority of the tribunate itself; they rejected the unfamiliar

justification, devised by Tiberius, that tribunes who resisted the will of the people ceased to be tribunes.

Fresh complications arose from the lack of financial provision in the agrarian law for the equipment of the new landholders. Tiberius expected the Senate to make the traditional allocation of funds, but Scipio Nasica, an elderly senator from the Scipionic faction, succeeded in limiting these to a derisory sum. Tiberius countered by a second outrageous proposal, of which he failed to see the implication. The King of Pergamum, a city in Anatolia, on his death in 134 had bequeathed his fortune and his kingdom to the Roman state. Tiberius by a fresh bill claimed these monies in the name of the people and assigned them to the land commissioners, thus interfering with the Senate's traditional control of public finance and foreign affairs. The storm over Tiberius' methods continued to rage. He was threatened with prosecution after the end of his tribunate, when he
would have no formal means of protecting his law and would be liable to prosecution before the Centuriate Assembly, in which the wealthier classes had a voting advantage. The charge would have been violation of the immunity of the tribune Octavius.

Lacking the self-assurance to realize that the people were unlikely either to repeal the agrarian law or to pass sentence against its champion, Tiberius sought refuge in yet another impropriety. He proposed to stand for election to a second tribunate in 132, although reelection had not been practiced for 300 years and was widely believed to have been barred by an ambiguous statute. In the Senate the embittered opposition, again led by Nasica, tried to induce the consul Scaevola to stop the elections by force. Scaevola replied evasively that he would see that nothing illegal was done. Meanwhile, in the Assembly, Tiberius and the other tribunes were at loggerheads over the conduct of the election. An abortive vote had shown that the success of Tiberius was assured if only the election could be completed. He expected no violence and made no preparations against it. Enraged by the attitude of the Consul, Nasica and his associates stormed out of the Senate, equally unarmed. Seizing sticks and staves they precipitated a riot. It may well have begun as an attempt to disperse the electoral meeting, but it ended with the clubbing to death of Tiberius and the indiscriminate killing of some scores of citizens.

The political fault lay with Tiberius. After presentation of the agrarian bill, he failed to act in prudent collaboration with his senatorial supporters, and he added to his troubles by dubious initiatives that were bound to offend the bulk of senatorial opinion. So Scaevola and the others abandoned him and effected a compromise. The Senate recommended that the land commission continue, and, though in 132 it set up a political court that punished many of the lesser followers of Tiberius, it also encouraged Nasica, who barely escaped prosecution, to leave Italy.

Notes for Julius Caesar, Dictator Of Rome:
César, Cayo Julio (100-44a.C.), general y político romano, creó los cimientos del futuro sistema imperial romano al final de la República.
La primera etapa de su vida
Nacido en Roma el 12 o 13 de julio del año 100a.C., perteneció a la prestigiosa familia Julia; desde su más tierna infancia conoció la polémica política. Su tío fue Cayo Mario, líder de los populares. Este partido apoyó reformas agrarias contra las que estaban los reaccionarios optimates, una fracción senatorial. En su último año como cónsul, Mario provocó muchas bajas entre los optimates, al mismo tiempo que nombraba al joven César flamen dialis, uno de los arcaicos sacerdocios sin poder. Esto lo identificó con la política extremista de su tío, y su matrimonio en el 84a.C. con Cornelia, la hija del socio de Mario, Cinna, reafirmó su confirmación como radical. Cuando Lucio Cornelio Sila, líder de los optimates, fue nombrado dictador en el 82a.C., publicó una lista de adversarios para ser ejecutados. Aunque César no resultó perjudicado, Sila le ordenó que se divorciara de Cornelia.

Negándose a cumplir esa orden, creyó prudente salir de Roma. No regresó a la ciudad hasta el 78a.C., tras la dimisión de Sila. César tenía entonces 22 años. Incapaz de obtener un cargo, dejó Roma de nuevo y se fue a Rodas, donde estudió retórica; regresó a Roma en el 73a.C., convertido en un orador muy persuasivo. El año anterior, mientras estaba en Rodas, había sido elegido para el Pontificado, un importante colegio de sacerdotes romanos.

## El triunvirato

En el año 71a.C. Pompeyo Magno, que se había hecho acreedor de su epíteto sirviendo bajo el mando de Sila, regresó a Roma, tras derrotar a Quinto Sertorio, el general de los rebeldes populares, en Hispania. Ese mismo año, Marco Licinio Craso, patricio acaudalado, reprimió la sublevación de esclavos dirigida por Espartaco en Italia. Tanto Pompeyo como Craso obtuvieron el consulado en el 70a.C. Pompeyo, quien para entonces había cambiado de bando, era técnicamente inadecuado, pero con la ayuda de César obtuvo el cargo. En el 69a.C., César fue elegido cuestor y en el 65a.C. edil curul, cargo en el que obtuvo gran popularidad con sus generosos juegos de gladiadores. Para pagarlos, pidió dinero prestado a Craso. Esto unió a los dos hombres, quienes también hicieron causa común con Pompeyo. Cuando César regresó a Roma en el 60a.C., después de un año como gobernador de Hispania, se unió a Craso y Pompeyo para formar el primer triunvirato; con el fin de fortalecer aun más su relación, Pompeyo se casó con la hija de César, Julia. Con la ayuda de esta alianza, César fue elegido cónsul en el 59a.C. a pesar de la hostilidad optimate, y en el 58a.C. se le nombró gobernador de la Galia. Durante los siete años siguientes dirigió las campañas conocidas como las guerras de las Galias, al final de las cuales el poder romano se estableció sobre el centro y norte de Europa, al oeste del río Rin.

## El juego del poder

Mientras César estaba en las Galias, sus agentes intentaron dominar la política en Roma. Sin embargo, esto amenazó la posición de Pompeyo y fue necesario que los triunviros se reunieran en Lucca en el 56a.C., tras lo cual se reconciliaron. Se decidió que César podía continuar en las Galias otros cinco años, mientras Pompeyo y Craso podían ser cónsules en el 55a.C.; después de esa fecha, los triunviros tendrían poder proconsular sobre sus respectivas provincias. César se marchó para reprimir una sublevación en las Galias y dirigir una expedición a Britania. Cuando llegó a Britania se supone que dijo "veni, vidi, vinci" ("llegué, vi y vencí"). Craso, siempre ansioso de gloria militar, se marchó a su cargo en Siria. Después de entrar en guerra con Partia, fue derrotado y muerto en Carres en el 53a.C. Esto aumentó las diferencias entre César y Pompeyo, cuyos lazos familiares se habían roto con la muerte de Julia en el 54a.C.

## La guerra civil

En el año 52a.C., tras el fallecimiento de Craso, Pompeyo fue nombrado único cónsul. Este cargo, combinado con sus otros poderes, lo situó en una posición privilegiada. Celoso de sus jóvenes rivales, decidió acabar con el poder de César, un objetivo que no podía realizar sin antes quitarle el mando de las Galias. Para protegerse, César sugirió que él y Pompeyo renunciaran a sus mandos simultáneamente, pero esto fue rechazado; incitado por Pompeyo, el Senado pidió a César que renunciara a su mando y disolviera su ejército o sería considerado enemigo público. Los tribunos, que eran agentes de César, vetaron esta moción, pero fueron expulsados del Senado. Entonces éste confió a Pompeyo la seguridad del Estado. Sus fuerzas, muy superiores en número a las de César, estaban dispersas por todas las provincias y sus tropas de la península Itálica no estaban preparadas para la guerra. A principios del año 49a.C. César cruzó el Rubicón, un pequeño río que separaba su provincia gala cisalpina de Italia y se dirigió rápidamente hacia el sur. Pompeyo huyó a Brundisium (la actual Brindisi) y desde allí a Grecia. En el periodo de tres meses, César controló toda la península Itálica y sus fuerzas tomaron Hispania y el puerto clave de Massilia (la actual Marsella, en Francia).

En Roma, César se convirtió en dictador hasta ser elegido cónsul en el 48a.C. A principios de ese año llegó a Grecia y destruyó las fuerzas de Pompeyo en Farsalia. Éste huyó a Egipto, donde fue asesinado. Cuando César visitó Egipto, instaló a Cleopatra, hija del fallecido rey Tolomeo XII, como reina. En el 47a.C. sometió a Asia Menor y regresó a Roma como dictador. Aproximadamente en el 48a.C. todas las fuerzas optimates habían sido derrotadas y el mundo mediterráneo pacificado.

Dictadura y asesinato

La base del poder de César era su posición de dictador 'vitalicio'. Según la constitución tradicional republicana este cargo sólo podía desempeñarse durante seis meses en una situación de gravedad extrema. Sin embargo, esa regla se había roto incluso antes de César. Sila había gobernado como dictador durante varios años y César siguió este precedente. También fue nombrado cónsul por diez años en el año 45a.C. (en el mismo año en que derrotó, en la península Ibérica, a los hijos de Pompeyo Magno en la batalla de Munda) y recibió la inviolabilidad de los tribunos. Además obtuvo honores que incrementaron su prestigio. Vistió la toga, la corona y el cetro de un general triunfante y usó el título de imperator. Es más, como sumo sacerdote, fue jefe de la religión del Estado, pero sobre todo tenía el mando de todos los ejércitos, lo cual continuó siendo la principal fuente de su poder.

César estableció un programa de reformas muy variado. En las provincias eliminó el corrupto sistema de impuestos, patrocinó el establecimiento de colonias de veteranos y amplió la ciudadanía romana. En la metrópoli reorganizó las asambleas e incrementó

el número de senadores. Su reforma del calendario dio a Roma un medio racional para registrar el tiempo.
Sin embargo, varias familias senatoriales sentían que César amenazaba sus posiciones; el honor y los poderes de César les hacían temer que éste quisiera ser rex (rey), un título que, como republicanos, odiaban. En el año 44a.C., un grupo de senadores, entre ellos Cayo Casio y Marco Junio Bruto, conspiraron para llevar a cabo su asesinato. En los idus (el 15) de marzo del 44a.C., cuando César entró en el Senado, el grupo lo asesinó.
Vida íntima
Después de la muerte de la primera esposa de César, Cornelia, en el 68a.C., se casó con Pompeya, nieta de Sila. Cuando los misterios de la Bona Dea, presididos por ella, fueron violados, fue difamada por las habladurías y César se divorció, arguyendo ante el Senado que su esposa debía estar por encima de toda sospecha (no sólo debía ser honrada, sino parecerlo). Su siguiente matrimonio (59a.C.) lo llevó a cabo con Calpurnia y se debió a motivos políticos. Al no tener César herederos varones, en su testamento estableció la condición de que su sobrino nieto, Octavio, se convirtiera en su sucesor. Octavio fue el primer emperador de Roma con el nombre de Augusto.
César fue un escritor de talento, con un estilo claro y sencillo. Sus Comentarios sobre la guerra de las Galias (De bello gallico), en los cuales describe las Galias y sus campañas gálicas, son unas de las principales fuentes de información sobre las primeras tribus celtas y germanas.
Logros
La opinión de los eruditos sobre los logros de César está dividida. Algunos le consideran un tirano sin escrúpulos, con un insaciable apego al poder, y le culpan de la desaparición de la República de Roma. Otros admiten que pudo ser cruel, pero insisten en que la República ya estaba destruida. Mantienen que para salvar el mundo romano del caos debía crearse una nueva clase de gobierno. En realidad, las reformas de César dieron estabilidad al mundo mediterráneo. También fue un general excepcional, que inspiró lealtad a sus soldados. En tanto que una de las figuras más notables del mundo antiguo, fue el tema de muchas obras literarias y biográficas, incluido el drama Julio César (c.1599) del inglés William Shakespeare.

Notes for Art Eanfhear The Melancholy, King:
[F.M.M..FTW]

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]

According to Keating's History of Ireland, the epithet "eanfhear" applied to this Art means "The Solitary," because he was the only one of his father's sons that survived; his two brothers Conla Ruadh and Crionna having been slain by their uncles. His grief on account of that fact was so intense that in old writings he is often called "Art, The Melancholy." This Art's descendants gave kings to Connaught, Meath and Orgiall, kings or princes to Clanaboy, Tirconnell and Tirowen; and with only two exceptions monarchs to Ireland up to the Anglo-Norman invasion. From this Art also descended the kings of Scotland from Fergus Mor Mac Earca, in the fifth century, down to the Stuarts. He was the 112th Monarch of Ireland (reigned 165-195). He had three sisters, one of whom Sarah was the wife of Conaire Mac Mogha Laimhe, the 111th Monarch of Ireland, by whom she had Caibre (Carbry) Riada, a quo Dalriada in Scotland; and another sister Tabiria married Olioll Olum, King of Munster.

The Monarch Art, after a reign of thirty years, fell at the battle of Magh Mucroimbe in County Galway, while riding with his brother-in-law Olioll Olum against Maccon in 195. He married Meadhbh Leathdearg, daughter of Conann Cualann. From this Queen the Rath Meadh near Tara obtained its name.

Notes for TiberiusSempronius Gracchus, Praetor:
Tiberio Semprornio Graco. Elegido tribuno de la plebe, tuvo, en I8I a. de J. C., la nobleza de defender a Publio y Lucio Escipión, a los que Catón habka hecho acusar de haber vendido la paz al rey de Siria; se opuso también a que se les condenase en ausencia. El primer Africano, agradecido a Sempronio, le casó con su hija.
Marchó éste en I85 con una embajada a Macedonia y en I 80 fué nombrado pretor de la Espana Citerior, que estaba levantada en armas. Penenetró hasta el corazón de la Celtiberia, apoderindose de treseientos pueblos, y cuando los enemigos se dieron por vencidos, ajustó la paz en condiciones nada duras para ellos; a fin de atraerles a la civilización romana, fundó varias ciudades y les concedió leyes justas, con lo cual se conquistó el respeto y el afecto de los

espanolrs. A su vuelta de Roma se le otorgaron los honores triunfales; En 177 llegó al consulado con Claudio Pulcher y se encargó de dominar el levantamiento de Córcega y Cerdena. Pronto logró reducir a los corsos, pero los sardos se resistieron bravamente, perdiendo 27.000 hombres en la lucha, por lo que Sempronio les trató con dureza, vendiendo tantos como esclavos, que quedó como proverbio la frase de "sardos en venta" para indicar lo que se vendka a bajo precio.
Ejerció luego la Censura con extraordinario tacto, asi como otras dos embajadas a Asia y a Roma. De Cornelia, la hija de Escipión, a la que amaba mucho, tuvo doce hijos, de que sólo se lograron tres a los que dió la mis selecta educación Ella encarnaba las virtudes de la matrona romana y era mujer muy ilustrada, sus cualidades le atraian el respeto de todos, aunque no parece fuese extrana a la muerte de su yerno Escipión el Joven, replesentante de la aristocracia y enemigo polktico de sus hijos.
Sempronio era un hombre culto y refinado y -buen orador- conocka el griego a la perfección, tanto que pronunció discursos en esta lengua.

Notes for Cornelia:
[Claudia.FTW]

Cornelia (c.189-c.110a.C.), matrona romana, hija del general Escipión el Africano. Cornelia se casó con el general y polktico Tiberio Sempronio Graco; después de la muerte de su esposo (153a.C.), se negó a casarse de nuevo y se dedicó a educar a sus hijos. Segsn la leyenda, cuando un visitante le pedka ver sus joyas, senalaba a sus hijos y contestaba, "éstas son mis joyas". Sólo tres de sus doce hijos llegaron a la edad adulta: Cayo Sempronio Graco y Tiberio Sempronio Graco, los grandes tribunos conocidos como los Gracos, y una hija, que se casó con el general romano Publio Cornelio Escipión. Después del asesinato de Cayo (121a.C.), Cornelia se retiró a Misenum (actualmente Miseno, en Italia) para estudiar griego y literatura latina.

---
Cornelia (fl. 2nd century BC), highly cultured mother of the late 2nd-century BC Roman reformers Tiberius and Gaius Sempronius Gracchus.

She was the second daughter of Publius Cornelius Scipio Africanus Major, the hero of the Second Punic War (Rome against Carthage, 218-201). Cornelia married Tiberius Sempronius Gracchus and bore him 12 children. In addition to the two Gracchi brothers, the only child to reach maturity was Sempronia, who married Scipio Aemilianus.

After the death of her husband in 154, Cornelia remained unmarried, refusing even the hand of Ptolemy VIII Euergetes of Egypt. She devoted herself entirely to the education of her surviving sons. Although hostile propaganda later

suggested that Cornelia had encouraged her sons to initiate "radical" reforms, other stories suggest that she exercised a restraining influence over them. After Gaius' murder in 121 she retired to Misenum (now Miseno, Italy). Cicero applauded her letters for the beauty of their style; the two fragments preserved in the manuscripts of Cornelius Nepos (1st century BC) may not be genuine.

Notes for Appius Claudius Pulcher:
Apio Claudio Pulcro. Consul en I43 antes de J. C. Fué rival de su contemporineo
Escipión Emiliano. Prkncipe del Senado y censor en I37. Fué elogiado como orador por Cicerón. Su hija Claudia fué esposa de Tiberio Graco. Después de haber sido derrotado una vez por los salesios, consiguió derrotarlos por completo, y, vuelto a Roma, quiso a la fuerza obtener el triunfo. Murió en I 33.

Claudius Pulcher, Appius (d. c. 130 BC), Roman politician, father-in-law of the agrarian reformer Tiberius Sempronius Gracchus. Claudius served on the Gracchan land commission from 133 until his death. He was consul in 143 and censor in 136. His prestige as princeps senatus ("senior senator") enabled him to provide powerful support for Gracchus' cause and to escape the violence that in 133 destroyed the reformer and many of his followers.

Notes for King Of the Franks Farabert:
Westphalia, German WESTFALEN, historic region of northwestern Germany, comprising (with the former state of Lippe) the present federal Land (state) of North Rhine-Westphalia and parts of the Länder (states) of Lower Saxony and Hesse.

The ancient Saxons were divided into three main groups: the Westphalians, the Angrians (German: Engern), and the Eastphalians (Ostfalen). The Westphalians, who had settled in the area of the Ems and Hunte rivers about AD 700, spread south almost as far as Cologne and in 775 resisted the advance of the Franks under Charlemagne. For about three centuries, this region retained its separate identity in spite of the rise of the more powerful aggregated Saxon stem duchy. In the 12th century the old distinction between Westphalians and Angrians fell into disuse, and all Saxony west of the Weser River came to be called Westphalia.

---

Saxon, member of a Germanic people who in ancient times lived in the area of modern Schleswig and along the Baltic coast. The period of Roman decline in the West was marked by vigorous Saxon piracy in the North Sea. During the early part of the 5th century AD, the Saxons spread rapidly through north Germany and along the coasts of Gaul and Britain. The coastal stretch from the Elbe to the Scheldt rivers, however, was held by the Frisians, on whom the Saxons had great influence.

The expansion of the Saxons brought collision with the Franks. In 772 the Frankish ruler Charlemagne decided on a campaign of conquest and conversion of the Saxons. With interruptions, the Saxon wars lasted 32 years and ended with the incorporation of the Saxons into the Frankish empire.

The Venerable Bede (in Historia ecclesiastica) described the Germanic invaders of Britain as Angles, Saxons, and Jutes and said that the East, West, and South Saxons (of Essex, Wessex, and Sussex) were descended from the Saxons. However, Bede was not always careful to distinguish Angles and Saxons; and, furthermore, all the invaders of Britain were closely related and spoke dialects similar to each other and to the Frisian language. The dialects of the continental
Saxons, on the other hand, underwent considerable approximation to High German, and their affinity to those of the English and the Frisians is only to be traced in sporadic spellings in texts now extant, of which none is older than the 9th century. When Procopius (Gothic Wars, c. 550) alleged that the inhabitants of Britain were Britons, Angles, and Frisians, he was no doubt confusing

Frisians and Saxons, owing to their close relationship and to the extensive Saxon
settlements among the Frisians.

Conn Ceadcatha (or Conn of the Hundred Battles), so called from hundreds of battles that he fought and won. He was the 110th Monarch, succeeded in 123-157, and reigned thirty-five years, but was at length barbarously slain by Tireach in Tara in 157, when Conn chanced to be alone and unattended by his guards. The assassins were fifty ruffians disguised as women, whom the King of Ulster employed for the purpose.

Conn CÉTCHATHACH (Irish), English CONN OF THE HUNDRED BATTLES (fl. 2nd century AD), in Irish tradition, the first of a line of Irish kings that survived into the 11th century. He is said to have ruled a kingdom covering most of the northern half of the island.

Because Conn's exploits are recorded only in heroic sagas, some historians regard him as a poetical invention. Others point to the use of the Gaelic phrase Leth Cuinn ("Conn's Half") as proof that he was a historical figure who held

sway over Ireland north of present Dublin. According to these scholars, his power was concentrated in Meath (in east-central Ireland) and Connaught. Evidently he failed to win the allegiance of southern Ireland, which was ruled by Eóghan (or Mog Nuadat) and called Leth Moga ("Mog's Half"). In Irish genealogy Conn is held to be the ancestor of Niall of the Nine Hostages (reigned 379-405), who founded the Uk Néill, the greatest dynasty in Irish history.

Notes for Carbry Riada, King:
[F.M.M..FTW]

Carbry Riada was the first King of Dalriada (Dal-Riada: in Irish meant Riada's share or portion) in Scotland. "One of the most noted facts in ancient Irish and British history," writes Dr. Joyce, "is the migration of colonies from the north of Ireland to the neighboring coasts of Scotland, and the intimate intercourse that in consequence existed in early ages between the two countries. The first regular settlement mentioned by our historian was made in the latter part of the second century by Caubre Riada, son of Condry, King of Ireland. This expedition, which is mentioned in most of our annals, is confirmed by Bede in the following words: 'In course of time Britain, beside the Britons and Picts, received a third nation, Scotia, which issued from Hiberia under the leadership of Riada and secured for themselves either by friendship or sword, settlements among the Picts which they still possess. From the name of their commander they are still called Dalrendidi.' There were other colonies, also, the most remarkable of which was that led by Fergus, Angus and Loarn, the three sons of Princess Eorca (daughter of Loarn, the last King of Dalriada) which laid the foundation of the Scottish Monarchy. The country colonized by these emigrants was known by the name of Airen Gaedhil, i.e., the territory of the Gall or Irish; and the name is still applied to the territory in the shortened form of Argyle."

Argyll,

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]
---
---
Argyll, also called ARGYLLSHIRE, Gaelic EARRAGHAIDHEAL ("Coastland of the Gael"), former county, western Scotland, since the reorganization of 1975 largely in Argyll and Bute (q.v.) district, of Strathclyde (q.v.) region.

In the 2nd century AD Argyll was invaded by Scots (Celts) who came from Ireland, then known as Scotia. The earliest Celtic settlement is assigned to the 3rd century, when a victorious chief, Cairbre Riada, occupied lands in the area later known as Mid Argyll. These lands, called Dalriada, were reinforced from time to time by new bands of immigrants from Celtic Ireland. Dalriada developed gradually as an independent kingdom under ambitious rulers and maintained a separate existence until 843, when one of them, Kenneth I MacAlpin, united the men of Dalriada with the Picts of central Scotland and founded
a new hybrid kingdom from which Scotland ultimately emerged. Later, Norsemen obtained control and held sway until 1266, when Argyll was added to the Scottish kingdom. Prior to this, however, semi-independent chiefs of mixed Celtic and Norse ancestry acquired power in Argyll and the Western Isles. One of them, Somerled, really the first lord of the Isles, was killed near Renfrew in 1164 on an expedition against the Scottish king, but the lordship of the Isles was held by his descendants
until 1493, when John, the last MacDonald lord of the Isles, was deprived of his vast estates by King James IV. The Campbells of Lochow (now Lochawe) rose on the ruin of the MacDonalds, and their chiefs became earls of Argyll. The combined prominence of the 9 Campbell earls of Argyll in Scottish history and the subsequent 11 dukes of Argyll in the history of Great Britain is perhaps unsurpassed by any other single noble British family.

The failure of the second Jacobite rising (1745), in which the people of Argyll with few exceptions fought for the Hanoverian George II and against the Stuart pretender, was followed by important political and economic changes. The abolition of the heritable jurisdictions in 1747, prior to which Highland lords and chiefs had been petty kings over their tenants and followers, led to the development of new relationships. The rents of tenants became of greater importance to their masters than the former
friendly loyalties. Sentimental ties were broken, and the small farms and holdings that had supported large numbers of occupants on a meagre scale of subsistence had to give way to larger farms stocked with flocks of sheep, immediately but only temporarily more profitable to their owners. Throughout the Highlands, including Argyll, thousands of small tenants were displaced.

In religious history, St. Columba and other Celtic Irish missionaries from Iona spread the Gospel throughout the kingdom of Dalriada in the 6th century. During the first Scottish Reformation (1560), the 5th Earl of Argyll played a prominent part as the most influential Protestant layman in Scotland. In subsequent conflicts between episcopacy and presbyterianism, the latter

prevailed and is still the most common form of church government in the Argyll region.

Notes for PubliusCornelius Scipio Africanus, General:
Escipión el Africano, Publio Cornelio (c.234-183a.C.), general romano, héroe de la segunda Guerra Psnica entre Cartago y Roma. En el 210a.C., después de servir en las legiones romanas enviadas contra el general cartaginés Ankbal en el norte de Italia, Escipión obtuvo el mando de los ejércitos romanos en Hispania con el tktulo de procónsul. Llegó allk en el 209a.C., dirigió un ataque sorpresa contra el cuartel general del Ejército cartaginés en Cartago Nova (ahora Cartagena), perdiendo los cartagineses su principal base de aprovisionamientos. En el 208a.C. expulsó al general cartaginés Asdrsbal Barca de Hispania, tras obtener la momentinea adhesión de algunos jefes militares indkgenas, como Indkbil y Mandonio, pero no pudo impedir que aquél cruzara los Pirineos para ayudar a su hermano Ankbal en el 207a.C. Escipión regresó triunfal a Roma en el 205a.C., tras conquistar la Hispania meridional, incluida Gades (la actual Cidiz), y le eligieron cónsul. Entre el 204 y el 203a.C., dirigió la invasión del norte de Ifrica, derrotando a los cartagineses en Campi Magni (región situada en la orilla de actual rko Medjerda, en Tsnez). Ankbal recibió ordenes de dejar Italia, pero Escipión obtuvo frente a él una victoria decisiva en la batalla de Zama en el 202a.C. Este triunfo, que terminó con la segunda Guerra Psnica, le proporcionó el tktulo honorkfico de Africano.
En el 190a.C., Escipión se convirtió en legado de su hermano, el cónsul de la provincia de Asia Lucio Cornelio Escipión (conocido como el Asiitico), en la guerra contra el rey Seléucida Antkoco III, a quien aplastaron en la gran victoria romana de Magnesia del Skpilo, en Asia Menor. Al regresar a Roma, su enemigo Marco Porcio Catón (Catón el Viejo) le acusó de aceptar sobornos de Antkoco. Fue absuelto de las acusaciones, pero se retiró de la vida psblica para vivir en su villa en Liternum (Campania). Escipión el Africano es considerado el general romano mis importante anterior a Julio César.

Scipio Africanus THE ELDER, Latin SCIPIO AFRICANUS MAJOR, in full PUBLIUS CORNELIUS SCIPIO AFRICANUS (b. 236 BC--d. 184/183, Liternum,

Campania [now Patria, Italy]), Roman general noted for his victory over the Carthaginian leader Hannibal in the great Battle of Zama (202 BC), ending the Second Punic War. For his victory he won the surname Africanus (201 BC).

Family background.

Publius Scipio was born into one of the great patrician families in Rome; his father, grandfather, and great-grandfather had all been consuls in their day. In 218 BC Scipio's father, also named Publius, held the consulship in one of the most critical years of Rome's history. While with him during a cavalry engagement on the Ticinus, the young Scipio made his first appearance in history: seeing his father wounded and cut off by the enemy, he charged forward and saved him. This anecdote is recorded by the historian Polybius on the authority of Scipio's friend Laelius, and it may well be true.

Of Scipio's boyhood or the date of his marriage to Aemilia, daughter of Aemilius Paullus, consul of 216 who fell at Cannae, nothing is known. He had two sons: Publius, who was debarred by ill health from a public career and who adopted Scipio Africanus the Younger; and Lucius, who became praetor in 174. Scipio's physical appearance is shown on some coins minted at Carthago Nova (Cartagena)--which almost certainly bear his portrait--and also probably on a signet ring found near Naples.

Military career

Scipio served as a military tribune at the disastrous Battle of Cannae in 216. He escaped after the defeat to Canusium, where some 4,000 survivors rallied; there he boldly thwarted a plot of some fainthearts to desert Rome. Then in 213 he returned to a civilian career by winning the curule aedileship; the story is told that when the tribunes objected to his candidature because he was under the legal age, he replied "If all the Roman people want to make me aedile, I am old enough." Soon family and national disaster followed: his father and uncle were defeated and killed in Spain, where the Carthaginians swept forward to the line of the Ebro (211).

In 210 the Romans decided to send reinforcements to Spain, but it is said that no senior general would undertake the task and that young Scipio offered himself as a candidate; at any rate, the Roman people decided to invest him with a command there, although he was technically a privatus (not a magistrate). This grant by the people, to a man who had not been praetor or consul, of a military command outside Italy created an important constitutional precedent. Thus
Scipio was given the chance to avenge his father's death in Spain, where he hoped not merely to hold the Carthaginian armies at bay and prevent them sending reinforcements to Hannibal in Italy but to resume his father's offensive policy, to turn back the tide of war, and to drive the enemy out of the peninsula. Such a task must have seemed fantastic in 210, but Scipio had the confidence and ability; it was achieved in the next four years.

From his headquarters at Tarraco (Tarragona) in 209, Scipio suddenly launched a combined military and naval assault on the enemy's headquarters at Carthago Nova, knowing that all three enemy armies in Spain were at least 10 days distant from the city. Helped by a lowering of the water in a lagoon, which exposed the northern wall, he successfully stormed the city. This tidal phenomenon, attributed to the help of Neptune, was perhaps caused by a sudden wind; at any
rate, it increased the troops' belief in their commander's divine support. In Carthago Nova he gained stores and supplies, Spanish hostages, the local silver mines, a splendid harbour, and a base for an advance farther south.

After training his army in new tactics, he defeated the Carthaginian commander Hasdrubal Barca at Baecula (Bailen) in Baetica (208); whereas normally the two rear ranks of a Roman army closely supported the front line, Scipio in this battle, under a screen of light troops, divided his main forces, which fell upon the enemy's flanks. When Hasdrubal broke away, ultimately to join his brother Hannibal in Italy, Scipio wisely declined the impossible task of trying to stop him and decided rather to accomplish his mission in Spain--the defeat of the other two Carthaginian armies still there. This he brilliantly achieved in 206 at a battle at Ilipa (Alcali del Rko, near Seville), where he held the enemy's main forces while the wings outflanked them. He then secured Gades (Cidiz), thus making Roman control of Spain complete.

Elected consul for 205, Scipio boldly determined to disregard Hannibal in Italy and to strike at Africa. Having beaten down political opposition in the Senate, he crossed to Sicily with an army consisting partly of volunteers. While preparing his troops, he boldly snatched Locri Epizephyrii in the toe of Italy from Hannibal's grasp, though the subsequent misconduct of Pleminius, the man he left in command of the town, gave Scipio's political opponents cause to criticize him. In 204 he landed with perhaps 35,000 men in Africa, where he besieged Utica. Early in 203 he burned the camps of Hasdrubal (son of Gisgo) and his Numidian ally Syphax. Then, sweeping down on the forces that the enemy was trying to muster at the Great Plains on the upper Bagradas (modern Suq al Khamis, on the Majardah in Tunisia), he smashed that army by a double outflanking movement.

Battle of Zama.

After his capture of Tunis, the Carthaginians sought peace terms, but Hannibal's subsequent return to Africa led to their renewing the war in 202. Scipio advanced southwestward to join the Numidian prince Masinissa, who was bringing his invaluable cavalry to his support. Then he turned eastward to face Hannibal at the Battle of Zama; his outflanking tactics failed against the master from whom he had learned them, but the issue was decided when the Roman and Numidian
cavalry, having broken off their pursuit of the Punic horsemen, fell on the rear of Hannibal's army. Victory was complete, and the long war ended; Scipio granted comparatively lenient terms to Carthage. In honour of his victory he was named Africanus.

Late years.

In 199 Scipio was censor and became princeps Senatus (the titular head of the Senate). Though he vigorously supported a philhellenic policy, he argued during his second consulship (194) against a complete Roman evacuation of Greece after the ejection of Philip V of Macedonia, fearing that Antiochus III of Syria would invade it; his fear was premature but not unfounded. In 193 he served on an embassy to Africa and perhaps also to the East. After Antiochus had advanced into Greece and had been thrown out by a Roman army, Scipio's brother Lucius was given the command against him, Publius serving as his legate (190); together the brothers crossed to Asia, but Publius was too ill to take a personal part in Lucius' victory over Antiochus at Magnesia (for which Lucius took the name Asiagenus).

Meantime, in Rome, Scipio's political opponents, led by the elder Cato, launched a series of attacks on the Scipios and their friends. Lucius' command was not prolonged; the generous peace terms that Africanus proposed for Antiochus were harshly modified; the "trials of the Scipios" followed. On the trials the ancient evidence is confusing: in 187 an attack on Lucius for refusing to account for 500 talents received from Antiochus (as war indemnity or personal booty?) was
parried, and Africanus himself may have been accused but not condemned in 184. In any case, his influence was shaken, and he withdrew from Rome to Liternum in Campania, where he lived simply, cultivating the fields with his own hands and living on a villa (country farm) of modest size: Seneca later contrasted its small and cold bathroom with the luxurious baths of his own day. He
had not long to live, however; embittered and ill, he died in 184 or 183, a virtual exile from his country. He is said to have ordered his burial at Liternum and not in the ungrateful city of Rome, where his family tomb lay outside, on the Appian Way.

The legend of Scipio

Such was Scipio's impact upon the Romans that even during his lifetime legends began to cluster around him: he was regarded as favoured by Fortune or even divinely inspired. Not only did many believe that he had received a promise of help from Neptune in a dream on the night before his assault on Carthago Nova but that he also had a close connection with Jupiter. He used to visit Jupiter's temple on the Capitol at night to commune with the god, and later the story circulated that he was even a son of the god, who had appeared in his mother's bed in the form of a snake.

The historian Polybius thought that this popular view of Scipio was mistaken and argued that Scipio always acted only as the result of reasoned foresight and worked on men's superstitions in a calculating manner. But Polybius himself was a rationalist and has probably underestimated a streak of religious confidence, if not of mysticism, in Scipio's character that impressed so many of his contemporaries with its magnanimity and generosity. Thus, although Polybius had an intense admiration for Scipio, whom he called "almost the most

famous man of all time," the existence of the legend, a unique phenomenon in Rome's history, indicates that Polybius' portrait is too one-sided.

Significance and influence.

A man of wide sympathies, cultured and magnanimous, Scipio easily won the friendship of such men as Philip, king of Macedonia, and the native princes of Spain and Africa, while he secured the devotion of his own troops. Though essentially a man of action, he may also have been something of a mystic in whom, at any rate, contemporary legend saw a favourite of Jupiter as well as a spiritual descendant of Alexander the Great. One of the greatest soldiers of the ancient world, by his tactical reforms and strategic insight he created an army that defeated even Hannibal and asserted Rome's supremacy in Spain, Africa, and the Hellenistic East. He had a great appreciation of Greek culture and enjoyed relaxing in the congenial atmosphere of the Greek cities of Sicily, conduct that provoked the anger of old-fashioned Romans such as Cato. Indeed, he was outstanding among those Roman nobles of the day who welcomed the civilizing influences of Greek culture that were beginning to permeate Roman society. His Greek sympathies led him to champion Rome's mission in the world as protector of Greek culture; he preferred to establish Roman protection rather than direct conquest and annexation. For 10 years (210-201) he commanded a devoted army at the people's wish. His position might seem almost kingly; he had been hailed as king by Spanish tribes, and he may have been the first Roman general to be acclaimed as imperator (emperor) by his troops; but, though convinced of his own powers, he offered no challenge to the dominance of the Roman nobility ensconced in the Senate except by normal political methods (in which he showed no outstanding ability). Reaction against his generous
foreign policy and against his encouragement of Greek culture in Roman life led to his downfall amid personal and political rivalries, but his career had shown that Rome's destiny was to be a Mediterranean, not merely an Italian, power.

Scipio's influence outlived the Roman world. Great interest was shown in his life during the early Renaissance, and it helped the early humanists to build a bridge between the classical world and Christendom. He became an idealized perfect hero who was seen to have served the ends of Providence. Petrarch glorified him in a Latin epic, the Africa, which secured his own coronation as poet laureate in 1341 on the Capitol, where, some 1,500 years earlier, the historical Scipio used to commune in the temple of Jupiter.

Notes for Publius Cornelius Scipio (Consul 218):
Scipio, Publius Cornelius (d. 211 BC), Roman general, consul in 218 BC and later proconsul, during the Second Punic War between Rome and Carthage.

In 218 he sailed with an army to southern Gaul to prevent Hannibal the Carthaginian from advancing on Italy. Having arrived too late, he himself returned to Italy but boldly sent his army on to Spain under his elder brother Gnaeus Cornelius Scipio Calvus to check the Carthaginian forces still there. In northern Italy he hoped to fight delaying actions against Hannibal along the tributaries of the Po River. Being repulsed and wounded at the Ticinus, he retired to the Trebia, where he was joined by his colleague Tiberius Sempronius Longus, who insisted on fighting and was defeated (December 218).

In 217 Scipio was sent as proconsul to Spain; in a battle near the Ebro River he and his brother smashed Hasdrubal's attempt to break through to Italy (215), and by 212 they had captured Saguntum (modern Sagunto). From his base they could move farther south; advancing separately, however, they both met disaster and death--Publius on the upper Baetis (Guadalquivir), Gnaeus in the hinterland of Carthago Nova (Cartagena), in 211. In spite of this final defeat, they had for
seven years denied Hannibal the resources of Spain.

Publius was the father of Scipio Africanus the Elder.

BRITANICA

Publio Cornelio Escipión, cónsul en 2I8 con Sempronio Longo. Declarada la segunda Guerra Psnica, preparó tropas para marchar a Espana y combatir a Ankbal. Pero la derrota infligida por boyos e insumbrios al cónsul Manlio, retrasó su salida, y al llegar Escipión a Marsella, Ankbal estaba ya en el Ródano. Escipión mandó a Espana a su hermano Cneo y él siguió el camino de Pisa para esperar al ejército de Ankbal, quebrantado por el paso de los Alpes pero no pudo llegar a tiempo, limitindose a tomar posiciones detris del Tesino. Alli tuvo lugar un combate de avanzadas en el que Escipión salió herido, viéndose obligado a retirarse a orillas del Trebia y entregar el mando a su colega Sempronio, que llegó con las legiones de Sicilia y, contra el parecer de Escipión, aceptó el combate, en que la caballeria nsmida dió a Ankbal una nueva victoria. Una vez curado de sus heridas marchó a Espana a reunirse con su herrnano.

Tuathal Teachtmar was the 106th Monarch of Ireland, succeeding 76-106. When he came of age he got together his friends with what aid his grandfather, the King of Alba, gave him, came to Ireland, fought and overcame his enemies in twenty-five battles in Ulster, twenty-five in Leinster, as many in Connaught, and thirty-five in Munster. Tacitus states that one of the Irish princes, who was then an exile from his own country, waited on Agricola, who was then the Roman general in Britain, to solicit his support in the recovery of his kingdom. This was probably Tuathal, as he became Monarch of Ireland in 76 and Agricola, with the Roman legions, carried on war against the Caledonians about 75-78. He was slain by his successor Mal in 106. He married Baine, daughter of Sgaile Balbh, King of England.

Notes for Publius Claudius Pulcher:
Claudius Pulcher, Publius (d. before 246 BC), son of Appius Claudius Caecus and commander of the fleet that suffered the only serious Roman naval defeat of the First Punic War (264-241 BC). The setback occurred in 249, when Claudius was consul. He attacked the Carthaginian fleet in the harbour of Drepanum (modern Trapani, Sicily) and lost 93 of his 123 vessels. It was popularly believed that Claudius failed because he had committed a sacrilegious act before the battle: when the chickens, used in augury, refused to eat, he threw them into the sea with the words "Let them drink then." He was, accordingly, accused of treason and heavily fined.

Notes for Cneus Cornelius Scipio Asina (Consul 260):
Cneo Cornelio Escipión Asina fué cónsul en 260 a. de J. C. con C. Duilio. Cuando en la primera Guerra Psnica, después de la toma de Agrigento (262 a. de J. C.), se convenció el Senado de que sus triunfos por tierra quedaban esterilizados a causa del dominio del mar por los cartagineses y se decidió a combatirles en su propio elemento, al construir y fletar para ello I20 naves, encargó de su mando a los dos cónsules. Cornelio Escipión, con I7 de ellas, puso proa a las islas Eolias, y creyendo que podrka al paso tomar Lipara, se vió cercado por una división de la flota cartaginesa estacionada en Palermo y cayó prisionero con todas sus naves, permaneciendo en poder del enemigo hasta que Régulo le liberó. Por segunda vez fué cónsul en 254 con Atilio Calatino, y luchó ventajosamente en Sicilia. El sobrenombse le vino por haber llevado una vez al Foro, como prenda de una compra, un asno cargado de oro.

Notes for Appius Claudius Caecus:

Claudius Caecus, Appius (fl. late 4th-early 3rd century BC), outstanding statesman, legal expert, and author of early Rome who was one of the first notable personalities in Roman history.

A member of the patrician class, Appius embarked on a program of political reform during his censorship, beginning in 312 BC. Elements of this program included the distribution of the landless citizens of Rome among the tribes, which at that time constituted basic political units. Appius also admitted sons of freedmen into the Senate. One intent of these reforms may have been to give the
urban artisans and commercial interests full political rights and, consequently, a greater voice in government.

Speculation as to why this member of the nobility proposed reforms apparently offensive to his class range from the suggestion that he was attempting to break the power of a new patrician-plebeian nobility on behalf of the older nobility to the suggestion that he was a demagogue attempting to create a new base of power. However, Appius' reforms were partly undone in 304, while some freedmen had already been denied a place in the Senate during the consulship that followed his own of 307.

His building projects proved more lasting. He completed the construction of the Aqua Appia, Rome's first aqueduct, bringing in water from the Sabine Hills. He also initiated the Via Appia, the great military and commercial road between Rome and Capua. Both of these projects were named for him, the first time such an honour had been conferred. Appius was elected censor a second time in 296 and commanded Roman troops against Samnium.

Appius' legal contribution lies in his initiating publication of the legis actiones ("methods of legal practice") and of a list of court days, allowing people readier access to legal remedy. He was the author of a treatise, De Usurpationibus ("Concerning Usurpations"), which has been lost. He is also one of the earliest Roman prose and verse writers whose name is known, though only fragments of one poem have survived.

Appius Claudius suffered blindness in old age, hence his surname Caecus ("the blind"). Near the end of his life, during a war between Rome and the Epirite king Pyrrhus, the Senate was presented with peace proposals that, if accepted, could have resulted in the abandonment by Rome of southern Italy. The aged Appius gave an eloquent speech urging rejection of the proposals. The Senate was convinced, and further warfare between Rome and Pyrrhus compelled the Epirite king to depart from Italy. This speech and others were still preserved and read in the time of Cicero.

Appian Way,

Latin VIA APPIA, the first and most famous of the ancient Roman roads, running from Rome to Campania and southern Italy. (See Roman road system.) The Appian Way was begun in 312 BC by the censor Appius Claudius Caecus. At first it ran only 132 miles (212 km) from Rome south-southeastward to

ancient Capua, in Campania, but by about 244 BC it had been extended another 230 miles (370 km) southeastward to reach the port of Brundisium (Brindisi), situated in the "heel" of Italy and lying along the Adriatic Sea.

From Rome southward the Appian Way's course was almost straight until it reached Tarracina (Terracina) on the Tyrrhenian Sea. The road then turned inland to the southeast to reach Capua. From Capua it ran east to Beneventium (Benevento) and then southeastward again to reach the port of Tarentum (Taranto). It then ran east for a short distance to terminate at Brundisium.

The Appian Way was celebrated by Horace and Statius, who called it longarum regina viarum, or "queen of long-distance roads." As the main highway to the seaports of southeastern Italy, and thus to Greece and the eastern mediterranean, the Appian Way was so important that during the empire it was administered by a curator of praetorian rank. The road averaged 20 feet (6 m) in width and was slightly convex in surface in order to facilitate good drainage. The road's foundation was of heavy stone blocks cemented together with line mortar; over these were laid polygonal blocks of lava that were smoothly and expertly fitted together. The lava blocks formed a good traveling surface, and one that proved to have extraordinary durability over the centuries. The first few miles of the Appian Way outside Rome are flanked by a striking series of monuments, and there are also milestones and other inscriptions along the remains of the road.

King Crimthann Niadh-Nar, who was 98th Monarch of Ireland, succeeded B.C.7 to A.D.9, and was named the "Heroic." It was in this Monarch's reign that

Our Lord and Saviour, Jesus Christ was born.

Crimthann's death was occasioned by a fall from his horse. He married Nar-Tacht Chalauch, and Baine, daughter of the King of Alba (the order of which is unsure). He brought from his expedition against the Romans in Britain various spoils -- a spendid war chariot, gilded and highly ornamented; gold-hilted swords and shields embossed with silver; a table studded with 300 brilliant gems; a pair of greyhounds coupled with a splended silver chain estimated to be worth 100 cumal (maid servant) or 300 cows; together with a great quantity of other precious articles. In his reign the oppression of the Plebians by the Milesians came to a climax. During three years the Attacotti saved their scanty earnings to prepare a sumptuous death feast, which after Crimthann's death was held at a place called Mogh Cro (or the Field of Blood) in County Mayo. To this feast they invited the provincial kings, nobility and gentry of the Milesian race in Ireland, and when the enjoyment was at its height, the Attacotti treacherously murdered almost all of their unsuspecting victims.

Notes for ArtavasdesII, King Of Atropatene Media (56-32 ):
Artavasdes II (fl. 1st century BC), king of Armenia (reigned 53-34 BC), the son and successor of Tigranes II the Great.

Artavasdes was at first an ally of Rome, but, when the Parthian king Orodes II invaded Armenia, he joined the Parthian side and gave his sister in marriage to Pacorus, Orodes' son. When the Romans under Mark Antony entered Armenia (36), Artavasdes again gave his allegiance to Rome. Later deserting the Roman forces, Artavasdes was captured by Antony when he reinvaded Armenia (34). Artavasdes was taken to Alexandria, where he was later killed by the Ptolemaic queen Cleopatra. Artavasdes was also an accomplished Greek scholar who composed dramas and other literary
works.

Notes for Tigranes II The Great, King Of Armenia (95-55):
Tigranes II THE GREAT, Tigranes also spelled TIGRAN, or DIKRAN (b. c. 140--d. c. 55 BC), king of Armenia from 95 to 55 BC, under whom the country became for a short time the strongest state in the Roman East.

Tigranes was the son or brother of Artavasdes I and a member of the dynasty founded in the early 2nd century by Artaxias. He was given as a hostage to the Parthian king Mithradates II, but later he purchased his freedom by ceding 70 valleys bordering on Media, in northwestern Iran.

Thereafter, Tigranes began to enlarge his kingdom, first annexing the kingdom of Sophene (east of the Upper Euphrates River). He also entered into alliance with Mithradates VI Eupator of Pontus, whose daughter Cleopatra he married. The interference of the two kings in Cappadocia (in eastern Asia Minor) resulted in successful Roman intervention in 92 BC.

Tigranes then began war with the Parthians, whose empire (southeast of the Caspian Sea) was temporarily weakened after the death of Mithradates II (about 87) by internal dissensions and invasions of the Scythians. Tigranes reconquered the valleys he had ceded and laid waste a great part of Media; the kings of Atropatene (Azerbaijan), Gordyene and Adiabene (both on the Upper Tigris River), and Osroene became his vassals. He also annexed northern Mesopotamia, and in the Caucasus the kings of Iberia and Albania accepted his suzerainty. In 83 the Syrians, tired of Seleucid dynastic struggles, offered him their crown, and in 78-77 he reoccupied Cappadocia. Tigranes took the title "king of kings" and built a new royal city, Tigranocerta, on the borders of

Armenia and Mesopotamia (the actual site is disputed), where he accumulated all his wealth and to which he transplanted the inhabitants of 12 Greek towns of Cappadocia, Cilicia, and Syria.

In 72 the Romans forced Mithradates of Pontus to flee to Armenia, and, in 69, Roman armies under Lucullus invaded Armenia. Tigranes was defeated at Tigranocerta on Oct. 6, 69, and again near the former capital of Artaxata in September 68. The recall of Lucullus gave some respite to Mithradates and Tigranes, but in the meantime a son of Tigranes, also called Tigranes, rebelled against him. Although the younger Tigranes was given an army by the Parthian king Phraates III, he was defeated by his father and was forced to flee to the Roman general Pompey. When Pompey advanced into Armenia, Tigranes surrendered (66 BC). Pompey received him graciously and gave him back his kingdom (in exchange for Syria and other southern conquests). Tigranes ruled about 10 years longer over Armenia, as a Roman client-king, though he lost all his conquests except Sophene and Gordyene. He was succeeded by his son Artavasdes II.

Notes for Antiochus I Theos, King Of Commagene (70-36 ac):
Commagene, region in northern ancient Syria (modern south-central Turkey) bounded by Cilicia on the west and Cappadocia on the north. Its eastern boundary on the Euphrates River, at the conjunction of several routes over the Taurus Mountains, gave Commagene a strategic position between the Roman and Parthian empires. Commagene broke free from the decaying Seleucid Empire about 162 BC.

Its king, Antiochus I Theos (c. 69-c. 34 BC), by adroitly playing off Rome against Parthia, brought the kingdom to its zenith--a fact attested by the splendid mausoleum built by Antiochus to his own memory on the peak of Nimrud Dag. Commagene maintained a precarious independence until it was annexed by Rome in AD 17. After a brief restoration (38-72), it was permanently incorporated into the Roman province of Syria.

Iran

Phraates I.

Precise information is not available concerning the reign of Priapatius (c. 191-176 BC), who succeeded Artabanus and whose name appears in documents found in excavations at Nisa. Under his son Phraates I (c. 176-171 BC), the young Parthian kingdom seems to have recuperated sufficiently to have taken up once again its expansionist activities. It attacked Media and was successful in the conquest of the Mardi tribe near the Caspian and set up a defense of the "Caspian Gates," an important strategic point of penetration in Phraates' possessions. Overturning tribal tradition, which reserved the succession to the throne to the eldest son, he designated as a successor--even though he had several sons--his brother Mithradates. His choice was no mistake.

**360307393105788930. Mithradates VII Eupator, King of Pontus,** born in c 132 BC, Sinope, North Turkey; died in 63 BC, Panticapaeum [now in Ukraine]. He was the son of **720614786211577860. Mithradates VI Euergetes, King Of Pontus** and **720614786211577861. Loadice, Queen Of Pontus**.

Notes for Mithradates VII Eupator, King of Pontus:
Mithradates VI (VII) EUPATOR, byname MITHRADATES THE GREAT (d. 63 BC, Panticapaeum [now in Ukraine]), king of Pontus in northern Anatolia (120-63 BC). Under his energetic leadership, Pontus expanded to absorb several of its small neighbours and, briefly, contested Rome's hegemony in Asia Minor.

Life.

Mithradates the Great was the sixth (seventh)--and last--Pontic ruler by that name. Mithradates (often misspelled Mithridates and meaning "gift of [the god] Mithra") was a common name among Anatolian rulers of the age. When he succeeded his father, Mithradates Euergetes, in 120 BC, he was then only a boy, and for a few years his mother ruled in his place. About 115 BC, she was deposed and thrown into prison by her son, who thereafter ruled alone. Mithradates began his long career of conquest by dispatching successful expeditions to the Crimea and to Colchis (on the eastern shore of the Black Sea). Both districts were added to the Pontic kingdom. To the Greeks of the Tauric Chersonese and the Cimmerian Bosporus (Crimea and Straits of Kerch), Mithradates was a deliverer from their Scythian enemies, and they gladly surrendered their independence in return for the protection given to them by his armies. In Anatolia, however, the royal dominions had been considerably diminished after the death of Mithradates V: Paphlagonia had freed itself, and Phrygia (c. 116 BC) had been linked to the Roman province of Asia. Mithradates' first move there was to partition Paphlagonia and Galatia between himself and Nicomedes III of Bithynia, but next he quarreled with Nicomedes over Cappadocia. Successful at first on two occasions, he was on both deprived of his advantage by Roman intervention (c. 95 and 92). While appearing to acquiesce, he resolved to expel the Romans from Asia. A first attempt to depose Nicomedes IV of Bithynia, who was completely subservient to the Romans, was frustrated (c. 90). Then Nicomedes, instigated by Rome, attacked Pontic territory, and Mithradates, after protesting in vain to the Romans, finally declared war (88).

Nicomedes and the Roman armies were defeated and flung back to the coasts of the Propontis and the Aegean. The Roman province of Asia was occupied, and most of the Greek cities in western Asia Minor allied themselves with Mithradates, though a few held out against him, such as Rhodes, which he besieged unsuccessfully. He also sent large armies into Greece, where Athens and other cities took his side. But the Roman generals, Sulla in Greece and Fimbria in Asia, defeated his forces in several battles during 86 and 85. In 88 he had arranged a general massacre of the Roman and Italian residents in Asia (80,000 are said to have perished), in order that the Greek cities, as his accessories in the crime, should feel irrevocably committed to the struggle against Rome. As the war turned against him, his former leniency toward the Greeks changed to severity; every kind of intimidation was resorted to--deportations, murders, freeing of slaves. But this reign of terror could not prevent the cities from deserting to the victorious side. In 85, when the war was clearly lost, he made peace with Sulla in the Treaty of Dardanus, abandoning his conquests, surrendering his fleet, and paying a large fine.

In what is called the Second Mithradatic War, the Roman general Lucius Licinius Murena invaded Pontus without provocation in 83 but was defeated in 82. Hostilities were suspended, but disputes constantly occurred, and in 74 a general war broke out. Mithradates defeated Marius Aurelius Cotta, the Roman consul, at Chalcedon, but Lucullus worsted him outside Cyzicus (73) and drove

him, in 72, to take refuge in Armenia with his son-in-law Tigranes. After scoring two great victories at Tigranocerta (69) and Artaxata (68), Lucullus was disconcerted by the defeat of his lieutenants and by mutiny among his troops. In 66 Lucullus was superseded by Pompey, who completely defeated both Mithradates and Tigranes.

Mithradates then established himself in 64 at Panticapaeum (Kerch) on the Cimmerian Bosporus and was planning an invasion of Italy by way of the Danube when his own troops, led by his son Pharnaces II, revolted against him. After failing in an attempt to poison himself, Mithradates ordered a Gallic mercenary to kill him. His body was sent to Pompey, who buried it in the royal sepulchre at Sinope, the Pontic capital.

Assessment.

Mithradates was a man of great stature and physical strength, a brave fighter, and a keen hunter. He also had some of the worst traits often associated with the Oriental despot--cruelty and sensuality, in particular. But it cannot be denied that Mithradates was a ruler of astonishing energy and determination, or that he possessed political skill of a high order. That he was one of the few men to offer a serious challenge to the Roman Republic is sufficient testimony to his ability. He organized the forces at his disposal very effectively, and he had a good grasp of strategy. He was unlucky in having to face three exceptionally brilliant Roman generals; unlucky, too, in coming to power at a time when the Hellenistic world was in the final stage of its collapse. It is quite conceivable that had he been born a century earlier he could have constructed an enduring Greco-Asiatic empire. A cunning, brutal tyrant, he concerned himself solely with maintaining and strengthening his own power. He posed as the champion of Hellenism, but this was mainly to further his political ambitions; it is no proof that he was deeply imbued with Greek culture or that he felt a mission to promote its extension within his domains. Hellenism made advances in Pontus during his reign, as it had under his predecessors, but this was a natural process. He treated all alike; Greek, Roman, and Asiatic were welcome at his court provided that they could be of use to him (his military subordinates were mostly Greeks, though in later years he employed several Roman renegades), but he trusted no one. Just as it is impossible to speak of his favouring one religion or culture above another, so it is impossible to believe that he had any notion of bringing Greeks and Asiatics closer together in a new kind of political and social system. His posing as a liberator of the Greeks from Roman oppression and, later, his encouragement of social revolution in the Greek cities of the province of Asia can only be interpreted, in both cases, as the actions of an opportunist seeking immediate political advantages.

King Eochaidh Feidlioch was the 93rd Monarch of Ireland who succeeded B.C.142 to 130.  He married Colthfionn, daughter of Uchtleathan, who was a very virtuous lady.  By him she had three children at a birth, who were slain at the Battle of Deomohriadh.  After their death a melancholy settled on the Monarch, hence his name "Feidhlioch."  This Monarch changed the divesion from twenty-five parts to provinces -- Munster, Leinster, Connaught and Ulster. He died at Tara B.C.130.

Notes for Deiotarus I, King Of Galatia (63-41 a.c.):
Deiotarus (d. 40 BC), tetrarch of the Tolistobogii (of western Galatia, now in western Turkey), later king of all Galatia, who, as a faithful ally of the Romans, became involved in the struggles between the Roman generals that led to the fall of the republic.

At the beginning of the Third Mithradatic War (74), Deiotarus drove the invading troops of Mithradates VI of Pontus from Phrygia. For this support, Pompey (Gnaeus Pompeius) rewarded him in 64 with the title of king and with part of eastern Pontus. In addition, the Senate granted him Lesser Armenia and most of Galatia.

Siding with Pompey and the Optimates against Julius Caesar in the Civil War (49-45), Deiotarus escaped with his ally to Asia after the defeat at Pharsalus in 48. The next year the king was pardoned by Caesar. As a consequence of the complaints of certain Galatian princes, however, Deiotarus was deprived of part of his dominions.

In 45, Deiotarus was accused at Rome of having attempted to murder Caesar when the dictator was his guest in Galatia. Cicero undertook Deiotarus'

defense, but the assassination of Caesar in 44 prevented a verdict. Then Mark Antony, bribed with a large sum of money, announced that Caesar had left instructions that specified Deiotarus was to resume rule of his former possessions. Nevertheless, Deiotarus continued to support the anti-Caesarian party until its defeat at Philippi (42), when he went over to the triumvirs. He remained in possession of his kingdom until his death.

---

Galatia, ancient district in central Anatolia that was occupied early in the 3rd century BC by Celtic tribes, whose bands of marauders created havoc among neighbouring Hellenistic states. Invited from Europe to participate in a Bithynian civil war (278 BC), the Gallic horde plagued western Anatolia until checked by the Seleucid king Antiochus I at the so-called Elephant Battle (275 BC). At that point the Celts, called Galatae (Galatians) by 3rd-century writers, settled in the territory to which they gave their name. The Galatians, having joined the Seleucids against Rome (winter 190-189 BC), brought upon themselves a Roman punitive expedition (189 BC) from which they never recovered. Passing successively under the rule of Pergamum and Pontus, Galatia became a Roman protectorate (85 BC) ruled by puppet kings. Though originally possessing a strong cultural identity, the Galatians by the 2nd century AD had become absorbed into the Hellenistic civilization of Anatolia.

Notes for Artabanus I, King Of Parthia:
Artabanus I, also called ARSACES II (fl. 3rd and 2nd centuries BC), king of Parthia (reigned 211-191BC) in southwestern Asia. In 209 he was attacked by the Seleucid king Antiochus III of Syria, who took Hecatompylos, the Arsacid capital (the present location of which is uncertain), and Syrinx in Hyrcania. Finally, however, Antiochus concluded a treaty with Artabanus, who after 206 lost much territory to Euthydemus, ruler of Bactria.

   Notes for Mitridates I, King Of Parthia:
   Mithradates I, also called ARSACES VI (fl. 2nd century BC), king of Parthia (reigned 171-138 BC); he succeeded his brother Phraates I.

Before 160 Mithradates I seized Media from the Seleucid ruler Timarchus. Turning to the east, he won two provinces, Tapuria and Traxiana, from the Bactrian king Eucratides. Mithradates then captured the province of Elymais (ancient Elam) and invaded Babylonia (142or 141). The Seleucid king Demetrius II Nicator recaptured Babylon (141 or 140) but was defeated and held by Mithradates in honourable captivity. Generally, Mithradates was regarded as a mild ruler, and his epithet Philhellene ("Greek-loving") indicates that he tried to conciliate his Greek subjects.

Notes for Mithradates II, King Of Parthia (123-88 BC):
Mithradates II (d. 88 BC), king of Parthia (reigned 123-88 BC); he was the son and successor of Artabanus II.

Mithradates recovered the eastern provinces that had been overrun by invading Shaka nomads during his father's reign. In the west he conquered Mesopotamia and defeated the Armenian king Artavasdes, whose son Tigranes (later Tigranes II) became a Parthian hostage and was redeemed only for the cession of 70 valleys. One of the most successful of the Parthian kings, Mithradates concluded the first treaty between Parthia and Rome in 92 BC.

Notes for Demetrius II Nikator, King Of Syria:
Demetrio II Nicitor (fallecido en el 125a.C.), rey de Siria (145-139a.C.; 127-125a.C.), miembro de la dinastka Seléucida, hijo de Demetrio I. Con la ayuda de Tolomeo VI, rey de Egipto, depuso y asesinó al usurpador Alejandro Balas (que reinó en 150-145a.C.) y se convirtió en rey de Siria en el 145a.C. Demetrio se casó con la viuda de su predecesor, Cleopatra Tea (fallecida hacia el 120a.C.), quien era hermana de Tolomeo VI. En el 140a.C., durante una batalla contra Partia, Demetrio fue hecho prisionero. En cautividad, se casó con Rodogune, hermana del rey parto Mitrkdates I. Demetrio II regresó a Siria en 129a.C. Su hermano, Antkoco VII, que habka usurpado el trono en el 139a.C. y habka contrakdo matrimonio con Cleopatra Tea, murió en combate en el 127a.C. Demetrio II volvió entonces a conseguir la corona y reinó hasta su asesinato dos anos después. Su hijo, Seleuco V, le sucedió, pero disfrutó de un corto reinado; fue condenado a muerte por su madre, Cleopatra Tea, ese mismo ano.

Demetrius II NICATOR (Greek: "Victor") (b. 161 BC--d. 125), king of Syria from 145 to 139 and from 129 to 125 BC.

The son of King Demetrius I Soter, he went into exile when his father was killed fighting the usurper Alexander Balas in 150. Demetrius returned to Syria (147) with an army of Cretan mercenaries, deposed Balas in 145, and installed himself on the throne. In 140 he drove back a Parthian invasion but was defeated and captured by the Parthians in 139. Demetrius was released from

captivity in 129 and returned to Syria, but, during his second reign, he controlled only part of
the kingdom. He was assassinated about four years later.

[MARINOS HASTA PERSIA.FTW]

Attalus III PHILOMETOR EUERGETES ("Loving-his-mother Benefactor") (b. c. 170 BC--d. 133), king of Pergamum from 138 to 133 BC who, by bequeathing his domains to Rome, ended the history of Pergamum as an independent political entity. He was the son of Eumenes II (reigned 197-159) and nephew of Attalus II Philadelphus (reigned 159-138). Little is known of his reign. Attalus is said to have behaved tyrannically at first, but he evidently settled down to a quiet and studious life. His motives for bequeathing Pergamum to Rome are obscure. In 129 Rome organized the kingdom into the province of Asia.

Notes for Antiochus III the Great, King Of Syria:
[MARINOS HASTA PERSIA.FTW]

Antiochus III, byname ANTIOCHUS THE GREAT, Greek ANTIOCHUS MEGAS (b. 242 BC--d. 187, near Susa, Iran), Seleucid king of the Hellenistic Syrian Empire from 223 BC to

187, who rebuilt the empire in the East but failed in his attempt to challenge Roman ascendancy in Europe and Asia Minor. He reformed the empire administratively by reducing the provinces in size, established a ruler cult (with himself and his consort Laodice as divine), and improved relations with neighbouring countries by giving his daughters in marriage to their princes.

The son of Seleucus II, Antiochus succeeded his brother Seleucus III as king. He retained from the previous administration Hermias as chief minister, Achaeus as governor of Asia Minor, and Molon and his brother Alexander as governors of the eastern provinces, Media and Persis. In the following year, when Molon rebelled and assumed the title of king, Antiochus abandoned a campaign against Egypt for the conquest of southern Syria, on the advice of Hermias, and marched against Molon, defeating him in 220 BC on the far bank of the Tigris and also conquering Atropatene, the northwestern part of Media. Shortly thereafter he had Hermias killed and was thus rid of most of the influences from the previous administration. In the same year, Achaeus set himself up as king in Asia Minor, but a mutiny in his army kept him from attacking Antiochus.

Antiochus was now free to conduct what has been called the Fourth Syrian War (219-216), during which he gained control of the important eastern Mediterranean sea ports of Seleucia-in-Pieria, Tyre, and Ptolemais. In 218 he held Coele Syria (Lebanon), Palestine, and Phoenicia. In 217 he engaged an army (numbering 75,000) of Ptolemy IV Philopator, a pharaoh of the Hellenistic dynasty ruling Egypt, at Raphia, the southernmost city in Syria. His own troops numbered 68,000. Though he succeeded in routing the left wing of the Egyptian army, his phalanx (heavily armed infantry in close ranks) in the centre was defeated by a newly formed Egyptian phalanx. In the subsequent peace settlement, Antiochus gave up all his conquests except the city of Seleucia-in-Pieria.

After the Syrian war, he proceeded against the rebel Achaeus. In alliance with Attalus I of Pergamum, Antiochus captured Achaeus in 213 in his capital, Sardis, and had him executed in a barbaric manner. After the pacification of Asia Minor he entered upon his later to be famous eastward campaign (212-205), pressing forward as far as India. In 212 he gave his sister Antiochis in marriage to King Xerxes of Armenia, who acknowledged his suzerainty and paid him tribute. He occupied Hecatompylos (southeast of the Caspian Sea), the capital of the Parthian king Arsaces III, and forced him to enter into an alliance in 209 and the following year defeated Euthydemus of Bactria, though he allowed him to continue to rule and retain his royal title.

In 206 he marched across the Hindu Kush into the Kabul Valley and renewed a friendship with the Indian king Sophagasenos.

Returning westward via the Iranian provinces of Arachosia, Drangiana, and Carmania, he arrived in Persis in 205 and received tribute of 500 talents of silver from the citizens of Gerrha, a mercantile state on the east coast of the Persian Gulf. Having established a magnificent system of vassal states in the East, Antiochus now adopted the ancient Achaemenid title of "great king," and
the Greeks, comparing him to Alexander the Great, surnamed him also "the Great."

After the death of Ptolemy IV, Antiochus concluded a secret treaty with Philip V, ruler of the Hellenistic kingdom of Macedonia, in which the two plotted the division of the Ptolemaic empire outside Egypt. Antiochus' share was to be southern Syria, Lycia, Cilicia, and Cyprus; Philip was to have western Asia Minor and the Cyclades. Antiochus invaded Coele Syria, defeated the Ptolemaic general Scopas at Panion near the source of the Jordan River in the year
200, gained control of Palestine, and granted special rights to the Jewish temple state. But Philip, marching along the Dardanelles, became involved in a war with Rhodes and Pergamum, both of whom appealed to Rome for help against Macedonia, informing Rome of the alliance between the two Hellenistic kings. Rome intervened decisively in the system of Hellenistic states. Philip was
defeated by the Romans in the Second Macedonian War (200-196), and Antiochus refused to help him. Instead, taking advantage of the Romans' involvement with Philip, Antiochus marched against Egypt. Though the Romans had sent ambassadors to Ptolemy V, they could not lend him any serious assistance. When peace was concluded in 195, Antiochus came permanently into possession of southern Syria--which had been fought over for 100 years by
the Ptolemies and Seleucids--and of the Egyptian territories in Asia Minor. He also gave his daughter Cleopatra in marriage to Ptolemy V. Egypt practically became a Seleucid protectorate.

In his insatiable expansionist drive, Antiochus occupied parts of the kingdom of Pergamum in 198 and in 197 Greek cities in Asia Minor. In 196 BC he crossed the Hellespont into Thrace, where he claimed sovereignty over territory that had been won by Seleucus I in the year 281 BC. A war of harassment and diplomacy with Rome ensued. A number of times the Romans sent ambassadors demanding that Antiochus stay out of Europe and set free all the autonomous
communities in Asia Minor. To meet these demands would have meant the actual dissolution of the western part of the Seleucid

Empire, and Antiochus thus refused. Tensions with Rome increased further when the great Carthaginian general Hannibal, who had fled from Carthage in the aftermath of defeat by the Romans in the Second Punic War, found refuge with Antiochus in 195 BC and became his adviser.

Antiochus offered an alliance to Philip of Macedonia, whom he had previously forsaken, but was rebuffed. Philip, Rhodes, Pergamum, and the Achaean League joined Rome. Only the Aetolians, discontent with Rome's growing influence in Greece, called upon Antiochus to be their liberator and appointed him commander in chief of their league. Relying on them Antiochus landed in Demetrias in the autumn of 192 with only 10,500 men and occupied Euboea. But he found little support in central Greece. In 191 the Romans, numbering more than 20,000, cut him off from his reinforcements in Thrace and outflanked his position at the pass of Thermopylae (in Greece). With the remainder of his troops Antiochus fled to Chalcis on Euboea and from there by sea to Ephesus; his fleet was wiped out by the combined naval forces of Rome, Rhodes, and Pergamum. Meeting no resistance, the Roman army crossed the Hellespont in 190. Antiochus was now eager to negotiate on the basis of Rome's previous demands, but the Romans insisted that he first evacuate the region west of the Taurus Mountains. When Antiochus refused, he was decisively defeated in the Battle of Magnesia near Mt. Sipylus, where he fought with a heterogeneous
army of 70,000 men against an army of 30,000 Romans and their allies. Although he could have continued the war in the eastern provinces, he renounced all claim to his conquests in Europe and in Asia Minor west of the Taurus at the peace treaty of Apamea. He also was obliged to pay an indemnity of 15,000 talents over a period of 12 years, surrender his elephants and his fleet, and furnish hostages, including his son Antiochus IV. His kingdom was now reduced to Syria, Mesopotamia, and western Iran. In 187 Antiochus was murdered in a Baal temple near Susa, where he was exacting tribute in order to obtain much needed revenue.

Seleucus IV PHILOPATOR (b. c. 217 BC--d. 175 BC), seventh king (reigned 187-175 BC) of the Seleucid dynasty, son of Antiochus III the Great.

Although the empire that Seleucus inherited was not so great as the one over which his father had ruled before the war with Rome (190-189), it was still large, consisting of Syria (including Cilicia and Palestine), Mesopotamia, Babylonia, and nearer Iran (Media and Persia). Because of financial difficulties, created in part by the heavy war indemnity exacted by Rome, Seleucus was compelled to pursue a policy devoid of expensive adventures. His unambitious policy and care were also dictated by the fact that his son and heir, Demetrius, had been sent to Rome as a hostage for his father. When Seleucus was assassinated in 175 by his chief minister Heliodorus, his brother Antiochus seized the throne.

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility

was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

iii. Cleopatra I, Queen Of Egypt, born in c 205 a.c.; died in 176 a.c; married Ptolomy V Epiphanes, King Of Egypt; born in 210 a.c..

Notes for Cleopatra I, Queen Of Egypt:
Cleopatra I SYRA (d. 176 BC), queen of Egypt (193-176 BC), wife of Ptolemy V Epiphanes and regent for her minor son, Ptolemy VI Philometor.

Daughter of Antiochus III the Great of the Syrian Empire, Cleopatra was married to Ptolemy V in 193 as part of the Peace of Lysimacheia, concluding warfare and border conflicts between Syria and Egypt. She brought as her dowry the revenues (but apparently not the ownership) of Coele-Syria, a land that Egypt had long sought to recover; and the total agreement helped to ensure Egypt's neutrality in Syria's continuing struggles with the Romans. When Ptolemy V died
(180), Cleopatra became the true ruler of Egypt as regent for her young son, and she ruled equitably, keeping peace with Syria while doing nothing to alienate Rome, and thereby kept Egypt free of invasion.

Notes for Ptolomy V Epiphanes, King Of Egypt:
Tolomeo V Epífanes (c.210-181 a.C.), rey de Egipto (205-181 a.C.), perteneciente a la dinastía Tolemaica, nieto de Tolomeo III Evergetes. Al comienzo de su reinado, Antíoco III de Siria y Filipo V de Macedonia acordaron dividir las posesiones extranjeras de Egipto y repartírselas, pero la derrota de Antíoco en Magnesia

frente a los romanos permitió la salvación de la dinastía Tolemaica. La coronación oficial de Tolomeo V se realizó en el 197 a.C.; fue la ocasión en la que el sacerdocio egipcio publicó el decreto que forma la inscripción trilingüe de la Piedra de Rosetta. En el 193 a.C., Tolomeo contrajo matrimonio con la princesa Seléucida Cleopatra I, hija de Antíoco III y madre de Tolomeo VI.

Ptolemy V EPIPHANES (Greek: Illustrious) (b. c. 210--d. 180 BC), Macedonian king of Egypt from 205 BC under whose rule Coele Syria and most of Egypt's other foreign possessions were lost.

After Sosibius, Ptolemy IV's corrupt minister, had murdered Ptolemy V's mother, the five-year-old king was officially elevated to the throne; Sosibius became his guardian. According to the 2nd-century BC Greek historian Polybius, all prominent officials were banished from Egypt while Sosibius' clique announced the young king's accession and the death of his parents. The rulers of Macedonia and of the Syrian-based Seleucid kingdom, however, realizing Egypt's weakness, conspired to partition that Kingdom's Asiatic and Aegean possessions.

When Sosibius retired about 202, Agathocles, another member of the clique, became Ptolemy's guardian. Soon, however, he provoked Tlepolemus, the governor of Pelusium (Egypt's eastern frontier city), who marched on Alexandria, where his supporters roused a mob, compelling Agathocles to resign in favour of another courtier. When the boy king, enthroned in the stadium while the mob clamoured for the murderers of his parents, nodded in confusion at the prompting of a courtier, the mob searched out and butchered Agathocles and his family. Tlepolemus, however, soon proved incompetent and was removed.

During the confusion in Egypt, Antiochus III, the Seleucid king, made serious inroads into Coele Syria. Ptolemy's forces mounted a counteroffensive, capturing Jerusalem; but in 201 the Seleucid king returned, defeating the Ptolemaic army and later seizing the Ptolemaic lands in Asia Minor. Roman diplomatic intervention finally halted the war; and in 194/193 BC, as part of the peace treaty, Cleopatra I, a daughter of Antiochus, was married to Ptolemy.

Within Egypt the revolts that had begun under Ptolemy's father continued; in 197 the King fought rebels in the Nile Delta, exhibiting great cruelty toward those of their leaders who capitulated. In Upper Egypt troubles persisted until 187/186. Though an adult, the King still was under the control of his guardians and advisers. To forestall further insurrections, he extended the authority of the
governor of Thebes to include all Upper Egypt. In 196 he promulgated the decree inscribed on the Rosetta Stone; found in 1799, it provided the key to the hieroglyphic, or pictographic writing, of ancient Egypt. The decree, which reveals the increasing influence of Egyptian natives, remitted debts and taxes, released prisoners, pardoned rebels who surrendered, and granted increased
benefactions to the temples.

Ptolemy retained existing alliances in Greece. Late in his reign an able eunuch was sent to recruit Greek mercenaries; but whatever the King's plans may have been, he died suddenly, about May 180, leaving two sons and a daughter, with the Queen as their regent.

Demetrius I SOTER (Greek: "Saviour") (b. c. 187 BC--d. 150), king of Syria from 162 to 150 BC. He was one of the line of rulers of the Seleucid dynasty, founded in 312 by a Macedonian successor of Alexander the Great.

The son of King Seleucus IV Philopator (reigned 187 to 175), Demetrius was sent to Rome as a hostage during his father's reign. While he was away, Syria came under the rule of his uncle, Antiochus IV Ephiphanes (d. 164), and then of his cousin, Antiochus V. Aided by the Greek statesman and historian Polybius, Demetrius escaped from Rome in 162 and returned to Syria to claim the throne. He defeated the rebel general Timarchus and was recognized as king by the Roman Senate. In 160 he crushed a Jewish rebellion in Palestine. Demetrius died while fighting the pretender Alexander Balas, who was supported by Rome, Egypt, and Pergamum.

Tolomeo V Epkfanes (c.210-181 a.C.), rey de Egipto (205-181 a.C.), perteneciente a la dinastka Tolemaica, nieto de Tolomeo III Evergetes. Al comienzo de su reinado, Antkoco III de Siria y Filipo V de Macedonia acordaron dividir las posesiones extranjeras de Egipto y repartkrselas, pero la derrota de Antkoco en Magnesia frente a los romanos permitió la salvación de la dinastka Tolemaica. La coronación oficial de Tolomeo V se realizó en el 197 a.C.; fue la ocasión en la que el sacerdocio egipcio publicó el decreto que forma la inscripción trilingüe de la Piedra de Rosetta. En el 193 a.C., Tolomeo contrajo matrimonio con la princesa Seléucida Cleopatra I, hija de Antkoco III y madre de Tolomeo VI.

Ptolemy V EPIPHANES (Greek: Illustrious) (b. c. 210--d. 180 BC), Macedonian king of Egypt from 205 BC under whose rule Coele Syria and most of Egypt's other foreign possessions were lost.

After Sosibius, Ptolemy IV's corrupt minister, had murdered Ptolemy V's mother, the five-year-old king was officially elevated to the throne; Sosibius became his guardian. According to the 2nd-century BC Greek historian Polybius, all prominent officials were banished from Egypt while Sosibius' clique announced the young king's accession and the death of his parents. The rulers of Macedonia and of the Syrian-based Seleucid kingdom, however, realizing Egypt's weakness, conspired to partition that Kingdom's Asiatic and Aegean possessions.

When Sosibius retired about 202, Agathocles, another member of the clique, became Ptolemy's guardian. Soon, however, he provoked Tlepolemus, the governor of Pelusium (Egypt's eastern frontier city), who marched on Alexandria, where his supporters roused a mob, compelling Agathocles to resign in favour of another courtier. When the boy king, enthroned in the stadium while the mob clamoured for the murderers of his parents, nodded in confusion at the prompting of a courtier, the mob searched out and butchered Agathocles and his family. Tlepolemus, however, soon proved incompetent and was removed.

Notes for Cleopatra I, Queen Of Egypt:
Cleopatra I SYRA (d. 176 BC), queen of Egypt (193-176 BC), wife of Ptolemy V Epiphanes and regent for her minor son, Ptolemy VI Philometor.

Daughter of Antiochus III the Great of the Syrian Empire, Cleopatra was married to Ptolemy V in 193 as part of the Peace of Lysimacheia, concluding warfare and border conflicts between Syria and Egypt. She brought as her dowry the revenues (but apparently not the ownership) of Coele-Syria, a land that Egypt had long sought to recover; and the total agreement helped to ensure Egypt's neutrality in Syria's continuing struggles with the Romans. When Ptolemy V died (180), Cleopatra became the true ruler of Egypt as regent for her young son, and she ruled equitably, keeping peace with Syria while doing nothing to alienate Rome, and thereby kept Egypt free of invasion.

Notes for Eumenes II, King Of Pergamum:
[MARINOS HASTA PERSIA.FTW]

Eumenes II (d. 160/159 BC), king of Pergamum from 197 until his death. A brilliant statesman, he brought his small kingdom to the peak of its power and did more than any other Attalid monarch to make Pergamum a great centre of Greek culture in the East.

Eumenes was the eldest son and successor of Attalus I Soter (ruled 241-197), and he continued his father's policy of cooperation with Rome. His military skill contributed substantially to the victory of Roman and Pergamene forces over the Seleucid king Antiochus III in the battle of Magnesia, in Lydia (autumn of 190). As his reward Eumenes was given control over the Thracian Chersonese (modern Gallipoli peninsula in European Turkey) and over most of the former Seleucid possessions in Asia Minor. Despite this enlargement of his domain, Eumenes realized that his power rested on Roman might. He therefore cultivated friendship with the Romans, securing their intervention in his struggles against the kings of Bithynia and Pontus, in northern Anatolia.

In 172 Eumenes visited Rome to denounce Perseus, the king of Macedonia, for allegedly plotting aggressions in the East. He then joined the Romans in their struggle against Perseus (Third Macedonian War, 171-168), but when the war dragged on it was rumoured that Eumenes was negotiating secretly with the enemy. Whatever the truth of the report, the mere suspicion of disloyalty was enough to put Eumenes permanently in the shadow of Rome's displeasure.

Eumenes was responsible for the construction of nearly all the main public buildings--together with their splendid sculptures--on the acropolis at Pergamum.

Arsaces. Nombre del fundador del Imperio de los partos y de muchos de sus sucesores: los Arsicidas.

1. Arsaces I. Se discute si es escita, bactriano o parto. Se hizo dueno del poder invadiendo la Partia con sus bandoleros y derrotando a Andrigoras. Fundó la ciudad de Dera y murió de muerte violenta.

2. El segundo se llamó Tiridates I y reinó treinta y siete anos.

3. Su hijo, Artabano I, luchó contra Antkoco III el Grande, que invadió su territorio el 2I2.

4. Arsaces Priapatio. Hijo del anterior reinó quince anos y dejó tres hijos: Fraates I, Mitridates I y Artabano II. Sucediéronle Fraates I (v. t.) y después de éste, Mitridates I, hombre de singular valor que penetró hasta la India, sometió a medos y elimeos e hizo prisionero a Demetrio Nicator, rey de Siria, a quien dió su hija por esposa. Murió entre los anos I38 y I30 con fama de justicia y munificencia. Su hijo fué Fraates II (v. t.), al cual sucedió Artabano II, hermano de Mitridates I.

5. Arsaces IX, o sea Mitridates II, fué llamado el Grande por sus victorias contra los escitas y Artavasdes, rey de Armenia. Envió una embajada a Sila y se hizo amigo de los romanos.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 1 Pgs. 175-176

Arsaces, Iranian name borne by the Parthian royal house as being descended from Arsaces, son of Phriapites (date unknown), a chief of the seminomadic Parni tribe from the Caspian steppes. The first of his line to gain power in Parthia was Arsaces I, who reigned from about 250 to about 211 BC. (Some authorities believe that a brother, Tiridates I, succeeded Arsaces about 248 and ruled until 211; other authorities consider Arsaces I and Tiridates I to be the same person.)

All Parthian kings after Arsaces I used Arsaces as their throne name; and, with the rare exceptions of usurpers and contestants for the throne, all are so designated on their coins and in official documents. By historians they are generally called by their personal names. The Arsacid dynasty maintained itself, although not in unbroken succession, until its overthrow by Ardashir in AD 224. During the time of the Parthian empire the Arsacids claimed descent from Artaxerxes II, probably to legitimate their rule over Achaemenid territories. From the Sasanian chronicles they enter Persian epic poetry under the name Ashkanian (individual rulers as Ashak, Ashkan).

The name Arsaces was also borne by several kings of Armenia who were of Parthian royal blood.

Notes for Antiochus II Theos, King Of Syria:
[MARINOS HASTA PERSIA.FTW]

Antiochus II THEOS (b. c. 287 BC--d. 246), king of the Seleucid dominions in the Middle East, who succeeded his father, Antiochus I, in 261 BC and spent much of his reign at war with Egypt, recovering much territory in Anatolia.

Finding a willing ally in Antigonus, ruler of Macedonia, who had suffered at the hands of Ptolemy II of Egypt, Antiochus waged the Second Syrian War (259-255) against Ptolemy to avenge his father's losses. While Antigonus defeated the Egyptian fleet at sea, Antiochus reconquered much of Anatolia, including the cities of Miletus and Ephesus, and also the Phoenician coast.

In Miletus, Antiochus overthrew a tyrant after he recaptured the city, and the citizens worshiped him as a god in thanksgiving. He later organized an empire-wide cult, as suggested by his epithet, Theos (God). He also established the freedom of the other Ionian cities. Further, he continued his predecessors' policies of encouraging the foundation of cities in his realm.

For unknown reasons, around 253, Antiochus dismissed his first queen, Laodice, and married Ptolemy's daughter Berenice. At his death in 246, a civil war erupted between the two queens. He was succeeded by his son Seleucus II, while another son, Antiochus Hierax, established himself in western Anatolia.

The primary source in English of knowledge about the members of the Seleucid dynast is Edwin Robert Bevan's The House of Seleucus, 2 vol. (1902; reprinted 1966).

Seleucus II CALLINICUS (d. 225 BC), fourth king (reigned 246-225) of the Seleucid dynasty, son of Antiochus II Theos.

Antiochus II repudiated his wife Laodice (Seleucus' mother) and married Ptolemy's daughter Berenice, but by 246 BC Antiochus had left Berenice in order to live again with Laodice and Seleucus in Asia Minor. Laodice poisoned him and proclaimed her son as King Seleucus II, while her partisans at Antioch made away with Berenice. Berenice's brother, Ptolemy III, who had just succeeded to the Egyptian throne, at once invaded the Seleucid realm and annexed the eastern provinces, while his fleets swept the coasts of Asia Minor. In the interior of Asia Minor Seleucus maintained himself, and when Ptolemy returned to Egypt he recovered northern Syria and the nearer provinces of Iran. At Ancyra (about 235?) Seleucus was defeated by his younger brother Antiochus Hierax, supported by Laodice, and left the country beyond the Taurus to his brother
and the other powers of the peninsula. Of these Pergamum rose to greatness under Attalus I, and Antiochus Hierax perished as a fugitive in Thrace in 228 or 227. A year later Seleucus was killed by a fall from his horse.

Seleucus IV PHILOPATOR (b. c. 217 BC--d. 175 BC), seventh king (reigned 187-175 BC) of the Seleucid dynasty, son of Antiochus III the Great.

Although the empire that Seleucus inherited was not so great as the one over which his father had ruled before the war with Rome (190-189), it was still large, consisting of Syria (including Cilicia and Palestine), Mesopotamia, Babylonia,

and nearer Iran (Media and Persia). Because of financial difficulties, created in part by the heavy war indemnity exacted by Rome, Seleucus was compelled to pursue a policy devoid of expensive adventures. His unambitious policy and care were also dictated by the fact that his son and heir, Demetrius, had been sent to Rome as a hostage for his father. When Seleucus was assassinated in 175 by his chief minister Heliodorus, his brother Antiochus seized the throne.

Notes for Ptolomy IV Filopator, King Of Egypt:
Ptolemy IV PHILOPATOR (Greek: Loving His Father) (b. c. 238 BC-d. 205 BC), Macedonian king of Egypt (reigned 221-205 BC), under whose feeble rule, heavily influenced by favourites, much of Ptolemaic Syria was lost and native uprisings began to disturb the internal stability of Egypt.

Classical writers depict Ptolemy as a drunken, debauched reveller, completely under the influence of his disreputable associates, among whom Sosibius was the most prominent. At their instigation, Ptolemy arranged the murder of his mother, uncle, and brother.

Following the defection of one of Ptolemy's best commanders, Egypt's Syro-Palestinian territory, Coele Syria, was seriously threatened by Antiochus III, the Syrian Seleucid ruler. In 219, when the Seleucid ruler captured some of the coastal cities, Sosibius and the Ptolemaic court entered into delaying negotiations with the enemy, while the Ptolemaic army was reorganized and intensively drilled. So grave was the threat that for the first time under the Ptolemaic regime native Egyptians were enrolled
into the infantry and cavalry and trained in phalanx tactics. In 218 the negotiations collapsed, and Antiochus renewed his advance, overrunning Ptolemy's forward defenses. In the spring of 217, however, Ptolemy's new army met the Seleucid forces near Raphia in southern Palestine, and with the help of

the Egyptian phalanx Ptolemy was victorious. Although holding the initiative, the Egyptian king, on Sosibius' advice, negotiated a peace, and the Seleucid army withdrew from Coele Syria.

After Raphia, Ptolemy married his sister, Arsinoe, who bore him a successor in 210. The Egyptians, however, sensing their power, rose in a rebellion that Polybius, the Greek historian, describes as guerrilla warfare. By 205 the revolt had spread to Upper Egypt.

To the south, Ptolemy maintained peaceful relations with the neighbouring kingdom. In the Aegean, he retained a number of islands, but, in spite of honours granted him, he refused to become embroiled in the wars of the Greek states. In Syria, also, Ptolemy avoided involvement in local struggles, though Sosibius attempted to embroil Egypt there. According to Polybius, Ptolemy's debauched and corrupt character, rather than his diplomatic acumen, kept him clear of foreign involvements. As his reign progressed he fell increasingly under the influence of his favourites, and around November 205 he died. His clique of favourites kept Ptolemy's death a secret, and about a year later murdered Queen Arsinoe, leaving the young successor at their mercy.

**11529779645762273337. Apollonis Of Cyzicus,** born in c 270 BC.

Notes for Attalus I Soter, King Of Pergamum:
Attalus I SOTER ("Preserver") (b. 269 BC--d. 197 BC), ruler of Pergamum from 241 to 197 BC, with the title of king after about 230. He succeeded his uncle, Eumenes I (reigned 263-241), and by military and diplomatic skill created a powerful Pergamene kingdom.

Attalus' mother, Antiochis, was a princess of the Seleucid house, a dynasty founded in Syria by one of the successors of Alexander the Great. Shortly before 230 Pergamum was attacked by the Galatians (Celts who had settled in central Anatolia in the 3rd century BC) because Attalus had refused to pay them

the customary tribute. Attalus crushed his enemy in a battle outside the walls of Pergamum, and, to mark the success, he took the title of king--the first of the Attalids to do so--and the cult name Soter. Next, he defeated the Seleucid king Antiochus Hierax in three battles and thereby gained control (228) over all the Seleucid domains in Anatolia except Cilicia in the southeast. But by 222 the Seleucids had won back almost all of this.

Attalus then turned to checking the expansionist ambitions of the Macedonian king Philip V (reigned 221-179). He fought against Philip with help from Rome and the Aetolians of south-central Greece during the inconclusive First Macedonian War (214-205). In 201 he took the side of the inhabitants of Rhodes in their war with Philip, and with them he brought about, by diplomatic approaches in Rome, a new Roman intervention against Macedonia (Second Macedonian War, 200-196). Shortly before the final defeat of Philip, Attalus died. The Pergamene ruler had also gained renown as a generous patron of the arts.

Antiochus I SOTER (b. 324 BC--d. 262/261), king of the Seleucid kingdom of Syria, who ruled about 292-281 BC in the east and 281-261 over the whole kingdom. Under great external pressures, he consolidated his kingdom and encouraged the founding of cities.

Antiochus was the son of Seleucus I, founder of the Seleucid kingdom, and his Sogdian queen, Apama. When an invasion of nomads threatened the eastern possessions of his father's realm (between the Caspian and Aral seas and the

Indian Ocean), Antiochus was appointed king (292). He restored some of the damage caused by the invaders and rebuilt three cities. Because his father still had interest in expanding the eastern trade, Antiochus dispatched a noted geographer and general to explore the environs of the Caspian Sea.

After his father's assassination in 281, Antiochus succeeded to the entire realm, but he was immediately beset by revolts in Syria (probably instigated by Egypt), by independence movements in northern Anatolia, and by a war led by Antigonus II Gonatas, ruler of the Greek cities and Macedonia. In 279, after the Gauls invaded Greece and almost ruined Antigonus, he and Antiochus signed a pact promising not to interfere with one another's territory. The next year, however, 20,000 Gauls crossed into Asia Minor, and the independent states in the northern part recruited them to harass Antiochus. He was preoccupied with the pacification of Syria until 275, when, utilizing Indian elephants brought from the east, he defeated the Gauls, who were afterward settled by their allies in Phrygia to make it a buffer state. The Ionian city-states that Antiochus had spared from the Gauls' ravages hailed him as a god and named him Soter ("Saviour"). In 275 the alliance with Antigonus, now fully in possession of Macedonia, was cemented by marriage to Antiochus' half sister.

Following the Gallic incursions in Greece, Antiochus encouraged Greek immigration to his realm and established many new cities in Asia Minor to serve as counterweights to the Gauls. He built other cities in Iran to forestall the Parthian threat to his eastern frontier, and he probably fostered a revival of Babylonian culture and religion to counteract Persian influence. At Babylon he rebuilt the ancient Esagila shrine, although he moved the city's populace to a great Seleucid city a short distance away on the Tigris River.

The aggressions of Ptolemy II of Egypt caused continuous friction with Antiochus. In 279 he lost Miletus, in southwestern Asia Minor, and in 276 the Egyptians invaded northern Syria. But Antiochus defeated his opponent, repelled him, and secured an alliance with the Egyptian ruler's half brother who ruled Cyrene. After Ptolemy married the energetic Arsinoe II, however, the war turned against the Seleucids, and about 273-272, Phoenicia and the coast of Asia Minor were lost to Egypt.

The continuous troubles in the west caused Seleucid control in the far eastern part of the empire to weaken. In 280 Antiochus made his eldest son king in the east, but he proved incompetent. Between 266 and 261 Antiochus was drawn into a war with Pergamum, and in 262 he suffered a defeat and lost additional territory. Soon afterward he died, leaving his son Antiochus II as successor.

Notes for Stratonice, Queen Of Syria:
In 294 a sensational scandal occurred at the court of Seleucus. Antiochus, his son by Apama, fell in love with his beautiful stepmother, Stratonice, and his unrequited passion affected his health. Seleucus gave him Stratonice, assigned him as commander in chief to the upper satrapies, and appointed him co-regent.

Cirenaica, región situada al noreste de Libia. Colonizada por los antiguos griegos, la Cirenaica se extendía originalmente a lo largo de la costa africana, desde lo que hoy es el golfo de Sidra al oeste, hasta 80 km al interior del delta del Nilo al este. La región es principalmente una meseta de unos 130 km de anchura, que desciende hacia el mar en una serie de terrazas. El clima mediterráneo, los numerosos oasis y la fertilidad de su suelo la convierten en una destacada región del norte de África. La colonización griega del territorio fue comenzada por Battus I (alrededor del siglo VII a.C.), el primero de los Battiadae, que fundó Cirene (la Shahhat actual) alrededor del año 630 a.C. Más tarde, los griegos fundaron otras cuatro ciudades notables: Teucheira, más tarde llamada Arsinoë (hoy Tukra); Barce (hoy al-Marj); Hespérides, más tarde Berenice (la Bengasi actual) y Apollonia (hoy Susah o Marsa Susa). En el año 450 a.C. aproximadamente, la monarquía fue derrocada y Cirenaica se convirtió en una república. Fue conquistada en el año 331 a.C. por Alejandro Magno y anexionada, alrededor del año 321 a.C., por el rey egipcio Tolomeo I Sóter. Bajo el reinado de los Tolomeos, Cirenaica se conoció como la Pentápolis, en reconocimiento a sus cinco importantes ciudades. Sin embargo, su economía sufrió una progresiva decadencia durante la dinastía tolemaica. En el año 96 a.C., Tolomeo Apión legó en su testamento la región de Cirenaica a los romanos, que más tarde la convirtieron en una provincia romana. Con la posterior decadencia del Imperio Romano, la región pasó gradualmente a ser dominada por los pueblos nativos camitas (véase camita). Los árabes la invadieron en el año 641 d.C. y a principios del siglo XVIII, se convirtió en una posesión turca, finalmente conocida como Bengasi. En septiembre de 1911, con el estallido de la guerra entre Italia y Turquía, Cirenaica fue ocupada por los italianos. Al final de la guerra, en octubre de 1912, Turquía cedió

Cirenaica y Trípoli (que se rebautizó como Tripolitania) a Italia, que las unificó en la colonia de Libia en 1934.

Notes for Ptolemy III, King Of Egypt:
Ptolemy III EUERGETES (Greek: Benefactor) (fl. 246-221 BC), Macedonian king of Egypt, son of Ptolemy II; he reunited Egypt and Cyrenaica and successfully waged the Third Syrian War against the Seleucid kingdom.

Almost nothing is known of Ptolemy's youth before 245, when, following a long engagement, hemarried Berenice II, the daughter of Magas, king of Cyrene; thereby he reunited Egypt and Cyrenaica, which had been divided since 258. Shortly after his accession and marriage, Ptolemy invaded Coele Syria, to avenge the murder of his sister, the widow of the Seleucid king Antiochus II. Ptolemy's navy, perhaps aided by rebels in the cities, advanced against Seleucus II's forces as far as Thrace, across the Hellespont, and also captured some islands off the Asia Minor coast, but were checked c. 245. Meanwhile, Ptolemy, with the army, penetrated deep into Mesopotamia, reaching at least Seleucia on the Tigris, near Babylon. According to classical sources he was compelled to halt his advance because of domestic troubles. Famine and a low Nile, as well as the hostile alliance between Macedonia, Seleucid Syria, and Rhodes, were perhaps additional reasons. The war in Asia Minor and the Aegean intensified as the Achaean League, one of the Greek confederations, allied itself to Egypt, while Seleucus II secured two allies in the Black Sea region. Ptolemy was pushed out of Mesopotamia and part of North Syria in 242-241, and the next year peace was finally achieved. Ptolemy managed to keep the Orontes River region and Antioch, both in Syria; Ephesus, in Asia Minor; and Thrace and perhaps also Cilicia.

Within Egypt, Ptolemy continued the colonization of al-Fayyum (the oasis-like depression southwest of Cairo), which his father had developed. He also reformed the calendar, adopting 311 as the first year of a "Ptolemaic Era." The Canopus decree, a declaration published by a synod of Egyptian priests, suggests that the true duration of the year (365 1/4 days) was now recognized, for an extra day was added to the calendar every four years. The new calendar failed, however, to achieve popular acceptance. The priests and classical sources also credited Ptolemy with the restoration of the divine statues plundered from the temples during Persian rule. In addition, the King initiated construction at Edfu, the Upper Egyptian site of a great Ptolemaic temple, and made donations to other temples.

Ptolemy avoided involvement in the wars that continued to plague Syria and Macedonia. He did, however, send aid to Rhodes, after earthquakes devastated the island, but he refrained from subsidizing the schemes of the Spartan king against Macedonia, though he granted him asylum in 222. In Asia Minor, when a pretender to one of the kingdoms, who was the instigator of much of the trouble there, sought asylum in Ptolemaic territory, Ptolemy promptly interned him. His policy was to maintain an equilibrium of power, guaranteeing the safety of his own territory. After declaring his son his successor, Ptolemy died, leaving Egypt at the peak of its political power, and internally stable and prosperous.

Notes for Berenice II, Queen Of Egypt:
Berenice II (b. c. 269--d. 221 BC), daughter of Magas, king of Cyrene (in modern Libya), whose marriage to Ptolemy III Euergetes reunited her country with Egypt.

Magas' queen, who favoured an alliance with the Seleucid dynasty of Syria, tried to thwart the marriage by summoning Demetrius the Fair, a Macedonian prince, as a husband for Berenice. The princess, however, arranged Demetrius' murder and married Ptolemy about 245. When Ptolemy set forth to avenge the murder of his sister (the widow of Antiochus II) in Syria, Berenice dedicated a lock of her hair for his safe return. According to the court astronomer, it was transferred to heaven, where it formed a new constellation that was consequently named Coma Berenices, "Hair of Berenice." Berenice and Ptolemy had four children: the future Ptolemy IV Philopator, Arsinoe III, Magas, and Berenice, who died as a child. The queen survived her husband, but her son Ptolemy IV linked her to a plot with her father, Magas, and had her poisoned.

[MARINOS HASTA PERSIA.FTW]

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his
general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed

by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

Notes for Seleucus I, General of Alexander III, The Great:
[MARINOS HASTA PERSIA.FTW]

Seleucus I NICATOR (b. 358/354 BC, Europus, Macedonia--d. August/September 281, near Lysimachia, Thrace), Macedonian army officer, founder of the Seleucid kingdom. In the struggles following the death of Alexander the Great, he rose from governor of Babylon to king of an empire centring on Syria and Iran.

Early life and ascent to power

Seleucus was the son of Antiochus, a general of Philip II of Macedonia, the father of Alexander the Great. Seleucus participated in the conquest of the Persian empire as one of Alexander's officers, and in 326 he commanded the Macedonian infantry against King Porus of India in battle on the Hydaspes River. In 324 Alexander ordered a mass wedding ceremony at Susa (in Persia) to put into practice his ideal of uniting the peoples of Macedonia and Persia. On this occasion Seleucus married Apama, the daughter of Spitamenes, the ruler of Bactria. Of all the Macedonian nobles, he was the only one who did not repudiate his wife after Alexander's death.

After Alexander died (323), Seleucus was given the command of the hetairoi (companions) cavalry and took part in the regent Perdiccas' campaign to oust Ptolemy, the governor (satrap) of Egypt. In Egypt, however, he joined with others in the assassination of Perdiccas. When the empire was divided in 321, he was given the governorship (satrapy) of Babylon. At the same time Antigonus Monophthalmus (the One-Eyed) had been placed in command of a campaign against Eumenes of Cardia, a supporter of Perdiccas. In 317 Seleucus aided Antigonus but, after Eumenes' execution in 316, Antigonus demanded that Seleucus give an accounting of the income from his satrapy. Seleucus refused to give the accounting and escaped capture by fleeing to Ptolemy in Egypt.

From 316 to 312 Seleucus remained in Ptolemy's service. He took the initiative in forging a coalition among Ptolemy, Lysimachus (the ruler of Thrace), and Cassander (who laid claim to Macedonia) against Antigonus, whose desire to become the ruler of the whole of Alexander's empire was a threat to them all. In the resulting coalition war (315-311), Seleucus was made one of Ptolemy's generals and jointly with him commanded the Ptolemaic troops that defeated

the force of Demetrius, the son of Antigonus, at the Battle of Gaza in southern Syria
(312).

Seleucus once again turned his attention to returning to Babylonia, and in August 312 he was able to reconquer Babylon with only a small army. This conquest marked the beginning of the Seleucid era, which is dated Dios 1 (Oct. 7), 312, in the Macedonian calendar and Nisan 1 (April 3), 311, in the Babylonian calendar. Antigonus ordered Nicanor, one of his generals, to invade Babylonia from the east and his son Demetrius to attack it from the west, but they failed to oust Seleucus. When Antigonus made peace with his enemies in 311, Seleucus was not included.

Consolidation of gains.

Little is known about the next few years of Seleucus' reign; he presumably used them to consolidate his gains. In the year 305 he followed the example of the other successors and assumed the title of king (basileus). He embarked on an expansion of his kingdom throughout the Iranian east (the upper satrapies) as far as India, but his advance was eventually halted by Candragupta, the founder of the Maurya dynasty of India. In a pact concluded by the two potentates, Seleucus agreed to territorial concessions in exchange for 500 elephants.

Developments in the west also caused Seleucus to end his campaign in India (303). He had joined a coalition that Ptolemy, Cassander, and Lysimachus had once again formed against Antigonus and Demetrius. In the winter of 302 Seleucus was back in Asia Minor and, together with Cassander and Lysimachus, defeated Antigonus in the Battle of Ipsus (301). The victors divided the lands of their enemy among them, with Seleucus being given Syria. The southern part
of Syria, Coele Syria, had in the meantime been occupied by Ptolemy, who had not taken part in the war. This gave rise to the long series of Syrian wars between the Seleucids and Ptolemies. For the time being, however, Seleucus declined to enforce his claim; he merely transferred his capital from Seleucia on the Tigris to the newly founded city of Antioch on the Orontes (301-300).

Ptolemy, anxious to improve relations with Lysimachus, had given him his daughter Arsinoe in marriage. To provide a counterbalance, Seleucus asked for the hand of Stratonice, the daughter of Demetrius, and in 298 the wedding was held with much pomp at Rhosus in Syria. Soon, however, Seleucus' territorial demands (e.g., the surrender of Cilicia and the cities of Tyre and Sidon) ruptured the previously harmonious relationship with Demetrius.

In 294 a sensational scandal occurred at the court of Seleucus. Antiochus, his son by Apama, fell in love with his beautiful stepmother, Stratonice, and his unrequited passion affected his health. Seleucus gave him Stratonice, assigned him as commander in chief to the upper satrapies, and appointed him co-regent.

In 285 Seleucus took Demetrius prisoner, thus foiling his attempt to conquer Asia, and interned him in Apamea, where he died in 283. Subsequently, Seleucus intervened in dissensions in the house of Lysimachus, who had had his son Agathocles assassinated. In February 281 Lysimachus fell in a battle against Seleucus at Corupedium, and Seleucus gained control of Lysimachus' kingdom. He was now near his goal of reestablishing Alexander's empire. He crossed over to Europe to enter Macedonia, but at the end of August or beginning of September 281, he was murdered by Ptolemy Ceraunus, who had been passed over by his father, Ptolemy, as successor to the Egyptian throne. Seleucus' son and successor, Antiochus I, entombed his father's ashes in Seleucia, initiated (probably) the posthumous cult of his father, and ordered his veneration as Zeus Nicator.

Seleucus was an energetic ruler, creating the Seleucid Empire, which gained its greatest expansion under his rule. He took great interest in the administration of his territories and founded many new cities. He also encouraged scientific research: Patrocles explored the Caspian Sea and Megasthenes the Ganges River. A bronze bust--a very impressive likeness of him, conveying his imposing personality--was found in Herculaneum (in Italy) and is now in Naples.

Notes for Demetrius I Poliorcetes, King Of Macedonia:

Demetrius I POLIORCETES (b. 336 BC, Macedonia--d. 283, Cilicia [now in Turkey]), king of Macedonia from 294 to 288 BC.

Demetrius was the son of Alexander the Great's general Antigonus I Monophthalmus, in whose campaigns he commanded with distinction and whose empire, based in Asia, he attempted to rebuild. Unsuccessful against Ptolemy I Soter, satrap of Egypt, and against the Nabataeans, he liberated Athens from the Macedonian Cassander in 307 BC and in 306 decisively defeated Ptolemy at Salamis (Cyprus). From his unsuccessful siege of Rhodes (305) he won the title
Poliorcetes ("the Besieger"). Recalled by his father from Greece, he fought in the Battle of Ipsus, in which his father was killed and lost much of his empire (301). Demetrius kept a foothold in Greece and in 294 reoccupied Athens and established himself as king of Macedonia, but in 288 he was driven out by his rivals Lysimachus and Pyrrhus. He finally surrendered to Seleucus I Nicator in Cilicia (285) and died there (283). He is the subject of one of Plutarch's Lives.

Notes for Ptolemy II, King Of Egypt:
Ptolemy II PHILADELPHUS (Greek: Brother-loving) (b. 308 BC, Cos--d. 246), king of Egypt (285-246 BC), second king of the Ptolemaic dynasty, who extended his power by skillful diplomacy, developed agriculture and commerce, and made Alexandria a leading centre of the arts and sciences.

Life

Reigning at first with his father, Ptolemy I Soter, he became sole ruler in 283-282 and purged his family of possible rivals. This dynastic strife led also to the banishment of his first wife, Arsinoe I, daughter of King Lysimachus of Thrace. Ptolemy then married his sister, Arsinoe II, an event that shocked Greek public opinion but was celebrated by the Alexandrian court poets. Taking advantage of the difficulties of the rival kingdoms of the Seleucids and Antigonids, Ptolemy II extended his rule in Syria, Asia Minor, and the Aegean at their expense and asserted at the same time his influence in Ethiopia and Arabia. Egyptian embassies to Rome as well as to India reflect the wide range of Ptolemy's political and commercial interests.

While a new war with the Seleucids (from 274 to 270) did not affect the basic position of the rival kingdoms, the so-called Chremonidean War (268?-261), stirred up by Ptolemy against Antigonus II Gonatas, king of Macedonia, resulted in the weakening of Ptolemaic influence in the Aegean and brought about near disaster to Ptolemy's allies Athens and Sparta. Ptolemy was no more successful in the Second Syrian War (c. 260-253), fought against the coalition of the Seleucid king Antiochus II and Antigonus Gonatas. The unsuccessful course of the military operations was compensated for, to a certain degree, by the diplomatic skill of Ptolemy, who first managed to lure Antigonus into concluding a separate peace (255) and then brought the war with the Seleucid Empire to an end by marrying his daughter, Berenice--provided with a huge dowry--to his foe Antiochus II. The magnitude of this political masterstroke can be gauged by the fact that Antiochus, before marrying the Ptolemaic princess, had to dismiss his
former wife, Laodice. Thus freed for the moment from Seleucid opposition and sustained by the considerable financial means provided by the Egyptian economy, Ptolemy II devoted himself again to Greece and aroused new adversaries to Antigonid Macedonia. While the Macedonian forces were bogged down in Greece, Ptolemy reasserted his influence in the Aegean, making good the setback suffered during the Chremonidean War. He further improved his position by arranging for the marriage of his son (and later successor) Ptolemy III Euergetes to the daughter of King Magas of Cyrene, who had proved so far a very troublesome neighbour. Not aiming at outright hegemony (even less imperialistic conquest) in the Hellenistic world of the eastern Mediterranean, Ptolemy II tried nonetheless to secure for Egypt as good a position as
possible, holding at large his rivals beyond a wide buffer zone of foreign possessions. Without being completely successful, he managed to let his allies bear the brunt of the heaviest reverses, healing his own military wounds with diplomatic remedies. The influence on Ptolemy of his wife and sister Arsinoe II, particularly in foreign affairs, was certainly substantial, though not as extensive as claimed by some contemporary authors.

Influence.

Ptolemy II's record in domestic affairs is no less impressive. From pharaonic times onward, agriculture and the work of artisans in Egypt had been highly organized. Under Ptolemy's supervision and with the help of Greek administrators, this system developed into a kind of planned economy. The peasant masses of the Nile Valley provided cheap labour, so that the introduction of slavery on a broad basis was never considered an economic necessity in Ptolemaic Egypt. Ptolemy II became a master at the fiscal exploitation of the Egyptian countryside; the capital, Alexandria, served as the main trading and export centre. Ptolemy II displayed a vivid interest in Greek as well as in Egyptian religion, paid visits to the sanctuaries in the countryside, and spent large sums erecting temples. Anxious to secure a solid position for, and religious elevation of, his dynasty, the King insisted upon divine honours not only for his parents but also for his sister and wife Arsinoe II and himself as theoi adelphoi ("brother gods"). He thus became one of the most ardent promoters of the Hellenistic ruler cult, which in turn was to have a far-reaching influence on the cult of the Roman emperors.

Under Ptolemy II, Alexandria also played a leading role in arts and science. Throughout the whole Mediterranean world the King acquired a reputation for being a generous patron of poets and scholars. Surrounding himself with a host of court poets, such as Callimachus and Theocritus, he expanded the library and financed the museum, a research centre founded as a counterweight to the more antimonarchial Athenian schools. Learning there was not confined to philosophy and literature but extended also to include mathematics and natural sciences. The age of Ptolemy II coincided with the apex of Hellenistic civilization; its vigour and glamour were a result of the still fresh forces of Greek leadership in the eastern Mediterranean. Ptolemy II was no man of peace, but neither was he one of the warlike Hellenistic soldier-kings. A prudent and enlightened ruler, he found his strength in diplomatic ability and his satisfaction in a vast curiosity of mind.

Notes for Arsinoe I of Egypt.:
Arsinoe I (fl. early 3rd century BC), queen of Egypt, daughter of Lysimachus, king of Thrace, and first wife of Ptolemy II Philadelphus. Although she bore Ptolemy three children, including his successor, she was unable to prevent him from repudiating her and marrying his sister, Arsinoe II.

Arsinoe I was married to Ptolemy about 282 as part of the alliance between Thrace and Egypt against Seleucus I Nicator of Syria. Three years later, Philadelphus' ambitious sister arrived in Egypt, and, probably at her instigation, charges of conspiring to assassinate Ptolemy were soon brought against Arsinoe. She was banished to Coptos, a city of Upper Egypt near the Wadi Hammamat, while her rival married Ptolemy and adopted her children.

Arsinoe survived at Coptos, where a stela referring to her has been found; on it she is called king's wife, but her name is not enclosed in the royal cartouche (an oval figure on monuments enclosing a sovereign's name), as is customary for a queen.

Cirenaica, región situada al noreste de Libia. Colonizada por los antiguos griegos, la Cirenaica se extendka originalmente a lo largo de la costa africana, desde lo que hoy es el golfo de Sidra al oeste, hasta 80 km al interior del delta del Nilo al este. La región es principalmente una meseta de unos 130 km de anchura, que desciende hacia el mar en una serie de terrazas. El clima mediterrineo, los numerosos oasis y la fertilidad de su suelo la convierten en una destacada región del norte de Ifrica.
La colonización griega del territorio fue comenzada por Battus I (alrededor del siglo VII a.C.), el primero de los Battiadae, que fundó Cirene (la Shahhat actual) alrededor del ano 630 a.C. Mis tarde, los griegos fundaron otras cuatro ciudades notables: Teucheira, mis tarde llamada Arsinoe (hoy Tukra); Barce (hoy al-Marj); Hespérides, mis tarde Berenice (la Bengasi actual) y Apollonia (hoy Susah o Marsa Susa). En el ano 450 a.C. aproximadamente, la monarquka fue derrocada y Cirenaica se convirtió en una repsblica. Fue conquistada en el ano 331 a.C. por Alejandro Magno y anexionada, alrededor del ano 321 a.C., por el rey egipcio Tolomeo I Sóter. Bajo el reinado de los Tolomeos, Cirenaica se conoció como la Pentipolis, en reconocimiento a sus cinco importantes ciudades. Sin embargo, su economka sufrió una progresiva decadencia durante la dinastka tolemaica. En el ano 96 a.C., Tolomeo Apión legó en su testamento la región de Cirenaica a los romanos, que mis tarde la convirtieron en una provincia romana. Con la posterior decadencia del Imperio Romano, la región pasó gradualmente a ser dominada por los pueblos nativos camitas (véase camita). Los irabes la invadieron en el ano 641 d.C. y a principios del siglo XVIII, se convirtió en una posesión turca, finalmente conocida como Bengasi. En septiembre de 1911, con el estallido de la guerra entre Italia y Turquka, Cirenaica fue ocupada por los italianos. Al final de la guerra, en octubre de 1912, Turquka cedió Cirenaica y Trkpoli (que se rebautizó como Tripolitania) a Italia, que las unificó en la colonia de Libia en 1934.

Notes for Eumenes, Macedonian General:
Eumenes fué un general de Alejandro. Nació en Cardia, en el Quersoneso de Tracia, el ano 36I a. de J. C. Parece que era todavka un nino cuando Filipo de Macedonia pasó por Cardia, y admirado de la destreza del muchacho en los ejercicios fksicos, se lo llevó consigo, confiindole el cargo de secretario. A la muerte de Filipo quedó al servicio de Alejandro, que le distinguió siempre con especial benevolencia, y en ocasiones tuvo que apaciguar a los cortesanos, celosos de tal preponderancia, singularmente a su amigo Efestión. Otra prueba de la amistad de que gozaba al lado de Alejandro es que le dió por esposa a una hermana de su propia mujer, Barsine, hija de Artabaces. En vida de Alejandro sólo se dió a conocer como polktico; mas a su muerte apareció en él el caudillo militar, que dirigió todos sus esfuerzos a apaciguar las luchas intestinas, tratando de conciliar los partidos rivales. Cuando se repartieron los territorios ganados por Alejandro, a él le correspondió la Capadocia. Asociado a Perdicas llegó a ser el mis firme apoyo de la familia real. Cuando Perdicas emprendió una campana contra Ptolomeo, Eumenes recibió de él el mando del Asia Menor y el encargo de que vigilara el Helesponto contra Critero y Antkpatro, al que venció al frente de un fuerte ejército. Poco después venció también a Critero y a Neoptólemo, que se habka aliado con el primero. La muerte de Critero, muy amado de los macedones que tenka en su ejército, le atrajo la enemistad de las tropas; resistió, no obstante, las insidias de Antkgono, que le sitió en Nora, en los confines de la Capadocia. Antkgono no pudo vencerle en esta ocasión, y la muerte de Antkpatro le impulsó a proponer una paz que fué aceptada por Eumenes después de conseguir algunas mejoras en las condiciones estipuladas en favor de Olimpia, madre de Alejandro y demis miembros de la familia reinante. Pero Antkgono no se mostró propicio a aceptar tales mejoras y la lucha se renovó, marchando Eumenes a Cilicia, en el Asia Menor, y de allk a Fenicia, a la Susiana y a Persépolis, donde pasó un invierno. En dos encuentros que tuvieron lugar entre Eumenes y Antkgono, resultó vencedor este sltimo por la indiseiplina de las tropas de Eumenes, hasta que Antkgono se atrajo a los macedones que figuraban en el ejército de Eumenes, lo cuales le dieron muerte, con lo cual desapareció el sltimo sostén de la familia real de Macedonia. Segsn algunos autores, se le deben las "Ephemerides Alexandri", que, como indica su nombre, son unas notas diarias de la expedición de Alejandro, muy estimadas en la antiguedad.

Notes for Spitamenes, Satrap Of Bactria (329-328):
SATRAP = the governor of a province in ancient Persia.

Bessus was in Bactria raising a national revolt in the eastern satrapies with the usurped title of Great King. Crossing the Hindu Kush northward over the Khawak Pass (11,650 feet), Alexander brought his army, despite food shortages, to Drapsaca (sometimes identified with modern Banu [Andarab], probably farther north at Qunduz); outflanked, Bessus fled beyond the Oxus (modern Amu Darya), and Alexander, marching west to Bactra-Zariaspa (modern Balkh [Wazirabad] in Afghanistan), appointed loyal satraps in Bactria and Aria. Crossing the Oxus, he sent his general Ptolemy in pursuit of Bessus, who had meanwhile been overthrown by the Sogdian SPITAMENES. Bessus was captured, flogged, and
sent to Bactra, where he was later mutilated after the Persian manner (losing his nose and ears); in due course he was publicly executed at Ecbatana.

From Maracanda (modern Samarkand) Alexander advanced by way of Cyropolis to the Jaxartes (modern Syrdarya), the boundary of the Persian Empire. There he broke the opposition of the Scythian nomads by his use of catapults and, after defeating them in a battle on the north bank of the river, pursued them into the interior. On the site of modern Leninabad (Khojent) on the Jaxartes, he founded a city, Alexandria Eschate, "the farthest." Meanwhile, SPITAMENES had raised all Sogdiana in revolt behind him, bringing in the Massagetai, a people of the Shaka confederacy. It took Alexander until the autumn of 328 to crush the most determined opponent he encountered in his campaigns. Later in the same year he attacked Oxyartes and the remaining barons who held out in the hills of Paraetacene (modern Tadzhikistan); volunteers seized the crag on which Oxyartes had his stronghold, and among the captives was his daughter, Roxana. In reconciliation Alexander married her, and the rest of his opponents were either won over or crushed.

Bactria,

also called BACTRIANA, or ZARIASPA, ancient country lying between the mountains of the Hindu Kush
(Paropamisus) and the Amu Darya (ancient Oxus River) in what is now part of Afghanistan, Uzbekistan, and Tajikistan. Bactria was especially important between about 600 BC and about AD 600, serving for much of that time as a meeting place not only for overland trade between East and West but also for the crosscurrents of religious and artistic ideas. Bactria's capital was Bactra,

also called Bactra-Zariaspa (probably modern Balkh, ancient Vahlika). Bactria was a fertile country, and a profusion of mounds and abandoned water channels testifies to its ancient prosperity.

The first written records of Bactria are Achaemenian. The region was probably subdued by Cyrus II the Great in the 6th century BC and remained an Achaemenian province for the next 200 years. When Alexander the Great defeated Darius III, the Bactrian satrap, Bessus, tried unsuccessfully to organize resistance in the East. Upon the death of Alexander (323 BC) Bactria passed under the rule of Seleucus I Nicator.

About 250 BC either Diodotus, the Seleucid satrap of Bactria, or his son of the same name founded an independent kingdom. The Seleucid king Antiochus III the Great defeated their successor, the usurper Euthydemus, but continued to recognize his independence. Euthydemus' successors advanced into the Hindu Kush and northwestern India, where they established the Indo-Greek branch of the kingdom. At the height of their power they ruled almost all of what is now Afghanistan, parts of Soviet Central Asia, and a large area in Pakistan. Consequently, Hellenistic influence on the culture of Central Asia and northwestern India has been considerable. Hellenistic traditions are especially evident in art, architecture, coinage, and script.

Sometime before 128 BC Greek rule north of the Hindu Kush was challenged by a people known to the Chinese as Yüeh-chih. By 128 BC the Greeks had become Yüeh-chih tributaries, and soon afterward the Yüeh-chih occupied Bactria. They probably were an Iranian people and included the Tocharі, whose name was subsequently applied to the whole area (Tocharian kingdom). In the 1st century AD the new rulers of Bactria extended their rule into northwestern India; that movement is associated with a group known as the Kushans, under whom the country became a centre of Buddhism. In the latter half of the 4th century the Hephthalites (originally a tribe of the Yüeh-chih) settled in Bactria, and for almost two
centuries they engaged in wars with the Sasanians. In AD 565 the western Turks overthrew the Hephthalites and ruled the area until the Muslim conquest in the middle of the 7th century.

Notes for Antigonus I Monophtalmus:
Antigonus I MONOPHTHALMUS ("One-Eyed"), also called ANTIGONUS I CYCLOPS (b. 382 BC--d. 301, Ipsus, Phrygia, Asia Minor [now in Turkey]), Macedonian general under Alexander the Great who founded the Macedonian dynasty of the Antigonids (306-168 BC), becoming king in 306. An exceptional strategist and combat leader, he was also an astute ruler who cultivated the friendship of Athens and other Greek city-states.

Military campaigns.

In 333 Alexander had appointed Antigonus satrap of Phrygia, and upon Alexander's death he also received the governorship of Pamphylia and Lycia from the regent of the Macedonian empire, Perdiccas. He then formed an alliance against Perdiccas with Antipater, the governor of Macedonia, and with Ptolemy of Egypt, Lysimachus of Thrace, and Craterus (all of whom had served under Alexander). Perdiccas was murdered, and Antipater became regent of the empire. In 321 Antipater appointed Antigonus commander in chief of his army in Asia and sent him against Eumenes, the satrap of Cappadocia and an adherent of Perdiccas. Antigonus defeated Eumenes and then besieged him unsuccessfully in the mountain fortress Nora. Polyperchon succeeded Antipater as regent, and Antigonus joined forces against him with Cassander (Antipater's son), Ptolemy, Lysimachus, and Eumenes in 319. When Eumenes, his rival in Asia Minor (Anatolia), went over to Polyperchon, Antigonus defeated him with the aid of Seleucus and Peithon (the satraps of Babylonia and Media, respectively)
at Gabiene. Then, wishing to eliminate all possible rivals, Antigonus had both Eumenes and Peithon executed; Seleucus escaped to Egypt.

Antigonus was now in complete control of Asia Minor, but Ptolemy, Lysimachus, Cassander, and Seleucus allied themselves against him in the first coalition war (315-311) in an attempt to thwart his plan of reuniting Alexander's empire. Antigonus occupied Syria and proclaimed himself regent. In order to win the support of the Greek city-states, whose resistance to subjugation presented the chief stumbling block to the formation of a Hellenistic monarchy, he announced to his assembled army that all the Greeks should be free, autonomous, and ungarrisoned. This political slogan was to be sounded again and again--almost immediately by Ptolemy and for a final time by the Romans in 196. With the aid of his officers in Greece, Antigonus drove out Cassander's Macedonian forces of occupation there and formed the island cities in the Aegean into the League of the Islanders, preparatory to his invasion of Greece. His ally, the city of Rhodes, furnished him with the necessary fleet.

While he was engaged in conquering Caria, his son, Demetrius Poliorcetes, was defeated at Gaza by Ptolemy and Seleucus (312). Seleucus returned to his former province, Babylonia. In view of this new threat from the East, Antigonus decided to make peace with all of his adversaries except Seleucus. All of the diadochoi (Alexander's successors) confirmed the existing boundaries and the freedom of the Greek cities. Antigonus, no longer regent but merely strategos

(officer in charge) of the whole of Asia, was to rule in Syria and from the Hellespont to the Euphrates.

Activities in Greece.

Then Ptolemy attacked Cilicia, and the second coalition war (310-301) against Antigonus broke out. In Greece in 307, Antigonus' son Demetrius ousted Demetrius of Phaleron, Cassander's governor of Athens, and reestablished the old Athenian constitution. The grateful Athenians honoured Antigonus and Demetrius as divine saviours (theoi soteres). Cassander's influence in Greece was now broken, and in 306 Demetrius defeated Ptolemy's fleet near Salamis on the island of Cyprus and conquered the island. This victory gave Antigonus control of the Aegean, of the eastern Mediterranean, and of all of the Near East except Babylonia. The assembled army proclaimed him king, and his friends adorned him with the diadem. For his part, he appointed Demetrius king and co-regent and sent him the diadem. This was to become a traditional ceremony in the Hellenistic monarchy.

In 305, after Antigonus had vainly attacked Egypt, Ptolemy also assumed the title of king, and Cassander, Lysimachus, and Seleucus followed suit. The partition of Alexander's empire into five states had now been formally established. In 305 Antigonus sent Demetrius to conquer Rhodes, which had refused him armed support against Ptolemy. After a year's unsuccessful siege he concluded a peace treaty and an alliance with the island state, guaranteeing it autonomy and
neutrality in his conflicts with Ptolemy. This concession was necessary because in the meantime Cassander had invaded Attica and was besieging Athens. Demetrius drove him out of central Greece, and the Athenians bestowed on him a new religious honour, synnaos ("having the same temple") of the temple of the goddess Athena.

In 303 he occupied Corinth, Sicyon, and Argos in the Peloponnese, and Achaea, Elis, and almost all of Arcadia joined his side. In 302 Antigonus and Demetrius crowned their success by renewing the pan-Hellenic league, which Philip II of Macedonia had formed in 337. Ambassadors from all the Hellenic states--with the exception of Sparta, Messenia, and Thessaly--elected Antigonus and Demetrius protectors of the new league at Corinth. It was to be an "eternal" treaty, extending to the descendants of the kings. Each member state furnished a contingent of troops for a league army that was commanded by the kings or their deputies. The
league was to ensure a general peace in Hellas, but first and foremost it was to aid Antigonus against Cassander.

Final campaigns.

Now at the zenith of his power, Antigonus demanded Cassander's unconditional submission. He wanted possession of Macedonia, the native land of his dynasty, and to establish his dominion over Alexander's former empire. The other diadochoi, however, warned by Cassander's fate, now joined forces to attack the omnivorous old man. From Babylonia, Seleucus invaded Asia Minor,

Ptolemy attacked Syria, and Lysimachus moved into the western part of Asia Minor. Docimus, the regent of Phrygia, and Phoenix, the strategos of Lycia, deserted Antigonus. He, in turn, recalled Demetrius, left his capital city, Antigoneia (which he had founded on the Orontes in 306), and crossed the Taurus Mountains. Lysimachus, who was waiting for Seleucus, avoided an engagement. In vain Antigonus sent a corps of raiders into Babylonia in order to divide his
enemies' forces. In 301 the united armies of Lysimachus and Seleucus engaged the forces of Antigonus and Demetrius at Ipsus in Phrygia. Demetrius made the error of pursuing the enemy's cavalry too far, and as a result Antigonus, age 80, lost the battle and his life.

Antigonus had been an excellent strategist who, until then, had never lost a battle. He had a genuine admiration for Greek civilization. He founded several cities, especially in Asia Minor, and united several small communities into unitary, large centres: Lebedus (Lebedos) and Teos, for example. Several Greek artists graced his court; Apelles painted his portrait in profile because of his missing eye (the cause of which is unknown).

Notes for Antipater, Regent of Macedonia (334-23):
Antkpatro (c.398-319a.C.), general macedonio, lugarteniente de Alejandro Magno. Cuando Alejandro comenzó su victorioso avance a través de Asia Menor contra los persas en el 334a.C., dejó a Antkpatro como snico encargado de los asuntos de Macedonia. Antkpatro cumplió con los deberes de su cargo con gran habilidad, al reprimir insurrecciones en Tracia y Esparta y apoyar a Alejandro con nuevos escuadrones desde su territorio. En el reparto del Imperio de Alejandro tras su muerte en el 323a.C., el gobierno de Macedonia fue otra vez asignado a Antkpatro. Pronto fue llamado para defender Macedonia en la guerra de Lamka contra la alianza de los estados griegos que intentaban recuperar su independencia. En un principio cosechó derrotas pero en el 322a.C., con la ayuda de su yerno Cratero, sofocó a los rebeldes griegos.
A la guerra de Lamka le siguió otra contra el general macedonio Perdicas, a quien Antkpatro también venció. Después de la muerte de Perdicas en el 321a.C., Antkpatro fue nombrado para ejercer la regencia suprema de Macedonia y para proteger a los hijos de Alejandro. Realizó una nueva división del reino pero cuando murió, poco tiempo después, dejó la regencia a su companero Poliperconte y dio un cargo subordinado a su hijo Casandro, quien se convirtió en el 310a.C. en rey de Macedonia.

Antipater (b. c. 397 BC--d. 319), Macedonian general, regent of Macedonia (334-23) and of the Macedonian Empire (321-319) whose death signalled the end of centralized authority in the empire. One of the leading men in Macedonia at the death of Philip II in 336, he helped to secure the succession to the Macedonian throne for Philip's son, Alexander the Great, who upon departure for the conquest of Asia (334) appointed Antipater regent in Macedonia with the title of general in Europe. Antipater's main task was to hold the northern frontiers against hostile tribes and to keep order among the Greek states. He ruled Greece by cooperating with the League of Corinth but was unpopular because he supported oligarchic governments. The settlement of the satrapies (provinces) of the Macedonian Empire by the new regent, Perdiccas, at Babylon in 323, immediately after Alexander's death, left Antipater in control of Macedonia and Greece, though as former regent his status in relation to Perdiccas was not clearly defined. Antipater then took the side of the Macedonian generals Antigonus, Seleucus, and Ptolemy, who were opposed to the claims of Perdiccas. By the settlement at Triparadisus, Syria (321), after Perdiccas'
death, Antipater became regent of the Macedonian Empire for the two kings: the intellectually retarded Philip III Arrhidaeus and the infant Alexander IV.

POLITICAL DEVELOPMENTS

Alexander's successors.

Nothing shows the personality of Alexander the Great more clearly than the way in which people who had seemed pygmies at his side now became leaders of the world he had left behind. Blood still counted: the only male relative, a mentally impaired, illegitimate son of Philip, was proclaimed king as Philip III Arrhidaeus (c. 358-317), together with Rhoxane's son Alexander IV (323-310), born after his father's death in August; both were mere figureheads. For the moment Antipater was confirmed in authority in Macedon and Greece. At Babylon power was shared by two senior officers, Perdiccas (c.
365-321) and Craterus (c. 370-321). By common consent, Alexander's ongoing plans were abandoned. His generals had to be content with the office of governor. Antigonus Monophthalmos ("The One-eyed"; c. 382-301), like Antipater, was not in Babylon at the time of Alexander's death in 323. For almost 10 years he had been governing Phrygia and had shown himself a brave soldier and ompetent administrator. His firmness and tact were popular with the Greek cities. Of the generals in Babylon, it was Ptolemy (c. 367/366-283) who

calculated from the first that the empire would not hold together. He secured for himself the governorship of Egypt, where he aspired to set up an independent kingdom. Lysimachus (c. 360-281) was given the less attractive assignment of governing Thrace. Two of the others, noted for their physical and military prowess, Leonnatus and Seleucus, waited on events. The soldiers discounted Eumenes of Cardia, who bore the main responsibility for civil administration, but he knew more about the empire than anyone else.

An uprising by Greek mercenaries who had settled in Bactria but wanted to return to Greece was crushed. Trouble in Greece, led by the Athenians and aimed at liberating the cities from Macedonian garrisons, was tougher to control. Sparta refused to participate, as did the islands, but a coalition of Athens with Argos, Sicyon, Elis, and Messenia, supported by Boeotians, Aetolians, and Thessalians, was a formidable challenge to Antipater's authority. For a time Antipater was hard-pressed in Lamia (the war of 323-322 is known as the Lamian War). Leonnatus intervened, nominally in support but in fact ambitious to usurp Antipater's power; he was killed in action, however. In the end Antipater won, Athens capitulated, and Demosthenes (the voice and symbol of anti-Macedonian feeling) committed suicide. Antipater reestablished Macedonian authority autocratically, with no nonsense about a "free" League of Corinth.

The story of the jockeying for power during the next two decades or so is inordinately complex. First Perdiccas, governing in the name of the two kings with the support of Eumenes, was charged with personal ambition and was assassinated. The armies made Antipater regent (Craterus had been killed in battle), and Antigonus, with Antipater's son Cassander (c. 358-297) as second-in-command, was placed in charge of the armies in Asia. Ptolemy was secure in Egypt; Seleucus (c. 358-281), governor of Babylon, and Lysimachus in Thrace continued to watch and wait; and Eumenes, a non-Macedonian with a fortune behind him, could claim to represent the kings against the ambitions of generals and governors.

Then, in 319, Antipater died and was succeeded by a senior commander but maladroit politician named Polyperchon, who tried to win the Greeks of the mainland by a new proclamation of their liberties. The result was that the Athenians used their freedom to execute the pro-Macedonians, including the worthy but compromising Phocion. War flared up. Eumenes, allied with Polyperchon, challenged Antigonus and secured Babylon, but he was betrayed and killed in 316. Seleucus escaped to Egypt. Polyperchon's position was weak, and he was soon ousted by the able, up-and-coming Cassander. In becoming master of Macedon and most of Greece, Cassander rebuilt Thebes and put the Aristotelian Demetrius of Phalerum in charge of Athens. Olympias, Alexander the Great's terrible mother, had eliminated Philip III. Cassander had her put to death, while keeping Rhoxane and Alexander IV under his protection--or guard.

Antigonus was now the dominant figure of the old brigade. Cassander, Ptolemy, and Lysimachus formed a coalition against him. For four years (315-311) they fought indecisively. Antigonus showed himself energetic, resourceful, and imaginative, but he could not strike a decisive blow. The only major change

came in the brilliant coup by which Seleucus succeeded in recovering Babylon. In 311 the four leaders agreed to divide the world, leaving Ptolemy with Egypt and Cyprus, Antigonus with Asia, Lysimachus with Thrace, and Cassander with Macedonia and Greece, but only until Alexander IV came of age in 305. Seleucus was left out.

Royal blood, however, was quickly forgotten in the pursuit of power. Cassander murdered Rhoxane and young Alexander in 310, soon after Antigonus had vainly tried to crush Seleucus. Seleucus, however, held on to a damaged Babylon and the eastern provinces, except for India, which he had to yield to the Indian king Chandragupta. Antigonus now had the effective support of his brilliant son Demetrius (336-283), known as Poliorcetes, or Besieger, who ousted the other Demetrius and restored the democracy and eventually the League of Corinth; he was hymned with divine honours and given the Parthenon as his palace. Demetrius, also in 306, crushed Ptolemy in a naval battle and secured Cyprus and the Aegean, though he failed in a famous siege of Rhodes (305-304). Antigonus and Demetrius now proclaimed themselves joint kings in succession to Alexander. Antigonus, however, failed to conquer Egypt, and the other rulers also took the title of king. Cassander, Lysimachus, Seleucus, and Ptolemy formed an alliance against Antigonus and Demetrius, and at Ipsus in 301 the allies, with the help of a force of elephants brought from India by Seleucus, defeated and killed Antigonus. Demetrius escaped, retaining Tyre and Sidon and command of the sea. Lysimachus took large portions of Anatolia; Seleucus assumed control over Mesopotamia and Syria, except for a part in the south occupied de facto by Ptolemy; and Cassander was content with Macedonia and parts of Greece.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Ptolemy gained command of the sea by Demetrius' fall. He died in his bed, the only one of Alexander's successors to do so, and was succeeded peacefully by his son Ptolemy II Philadelphus (308-246). However, a son by his first wife, Ptolemy Ceraunus, the Thunderbolt (grandson of Antipater), was stirring the waters round Lysimachus, and the latter soon lost support. Seleucus defeated and killed Lysimachus, and Alexander's empire, except for Egypt, seemed to be his for the asking. Lysimachus' army, however, supported Ceraunus, who assassinated Seleucus in 281. Seleucus' son by a Sogdian noblewoman succeeded him as Antiochus I (324-261). In Greece proper the strongest powers were Antigonus Gonatas (c. 320-239), son of the brilliant Demetrius and himself a man of high character, ability, and culture, and Pyrrhus, king of Epirus. Pyrrhus was about to embark on his ill-starred expedition to Italy, where he soundly defeated the growing power of Rome but at an enormous cost to himself.

At this point, migrating Celts under the command of Bolgius and Brennus caused an added complication, not least by the defeat and death of Ceraunus. Brennus pushed down into Greece but was repulsed by the Aetolians. The dangers posed by the invading Celts led, in 279, to a treaty between Antigonus and Antiochus, who agreed not to interfere in one another's spheres of influence. Each won a decisive victory over the Celtic invaders, who eventually settled in Serbia, Thrace, and Galatia in
central Anatolia. Antigonus was able to secure Macedonia. Lysimachus' kingdom was never revived. The three centres of power were Macedonia, Syria, and Egypt.

Children of Antipater, Regent of Macedonia (334-23) are:

i. Cassander, King Of Macedonia (305-297), born in c. 358 BC Macedonia; died in 297 BC; married Thessaloníki, Princess Of Macedonia; born in c 348 a.c. (Sister Of Alexander The Great).

Notes for Cassander, King Of Macedonia (305-297):
Casandro. Hijo de Antípater, uno de los generales de Alejandro Magno que más intervinieron en los sucesos posteriores a la muerte de éste. Al morir Antípater dejó la regencia a Polispercon, hombre de grandes prendas. Casandro no respetó la voluntad paterna y se unió a Ptolomeo, celeuco y Antígono contra el regente, que a su vez se apovó en Eumenes, comenzando aquella serie de guerras que ensangrentaron la herencia del macedón. Antígono logró dar muerte a Eumenes, abandonado por sus soldados, lo que trajo como consecuencia que las satrapias asiaticas se independizasen y Antígono senta se las bases de su poder. Se aliaron contra él Ptolomeo, Lisímaco, Casandro y Seleuco, pero tras de algunos desastres iniciales, venció Antigono, imponiendo la paz de 3I8 a. de J C., que dejó casi las cosas como estaban, es decir, a Lisímaco dueño de Tracia, a Ptolomeo de Egipto y a Seleuco de Asia, otorgando el trono de Macedonia al niño Alejandro Egus, hijo de Alejandro Magno y Roxana, bajo la regencia de Casandro. Este se apoderó de Atenas, donde estableció un gobierno aristocrático, a la cabeza del cual puso a Demetrio Falereo. Disensiones entre la familia de Alejandro Magno indispusieron a Filipo Arrideo y su esposa Eurídice con Polispercón por sus respetos hacia Olimpia, madre del macedón, e hicieron que se aliase a Casandro. Triunfó de momento Olimpia, que mandó matar a Filipo e hizo suicidarse a su esposa, persiguió y casi exterminó a la familia y partidarios de Casandro, pero éste consiauió sitiarla en Pidna la rindió por hambre y la entregó a las familias de los asesinados que la

lapidaron (3I5). Casandro, para adquirir derechos al trono, CASÓ CON TESALÓNICA e hizo que Glaucis, amigo suyo y gobernador del Antípolis, diese muerte a Alejandro Egus. Polispercón, entonces, proelamó rey al joven Hércules hijo natural del macedón, pero al ofrecerle Casandro la corona, Polispercón se dejó engañar e hizo matar a Hércules. Antígono, el más ambicioso e independiente de Ios generales, depuso a Faléreo e impuso a un hijo suyo, también llamado Demetrio, lo que lanzó a la guerra a Casandro y Ptolomeo, y después de la segunda batalla de Salamina todos los contendientes tomaron decididamente el título de rey. El hijo de Antígono rechazó a Casandro en las Termópilas, pero éste, aliado de nuevo con Lisímaco, Seleuco y Ptolomeo, triunfó en Ipso (30I) y Grecia quedó entregada a Casandro, que reinó en ella hasta su muerte, en 298.

Cassander (b. c. 358 BC--d. 297 BC), son of the Macedonian regent Antipater and king of Macedonia from 305 to 297.

Cassander was one of the diadochoi ("successors"), the Macedonian generals who fought over the empire of Alexander the Great after his death in 323. After Antipater's death in 319, Cassander refused to acknowledge the new regent, Polyperchon. With the aid of Antigonus I Monophthalmus, ruler of Phrygia, Cassander seized Macedonia and most of Greece, including Athens (319-317). When Antigonus returned from the eastern provinces intending to reunite Alexander's empire under his own sovereignty, Cassander joined forces with Ptolemy I, Seleucus, and Lysimachus (rulers of Egypt, Babylon, and Thrace, respectively) to oppose him. Between 315 and 303 the two sides clashed frequently. Cassander lost Athens in 307 and his other possessions south of Thessaly in 303-302, but the defeat of Antigonus at the Battle of Ipsus in Phrygia (301) secured Cassander's control of Macedonia.

Even though he had already murdered Alexander IV and Roxana, the son and the widow of Alexander the Great, Cassander did not take the royal title until 305. His ruthlessness toward Alexander's family was partly dictated by political considerations, but his personal hatred for the dead king was evidenced by his rebuilding of Thebes, which had been leveled by Alexander as punishment for the Theban rebellion.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he

was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Notes for Alexander III The Great:
Alejandro III el Magno (356-323a.C.), rey de Macedonia (336-323a.C.), conquistador del Imperio persa, y uno de los lkderes militares mis importantes del mundo antiguo.
Las primeras conquistas
Alejandro nació en Pela, la antigua capital de Macedonia; era hijo de Filipo II, rey de Macedonia, y de Olimpia, princesa de Epiro. Aristóteles fue su tutor, ensenindole retórica y literatura, y estimuló su interés por la ciencia, la medicina y la filosofka. En el verano del ano 336a.C. Filipo fue asesinado y Alejandro ascendió al trono de Macedonia. Se encontró rodeado de enemigos y se vio amenazado por una rebelión en el extranjero. Alejandro ordenó la ejecución de todos los conspiradores y enemigos nacionales. Marchó sobre Tesalia, donde los partidarios de la independencia habkan obtenido el control, y restauró el dominio macedónico. Hacia finales del verano del 336a.C. habka restablecido su posición en Grecia y un congreso de estados en Corinto lo eligió comandante del Ejército griego para la guerra contra Persia. En el 335a.C. dirigió una campana brillante contra los rebeldes tracios cerca del rko Danubio. A su regreso a Macedonia, reprimió en una sola semana a los hostiles ilirios y dardanelos cerca del lago Pequeno Prespa y después se dirigió hacia Tebas, que se habka sublevado. Tomó la ciudad por asalto y arrasó sus edificios, respetando sólo los templos y la casa del poeta lkrico Pkndaro, esclavizando a unos treinta mil habitantes capturados. La rapidez de Alejandro en reprimir la sublevación de Tebas facilitó la inmediata sumisión de los otros estados griegos.
La creación de un imperio
Alejandro comenzó su guerra contra Persia la primavera del 334a.C. al cruzar el Helesponto (actualmente Dardanelos) con un ejército de unos 365.000 hombres de Macedonia y de toda Grecia; sus oficiales jefes eran todos macedonios, incluidos Antkgono (mis tarde Antkgono Monoftalmos), Tolomeo (mis tarde Tolomeo I) y Seleuco (mis tarde Seleuco I). En el rko Grinico, cerca de la antigua ciudad de Troya (en la actual Turquka), atacó a un ejército de 40.000 persas y griegos hoplitas (mercenarios). Sus fuerzas derrotaron al enemigo y, segsn la tradición, sólo perdió 110 hombres; después de esta batalla, toda Asia se rindió. Al parecer, en su camino a través de Frigia cortó con su espada el nudo gordiano. Continuó avanzando hacia el sur y se encontró con el ejército principal persa, bajo el mando de Darko III, en Isos, en el noroeste de Siria. Segsn la tradición, el ejército de Darko se estimaba en 500.000 soldados, cifra que hoy es considerada exagerada. La batalla de Isos, en el ano 333a.C., terminó con una gran victoria de Alejandro. Aunque cortó la retirada, Darko huyó, abandonando a su madre, esposa e hijos a Alejandro, quien les trató con respeto debido a su condición de familia real. Tiro, un puerto marktimo muy fortificado, ofreció una resistencia obstinada, pero Alejandro lo tomó por asalto en el 332a.C. después de un asedio de siete meses. Seguidamente, Alejandro capturó Gaza y después pasó a Egipto, donde fue recibido como libertador. Estos acontecimientos facilitaron el control de toda la lknea costera del Mediterrineo. Mis tarde, en el 332a.C., fundó en la desembocadura del rko Nilo la ciudad de Alejandrka, que se convirtió en el centro literario, cientkfico y comercial del mundo griego. Cirene, la capital del

antiguo reino de Cirenaica, en el norte de Ifrica, se rindió a Alejandro en el 331a.C., extendiendo sus dominios a todo el territorio de Cartago.
En la primavera del 331a.C. Alejandro hizo una peregrinación al gran templo y oriculo de Amón-Ra, el dios egipcio del Sol a quien los griegos identificaron con Zeus. Se creka que los primeros faraones egipcios eran hijos de Amón-Ra, y Alejandro, el nuevo dirigente de Egipto, querka que el dios le reconociera como su hijo. La peregrinación tuvo éxito, y quizi confirmara la creencia de Alejandro en su propio origen divino. Dirigiéndose de nuevo hacia el norte, reorganizó sus fuerzas en Tiro y salió hacia Babilonia con un ejército de 40.000 infantes y 7.000 jinetes. Cruzó los rkos Éufrates y Tigris y se encontró con Darko al frente del ejército persa, el cual, segsn informes exagerados, llevaba un millón de hombres, cantidad que no impidió que sufriera una derrota devastadora en la batalla de Arbela (Gaugamela) el 1 de octubre del 331a.C. Darko huyó al igual que hizo en Isos y un ano mis tarde fue asesinado por uno de sus propios colaboradores. Babilonia se rindió después de Gaugamela, y la ciudad de Susa, con sus enormes tesoros, fue igualmente conquistada. Mis tarde, hacia mitad del invierno, se dirigió a Persépolis, la capital de Persia. Después de robar los tesoros reales y apropiarse de un rico botkn, quemó la ciudad, lo cual completó la destrucción del antiguo Imperio persa. El dominio de Alejandro se extendka a lo largo y ancho de la orilla sur del mar Caspio, incluyendo las actuales Afganistin y Beluchistin, y hacia el norte a Bactriana y Sogdiana, el actual Turkestin ruso, también conocido como Asia central. Sólo le llevó tres anos, desde la primavera del 330a.C. hasta la primavera del 327a.C., dominar esta vasta zona.
Para completar la conquista del resto del Imperio persa, que en tiempos habka incluido parte de la India occidental, Alejandro cruzó el rko Indo en el 326a.C. e invadió el Punjab, alcanzando el rko Hifasis (actual Bias); en este punto los macedonios se rebelaron, negindose a continuar. Entonces Alejandro construyó una flota y bajó navegando el Hidaspo (llamado Hydaspes por los griegos, donde derrotó al dirigente indio Poros en el 326a.C.) hacia el Indo, alcanzando su delta en septiembre del 325a.C. La flota continuó hacia el golfo Pérsico. Con su ejército, Alejandro cruzó el desierto de Susa en el 324a.C. La escasez de comida y agua durante la marcha habka causado varias pérdidas y desacuerdos entre sus tropas. Alejandro pasó aproximadamente un ano organizando sus dominios e inspeccionando territorios del golfo Pérsico donde conseguir nuevas conquistas. Llegó a Babilonia en la primavera del 323a.C., pero en junio contrajo fiebres y murió. Dejó su Imperio, segsn sus propias palabras, "a los mis fuertes" este ambiguo testamento provocó terribles luchas internas durante medio siglo.
El legado de Alejandro
Alejandro fue uno de los mayores conquistadores de la historia, destacó por su brillantez tictica y por la velocidad con la que cruzó grandes extensiones de terreno. Aunque fue valiente y generoso, supo ser cruel y despiadado cuando la situación polktica lo requerka, aunque cometió algunos actos de los que luego se arrepintió, caso del asesinato de su amigo Clito en un momento de embriaguez. Como polktico y dirigente tuvo planes grandiosos; segsn muchos historiadores abrigó el proyecto de unificar Oriente y Occidente en un imperio mundial, una nueva e ilustrada hermandad mundial de todos los hombres. Hizo que unos 30.000 jóvenes persas fueran educados en el habla griega y en ticticas militares macedónicas y les alistó en su Ejército. Él mismo adoptó

costumbres persas y se casó con mujeres orientales: con Estatira (o Stateira; que murió hacia el 323a.C.), la hija mayor de Darko III, y con Roxana (que murió hacia el 311a.C.), hija del sitrapa de Bactriana Oxiartes; ademis animó y sobornó a sus oficiales para que tomaran esposas persas. Poco después murió. Alejandro ordenó que las ciudades griegas le adoraran como a un dios. Aunque probablemente dio la orden por razones polkticas, segsn su propia opinión y la de sus contemporineos, se le consideraba de origen divino. Tras su muerte, la orden fue en gran parte anulada.
Para unificar sus conquistas, Alejandro fundó varias ciudades a lo largo de su marcha, muchas se llamaron Alejandrka en honor a su persona; estas ciudades estaban bien situadas, bien pavimentadas y contaban con buenos suministros de agua. Eran autónomas pero sujetas a los edictos del rey. Los veteranos griegos de su Ejército al igual que soldados jóvenes, negociantes, comerciantes y eruditos se instalaron en ellas y se introdujo la cultura y la lengua griega. Ask, Alejandro extendió ampliamente la influencia de la civilización griega y preparó el camino para los reinos del periodo helenkstico y la posterior expansión de Roma.

Notes for Ptolemy I Soter, King Of Egypt:
Ptolemy I SOTER (Greek: Saviour) (b. 367/366 or 364 BC, Macedonia--d. 283/282, Egypt), Macedonian general of Alexander the Great, who became ruler of Egypt (323-285 BC) and founder of the Ptolemaic dynasty, which reigned longer than any other dynasty established on the soil of the Alexandrian empire and only succumbed to the Romans in 30 BC.

Early life and career.

Ptolemy was the son of the nobleman Lagus, a native of the Macedonian district of Eordaea whose family was undistinguished until Ptolemy's time, and of Arsinoe, who was related to the Macedonian Argead dynasty. He was probably educated as a page at the royal court of Macedonia, where he became closely associated with Alexander. He was exiled in 337, along with other companions of the crown prince. When he returned, after Alexander's accession to the

throne in 336, he joined the King's bodyguard, took part in Alexander's European campaigns of 336-335, and in the fall of 330 was appointed personal bodyguard (somatophylax) to Alexander; in this capacity he captured the assassin of Darius III, the Persian emperor, in 329. He was closely associated with Alexander during the advance through the Persian highland. As a result of Ptolemy's successful military performance on the way from Bactria (in northeastern Afghanistan)
to the Indus River (327-325), he became commander (trierarchos) of the Macedonian fleet on the Hydaspes (modern Jhelum in India). Alexander decorated him several times for his deeds and married him to the Persian Artacama at the mass wedding at Susa, the Persian capital, which was the crowning event of Alexander's policy of merging the Macedonian and Iranian populations.

Satrap of Egypt.

Ptolemy, who distinguished himself as a cautious and trustworthy troop commander under Alexander, also proved to be a politician of unusual diplomatic and strategic ability in the long series of struggles over the throne that broke out after Alexander's death in 323. Convinced from the outset that the generals could not maintain the unity of Alexander's empire, he proposed during the council at Babylon, which followed Alexander's death, that the satrapies (the provinces of the huge empire) be divided among the generals. He became satrap of Egypt, with the adjacent Libyan and Arabian regions, and methodically took advantage of the geographic isolation of the Nile territory to make it a great Hellenistic power. He took steps to improve internal administration and to acquire several external possessions in Cyrenaica (the easternmost part of Libya), Cyprus,
and Syria and on the coast of Asia Minor; these, he hoped, would guarantee him military security. Although he pursued a friendly policy toward Greece that secured his political influence there, he also succeeded in winning over the native Egyptian population.

In 322 Ptolemy, taking advantage of internal disturbances, acquired the African Hellenic towns of Cyrenaica. In 322-321, as a member of a coalition of "successors" (diadochoi) of Alexander, he fought against Perdiccas, the ruler (chiliarchos) of the Asiatic region of the empire. The coalition was victorious and Perdiccas died during the fighting. Ptolemy's diplomatic talent was put to the test during this war. When the satrapies were redistributed at Triparadisus in northern Syria, Antipater, the general of the European region, became regent of the Macedonian empire and Ptolemy was confirmed in possession of Egypt and Cyrene. He further strengthened his position by marrying Eurydice, the third daughter of Antipater.

About 317 he married Berenice I, the granddaughter of Cassander, the son of Antipater. Cassander, at his father's death in 319, refused to accept his father's successor, made war upon him, seized part of the empire, and in 305 assumed the title of king of Macedonia. In the coalition war of 315-311, Ptolemy obtained possession of Cyprus. In this war he scored his most important victory in the

battle near Gaza in 312, in which the Egyptian contingents were decisive. But war broke out anew in 310, and he lost Cyprus again in 306. He temporarily lost Cyrene as well and was unable to hold the important Greek positions of Corinth and neighbouring Sicyon and Megara, which he had captured in 308. He ultimately suffered overwhelming defeat in 306 in the naval battle near Salamis on Cyprus. The victor in this battle, Antigonus I Monophthalmus, who was assisted by his son, Demetrius Poliorcetes, assumed the title of king in 306. The remaining satraps, led by Ptolemy after he successfully resisted Antigonus' attack on Egypt, also took the title of king in 305-304.

King of Egypt.

After naming himself king, Ptolemy's first concern was the continuing war with Antigonus, which was now focussed on the island of Rhodes. In 304 Ptolemy aided the inhabitants of Rhodes against Antigonus and was accorded the divine title Soter (Saviour), which he was commonly called from that time. The dissolution of Alexander's empire was brought to a close with the battle near Ipsus in Asia Minor in 301. During this battle Antigonus was defeated by the other kings. This led to the attempt by the remaining successors of Alexander to define their kingdoms. For this reason a dispute arose between Ptolemy and Seleucus I Nicator of Babylon over Syria, particularly the southern Syrian ports, which served as terminal points for the caravan routes. This quarrel, however, was temporarily settled peacefully through compromise. In addition to Coele Syria (Palestine), Ptolemy apparently also occupied Pamphylia, Lycia, and part
of Pisidia in southern Asia Minor.

During the last 15 years of his reign, because of the defeats he suffered between 308 and 306, Ptolemy preferred to secure and expand his empire through a policy of alliances and marriages rather than through warfare. In 300 he concluded an alliance with Lysimachus of Thrace (modern Bulgaria) and gave him his daughter Arsinoe II in marriage in 299/298. At approximately the same time he married his stepdaughter Theoxena to Agathocles, the tyrant of Syracuse (southeastern Sicily). About 296 he made peace with Demetrius Poliorcetes, to whom he betrothed his daughter Ptolemais. To Pyrrhus of Epirus, Demetrius' brother-in-law, who was at the Egyptian court as a hostage, he gave his stepdaughter Antigone. He finally brought rebellious Cyrene into subjection in 298, and in approximately 294 he gained control over Cyprus and the Phoenician coastal towns of Tyre and Sidon.

In a last coalition war in 288-286, in which Ptolemy, Seleucus, Lysimachus, and Pyrrhus opposed Demetrius, the Egyptian fleet participated decisively in the liberation of Athens from Macedonian occupation. During this war Ptolemy obtained the protectorate over the League of Islanders, which was established by Antigonus Monophthalmus in 315 and included most of the Greek islands in the Aegean. Egypt's maritime supremacy in the Mediterranean in the ensuing decades was based on this alliance.

Ptolemy was able to evaluate the chaotic international situation of this post-Alexandrian era, which was characterized by constantly renewed wars with

shifting alliances and coalitions, in realistic political terms. Adhering to a basically defensive foreign policy, he secured Egypt against external enemies and expanded it by means of directly controlled foreign possessions and hegemonic administrations. He did not, however, neglect to devote attention to the internal organization of the country and to provide for a successor. In 290 he made his wife Berenice queen of Egypt and in 285 (possibly on June 26) appointed his younger son Ptolemy II Philadelphus, who was born to Berenice in 308, co-regent and successor. The provision for the succession, which was based on examples from the time of the pharaohs, made possible a peaceful transition when Ptolemy died in the winter of 283-282. The early Ptolemies were occupied with the economic exploitation of Egypt, but, because of the lack of first-hand information, the details of Ptolemy's participation in the process cannot be determined. It is certain, however, that discrimination against the Egyptians took place during his reign. The only town he founded was Ptolemais in Upper
Egypt. He probably placed Macedonian military commanders alongside the Egyptian provincial administrators and intervened unobtrusively in legal and financial affairs. In order to regulate the latter, he introduced coinage, which until that time was unknown in Egypt.

He found it necessary from the outset, however, to pursue a conciliatory policy toward the Egyptians, since Egyptians had to be recruited for his army, which initially numbered only 4,000 men. Ptolemy won over the Egyptians through the establishment in Memphis of the Sarapis cult, which fused the Egyptian and Greek religions; through restoration of the temples of the pharaohs, which had been destroyed by the Persians; and through gifts to the ancient Egyptian gods and patronage of the Egyptian nobility and priesthood. Finally, he founded the Museum (Mouseion), a common workplace for scholars and artists, and established the famous library at Alexandria. Besides being a patron of the arts and sciences, he was a writer himself. In the last few years of his life Ptolemy wrote a generally reliable history of Alexander's campaigns. Although it is now lost, it can be largely reconstructed through the extensive use made of it later by the historian Arrian.

Several times during his life Ptolemy was proclaimed a deity by certain classes of people. After his death he was raised to the level of a god by all the Egyptians.

Notes for Berenice I, Queen Of Egypt:
Berenice I (fl. c. 317-c. 275 BC), queen of Egypt, third wife of Ptolemy I Soter, and mother of Arsinoe II and Ptolemy II Philadelphus.

Berenice I was granddaughter of Cassander, the son of Antipater. Cassander, at his father's death in 319, refused to accept his father's successor, made war upon him, seized part of the empire, and in 305 assumed the title of king of Macedonia.

Berenice arrived in Egypt in the retinue of Eurydice, Ptolemy's second queen, whom he married as part of a political agreement with her father, Antipater of Macedonia. About 317 Ptolemy married Berenice. In 308 Berenice gave birth to Ptolemy II Philadelphus, and in 290 Ptolemy made her queen of Egypt. In 285 Ptolemy II was made coregent and successor to his father, bypassing Eurydice's children. Ptolemy II's second wife was his sister Arsinoe II, also the child of Berenice.

Children of Ptolemy I Soter, King Of Egypt and Berenice I, Queen Of Egypt are:

23059673158770491728 i. Ptolemy II, King Of Egypt, born in 308 a.c.; died in c 246 a.c; married Arsinoe I of Egypt..

ii. Arsinoe II, Queen Of Thrace, born in c. 316 BC; died in July 270 BC; married Lysimachus, king of Thrace; born in c. 360 BC; died in 281 BC Ciropedion (Frigia).

Notes for Arsinoe II, Queen Of Thrace:
Arsinoe II (b. c. 316 BC--d. July 270 BC), daughter of Berenice and Ptolemy I Soter, founder of the Macedonian (Ptolemaic) dynasty in Egypt; as queen of Thrace and later wife of her brother, King Ptolemy II Philadelphus of Egypt, she ruthlessly used her two husbands to advance her own position and eventually wielded great power in both kingdoms.

In 300 BC Arsinoe was married to Lysimachus, the king of Thrace, who renamed
Ephesus after her and gave her three cities on the Black Sea, as well as Cassandrea, a city in northern Greece. She strove to secure the succession of the Thracian kingdom for the eldest of her three sons by accusing the heir apparent, Agathocles, the king's son by an earlier marriage, of plotting to kill his father. When the old and suspicious king ordered him executed, an ally of
Agathocles in Asia Minor, the governor of Pergamum, requested aid from the Seleucid ruler Seleucus I Nicator, and war broke out between Thrace and the Middle Eastern Seleucid kingdom. After Lysimachus' death in battle (281), Arsinoe fled to Cassandrea. After assassinating Seleucus, Ptolemy Ceraunus (Arsinoe's half brother) cajoled her into marrying him, but, on entering Cassandrea, he promptly executed her two younger sons. Arsinoe escaped and eventually went to Alexandria (c. 279) to advance her fortune.

Soon after her arrival in Egypt, Ptolemy II's first queen was accused, probably at Arsinoe's instigation, of plotting his murder and was exiled. Arsinoe then married her own brother (c. 277), a customary practice in Egypt but scandalous to the Greeks. "Philadelphoi" ("Brother-Loving") consequently was added to the names of Ptolemy and Arsinoe.

Arsinoe's influence in the Egyptian government grew very swiftly. She contributed to Ptolemy's victory in the First Syrian War (274-271 BC) between Egypt and the Seleucid realm. Argaeus, Ptolemy's brother, and a half brother were executed on the familiar charge of conspiracy.

Arsinoe shared all of Ptolemy's titles, appeared on the coinage alone and with her husband, and had her own throne name. Towns were named after her in Greece, and dedications to her were made at numerous places in Greece and Egypt.

According to Egyptian custom, which recognized the living rulers as deities in their own right, Arsinoe was probably deified within her lifetime. After her death in 270, her cult was established in numerous places, including Alexandria, the Ptolemaic capital, where a great shrine, the Arsinoeion, was dedicated to her. Toward the end of Ptolemy II's reign, a province, Al-Fayyum, southwest of Cairo, where the king had done much land reclamation, was renamed in her honour
as the Arsinoite province.

Notes for Lysimachus, king of Thrace:
Lisimaco. Uno de los treinta y cuatro generales que fueron admitidos en el
reparto de la herencia de Alejandro, siéndole adjudicadas la Tracia y las naciones costeras del Ponto Euxino. Era hombre de nacimiento obscuro, a quien su valor y talentos militares habían destacado en el brillante plantel de caudillos, nacido de las s campañas de Alejandro. Pronto se hizo dueño de la mayor parte de Tracia, creando para sí un reino en el que levantó la ciudad a la que dió su nombre (309 a. de J. C.). Al estallar en 315 la guerra entre los generales, en que los reinantes en Asia tuvieron como objetivo, que no llegaron a realizar, la conquista de Grecia, Lisimaco se alió con Ptolomeo, Casandro y Seleuco, contra Antígono y Demetrio, por lo cual el primero de éstos trató de crearle dificultades en la retaguardia, ayudando con tropas y recursos a Seuthes, rey de Tracia, que se había levantado contra él. El primer año de guerra fué desgraciado para Antígono, que sufrió una derrota naval, perdió Chipre, que le quitó Ptolomeo, y vió invadido el Peloponeso por Casandro,
sufriendo también desastres en Argos y Orcomeno; se unió a éstos la defección de Alejandro, hijo de Polisperco, que se vendió a Casandro y combatió contra su propio padre En el año siguiente, Demetrio, hijo de Antígono, fué batido por Ptolomeo y Seleuco cerca de Gaza, pero Antígono acudió con grandes fuerzas en auxilio de su hijo, y Ptolomeo tuvo que retirarse a Egipto, que la inundación del Nilo hacía entonces inabordable. La

guerra se mantuvo durante cuatro años sin éxitos definitivos, agobiando y esquilmando a los pueblos, pero a la larga favoreció a Antígono, que, por la paz obtuvo Siria, Judea, Fenicia y hasta aspiró a Babilonia, quedando Casandro como rey de Macedonia. Esta paz no podía ser definitiva, y la Asamblea de Corinto demostró a Casandro que por sí solo no podía luchar contra Antígono y su hijo, por lo cual se puso de acuerdo con Lsimaco e invitaron a una nueva liga a Seleuco y Ptolomeo. Se concertó esta alianza en 302 a de Jesucristo. Lisimaco pasó a Asia, sometiendo Frigia, Iliria y Licaonia, mientras los demás aliados atacaban por otros frentes. No acertaron sin embargo, a impedir la unión de Antígono y su hijo Demetrio, y habiéndose encontrado los dos ejércitos rivales en Ipso (Alta Frigia) (30I antes de J. C.), se entabló la batalla, en la que al principio Antígono, ya de ochenta años, no mostró su audacia acostumbrada, y la temeraria impetuosidad de su hijo Demetrio le llevó muy lejos en la persecución de la caballería enemiga, encontrándose al volver con la barrera infranqueable de los elefantes de Seleuco. Parte de la infantería de Antigono se pasó a éste, y trajo como consecuencia el que Antígono se hiciera matar luchando heroicamente y Demetrio lograra retirarse con cinco mil infantes y cuatro mil caballos. En la paz, Seleuco, principal autor del triunfo, y Lisimaco fueron los más beneficiados, tocándole al último toda el Asia Menor hasta el Tauro. De las múltiples partes hechas del Imperio de Alejandro ya no quedaban más que cuatro, que luego se redujeron a tres. Demetrio se vió abandonado hasta de Atenas, por él tan amada, la cual le envió un diputado a notificarle que no recibiría más reyes entre sus muros; le sirvió de consuelo el ver pronto surgir la discordia entre sus expoliadores, y Seleuco, que necesitaba de la flota y las costas de Fenicia, en poder de Demetrio, hizo a éste proposiciones que le aproximaron al más poderoso de los sucesore de Alejandro. Se formó una nueva coalición contra él, y Lisimaco atacó Macedonia por el este, Pirro por el oeste y Ptolomeo desembarcó en Grecia, llamando a sus pueblos a la libertad (288 a. de J. C.). Antípatro, yerno de Lisimaco, rompió con él por haberle reclamado la Macedonia oriental, y el suegro dio muerte al yerno y hasta puso en prisión perpetua a su propia hija. Lisimaco repudió a su esposa, la princesa persa Amastris, para casarse con Arsinoe, hija de Ptolomeo. Poseído de una verdadera pasión homicida no respetó ni a su propia familia haciendo matar a los dos hijos anteriores de Amastris y su propio hijo Agatocles, víctima de una acusación de su madrastra. Ofreció tambien mil talentos a Seleuco para que se desembarazase de su rival Demetrio, a quien quél había cogido prisionero, pero no pudo lograr su intento ya que Seleuco trató con generosidad al vencido. En 287 Pirro y Lisímaco se repartieron Macedonia, pero poco después éste expulso a aquél, aumento de su poder le trajo la desgracia. La viuda de Agatocles buscó refugio al lado de Seleuco soliviantándole contra Lisimaco;

la guerra estalló, y éste, que ya tenía setenta y cuatro años, fué vencido y muerto en Ciropedion (Frigia), en 28I a. de J. C, concluyendo con él un Imperio y quedando ya sólo dos con la herencia de Alejandro.

Lysimachus (b. c. 360 BC--d. 281), Macedonian general, satrap (provincial governor), and king who, as one of the diadochoi ("successors") to Alexander the Great, came to rule strategic parts of the divided Macedonian Empire.

Lysimachus was one of Alexander's bodyguards during the conquest of Asia, and, in the distribution of satrapies that followed Alexander's death (323), he was assigned to govern Thrace. Occupied there for many years in wars against the local peoples, Lysimachus took little part in the struggles among Alexander's other successors in Greece and Asia. Not until 302, when he bore the brunt of the campaign that ended in the overthrow of the successor Antigonus Monophthalmus, king of Asia, at the Battle of Ipsus (301), did Lysimachus emerge as a power of the first rank. Through this victory he added the greater part of Asia Minor to his European possessions and began to consolidate his power in both areas against the threat posed by Antigonus' son, Demetrius I Poliorcetes. In 285 Lysimachus drove Demetrius from Macedonia, which had been taken by Demetrius in 294.

The last period of Lysimachus' life was darkened by the intrigues of his third wife, Arsinoe II, daughter of Ptolemy I Soter, king of Egypt. In order to gain the succession for her own sons, she had her husband execute his eldest son, Agathocles, on a charge of conspiring with Seleucus I, the Syrian king, to commit treason. During the disorders that followed Agathocles' death, Seleucus seized the opportunity to invade Asia Minor, where he killed Lysimachus in the decisive battle of Corupedium in Lydia, in 281.

Notes for Lysimachus, king of Thrace:

Lisimaco. Uno de los treinta y cuatro generales que fueron admitidos en el reparto de la herencia de Alejandro, siéndole adjudicadas la Tracia y las naciones costeras del Ponto Euxino. Era hombre de nacimiento obscuro, a quien su valor y talentos militares habkan destacado en el brillante plantel de caudillos, nacido de las s campanas de Alejandro. Pronto se hizo dueno de la mayor parte de Tracia, creando para sk un reino en el que levantó la ciudad a la que dió su nombre (309 a. de J. C.). Al estallar en 3I5 la guerra entre los generales, en que los reinantes en Asia tuvieron como objetivo, que no llegaron a realizar, la conquista de Grecia, Lisimaco se alió con Ptolomeo, Casandro y Seleuco, contra Antkgono y Demetrio, por lo cual el primero de éstos trató de crearle dificultades en la retaguardia, ayudando con tropas y recursos a Seuthes, rey de Tracia, que se habka levantado contra él. El primer ano de guerra fué desgraciado para Antkgono, que sufrió una derrota naval, perdió Chipre, que le quitó Ptolomeo, y vió invadido el Peloponeso por Casandro, sufriendo también desastres en Argos y Orcomeno; se unió a éstos la defección de Alejandro, hijo de Polisperco, que se vendió a Casandro y combatió contra su propio padre  En el ano siguiente, Demetrio, hijo de Antkgono, fué batido por Ptolomeo y Seleuco cerca de Gaza, pero Antkgono acudió con grandes fuerzas en auxilio de su hijo, y Ptolomeo tuvo que retirarse a Egipto, que la inundación del Nilo hacka entonces inabordable. La guerra se mantuvo durante cuatro anos sin éxitos definitivos, agobiando y esquilmando a los pueblos, pero a la larga favoreció a Antkgono, que, por la paz obtuvo Siria, Judea, Fenicia y hasta aspiró a Babilonia, quedando Casandro como rey de Macedonia. Esta paz no podka ser definitiva, y la Asamblea de Corinto demostró a Casandro que por sk solo no podka luchar contra Antkgono y su hijo, por lo cual se puso de acuerdo con Lsimaco e invitaron a una nueva liga a Seleuco y Ptolomeo. Se concertó esta alianza en 302 a de Jesucristo. Lisimaco pasó a Asia, sometiendo Frigia, Iliria y Licaonia, mientras los demis aliados atacaban por otros frentes. No acertaron sin embargo, a impedir la unión de Antkgono y su hijo Demetrio, y habiéndose encontrado los dos ejércitos rivales en Ipso (Alta Frigia) (30I antes de J. C.), se entabló la batalla, en la que al principio Antkgono, ya de ochenta anos, no mostró su audacia acostumbrada, y la temeraria impetuosidad de su hijo Demetrio le llevó muy lejos en la persecución de la caballerka enemiga, encontrindose al volver con la barrera infranqueable de los elefantes de Seleuco. Parte de la infanterka de Antigono se pasó a éste, y trajo como consecuencia el que Antkgono se hiciera matar luchando heroicamente y Demetrio lograra retirarse con cinco mil infantes y cuatro mil caballos. En la paz, Seleuco, principal autor del triunfo, y Lisimaco fueron los mis beneficiados, tocindole al sltimo toda el Asia Menor hasta el Tauro. De las msltiples partes hechas del Imperio de Alejandro ya no quedaban mis que cuatro, que luego se redujeron a tres. Demetrio se vió abandonado hasta de Atenas, por él tan amada, la cual le envió un diputado a notificarle que no recibirka mis reyes entre sus muros; le sirvió de consuelo el ver pronto surgir la discordia entre sus expoliadores, y Seleuco, que necesitaba de la flota y las costas de Fenicia, en poder de Demetrio, hizo a éste proposiciones que le aproximaron al mis poderoso de los sucesore de Alejandro. Se formó una nueva coalición contra él, y Lisimaco atacó Macedonia por el este, Pirro por el oeste y Ptolomeo desembarcó en Grecia, llamando a sus pueblos a la libertad (288 a. de J. C.). Antkpatro, yerno de Lisimaco, rompió con él por haberle reclamado la Macedonia oriental, y el suegro dio muerte al yerno y hasta puso

en prisión perpetua a su propia hija. Lisimaco repudió a su esposa, la princesa persa Amastris, para casarse con Arsinoe, hija de Ptolomeo. **92238237166098186690. Darius III, King Of Persia,** born in c 380 a.c.; died in 330 BC, Bactria.

Notes for Darius III, King Of Persia:
Darius III, also called CODOMMANUS (d. 330 BC, Bactria), the last king (reigned 336-330 BC) of the Achaemenid dynasty.

Darius belonged to a collateral branch of the royal family and was placed on the throne by the eunuch Bagoas, who had poisoned the two previous kings, Artaxerxes III and Arses. When Darius asserted his independence, Bagoas also attempted his murder but was forced by the king to drink the poison himself.

In 337 Philip II of Macedon had formed the League of Corinth for the purpose of
liberating the Greek cities under Achaemenid rule and, early in 336, had sent an advance force into Asia Minor. In July, however, he was assassinated, perhaps at the instigation of Darius. In the spring of 334 Philip's son Alexander the Great crossed the Hellespont. Because Darius had made no serious preparations to resist the invasion, Alexander defeated an Achaemenid army at the Granicus and, by the following year, had won most of Asia Minor and reached Cilicia.
Darius finally advanced against him but was defeated at Issus in the autumn of 333. Darius fled from the field, abandoning his mother, wife, and children.

Darius twice sent Alexander a letter of friendship, the second time offering a large ransom for his family, cession of all the Achaemenid Empire west of the Euphrates River, and the hand of his daughter in return for an alliance. Alexander rejected both letters and marched into Mesopotamia. Darius made no attempt to resist his crossing of the Euphrates and Tigris but offered battle at Gaugamela, east of modern Mosul. On Oct. 1, 331, he was decisively defeated, and, as at
Issus, he turned his chariot and fled, although his subordinates fought on. He escaped to Ecbatana, and then, on the approach of Alexander, he retired toward Bactria but was deposed and killed by the Bactrian satrap Bessus.

Darko III Codomano (c.380-330a.C.), rey de Persia (336-330a.C.), biznieto de Darko II. Fue sustituido en el trono por el eunuco Bagoas, responsable del asesinato de Artajerjes III (que reinó en 359-338a.C.), y Arsés (que reinó en 338-336a.C.); y finalmente, Bagoas fue asesinado por el propio Darko III. Durante su reinado, Darko III condujo el Ejército persa contra las fuerzas de Alejandro Magno de Macedonia, pero fue derrotado en las batallas de Issos en el 333a.C. y Arbela (Gaugamela) en el 331. Murió asesinado por uno de sus propios sitrapas mientras huka de Arbela.

Arbela, Batalla de, también llamada batalla de Gaugamela, donde en realidad tuvo lugar, combate librado entre los ejércitos de Alejandro Magno y el monarca persa Darko III, el 1 de octubre del 331a.C. La derrota de los persas en la batalla marcó el declive de su Imperio y la apertura del este a los macedonios. Alejandro invadió el Imperio persa por segunda vez, dirigiéndose al norte desde Egipto en el 331a.C. Darko reunió un ejército de unos 250.000 hombres en la llanura de Gaugamela (a 97km de Arbela, en la actualidad Irbil, o Arbil, en Irak), situada en la alta Mesopotamia, cerca del emplazamiento de Nknive. Los persas formaron una lknea frontal de carros, apoyada por arqueros y caballerka. La infanterka estaba agrupada detris de los carros y la caballerka ligera protegka los flancos. Alejandro, con 40.000 hombres y 7.000 unidades de caballerka, acercó sus fuerzas a la posición persa a finales de septiembre. El 1 de octubre, Alejandro comenzó la batalla atacando el flanco izquierdo de los persas. Realizó pocos progresos hasta que toda la caballerka persa del flanco izquierdo entró en combate, dejando a la infanterka indefensa. Alejandro dirigió una carga de su mejor caballerka contra el centro del enemigo, a quién rompió su posición, atacó a los persas por los flancos y la retaguardia. Darko huyó y el Ejército persa comenzó a retroceder. Los hombres de Alejandro persiguieron a los persas durante 80km matando a muchos de los que hukan. Los persas perdieron entre 40.000 y 90.000 hombres en la batalla; los macedonios perdieron menos de 500.

Notes for Alexander III The Great:
Alejandro III el Magno (356-323a.C.), rey de Macedonia (336-323a.C.), conquistador del Imperio persa, y uno de los líderes militares más importantes del mundo antiguo.
Las primeras conquistas
Alejandro nació en Pela, la antigua capital de Macedonia; era hijo de Filipo II, rey de Macedonia, y de Olimpia, princesa de Epiro.

Aristóteles fue su tutor, enseñándole retórica y literatura, y estimuló su interés por la ciencia, la medicina y la filosofía. En el verano del año 336a.C. Filipo fue asesinado y Alejandro ascendió al trono de Macedonia. Se encontró rodeado de enemigos y se vio amenazado por una rebelión en el extranjero. Alejandro ordenó la ejecución de todos los conspiradores y enemigos nacionales. Marchó sobre Tesalia, donde los partidarios de la independencia habían obtenido el control, y restauró el dominio macedónico. Hacia finales del verano del 336a.C. había restablecido su posición en Grecia y un congreso de estados en Corinto lo eligió comandante del Ejército griego para la guerra contra Persia. En el 335a.C. dirigió una campaña brillante contra los rebeldes tracios cerca del río Danubio. A su regreso a Macedonia, reprimió en una sola semana a los hostiles ilirios y dardanelos cerca del lago Pequeño Prespa y después se dirigió hacia Tebas, que se había sublevado. Tomó la ciudad por asalto y arrasó sus edificios, respetando sólo los templos y la casa del poeta lírico Píndaro, esclavizando a unos treinta mil habitantes capturados. La rapidez de Alejandro en reprimir la sublevación de Tebas facilitó la inmediata sumisión de los otros estados griegos.

La creación de un imperio

Alejandro comenzó su guerra contra Persia la primavera del 334a.C. al cruzar el Helesponto (actualmente Dardanelos) con un ejército de unos 365.000 hombres de Macedonia y de toda Grecia; sus oficiales jefes eran todos macedonios, incluidos Antígono (más tarde Antígono Monoftalmos), Tolomeo (más tarde Tolomeo I) y Seleuco (más tarde Seleuco I). En el río Gránico, cerca de la antigua ciudad de Troya (en la actual Turquía), atacó a un ejército de 40.000 persas y griegos hoplitas (mercenarios). Sus fuerzas derrotaron al enemigo y, según la tradición, sólo perdió 110 hombres; después de esta batalla, toda Asia se rindió. Al parecer, en su camino a través de Frigia cortó con su espada el nudo gordiano. Continuó avanzando hacia el sur y se encontró con el ejército principal persa, bajo el mando de Darío III, en Isos, en el noroeste de Siria. Según la tradición, el ejército de Darío se estimaba en 500.000 soldados, cifra que hoy es considerada exagerada. La batalla de Isos, en el año 333a.C., terminó con una gran victoria de Alejandro. Aunque cortó la retirada, Darío huyó, abandonando a su madre, esposa e hijos a Alejandro, quien les trató con respeto debido a su condición de familia real. Tiro, un puerto marítimo muy fortificado, ofreció una resistencia obstinada, pero Alejandro lo tomó por asalto en el 332a.C. después de un asedio de siete meses. Seguidamente, Alejandro capturó Gaza y después pasó a Egipto, donde fue recibido como libertador. Estos acontecimientos facilitaron el control de toda la línea costera del Mediterráneo. Más tarde, en el 332a.C., fundó en la desembocadura del río Nilo la ciudad de Alejandría, que se convirtió en el centro literario, científico y comercial del mundo griego. Cirene, la capital del antiguo reino de Cirenaica, en el

norte de África, se rindió a Alejandro en el 331a.C., extendiendo sus dominios a todo el territorio de Cartago.
En la primavera del 331a.C. Alejandro hizo una peregrinación al gran templo y oráculo de Amón-Ra, el dios egipcio del Sol a quien los griegos identificaron con Zeus. Se creía que los primeros faraones egipcios eran hijos de Amón-Ra, y Alejandro, el nuevo dirigente de Egipto, quería que el dios le reconociera como su hijo. La peregrinación tuvo éxito, y quizá confirmara la creencia de Alejandro en su propio origen divino. Dirigiéndose de nuevo hacia el norte, reorganizó sus fuerzas en Tiro y salió hacia Babilonia con un ejército de 40.000 infantes y 7.000 jinetes. Cruzó los ríos Éufrates y Tigris y se encontró con Darío al frente del ejército persa, el cual, según informes exagerados, llevaba un millón de hombres, cantidad que no impidió que sufriera una derrota devastadora en la batalla de Arbela (Gaugamela) el 1 de octubre del 331a.C. Darío huyó al igual que hizo en Isos y un año más tarde fue asesinado por uno de sus propios colaboradores. Babilonia se rindió después de Gaugamela, y la ciudad de Susa, con sus enormes tesoros, fue igualmente conquistada. Más tarde, hacia mitad del invierno, se dirigió a Persépolis, la capital de Persia. Después de robar los tesoros reales y apropiarse de un rico botín, quemó la ciudad, lo cual completó la destrucción del antiguo Imperio persa. El dominio de Alejandro se extendía a lo largo y ancho de la orilla sur del mar Caspio, incluyendo las actuales Afganistán y Beluchistán, y hacia el norte a Bactriana y Sogdiana, el actual Turkestán ruso, también conocido como Asia central. Sólo le llevó tres años, desde la primavera del 330a.C. hasta la primavera del 327a.C., dominar esta vasta zona.
Para completar la conquista del resto del Imperio persa, que en tiempos había incluido parte de la India occidental, Alejandro cruzó el río Indo en el 326a.C. e invadió el Punjab, alcanzando el río Hifasis (actual Bias); en este punto los macedonios se rebelaron, negándose a continuar. Entonces Alejandro construyó una flota y bajó navegando el Hidaspo (llamado Hydaspes por los griegos, donde derrotó al dirigente indio Poros en el 326a.C.) hacia el Indo, alcanzando su delta en septiembre del 325a.C. La flota continuó hacia el golfo Pérsico. Con su ejército, Alejandro cruzó el desierto de Susa en el 324a.C. La escasez de comida y agua durante la marcha había causado varias pérdidas y desacuerdos entre sus tropas. Alejandro pasó aproximadamente un año organizando sus dominios e inspeccionando territorios del golfo Pérsico donde conseguir nuevas conquistas. Llegó a Babilonia en la primavera del 323a.C., pero en junio contrajo fiebres y murió. Dejó su Imperio, según sus propias palabras, "a los más fuertes" este ambiguo testamento provocó terribles luchas internas durante medio siglo.
El legado de Alejandro
Alejandro fue uno de los mayores conquistadores de la historia, destacó por su brillantez táctica y por la velocidad con la que cruzó grandes extensiones de terreno. Aunque fue valiente y

generoso, supo ser cruel y despiadado cuando la situación política lo requería, aunque cometió algunos actos de los que luego se arrepintió, caso del asesinato de su amigo Clito en un momento de embriaguez. Como político y dirigente tuvo planes grandiosos; según muchos historiadores abrigó el proyecto de unificar Oriente y Occidente en un imperio mundial, una nueva e ilustrada hermandad mundial de todos los hombres. Hizo que unos 30.000 jóvenes persas fueran educados en el habla griega y en tácticas militares macedónicas y les alistó en su Ejército. Él mismo adoptó costumbres persas y se casó con mujeres orientales: con Estatira (o Stateira; que murió hacia el 323a.C.), la hija mayor de Darío III, y con Roxana (que murió hacia el 311a.C.), hija del sátrapa de Bactriana Oxiartes; además animó y sobornó a sus oficiales para que tomaran esposas persas. Poco después murió. Alejandro ordenó que las ciudades griegas le adoraran como a un dios. Aunque probablemente dio la orden por razones políticas, según su propia opinión y la de sus contemporáneos, se le consideraba de origen divino. Tras su muerte, la orden fue en gran parte anulada.
Para unificar sus conquistas, Alejandro fundó varias ciudades a lo largo de su marcha, muchas se llamaron Alejandría en honor a su persona; estas ciudades estaban bien situadas, bien pavimentadas y contaban con buenos suministros de agua. Eran autónomas pero sujetas a los edictos del rey. Los veteranos griegos de su Ejército al igual que soldados jóvenes, negociantes, comerciantes y eruditos se instalaron en ellas y se introdujo la cultura y la lengua griega. Así, Alejandro extendió ampliamente la influencia de la civilización griega y preparó el camino para los reinos del periodo helenístico y la posterior expansión de Roma.

Capadocia. Una de las mis extensas regiones del Asia Menor, comprendida entre los rkos Halys y Eufrates, sus lkmites variaron mucho en las diversas épocas. Estaba fksicamente, separada en dos regiones por una lknea, trazada

por el monte Tauro, desde Derbe e Iconium hasta el Ponto Euxino, quedando a un lado la Armenia Menor y al otro la Capapadocia propiamente dicha. Sus habitantes sufrieron, sucesivamentee el yugo de Teglaffalasar (II20 anos a. de J. C.), de los Medos y de Ciro; después fueron gobernados por sitrapas que, con frecuencia, se independizaban. Dividida, posteriormente, en Capadocia del Ponto y del Tauro, la primera conservó la independencia, pero la segunda perteneció sucesivamente a Eumenes, Antkgono y, después de Ipso, a los Seleucidas. Ariarates I de Armenia la unió a su reino y asi permaneció bajo todos sus sucesores que llevaban su mismo nombre hasta que al VII le destronó Mitridates, que puso en su lugar a Ariobatzanes, despojado a su vez por Tigranes. El ano 17 de nuestra era Tiberio hizo de Capaddocia una provincia romana bajo la ptotección del legado propetor de Siria.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 1, pg, 147 y 316

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his
general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

Notes for Philip II, King Of Macedonia:
Philip II, byname PHILIP OF MACEDON (b. 382 BC--d. 336, Asia Minor), 18th king of Macedonia (359-336 BC), who restored internal peace to his country and then, by 339, had gained domination over all Greece by military and diplomatic means, thus laying the foundations for its expansion under his son Alexander III the Great.

Early life and accession.

Philip was a son of Amyntas III. In his boyhood he saw the Macedonian kingdom disintegrating while his elder brothers Alexander II and Perdiccas III, who each reigned for a few years, strove unsuccessfully against insubordination of their regional vassal princes, intervention of the strong Greek city Thebes, and invasion by the Illyrians of the northwest frontier.

Philip himself spent some time as a hostage at Thebes, the leading city (with Athens) of this decade (370-360 BC), where the great Epaminondas, the most inventive tactician of all Greek generals until then, was in charge of the best army in Greece. These were probably the most formative years of Philip's education. When he returned to Macedonia his brother Perdiccas soon found him ready for a command.

Philip came to the throne suddenly and unexpectedly in 359, when Perdiccas was killed meeting an Illyrian invasion. The Illyrians prepared to close in; the Paeonians were raiding from the north, and two claimants to the throne were supported by foreign powers. In this crisis Philip showed a good sense of priorities by buying off his dangerous neighbours and, with a treaty, ceding Amphipolis to Athens. He used the time gained in military preparations. The army that later conquered Persia was developed all through his reign, but the decisive innovations in arms--the sarissa, a pike nearly half as long again as the spear of the Greeks--tactics, and training belong probably to this first year.

Macedonian expansion.

In 358 he invaded Paeonia, and then he defeated the Illyrians decisively, in a battle that already suggests a master of war. The next year his marriage with

Olympias, the Molossian princess of Epirus (the mother of Alexander the Great), helped to stabilize his western frontier. Now he ventured to antagonize Athens by recapturing Amphipolis, the strategic key securing the eastern frontier and giving access into Thrace; and in 356 he took the west Thracian Crenides (renamed by him Philippi), a place newly founded to exploit new finds of silver and gold in Mount Pangaeum. These successes frightened his neighbours into forming a coalition against him, which was joined by Athens; but it achieved nothing.

The 10-year "war for Amphipolis" with Athens showed that the Athenians, with all their naval power, were quite unable to damage the continental and military power of Macedonia or even to save their own allies from Philip's attacks. Meanwhile he twice penetrated deeply into Thrace. And in the south a Thessaly divided against itself gave him an entry into Greece. These same 10 years saw central Greece immersed in the Sacred War to liberate Delphi from its occupation by the Phocians, enabling Philip to intervene as the ally of Thebes and the Thessalian League of city states. His only great defeat in the field came in Thessaly in 353, owing (it seems) to overconfidence and failure of reconnaissance. The next year he retrieved it with a spectacular victory, which forced the Athenians to occupy Thermopylae and bar his path to the south.

Presidency of the Thessalian League.

Characteristically, Philip declined the trial of strength, prepared to wait for six years until he could gain Thermopylae by negotiation and without striking a blow. Meanwhile his Thessalian victory earned him election as president (archon) of the Thessalian League (probably 352), a position unique for a foreigner in a Greek confederation and one that was to bind Thessaly to the kings of Macedonia for 150 years and more.

Philip's capture of Olynthus and annexation of Chalcidice in 348, enslaving the Olynthians and other of the Chalcidians, was disquieting to many. The Greeks themselves occasionally were brutal to small cities, but Olynthus was a large city. Philip's enemies could affect a high moral tone and contempt for a barbarous Macedonian, but even his friends might have wondered whether he ought to be allowed into the heart of Greece with an army. Yet there were many ways in which he could serve them. Particularly, he could finish the Sacred War, which the Thessalians, Thebans, and others still could not finish for themselves. Athens could not prevent this now and had reason to fear that Philip's next campaign in Thrace (346) might challenge its own control of the sea route to southern Russia, its main source for imported corn. Significantly, however, it was Philip, and not Athens, who made the first overtures for peace, though all the military initiatives lay in his own hand. His plans for the future, in Greece and farther afield, included Athens as a willing ally, not as a defeated enemy.

Even before the peace with Athens was ratified (346), the Athenian publicist Isocrates was inviting Philip to reconcile the four leading cities of Greece and to lead a united Greek alliance in a war of expansion against Persia. A step in this direction was Philip's intervention now to end the Sacred War, in recognition of

which he was admitted to membership of the Delphic Amphictyony--an association of neighbouring states. The votes of the Thessalians and their clients gave him a control of its council, which could be used on occasion for political and diplomatic ends.

He lost no opportunity in the next years (346-343) of penetrating Greece without war, by winning and buying friends among the politicians of the smaller cities and intervening occasionally with subsidies or a force of mercenaries in their local disturbances. This policy made him some enemies, too, and it played into the hands of the great orator Demosthenes and others at Athens. Demosthenes saw Philip now as a bar to Athenian greatness and a threat to its freedom and existence; he talked tirelessly to warn the Athenians of the danger and to convince the Greeks in general that it was their danger too. Philip in these years conciliated Athens in small ways even under provocation, but he came to see that Demosthenes and the anti-Macedonians were beyond conciliation (343-342). Meanwhile, he reasserted his suzerainty over the neighbouring Illyrians, tightened his grip on Thessaly, and in 342 began the series of campaigns in Thrace that enabled him in two years to annex great parts of it as a province, and finally to demonstrate his power against the Scythians settled on the southern banks of the Danube
Delta. The events in Thrace caused two of his Greek allies, the cities of Perinthus (later called Heraclea, present-day Marmaraereglisi) and Byzantium, to review their position, and his coercion of them led to the two great sieges that showed the development of his artillery and allied arms, of which his son Alexander was to make greater use in Asia.

The declaration of war by Athens in 340 enabled him to raise the two sieges without undue loss of face, though he had failed to establish a threat to the Athenian corn route to southern Russia. Athens was to be intimidated now by invasion of its territory through central Greece, where the key position was held by Thebes, his ally hitherto, but of late a dissatisfied and recalcitrant one. His services to it in the Sacred War had been more than offset by his new position as its successful rival for leadership in
and through the Amphictyony, and his moves toward hegemony in Greece could be seen in Thebes as encroachments.

Victory of Chaeronea.

When Philip swept south with his army in November 339, he hoped to rush the Thebans into honouring their alliance and letting him through into Attica. The Thebans listened instead to Demosthenes and to their own instinct of self-preservation. The Greek alliance became something formidable with the accession of Thebes, and Philip was forced, as a contemporary orator put it with only a mild exaggeration, "to stake his all on the issue of one short day." Chaeronea was a famous victory,
gained by decisive blows of Philip's cavalry. His real skill as a general can be seen, though dimly, in a manoeuvre of controlled retreat aimed at dislocating the advancing Greeks and creating gaps for the cavalry to strike. By winning this battle he had won the war.

In the various peace treaties with the Greek states, Thebes had to admit a Macedonian garrison, and its democratic constitution was replaced by a pro-Macedonian government; but Athens suffered neither invasion of its territory nor interference with its democracy and was not disarmed by dismantling of the walls or surrender of the navy. For Philip, Athens was the one Greek state from which he needed not neutrality or unwilling alliance but active cooperation. All past experience had shown that wars
against Persia succeeded only when the Persians were denied the use of the Aegean, and for this the great Athenian navy was the first need.

In Greece (outside Thessaly), Philip could have had no illusions about his own unpopularity, except among those of the well-to-do who were attracted by his court and his patronage; some cities also (especially the neighbours of Sparta) were glad to lean on Macedonia for support against an ancient enemy. Philip intended to involve all the Greeks with the Persian war. So Isocrates had advised him eight years before; but on the details of the ways and means he had no advice to offer. Philip himself
organized the Greeks now to keep the peace with him and with each other and to support him in the Persian war overseas. In the constitutional details of his settlement of Greece he may well have had the help of Aristotle, free from his recent duties as tutor of the young Alexander.

The League of Corinth.

Philip's so-called League of Corinth, established in 337, was an organization designed to preserve and perpetuate a general peace (koine eirene), inaugurated when the delegates of all the states of Greece (except Sparta) and the islands swore to abide by it and to recognize Philip as president (hegemon) for this purpose. The general peace was a political innovation of the Greeks themselves, used several times in the past 50 years in attempts to stabilize affairs while promoting this or that hegemony. The peace had never lasted long because the leading Greek states had neither the power nor the mutual trust to create an effective organization for collective action against aggressors.

Philip designed a council of representatives from all the states (synedrion), which was empowered to deliberate and decide on action to be taken in the event of the peace being broken or threatened. After the decisions were made, their execution lay with Philip as hegemon. The states were under obligation to supply troops or ships to the hegemon on demand, by quotas corresponding to their voting power on the council. Though neither Philip nor Macedonia had representatives on the council, it was the knowledge that the hegemon had the power of Macedonia in his hand that made this organization effective. As it happened, Corinth, where the inaugural meeting was held, was one of only three Greek cities with a Macedonian garrison, a fact the significance of which can have been lost on nobody.

Last years.

Philip was wise, no doubt, to build on the foundation of the earlier practice of the Greeks themselves and also to refrain from organizing them in any permanent

alliance that would have recalled too much the unpalatable experiences of the past. He was not, however, a Greek politician or even a Greek, but king of the Macedonians; and he cannot possibly have seen the settlement of Greece--as most modern historians have seen it--as the culmination of his life's work. For him it culminated nothing and was not even an end in itself but only a means. Chaeronea had brought the Greeks to order, and his plans required that they should stay in order now. The synedrion at Corinth heard his program for a Persian war and duly acclaimed it early in 337. Early the next year an advance force of the Macedonian army crossed to Asia Minor. Philip would lead the grand army into Asia presently, and the Greeks would be with him.

This meteor fizzled out. The subtle, pliant, patient, calculating diplomatist, master of timing in politics and war, ended his life in a tale of irresponsible incompetence. The historian Theopompus, who saw Philip at close quarters, made much of his vices, his love of drink and debauchery, and his wild extravagance with money. Allowance made for this notably faultfinding and puritanical writer, Philip's character did contain some real ambiguities, extending into his domestic life. His "political marriages"
were mostly opportune symbols of goodwill toward princes or groups worth conciliating, but his last marriage, in 338, to the Macedonian Cleopatra, led to a final break with Olympias, his queen, who left the country accompanied by the crown prince Alexander. Though Olympias was unpopular at court and though Cleopatra's connections were powerful and important, it was not "politic" to put the succession in jeopardy. Philip showed that he had never intended this result, by taking trouble to be reconciled with Alexander. The tradition that makes him infatuated with Cleopatra is probably right. If so, he
misjudged fatally the amount of harm that could be done by marrying her.

With the preparations far advanced for the crossing into Asia, at the grand celebration of his daughter Cleopatra's marriage to Alexander of Epirus (brother of Olympias), Philip was assassinated by Pausanias, a young Macedonian noble with a bitter grievance against the young queen's uncle Attalus and against Philip for denying him justice. This was the official explanation, and Pausanias himself could add nothing to it; he was killed on the spot. Suspicion fell on Olympias and Alexander, those with
most to gain from Philip's death, and many modern interpreters have followed it. Aristotle, however, clearly did not believe it. In his Politics a few years later he used this incident as an example of a monarch murdered for private and personal motives--which would have been a puerile indiscretion if either he or the world in general had ever taken the canard seriously.

Assessment.

So ended, unworthily, the first of the great Macedonians. Everything known about him comes from Greek sources, which concentrate on his impact upon the Greeks and their history. Yet even more impressive, in view of Macedonia's troubled and undistinguished past, would be the full story of his unification and expansion of his own kingdom; his control of its regional princes, nobles, and gentry and their retainers, to form a great Macedonian people, symbolized by the finest army the world had seen; and his continuing attrition by warfare and

diplomacy, which in some 20 years reduced much of the Balkan peninsula to subservience.

The apparently untidy record of his campaigns into Illyria or Thrace and of his interventions with diplomacy or arms (or both) in Thessaly, Euboea, and the Peloponnese, which might suggest that repetition is a sign of incompetence, seem better interpreted as the work of a strategist operating always on several fronts, often preferring diplomacy to war, limited objectives to the grandiose, the smaller risks to the greatest; especially never forgetting that there is always another day. His decisive day at
Chaeronea came, in a sense, because his true policy in Greece had failed, thanks partly to Demosthenes. But probably to take control of Greece without a Chaeronea was a real impossibility at this date (or indeed later).

Though Philip certainly wanted to be acceptable in Greece and did attract many important Greeks to his court, his philhellenism has been overrated: Olynthus and other Greek cities knew better. Though he cultivated the Athenians for reasons of high policy, there is no evidence that he ever in his life set foot in Athens, a remarkable piece of insouciance at every level. Pella, his capital, had long been a resort or refuge of great men of letters, and under Philip the connection with Plato's Academy was preserved, Theopompus was entertained, and Isocrates was invited; the leading actors of the Athenian stage appeared in Macedonia, too. Aristotle, whose father had been physician to Amyntas, Philip's father, spent three or four important years as Alexander's tutor.

Philip presumably was at home with these people, but tradition says nothing of him as a man of letters himself or as an intellectual, though as an orator he could impress a party of Athenians that included Demosthenes and Aeschines and other professionals. His charm was great; he was by nature convivial, hospitable, and a bon viveur. Undoubtedly he drank too much and too often, with the saving grace that he was known to listen to home truths even when drunk. As a commander in the field he was unwearying, and in action he fought like a lion; in the end he was really disfigured with old wounds. He was a general perhaps not of genius but of a very high order, with the tactical skill to coordinate the cavalry and infantry arms which were largely of his own creating. Making and training over the years a great army, he was paradoxically sparing and even cautious in using it.

If he had survived to invade Asia, it would not have been to overthrow the Persian Empire. He might have established a Macedonian empire in Asia, perhaps, but it would have been a Mediterranean empire in character. The Greeks would have benefitted by colonization, but the problem of Greek freedom would have remained, with the political domination of the higher culture by the lower. Philip was aware of the problem, and the League of Corinth, with its facade of freedom, was his answer. It did not deceive the Greeks or satisfy them; but no later Macedonian king could improve on it. Philip had made Macedonia,
and now Macedonia and its kings made world history.

Notes for Olympias, Queen Of Macedonia:
Olympias (b. c. 375 BC--d. 316 BC), wife of Philip II of Macedonia and mother of Alexander the Great. She had a passionate and imperious nature, and she played important roles in the power struggles that followed the deaths of both rulers.

The daughter of Neoptolemus, king of Epirus, Olympias apparently was originally named Myrtale. Later she may have been called Olympias as a recognition of Philip's victory in the Olympic Games of 356 BC. Philip's polygamy did not threaten her position until 337, when he married a high-born Macedonian, Cleopatra. Olympias withdrew to Epirus, returning after Philip's assassination (336). She then had Cleopatra and her infant daughter killed. Olympias quarreled repeatedly with Antipater, regent of Macedonia during the early years of Alexander's invasion of Asia, and eventually retired again, about 331, to Epirus. Upon the death of Antipater in 319 (Alexander had died in 323), his successor, Polyperchon, invited Olympias to act as regent for her young grandson, Alexander IV (Alexander the Great's son). She declined his request until 317, when Antipater's son Cassander established Philip II's half-witted son Philip III (Arrhidaeus) as king of Macedonia. The Macedonian soldiers supported her return. She put to death Philip Arrhidaeus and his wife, as well as Cassander's brother and a hundred of his partisans. In response Cassander entered Macedonia and blockaded Olympias in Pydna, where she surrendered in the spring of 316. She was condemned to death, but Cassander's soldiers refused to carry out the sentence. She eventually was killed by relatives of those she had executed.

Notes for Cassander, King Of Macedonia (305-297):

Casandro. Hijo de Antípater, uno de los generales de Alejandro Magno que más intervinieron en los sucesos posteriores a la muerte de éste. Al morir Antípater dejó la regencia a Polispercon, hombre de grandes prendas. Casandro no respetó la voluntad paterna y se unió a Ptolomeo, celeuco y Antígono contra el regente, que a su vez se apovó en Eumenes, comenzando aquella serie de guerras que ensangrentaron la herencia del macedón. Antígono logró dar muerte a Eumenes, abandonado por sus soldados, lo que trajo como consecuencia que las satrapias asiaticas se independizasen y Antígono senta se las bases de su poder. Se aliaron contra él Ptolomeo, Lisímaco, Casandro y Seleuco, pero tras de algunos desastres iniciales, venció Antigono, imponiendo la paz de 3I8 a. de J C., que dejó casi las cosas como estaban, es decir, a Lisímaco dueño de Tracia, a Ptolomeo de Egipto y a Seleuco de Asia, otorgando el trono de Macedonia al niño Alejandro Egus, hijo de Alejandro Magno y Roxana, bajo la regencia de Casandro. Este se apoderó de Atenas, donde estableció un gobierno aristocrático, a la cabeza del cual puso a Demetrio Falereo. Disensiones entre la familia de Alejandro Magno indispusieron a Filipo Arrideo y su esposa Eurídice con Polispercón por sus respetos hacia Olimpia, madre del macedón, e hicieron que se aliase a Casandro. Triunfó de momento Olimpia, que mandó matar a Filipo e hizo suicidarse a su esposa, persiguió y casi exterminó a la familia y partidarios de Casandro, pero éste consiauió sitiarla en Pidna la rindió por hambre y la entregó a las familias de los asesinados que la lapidaron (3I5). Casandro, para adquirir derechos al trono, CASÓ CON TESALÓNICA e hizo que Glaucis, amigo suyo y gobernador del Antípolis, diese muerte a Alejandro Egus. Polispercón, entonces, proelamó rey al joven Hércules hijo natural del macedón, pero al ofrecerle Casandro la corona, Polispercón se dejó engañar e hizo matar a Hércules. Antígono, el más ambicioso e independiente de Ios generales, depuso a Faléreo e impuso a un hijo suyo, también llamado Demetrio, lo que lanzó a la guerra a Casandro y Ptolomeo, y después de la segunda batalla de Salamina todos los contendientes tomaron decididamente el título de rey. El hijo de Antígono rechazó a Casandro en las Termópilas, pero éste, aliado de nuevo con

Lisímaco, Seleuco y Ptolomeo, triunfó en Ipso (30I) y Grecia quedó entregada a Casandro, que reinó en ella hasta su muerte, en 298.

Cassander (b. c. 358 BC--d. 297 BC), son of the Macedonian regent Antipater and king of Macedonia from 305 to 297.

Cassander was one of the diadochoi ("successors"), the Macedonian generals who fought over the empire of Alexander the Great after his death in 323. After Antipater's death in 319, Cassander refused to acknowledge the new regent, Polyperchon. With the aid of Antigonus I Monophthalmus, ruler of Phrygia, Cassander seized Macedonia and most of Greece, including Athens (319-317). When Antigonus returned from the eastern provinces intending to reunite Alexander's empire under his own sovereignty, Cassander joined forces with Ptolemy I, Seleucus, and Lysimachus (rulers of Egypt, Babylon, and Thrace, respectively) to oppose him. Between 315 and 303 the two sides clashed frequently. Cassander lost Athens in 307 and his other possessions south of Thessaly in 303-302, but the defeat of Antigonus at the Battle of Ipsus in Phrygia (301) secured Cassander's control of Macedonia.

Even though he had already murdered Alexander IV and Roxana, the son and the widow of Alexander the Great, Cassander did not take the royal title until 305. His ruthlessness toward Alexander's family was partly dictated by political considerations, but his personal hatred for the dead king was evidenced by his rebuilding of Thebes, which had been leveled by Alexander as punishment for the Theban rebellion.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Notes for Amyntas II, King Of Macedonia:
AmyntasIII (or II) (d. 370/369 BC), king of Macedonia from about 393 to 370/369. His skillful diplomacy created a minor role for Macedonia in Greek affairs and prepared the way for its emergence as a great power under his son Philip II (ruled 359-336).

Amyntas came to the throne during the disorders that plagued Macedonia after the death of the powerful king Archelaus (ruled c. 413-399). Amyntas soon had to fight off attacks by the Illyrians (of present-day Albania) and by the Chalcidian League, a confederation of cities of the Chalcidice peninsula, east of Macedonia. The threat from the latter was removed when intervention by Sparta led to the dissolution of the league in 379. Amyntas continued to maintain his independence by siding with the powers ascendant in Greece, including first Athens and then Thessaly, under its tyrant Jason of Pherae (ruled c. 385-370).

Notes for Neoptolemus, king of Epirus:
In the 5th century Epirus was still on the periphery of the Greek world. To the 5th-century historian Thucydides, the Epirotes were "barbarians." The only Epirotes regarded as Greek were the Aeacidae, who were members of the Molossian royal house and claimed descent from Achilles. From about 370 BC on, the Aeacidae were able to expand the Molossian state by incorporating tribes from the rival groups in Epirus. The Aeacidae's efforts gained impetus from the marriage of Philip II of Macedon to their princess, Olympias. In 334, while Alexander the Great, son of Philip and Olympias, crossed into Asia, his uncle, the Molossian ruler Alexander, attacked southern Italy, where he was eventually checked by Rome and killed in battle in about 331. Upon Alexander the Molossian's death, the Epirote tribes formed a coalition on an equal basis but with the Molossian king in command of their military forces. The greatest

Molossian king of this coalition was Pyrrhus (319-272); he and his son Alexander II ruled as far south as Acarnania and to central Albania in the north. Pyrrhus' military adventures overstrained his state's military resources, but they also brought great prosperity to Epirus. He built a magnificent stone theatre at Dodona and a new suburb at Ambracia (now Irta), which he made his capital.

By Andromache, Priam's daughter-in-law, Neoptolemus (possible far ancestor of Olympia) was the father of Molossus, ancestor of the Molossian kings.

Notes for Cassander, King Of Macedonia (305-297):

Casandro. Hijo de Antkpater, uno de los generales de Alejandro Magno que mis intervinieron en los sucesos posteriores a la muerte de éste. Al morir Antkpater dejó la regencia a Polispercon, hombre de grandes prendas. Casandro no respetó la voluntad paterna y se unió a Ptolomeo, celeuco y Antkgono contra el regente, que a su vez se apovó en Eumenes, comenzando aquella serie de guerras que ensangrentaron la herencia del macedón. Antkgono logró dar muerte a Eumenes, abandonado por sus soldados, lo que trajo como consecuencia que las satrapias asiaticas se independizasen y Antkgono senta se las bases de su poder. Se aliaron contra él Ptolomeo, Liskmaco, Casandro y Seleuco, pero tras de algunos desastres iniciales, venció Antigono, imponiendo la paz de 3I8 a. de J C., que dejó casi las cosas como estaban, es decir, a Liskmaco dueno de Tracia, a Ptolomeo de Egipto y a Seleuco de Asia, otorgando el trono de Macedonia al nino Alejandro Egus, hijo de Alejandro Magno y Roxana, bajo la regencia de Casandro. Este se apoderó de Atenas, donde estableció un gobierno aristocritico, a la cabeza del cual puso a Demetrio Falereo. Disensiones entre la familia de Alejandro Magno indispusieron a Filipo Arrideo y su esposa Eurkdice con Polispercón por sus respetos hacia Olimpia, madre del macedón, e hicieron que se aliase a Casandro. Triunfó de momento Olimpia, que mandó matar a Filipo e hizo suicidarse a su esposa, persiguió y casi exterminó a la familia y partidarios de Casandro, pero éste consiauió sitiarla en Pidna la rindió por hambre y la

entregó a las familias de los asesinados que la lapidaron (3I5). Casandro, para adquirir derechos al trono, CASÓ CON TESALÓNICA e hizo que Glaucis, amigo suyo y gobernador del Antkpolis, diese muerte a Alejandro Egus. Polispercón, entonces, proelamó rey al joven Hércules hijo natural del macedón, pero al ofrecerle Casandro la corona, Polispercón se dejó enganar e hizo matar a Hércules. Antkgono, el mis ambicioso e independiente de Ios generales, depuso a Faléreo e impuso a un hijo suyo, también llamado Demetrio, lo que lanzó a la guerra a Casandro y Ptolomeo, y después de la segunda batalla de Salamina todos los contendientes tomaron decididamente el tktulo de rey. El hijo de Antkgono rechazó a Casandro en las Termópilas, pero éste, aliado de nuevo con Liskmaco, Seleuco y Ptolomeo, triunfó en Ipso (30l) y Grecia quedó entregada a Casandro, que reinó en ella hasta su muerte, en 298.

Cassander (b. c. 358 BC--d. 297 BC), son of the Macedonian regent Antipater and king of Macedonia from 305 to 297.

Cassander was one of the diadochoi ("successors"), the Macedonian generals who fought over the empire of Alexander the Great after his death in 323. After Antipater's death in 319, Cassander refused to acknowledge the new regent, Polyperchon. With the aid of Antigonus I Monophthalmus, ruler of Phrygia, Cassander seized Macedonia and most of Greece, including Athens (319-317). When Antigonus returned from the eastern provinces intending to reunite Alexander's empire under his own sovereignty, Cassander joined forces with Ptolemy I, Seleucus, and Lysimachus (rulers of Egypt, Babylon, and Thrace, respectively) to oppose him. Between 315 and 303 the two sides clashed frequently. Cassander lost Athens in 307 and his other possessions south of Thessaly in 303-302, but the defeat of Antigonus at the Battle of Ipsus in Phrygia (301) secured Cassander's control of Macedonia.

Even though he had already murdered Alexander IV and Roxana, the son and the widow of Alexander the Great, Cassander did not take the royal title until 305. His ruthlessness toward Alexander's family was partly dictated by political considerations, but his personal hatred for the dead king was evidenced by his rebuilding of Thebes, which had been leveled by Alexander as punishment for the Theban rebellion.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Notes for Artaxerxes II Abialaka, King Of Persia:
Artaxerxes II (fl. late 5th and early 4th centuries BC), Achaemenid king of Persia (reigned 404-359/358).

He was the son and successor of Darius II and was surnamed (in Greek) Mnemon, meaning "the mindful." When Artaxerxes took the Persian throne, the power of Athens had been broken in the Peloponnesian War (431-404), and the Greek towns across the Aegean Sea in Ionia were again subjects of the Achaemenid Empire. In 404, however, Artaxerxes lost Egypt, and in the following year his brother Cyrus the Younger began preparations for his rebellion. Although Cyrus was defeated and killed at Cunaxa (401), the rebellion had dangerous repercussions, for it not only demonstrated the superiority of the Greek hoplites used by Cyrus but also led the Greeks to believe that Persia was vulnerable.

In 400 Sparta broke openly with the Achaemenids, and during the next five years its armies achieved considerable military success in Anatolia. The Spartan navy, however, was destroyed at Cnidus (394), thereby giving the Achaemenids mastery of the Aegean. The Greek allies of Persia (Thebes, Athens, Argos, and Corinth) continued the war against Sparta, but, when it became evident that the only ones to gain from the war were the Athenians, Artaxerxes decided
to conclude peace with Sparta. In 386 Athens was compelled to accept the settlement known as the King's Peace, or the Peace of Antalcidas, by which Artaxerxes decreed that all the Asiatic mainland and Cyprus were his, that Lemnos, Imbros, and Scyros were to remain Athenian dependencies, and that all the other Greek states were to receive autonomy.

Elsewhere Artaxerxes met with less success. Two expeditions against Egypt (385-383 and 374) ended in complete failure, and during the same period there were continuous rebellions in Anatolia. There were also wars against the mountain tribes of Armenia and Iran.

By the King's Peace the Achaemenids had become the arbiters of Greece, and in the following wars all parties applied to them for a decision in their favour. After the Theban victory of Leuctra (371), an old alliance between the Achaemenids and the Thebans was restored. Achaemenid supremacy, however, was based on Greek internal discord rather than Achaemenid strength, and, when this weakness became apparent, all the satraps (governors) of Anatolia rose in revolt
(c. 366), in alliance with Athens, Sparta, and Egypt, and Artaxerxes could do little against them. The satraps, however, were divided by mutual distrust, and the rebellion was finally put down by Persia through a series of treacheries. When the reign of Artaxerxes ended, Achaemenid authority had been restored over most of the empire--more from internal rivalries and discord than from his efforts.

Under Artaxerxes an important change occurred in the Persian religion. The Persians apparently did not worship images of the gods until Artaxerxes set up statues of the goddess Anahita in various large cities. Inscriptions by all former

kings named only Ahura Mazda, but those of Artaxerxes also invoked Anahita and Mithra, two deities of the old popular Iranian religion that had been neglected.

ii. Artaxerxes III Ochus, King Of Persia, born in c 426 a.c.; died in 338 a.c; married Atossa; born in c 420 a.c..

Notes for Artaxerxes III Ochus, King Of Persia:
Artaxerxes III (d. 338 BC), Achaemenid king of Persia (reigned 359/358-338 BC).

He was the son and successor of Artaxerxes II and was called Ochus before he took the throne. Artaxerxes III was a cruel but energetic ruler. To secure his throne he put to death most of his relatives. In 356 he ordered all the satraps (governors) of the Achaemenid empire to dismiss their mercenaries. He also forced Athens to conclude peace and to acknowledge the independence of its rebellious allies (355).

Artaxerxes then attempted to subjugate Egypt, which had been independent since 404. Failure of the first attempt (351) encouraged the Phoenician towns and the princes of Cyprus to revolt. Early in 345, Artaxerxes collected a great army and marched against the Phoenician city of Sidon. Mentor of Rhodes, who had helped betray Sidon, rose high in the king's favour and entered into a close understanding with the eunuch Bagoas, the king's favourite. Artaxerxes then advanced on Egypt with a great land and naval force and, at Pelusium in the Nile River delta, defeated the pharaoh Nectanebo II (343). A Persian satrap was placed over Egypt, the walls of its cities were destroyed, its temples were plundered, and Artaxerxes was said to have killed the Apis bull with his own hand.

After the king's return to Susa, Bagoas ruled the court and the upper satrapies, while Mentor restored the authority of the empire throughout the west. When Philip of Macedon attacked Perinthus and Byzantium (340), Artaxerxes sent support to those cities. In 338 Artaxerxes and his elder sons were killed by Bagoas, who then raised the king's youngest son, Arses, to the throne.

Notes for Darius II, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Darius II Ochus (d. 404 BC, Babylon [now in Iraq]), Achaemenid king (reigned 423-404 BC) of Persia.

The son of Artaxerxes I by a Babylonian concubine, he seized the throne from his half brother Secydianus (or Sogdianus), whom he then executed. Ochus, who had previously been satrap of Hyrcania, adopted the name of Darius on his accession; he was also known as Nothus (Bastard). Darius was dominated by eunuchs and by his half sister and wife, the cruel and ambitious Parysatis. Intrigue and corruption were rife at the Achaemenid court, and revolts in Hyrcania and Media, although quickly suppressed, were symptomatic of the discontent caused by his rule.

After the Athenian defeat at Syracuse in 413 BC, Darius decided to recover the Greek coastal cities of Asia Minor, which had been under Athenian control since 448. The satraps of Asia Minor, Tissaphernes and Pharnabazus, were ordered to collect overdue tribute, and an alliance against Athens was formed with Sparta. In the ensuing war the greater part of Ionia was recovered, but elsewhere the allies had less success, partly because of the policy of Tissaphernes, who gave Spartan forces only limited support. In 407, however,

Darius decided to put all his resources behind Sparta. He appointed his son Cyrus the Younger in place of Tissaphernes as commander in chief of Asia Minor and gave him funds to re-create the Spartan fleet. As a result Athenian power was broken in 405 at  Aegospotami. Not long after, Darius died of an illness.

i. Cyrus The Younger, Prince Of Persia, born in c 456 BC; died in 401 a.c.

Notes for Cyrus The Younger, Prince Of Persia:
Ciro de Persia el Joven (424-401a.C.), príncipe persa, hijo de Darío II, rey de Persia, y hermano menor de Artajerjes II (que reinó en 404-c.358a.C.). En el 408a.C. fue nombrado sátrapa (gobernador) de las provincias persas al oeste de Asia Menor. También apoyó a los espartanos durante los últimos años de la guerra del Peloponeso permitiéndoles derrotar a los atenienses. Cuando Darío murió y Artajerjes le sucedió (404a.C.) en el trono, Ciro proyectó una revuelta, pero Tisafernes, sátrapa de Caria, reveló sus planes (413-395a.C.). Ciro fue perdonado gracias a la influencia de su madre, Parisatis, y enviado de nuevo a su satrapía. Allí reunió una fuerza de aproximadamente 100.000 individuos persas y 13.000 griegos, principalmente mercenarios espartanos. Bajo el pretexto de dirigir una expedición contra los bandidos de Pisidia, marchó desde Sardes hacia Babilonia, entonces bajo dominio persa, para deponer a su hermano. En el 401a.C. los ejércitos de Artajerjes se encontraron con los de Ciro en la batalla de Cunaxa, cerca del río Éufrates; Ciro murió durante la lucha. Una consecuencia importante de esta batalla fue el repliegue estratégico de los griegos desde el centro del territorio persa hasta el mar Negro, exponiendo al mundo griego la debilidad militar de los persas. La historia de la revuelta de Ciro y de la marcha de los conocidos como los 'diez mil griegos' fue narrada por el general e historiador ateniense Jenofonte en la Anábasis.

Cyrus THE YOUNGER  (b. after 423 BC--d. 401, Cunaxa, Babylonia [now in Iraq]), younger son of the Achaemenian king Darius II and his wife,  Parysatis.

Cyrus was the favourite of his mother, who hoped to secure the succession for him instead of her eldest son, Arsaces. When Darius decided to continue the war against Athens and give support to the Spartans, Parysatis persuaded him to appoint the young Cyrus as satrap (governor) of Lydia, Phrygia, and Cappadocia and commander in chief of the Achaemenian forces in Asia Minor (407). Cyrus' friendly alliance with Lysander, the commander of the Spartan fleet, assured Sparta of victory.

In 405 Cyrus was called to his father's deathbed, and in 404, when Arsaces became king as Artaxerxes II, Cyrus was accused by Tissaphernes, satrap of Caria, of plotting his brother's murder. On the intercession of Parysatis, however, Cyrus was pardoned and sent back to his satrapy. On his return, Cyrus began preparations to seize the throne. He used a quarrel with Tissaphernes over the Ionian cities as a pretext for gathering a large army and also pretended to
prepare an expedition to Pisidia, in the Taurus Mountains. In the spring of 401 Cyrus started out with about 20,000 men, many of whom were Greek mercenaries. When he reached the Euphrates River at Thapsacus, he announced that he was marching against Artaxerxes. He advanced unopposed into Babylonia; but Artaxerxes, warned at the last moment by Tissaphernes, was hastily gathering an army. The two forces met at the Battle of Cunaxa, north of Babylon, where Cyrus was slain. The Greek troops of Cyrus, after their commanders had been treacherously seized by Tissaphernes, forced their way to the Black Sea.

The courage and ability of Cyrus were highly praised by the Greeks, especially by the historian Xenophon (one of the Greek mercenaries), who in his Anabasis wrote the history of the Greek retreat; but from the standpoint of the Achaemenians Cyrus was a traitor who, to gain his own ends, used hostile Greeks to attack the empire.

Notes for King Of Troy Priamos:
Priam, in Greek mythology, the last king of Troy. He succeeded his father, Laomedon, as king and extended his control over the Hellespont. He married first Arisbe (a daughter of Merops the seer) and then Hecuba, by whom he had many children, including his favourites, Hector and Paris. Homer described Priam as an old man, powerless but kindly, not even blaming Helen, the wife of Paris, for all his personal losses resulting from the Trojan War. In the final year of the conflict, Priam saw 13 sons die: the Greek warrior Achilles killed Polydorus, Lycaon, and Hector within one day. The death of Hector, which signified the end of Troy's hopes, also broke the spirit of the king. Priam's paternal love impelled him to brave the savage anger of Achilles and to ransom the corpse of Hector; Achilles, respecting the old man's feelings and foreseeing his own father's sorrows, returned the corpse. When Troy fell, Neoptolemus, the son of Achilles, butchered the old king on an altar. Both Priam's death and his ransoming of Hector were favourite themes of ancient art.

Trojan War, legendary conflict between the early Greeks and the people of Troy in western Anatolia, dated by later Greek authors to the 12th or 13th century BC. (See Troy.) The war stirred the imagination of the ancient Greeks more than any other event in their history, and was celebrated in the Iliad and the Odyssey of Homer, as well as a number of other early works now lost, and frequently provided material for the great dramatists of the Classical Age. It also figures in the literature of the Romans (e.g., Virgil's Aeneid) and of later European peoples down to the 20th century.

In the traditional accounts, Paris, son of the Trojan king, ran off with Helen, wife of Menelaus of Sparta, whose brother Agamemnon then led a Greek expedition against Troy. The ensuing war lasted 10 years, finally ending when the Greeks pretended to withdraw, leaving behind them a large wooden horse with a raiding party concealed inside. When the Trojans brought the horse into their city, the hidden Greeks opened the gates to their comrades, who then sacked Troy, massacred its men, and carried off its women. This version was recorded centuries later; the extent to which it reflects actual historical events is not known.

Troy
---
Greek TROIA, also called ILIOS, or ILION, Latin TROIA, TROJA, or ILIUM, ancient city in northwestern Anatolia that holds an enduring place in both literature and archaeology. The legend of the Trojan War is the most notable theme from ancient Greek literature and forms the basis of Homer's Iliad. Though its present-day ruins are not of vast extent, Troy is a key archaeological site whose many layers illustrate the gradual development of civilization in northwestern Asia Minor.

Geography.

Ancient Troy commanded a strategic point at the southern entrance to the Dardanelles (Hellespont), a narrow strait linking the Black Sea with the Aegean Sea via the Sea of Marmara. The city also commanded a land route that ran north along the west Anatolian coast and crossed the narrowest point of the Dardanelles to the European shore. Troy probably used its site astride these two lines of communication to exact tolls from trading vessels and other travelers using them. This practice
probably accounted for the wealth of ancient Troy; it may also have been the Greeks' actual motive in waging war against the city, which chronically interfered with their trade through the Dardanelles.

The Troad (Greek Troias; "Land of Troy") is the district formed by the northwestern projection of Asia Minor into the Aegean Sea. The present-day ruins of Troy itself occupy the western end of a low descending ridge in the extreme northwest corner of the Troad. Less than 4 miles (6 km) to the west, across the plain of the Scamander River, is the Aegean Sea, and toward the north are the narrows of the Dardanelles.

Archaeology.

The approximate location of Troy was well known from references in works by ancient Greek and Latin authors. But the exact site of the city remained unidentified until modern times. A large mound, called Hisarlik (or Hissarlik) by the Turks, had long been known to hold the ruins of a city named Ilion that had flourished in Hellenistic and Roman times. In 1822 Charles McLaren suggested that this was the site of Homeric Troy, but for the next 50 years his suggestion received little attention from classical scholars, most of whom regarded the Trojan legend as a mere fictional creation based on myth, not history. The German archaeologist Heinrich Schliemann deserves full credit for adopting McLaren's identification and demonstrating to the world that it was correct. In seven major and two minor campaigns between 1870 and 1890, Schliemann conducted excavations on a large scale mainly in the central area of the Hisarlik mound, where he exposed most of the remains of the Early Bronze Age. After Schliemann's death in 1890, the excavations were continued (1893-94) by his colleague Wilhelm Dörpfeld and later (1932-38) by an expedition from the University of Cincinnati headed by Carl W. Blegen.

Before excavations began, the mound rose to a height of 105 feet (32 m) above the plain. It contained a vast accumulation of debris that was made up of many clearly distinguishable layers. Schliemann and Dörpfeld identified a sequence of nine principal strata, representing nine periods during which houses were built, occupied, and ultimately destroyed. At the end of each period when a settlement was destroyed (usually by fire, or earthquake, or both), the survivors, rather than clear the wreckage down
to the floors, merely leveled it out and then built new houses upon it.

The nine major periods of ancient Troy are labeled I to IX, starting from the bottom with the oldest settlement, Troy I. In periods I to VII Troy was a fortified stronghold that served as the capital of the Troad and the residence of a king, his family, officials, advisers, retinue, and slaves. Most of the local population,

however, were farmers who lived in unfortified villages nearby and took refuge in the citadel in times of danger. Troy I to V corresponds roughly to the Early Bronze Age (c. 3000 to 1900 BC). The citadel of Troy I was small, not more than 300 feet (90 m) in diameter. It was enclosed by a massive wall with gateways and flanking towers and contained perhaps 20 rectangular houses. Troy II was twice as large and had higher, sloping stone walls protecting an acropolis on which stood the king's palace and other princely residences, which were built of brick in a megaron (q.v.) plan. This city came to an end through fire, and Schliemann mistakenly identified it with Homer's Troy. In the "burnt layer's" debris were found a trove of gold jewelry and ornaments and gold, silver, copper, bronze, and ceramic vessels
that Schliemann named "Priam's treasure." The burning of Troy II seems to have been followed by an economic decline; each of the citadels of Troy III, IV, and V was fortified and somewhat larger than its predecessor, but the houses inside the walls were much smaller and more closely packed than in Troy II.

Troy VI and VII may be assigned to the Middle and Late Bronze Ages (c. 1900 to 1100 BC). Troy at this time had new and vigorous settlers who introduced domesticated horses to the Aegean area. They further enlarged the city and erected a magnificent circuit of cut limestone walls that were 15 feet (4.5 m) thick at the base, rose to a height of more than 17 feet (5 m), and had brick ramparts and watchtowers. Inside the citadel, which was now about 650 feet (200 m) long and 450 feet (140 m) wide, great houses were laid out on ascending, concentric terraces. Troy VI was destroyed by a violent earthquake a little
after 1300 BC. Dörpfeld had identified this stage as Homeric Troy, but its apparent destruction by an earthquake does not agree with the realistic account of the sack of Troy in Greek tradition. Moreover, the city's date, as indicated by imported Mycenaean pottery found in the earthquake debris, is too early for the Trojan War.

The survivors of the earthquake quickly rebuilt the town, thus inaugurating the short-lived Troy VIIa. The ruins were leveled and covered over by new buildings, which were set close together and filled all available space inside the fortress. Almost every house was provided with one or several huge storage jars that were sunk deep into the ground, with only their mouths above the level of the floor. Troy VIIa probably lasted little more than a generation. The crowding together of houses and the special
measures to store up food supplies suggest that preparations had been made to withstand a siege. The town was destroyed in a devastating fire, and remnants of human bones found in some houses and streets strengthen the impression that the town was captured, looted, and burnt by enemies. Based on the evidence of imported Mycenaean pottery, the end of Troy VIIa can be dated to between 1260 and 1240 BC. The Cincinnati expedition under Blegen concluded that Troy VIIa was very likely the capital of King Priam described in Homer's Iliad, which was destroyed by the Greek armies of Agamemnon.

The partly rebuilt Troy VIIb shows evidence of new settlers with a lower level of material culture, who vanished altogether by 1100 BC. For about the next four centuries the site was virtually abandoned. About 700 BC Greek settlers began

to occupy the Troad. Troy was reoccupied and given the Hellenized name of Ilion; this Greek settlement is known as Troy VIII. The Romans sacked Ilion in 85 BC, but it was partially restored by the Roman general Sulla that same year. This Romanized town, known as Troy IX, received fine public buildings from the emperor Augustus and his immediate successors, who traced their ancestry back to the Trojan Aeneas. After the founding of Constantinople (AD 324), Ilion faded into obscurity.

The Trojan War.

The classical legends of the Trojan War developed continuously throughout Greek and Latin literature. In Homer's Iliad and Odyssey, the earliest literary evidence available, the chief stories have already taken shape, and individual themes were elaborated later, especially in Greek drama. The story of the Trojan origin, through Aeneas, of Rome helped to inspire Roman interest; book ii of Virgil's Aeneid contains the best-known account of the sack of Troy. Finally there are the pseudo-chronicles that go under the names of Dictys Cretensis and Dares Phrygius.

The Trojan War fought between the Greeks and Troy originated in the following manner. King Priam of Troy was wealthy and powerful; by his wife Hecuba and by concubines he had 50 sons and 12 daughters. But his son Paris was invited to judge which of the goddesses Aphrodite, Hera, and Athena was entitled to receive the golden apple marked by the goddess Eris (Discord) "for the most beautiful." Aphrodite promised Paris the most beautiful woman in the world: he therefore awarded her the apple and went to Greece, where he won the love of, and eloped with, Helen, wife of Menelaus, the king of Sparta.

To recover Helen, the Greeks launched a great expedition under the overall command of Menelaus' brother, Agamemnon, king of Argos or Mycenae. The Trojans refused to return Helen. Small towns in or near the Troad were sacked by the Greeks, but Troy, assisted by allies from Asia Minor and Thrace, withstood a Greek siege for 10 years. The gods also took sides, notably Hera, Athena, and Poseidon for the Greeks, and Aphrodite (who had a son, Aeneas, by the Trojan Anchises, grandson of Assaracus), Apollo, and Ares for the Trojans. The Iliad, which is set in the 10th year of the war, tells of the quarrel between Agamemnon and Achilles, who was the finest Greek warrior, and the consequent deaths in battle of (among others) Achilles' friend Patroclus and Priam's eldest son, Hector.

After Hector's death the Trojans were joined by two exotic allies, Penthesilea, queen of the Amazons, and Memnon, king of the Ethiopians and son of the dawn-goddess Eos. Achilles killed both of these, but Paris then managed to kill Achilles with an arrow. Before they could take Troy, the Greeks had to steal from the citadel the wooden image of Pallas Athena (the Palladium) and fetch the arrows of Heracles and the sick archer Philoctetes from Lemnos and Achilles' son Neoptolemus (Pyrrhus) from Skyros; Odysseus and Diomedes achieved all these. Finally, with Athena's help, Epeius built a huge wooden horse. Several Greek warriors hid inside it; the rest of the Greek army sailed away to Tenedos, a nearby island, pretending to abandon the siege. Despite

the warnings of Priam's daughter Cassandra, the Trojans were persuaded by Sinon, a Greek who feigned desertion, to take the horse inside the walls of Troy as an offering to Athena; the priest Laocoon, who tried to have the horse destroyed, was killed by sea-serpents. At night the Greek fleet returned, and the Greeks from the horse opened the gates of Troy. In the total sack that followed, Priam and his remaining sons were slaughtered; the Trojan women passed into slavery in various cities of Greece. The adventurous homeward voyages of the Greek leaders were told in two epics, the Returns (Nostoi; lost) and Homer's Odyssey.

The few Trojan survivors included Aeneas, whose descendants continued to rule the Trojans; later tradition took Aeneas' Trojans to Italy as the ancestors of the Romans.

Medieval legends

Medieval European writers, unacquainted with Homer at first hand, found in the Troy legend a rich source of heroic and romantic storytelling and a convenient framework into which to fit their own courtly and chivalric ideals. The chief sources for medieval versions of the story were fictitious eyewitness accounts of the Trojan War by Dictys Cretensis and Dares Phrygius. The key work in the medieval exploitation of the Trojan theme was a French romance, the Roman de Troie (1154-60),
by Benoit de Sainte-Maure (q.v.).

Later medieval writers used the Roman de Troie until it was superseded by a Latin prose account, the Historia destructionis Troiae (c. 1287; "History of the Destruction of Troy"), by Guido delle Colonne. The French author Raoul Le Fcvre's Recueil des histoires de Troye (1464), an account based on Guido, was translated into English by William Caxton and became the first book to be printed in English as The Recuyell of the Histories of Troye (c. 1474).

Notes for Hecuba:
Hecuba, Greek HEKABE, in Greek legend, the principal wife of the Trojan king Priam, mother of Hector, and daughter, according to some accounts, of the Phrygian king Dymas. When Troy was captured by the Greeks, Hecuba was taken prisoner. Her fate was told in various ways, most of which connected her with the promontory Cynossema (Dog's Monument) on the Hellespont. According to Euripides (in the Hecuba), her youngest son, Polydorus, had been placed under the care of Polymestor, king of Thrace. When the Greeks reached the Thracian Chersonese on their way home, she discovered that her son had been murdered and in revenge put out the eyes of Polymestor and murdered his two sons. Later, she was turned into a dog, and her grave became a mark for ships.

Después de la cakda de la ciudad, que marcó el final de la guerra de Troya, y de la muerte de Prkamo, la anciana Hécuba fue hecha prisionera por los griegos. Durante el sitio de Troya, su hijo menor, Polidoro, habka sido confiado al cuidado del rey de Tracia. Camino a Grecia, donde sus captores la habkan apresado, Hécuba descubrió que habkan asesinado a Polidoro en la costa tracia. En venganza, arrancó los ojos del rey que mató a sus dos hijos. Hay tres versiones diferentes sobre la muerte de Hécuba: que desesperada por su captura se arrojó al Helesponto (hoy Dardanelos), que la mataron por insultar a sus captores o que fue metamorfoseada en un perro.

Andromache, in Greek legend, the daughter of Eëtion (prince of Thebe in Mysia) and wife of Hector (son of King Priam of Troy). All her relations perished in or shortly after the taking of Troy by the Greek warrior Neoptolemus (Pyrrhus). When the captives were allotted, Andromache fell to Neoptolemus, the son of Achilles, whom she accompanied to Epirus and to whom she bore three sons. Neoptolemus was slain at Delphi, and he left Andromache and the kingdom as well to Helenus, the brother of Hector. After the death of Helenus, Andromache returned to Asia Minor with her youngest son, Pergamus, who there founded a town named after himself.

[MARINOS HASTA PERSIA.FTW]

Artaxerxes I (d. 425 BC, Susa, Elam [now in Iran]), Achaemenid king of Persia (reigned 465-425 BC).

He was surnamed in Greek Macrocheir ("Longhand") and in Latin Longimanus. A younger son of Xerxes I and Amestris, he was raised to the throne by the commander of the guard, Artabanus, who had murdered Xerxes. A few months later, Artaxerxes slew Artabanus in a hand-to-hand fight. His reign, though generally peaceful, was disturbed by several insurrections, the first of which was the revolt of his brother the satrap of Bactria. More dangerous was the rebellion of Egypt under Inaros, who received assistance from the Athenians. Achaemenid rule in Egypt was restored by Megabyzus, satrap of Syria, after a prolonged struggle (460-454). In 448 fighting between the Achaemenids and the Athenians ended, and in the Samian and Peloponnesian wars Artaxerxes remained neutral; toward the Jews he pursued a tolerant policy. His building inscriptions at Persepolis record the completion of the throne hall of his father. The tomb of Artaxerxes is at Naqsh-e Rustam.

Notes for Alexander I, King Of Macedonia:
Alexander I, byname ALEXANDER PHILHELLENE, or ALEXANDER THE WEALTHY (d. c. 450 BC), 10th king of ancient Macedonia, who succeeded his father, Amyntas I, about 500 BC. More than a decade earlier, Macedonia had become a vassal state of Persia; and in 480 Alexander was obliged to accompany Xerxes I in a campaign through Greece, though he secretly aided the Greek allies. With Xerxes' apparent acquiescence, Alexander seized the Greek colony of Pydna and advanced his frontiers eastward to the Strymon, taking in Crestonia and Bisaltia, with the rich silver deposits of Mt. Dysorus.

It was probably Alexander who organized the mass of his people as a hoplite army called pezhetairoi ("foot companions"), with rudimentary political rights, to act as a counterweight to the nobility, the cavalry hetairoi ("companions"). His byname, the Philhellene, indicates his efforts to win Greek sympathies; and he obtained admission to the Olympic games. From Persian spoil he erected a golden statue at Delphi, and he entertained the poet Pindar at his court.

Notes for Laomedon, King Of Troy:
Laomedon, legendary king of Troy and father of Podarces (later famous as King Priam of Troy). Laomedon refused to give the gods Apollo and Poseidon their wages after they had built the walls of Troy for him. The gods therefore sent a pestilence and a sea monster to ravage the land, which could be delivered only by the sacrifice of the king's daughter Hesione. But the Greek hero Heracles, who happened to be at Troy at the time, killed the monster and rescued the maiden on the understanding that
Laomedon should give him his divine horses. When Laomedon later refused, Heracles returned with a band of warriors, captured Troy, and slew Laomedon and all his sons except Priam. Laomedon was buried near the Scaean Gate, and, according to legend, as long as his grave remained undisturbed the walls of Troy would remain impregnable.

Notes for Xerxes I The Great, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Xerxes I, Old Persian KHSHAYARSHA, byname XERXES THE GREAT (b. c. 519 BC--d. 465, Persepolis), Persian king (486-465 BC), the son and successor of Darius I. He is best known for his massive invasion of Greece from across the Hellespont (480 BC), a campaign marked by the battles of Thermopylae, Salamis, and Plataea. His ultimate defeat spelled the beginning of the decline of the Achaemenid Empire.

Accession to the throne.

Xerxes was the son of Darius I and Atossa, daughter of Cyrus; he was the first son born to Darius after his accession to the throne. Xerxes was designated heir apparent by his father in preference to his elder brother Artabazanes. A bas-relief on the southern portico of a courtyard in the treasury of Persepolis, as well as the bas-reliefs on the east door of the tripylon (an ornamental stairway) depict him as the heir apparent, standing behind his father, who is seated on the throne.
When his father died, in 486 BC, Xerxes was about 35 years old and had already governed Babylonia for a dozen years.

One of his first concerns upon his accession was to pacify Egypt, where a usurper had been governing for two years. But he was forced to use much stronger methods than had Darius: in 484 BC he ravaged the Delta and chastised the Egyptians. Xerxes then learned of the revolt of Babylon, where two nationalist pretenders had appeared in swift succession. The second, Shamash-eriba, was conquered by Xerxes' son-in-law, and violent repression ensued: Babylon's fortresses were torn down, its temples pillaged, and the statue of Marduk destroyed; this latter act had great political significance: Xerxes was no longer able to "take the hand of" (receive the patronage of) the Babylonian god. Whereas Darius had treated Egypt and Babylonia as kingdoms personally united to the Persian Empire (though administered as satrapies), Xerxes acted with a new intransigence. Having rejected the fiction of

personal union, he then abandoned the titles of king of Babylonia and king of Egypt, making himself simply "king of the Persians and the Medes."

It was probably the revolt of Babylon, although some authors say it was troubles in Bactria, to which Xerxes alluded in an inscription that proclaimed:

> And among these countries (in rebellion) there was one where, previously, daevas had been worshipped. Afterward, through Ahura Mazda's favour, I destroyed this sanctuary of daevas and proclaimed, "Let daevas not be worshipped!" There, where daevas had been worshipped before, I worshipped
> Ahura Mazda.

Xerxes thus declared himself the adversary of the daevas, the ancient pre-Zoroastrian gods, and doubtlessly identified the Babylonian gods with these fallen gods of the Aryan religion. The questions arise of whether the destruction of Marduk's statue should be linked with this text proclaiming the destruction of the daeva sanctuaries, of whether Xerxes was a more zealous supporter of Zoroastrianism than was his father, and, indeed, of whether he himself was a Zoroastrian. The problem of the relationship between the Achaemenid religion and Zoroastrianism is a difficult one, and some scholars, such as M. Molé, have even thought that this is an improper posing of the question, that there were, rather, three different states of religion: a religion of strict observance, a royal religion as attested by the Achaemenid inscriptions, and the popular religion as described by the Greek historian Herodotus.

War against the Greeks.

With the tranquillity of the empire reestablished, Xerxes would willingly have devoted himself to peaceful activities. But many of those around him were pressing for the renewal of hostilities. His cousin and brother-in-law Mardonius, supported by a strong party of exiled Greeks, incited him to take revenge for the affront that Darius had suffered at the hands of the Greeks at Marathon (490 BC). The impressionable Xerxes gave way to pressure from his entourage and threw himself into patient diplomatic and military preparations for war, which required three years to complete (484-481 BC). Herodotus notes that never before had such an effort been undertaken. Troops were levied in all the satrapies, and a navy, intended to be the army's supply line, was gathered. The care lavished on this enterprise shows that the King did not regard it as a minor operation.

There has been much later speculation on the real causes for the expedition. They could not have been economic, because Greece was not important then. Perhaps it was only the manifestation of a royal absolutism: Xerxes, whose character was later distorted in Greek legend, was neither foolish nor overly optimistic; although sensible and intelligent, he was nevertheless, according to G. Glotz,

> a sovereign by divine right, to whom opposition was as annoying as sacrilege . . .

nervous in temperament, fallen from youthful fire into indolence, incited to make a
war he didn't like. . . .

At the head of his armies, he left Sardis for the Hellespont and had two boat bridges placed across the strait. A storm destroyed them, and Xerxes had the sea whipped as punishment. With the bridges remade, for seven days he oversaw the crossing of the army--5,000,000 men according to Herodotus and 360,000 by modern estimate, supported by 700 to 800 ships. Their passage was facilitated by a massive engineering works: a channel was dug across the Isthmus of Actium so that the peaks of Mount Athos might be avoided. Nevertheless, the army's size was of no help, partly because of misinformation about the enemy terrain and partly because of the appearance of a national feeling in Greece. After a few successes (e.g., Thermopylae, mid-August 480 BC), Xerxes occupied Attica and pillaged Athens on September 21, but on September 29, at Salamis, a naval battle that he had initiated turned into a defeat. Without a fleet to bring supplies to the army, he had to retreat; he crossed over into Asia, leaving Mardonius in Thessaly. During an indecisive battle near Plataea, on Aug. 27, 479, Mardonius was killed, and his death obliged the army of occupation to withdraw. Hostilities continued for 13 years, but thenceforth Xerxes involved himself only slightly.

Withdrawal to Persia.

Soured by this failure, which modern historians consider the beginning of Achaemenian decline, Xerxes retired to Susa and Persepolis. He then furthered the depletion of the once-enormous resources he had gathered, through multiple taxation, by launching a vast construction program. At the capital city of Persepolis, Darius' architects, working from a unified plan of great scope, had already begun construction on a gigantic terrace of the Apadana (an audience hall), the Tripylon, a palace, and a treasury. When Xerxes became king, he had laid the enameled-brick facing on the exterior of the Apadana and finished his father's palace. Then he erected other monuments: his own palace, southeast of Darius' and similar to it in plan, and a mysterious building called the Harem by archaeologists--a line of small, identical rooms that may have been Xerxes' treasury. He also undertook construction of the Hall of a Hundred Columns, or Throne Room, but he was able to finish only the paving and the base of the walls (the walls themselves and the decoration of this gigantic hypostyle hall were the work of Artaxerxes I). These buildings marked an evolution toward the colossal and toward a style that was perhaps more pretentious than that typical of Darius' reign.

Little is known about the last years of Xerxes' life. After his reversal in Greece, he withdrew into himself and allowed himself to be drawn into harem intrigues in which he was, in fact, only a pawn: thus, he disposed of his brother's entire family at the demand of the queen. But in 465 he himself fell, together with his eldest son, under the blows of murderous members of his court, among them his minister Artabanus. Another son, Artaxerxes I, succeeded in retaining power.

Notes for Ilos, King Of Troy:
Ilos, in Greek mythology, the founder of Ilion (Troy). Ilos (or Zacynthus, a Cretan name) has been identified either as the brother of Erichthonius or as the son of Tros and grandson of Erichthonius. According to legend, the King of Phrygia gave Ilos a spotted cow as a wrestling prize, with the advice that he found a city wherever the cow first lay down. The animal chose the hill of Ate, where Ilos marked out the boundaries of Ilion. After praying for a sign from Zeus, Ilos was sent the Palladium, a statue of Pallas Athena, for which he built a temple. Ilos' son Laomedon succeeded him as ruler of the city, and his grandson Priam was the last king of Ilion.

Notes for Darius I The Great, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Darius I, byname DARIUS THE GREAT (b. 550 BC--d. 486), king of Persia in 522-486 BC, one of the greatest rulers of the Achaemenid dynasty, who was noted for his administrative genius and for his great building projects. Darius attempted several times to conquer Greece; his fleet was destroyed by a storm in 492, and the Athenians defeated his army at Marathon in 490.

Ascension to monarchy.

Darius was the son of Hystaspes, the satrap (provincial governor) of Parthia. The principal contemporary sources for his history are his own inscriptions, especially the great trilingual inscription on the Bisitun (Behistun) rock at the village of the same name, in which he tells how he gained the throne. The accounts of his accession given by the Greek historians Herodotus and Ctesias are in many points obviously derived from this official version but are interwoven with legends.

According to Herodotus, Darius, when a youth, was suspected by Cyrus II the Great (who ruled from 559 to 529 BC) of plotting against the throne. Later Darius was in Egypt with Cambyses II, the son of Cyrus and heir to his kingdom, as a member of the royal bodyguard. After the death of Cambyses in the summer of 522 BC, Darius hastened to Media, where, in September, with the help of six Persian nobles, he killed Bardiya (Smerdis), another son of Cyrus, who had usurped the throne the previous March. In the Bisitun inscription Darius defended this deed and his own assumption of kingship on the grounds that the usurper was actually Gaumata, a Magian, who had impersonated Bardiya after Bardiya had been murdered secretly by Cambyses. Darius therefore claimed that he was restoring the kingship to the rightful Achaemenid house. He himself, however, belonged to a collateral branch of the royal family, and, as his father and grandfather were alive at his accession, it is unlikely that he was next in line to the throne. Some modern scholars consider that he invented the story of Gaumata in order to justify his actions and that the murdered king was indeed the son of Cyrus.

Darius did not at first gain general recognition but had to impose his rule by force. His assassination of Bardiya was followed, particularly in the eastern provinces, by widespread revolts, which threatened to disrupt the empire. In

Susiana, Babylonia, Media, Sagartia, and Margiana, independent governments were set up, most of them by men who claimed to belong to the former ruling families. Babylonia rebelled twice and Susiana three times. In Persia itself a certain Vahyazdata, who pretended to be Bardiya, gained considerable support. These risings, however, were spontaneous and uncoordinated, and, otwithstanding the small size of his army, Darius and his generals were able to suppress them one by one. In the Bisitun inscription he records that in 19 battles he defeated nine rebel leaders, who appear as his captives on the accompanying relief. By 519 BC, when the third rising in Susiana was put down, he had established his authority in the east. In 518 Darius visited Egypt, which he lists as a rebel country, perhaps because of the insubordination of its satrap, Aryandes, whom he put to death.

Fortification of the empire.

Having restored internal order in the empire, Darius undertook a number of campaigns for the purpose of strengthening his frontiers and checking the incursions of nomadic tribes. In 519 BC he attacked the Scythians east of the Caspian Sea and a few years later conquered the Indus Valley. In 513, after subduing eastern Thrace and the Getae, he crossed the Danube River into European Scythia, but the Scythian nomads devastated the country as they retreated from him, and he was forced, for lack of supplies, to abandon the campaign. The satraps of Asia Minor completed the subjugation of Thrace, secured the submission of Macedonia, and captured the Aegean islands of Lemnos and Imbros. Thus, the approaches to Greece were in Persian hands, as was control of the Black Sea grain trade through the straits, the latter being of major importance to the Greek economy. The conquest of Greece was a logical
step to protect Persian rule over the Greeks of Asia Minor from interference by their European kinsmen. According to Herodotus, Darius, before the Scythian campaign, had sent ships to explore the Greek coasts, but he took no military action until 499 BC, when Athens and Eretria supported an Ionian revolt against Persian rule. After the suppression of this rebellion, Mardonius, Darius' son-in-law, was given charge of an expedition against Athens and Eretria, but the loss of his fleet in a storm off Mount Athos (492 BC) forced him to abandon the operation. In 490 BC another force under Datis, a Mede, destroyed Eretria and enslaved its inhabitants but was defeated by the Athenians at Marathon. Preparations for a third expedition were delayed by an insurrection in Egypt, and Darius died in 486 BC before they were completed.

Darius as an administrator.

Although Darius consolidated and added to the conquests of his predecessors, it was as an administrator that he made his greatest contribution to Persian history. He completed the organization of the empire into satrapies, initiated by Cyrus the Great, and fixed the annual tribute due from each province. During his reign, ambitious and far-sighted projects were undertaken to promote imperial trade and commerce. Coinage, weights, and measures were standardized and land and sea routes developed. An expedition led by Scylax of Caryanda

sailed down the Indus River and explored the sea route from its mouth to Egypt, and a canal from the Nile River to the Red Sea, probably begun by the chief of the Egyptian delta lords, Necho I (7th century BC), was repaired and completed.

While measures were thus taken to unite the diverse peoples of the empire by a uniform administration, Darius followed the example of Cyrus in respecting native religious institutions. In Egypt he assumed an Egyptian titulary and gave active support to the cult. He built a temple to the god Amon in the Kharga oasis, endowed the temple at Edfu, and carried out restoration work in other anctuaries. He empowered the Egyptians to reestablish the medical school of the temple of Sais, and he ordered his satrap to codify the Egyptian laws in consultation
with the native priests. In the Egyptian traditions he was considered as one of the great lawgivers and benefactors of the country. In 519 BC he authorized the Jews to rebuild the Temple at Jerusalem, in accordance with the earlier decree of Cyrus. In the opinion of some authorities, the religious beliefs of Darius himself, as reflected in his inscriptions, show the influence of the teachings of Zoroaster, and the introduction of Zoroastrianism as the state religion of Persia is probably to be attributed to him.

Darius was the greatest royal architect of his dynasty, and during his reign Persian architecture assumed a style that remained unchanged until the end of the empire. In 521 BC he made Susa his administrative capital, where he restored the fortifications and built an audience hall (apadana) and a residential palace. The foundation inscriptions of his palace describe how he brought materials and craftsmen for the work from all quarters of the empire. At Persepolis, in his native country of Fars (Persis), he founded a new royal residence to replace the earlier capital at Pasargadae. The fortifications, apadana, council hall, treasury, and a residential palace are to be attributed to him, although not completed in his lifetime. He also built at Ecbana and Babylon.

Astyages, Akkadian ISHTUMEGU (fl. 6th century BC), the last king of the Median empire (reigned 585-550 BC). According to Herodotus, the Achaemenian Cyrus the Great was Astyages' grandson through his daughter Mandane. According to Babylonian inscriptions, Cyrus, king of Anshan (in southwestern Iran), began war against Astyages in 553 BC; in 550 the Median troops rebelled, and Astyages was taken prisoner. Then Cyrus occupied and plundered Ecbatana, the Median capital. A somewhat different account of these events is given by the Greek writer Ctesias.

Partia, antiguo paks de Asia, situado aproximadamente en lo que actualmente es Irin y el noroeste de Afganistin. Sus habitantes, los partos, descendkan probablemente de los escitas y adoptaron la indumentaria meda y la lengua aria. Eran excelentes jinetes y arqueros. En combate a caballo, los partos descargaban frecuentemente sus flechas hacia el enemigo mientras simulaban la huida; éste es el origen del dicho "disparar la flecha del parto" (anadir alguna palabra hiriente a un interlocutor en el momento de retirarse).
Partia estuvo sometida sucesivamente a Asiria, a Media, a Persia, a Macedonia bajo el reinado de Alejandro Magno, y al reino Seléucida. Hacia el 250a.C. los reyes partos de la dinastka de los Arsicidas fundaron un reino independiente que durante el siglo I a.C. se convirtió en un imperio que se extendka desde el rko Éufrates hasta el Indo, y desde el rko Oxus (actual Ams Daryi) al océano Kndico. Las principales ciudades partas eran Seleucia del Tigris, Ctesifonte y Hecatómpilos. Después de mediados del siglo I a.C. Notes for Cyrus II, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Cyrus II, byname CYRUS THE GREAT (b. 590-580 BC, Media, or Persis--d. c. 529, Asia), conqueror who founded the Achaemenid empire, centred on Persia and comprising the Near East from the Aegean Sea to the Indus River. He is also remembered in the Cyrus legend--first recorded by Xenophon, Greek soldier and author, in his Cyropaedia--as a tolerant and ideal monarch who was called father of his people by the ancient Persians and in the Bible as the liberator of the Jews captive in Babylonia.

Life and legend

Cyrus was born between 590 and 580 BC, either in Media or, more probably, in Persis, the modern Fars province of Iran. The meaning of his name is in dispute, for it is not known whether it was a personal name or a throne name given to him when he became a ruler. It is noteworthy that after the Achaemenid empire the name does not appear again in sources relating to Iran, which may indicate some special sense of the name.

Most scholars agree, however, that Cyrus the Great was at least the second of the name to rule in Persia. One cuneiform text in Akkadian--the language of Mesopotamia (present-day Iraq) in the pre-Christian era--asserts he was the son of Cambyses, great king, king of Anshan, grandson of Cyrus, great king, king of Anshan, descendant of Teispes, great king, king of Anshan, of a family [which] always [exercised] kingship.

In any case, it is clear that Cyrus came from a long line of ruling chiefs.

The most important source for his life is the Greek historian Herodotus. The idealized biography by Xenophon is a work for the edification of the Greeks concerning the ideal ruler, rather than a historical treatise. It does, however,

indicate the high esteem in which Cyrus was held, not only by his own people, the Persians, but by the Greeks and others. Herodotus says that the Persians called Cyrus their father, while later Achaemenid rulers were not so well regarded. The story of the childhood of Cyrus, as told by Herodotus with echoes in Xenophon and the Greek historian Ctesias, may be called a Cyrus legend since it obviously follows a pattern of folk beliefs about the almost superhuman qualities of the founder of a dynasty. Similar beliefs also exist about the founders of later dynasties throughout the history of Iran. According to the legend, Astyages, the king of the Medes and overlord of the Persians, gave his daughter in marriage to his vassal in Persis, a prince called Cambyses. From this marriage Cyrus was born. Astyages, having had a dream that the baby would grow up to overthrow him, ordered Cyrus slain. His chief adviser, however, instead gave the baby to a shepherd to raise. When he was 10 years old, Cyrus, because of his outstanding qualities, was discovered by Astyages, who, in spite of the dream, was persuaded to allow the boy to live. Cyrus, when he reached manhood in Persis, revolted against his maternal grandfather and overlord. Astyages marched against the rebel, but his army deserted him and surrendered to Cyrus in 550 BC.

Cyrus' conquests

After inheriting the empire of the Medes, Cyrus first had to consolidate his power over Iranian tribes on the Iranian plateau before expanding to the west. Croesus, king of Lydia in Asia Minor, had enlarged his domains at the expense of the Medes when he heard of the fall of Astyages, and Cyrus, as successor of the Median king, marched against Lydia. Sardis, the Lydian capital, was captured in 547 or 546, and Croesus was either killed or burned himself to death, though according to other sources he was taken prisoner by Cyrus and well
treated. The Ionian Greek cities on the Aegean Sea coast, as vassals of the Lydian king, now became subject to Cyrus, and most of them submitted peacefully. Several revolts of the Greek cities were later suppressed with severity. Next Cyrus turned to Babylonia, where dissatisfaction of the people with the ruler Nabonidus gave him a pretext for invading the lowlands. The conquest was quick, for even the priests of Marduk, the national deity of the great metropolis of Babylon, had become estranged from Nabonidus. In October 539 BC, the greatest city of the ancient world fell to the Persians.

In the Bible (e.g., Ezra 1:1-4), Cyrus is famous for freeing the Jewish captives in Babylonia and allowing them to return to their homeland. Cyrus was also tolerant toward the Babylonians and others. He honoured Marduk and conciliated the local population by supporting local customs and even sacrificing to local deities. The capture of Babylon delivered not only Mesopotamia into the hands of Cyrus but also Syria and Palestine, which had been conquered previously
by the Babylonians. The ruler of Cilicia in Asia Minor had become an ally of Cyrus when the latter marched against Croesus, and Cilicia retained a special status in Cyrus' empire. Thus it was by diplomacy as well as force of arms that he established the largest empire known until his time.

Cyrus seems to have had several capitals. One was the city of Ecbatana, modern Hamadan, former capital of the Medes, and another was a new capital of the empire, Pasargadae, in Persis, said to be on the site where Cyrus had won the battle against Astyages. The ruins today, though few, arouse admiration in the visitor. Cyrus also kept Babylon as a winter capital.

No Persian chauvinist, Cyrus was quick to learn from the conquered peoples. He not only conciliated the Medes but joined them with the Persians in a kind of dual monarchy of the Medes and Persians. Cyrus had to borrow the traditions of kingship from the Medes, who had ruled an empire when the Persians were merely their vassals. It is probable that a Mede was traditionally made an adviser to the Achaemenid king, as a sort of chief minister; on later reliefs at Persepolis, a capital of the Achaemenid kings from the time of Darius, a Mede is frequently depicted together with the great king. The Elamites, indigenous inhabitants of Persis, were also the teachers of the Persians in many ways, as can be seen, for example, in the Elamite dress worn by Persians and by Elamite objects carried by them on the stone reliefs at Persepolis. There also seems to have been little innovation in government and rule, but rather a willingness to borrow, combined with an ability to adapt what was borrowed to the new empire. Cyrus was undoubtedly the guiding genius in the creation not only of a great empire but in the formation of Achaemenid culture and civilization.

Little is known of the family life of Cyrus. He had two sons, one of whom, Cambyses, succeeded him; the other, Bardiya ( Smerdis of the Greeks), was probably secretly put to death by Cambyses after he became ruler. Cyrus had at least one daughter, Atossa (who married her brother Cambyses), and possibly two others, but they played no role in history.

When Cyrus defeated Astyages he also inherited Median possessions in eastern Iran, but he had to engage in much warfare to consolidate his rule in this region. After his conquest of Babylonia, he again turned to the east, and Herodotus tells of his campaign against nomads living east of the Caspian Sea. According to the Greek historian, Cyrus was at first successful in defeating the ruler of the nomads--called the Massagetai--who was a woman, and captured her son. On the son's committing suicide in captivity, his mother swore revenge and defeated and killed Cyrus. Herodotus' story may be apocryphal, but Cyrus' conquests in Central Asia were probably genuine, since a city in farthest Sogdiana was called Cyreschata, or Cyropolis, by the Greeks, which seems to prove the extent of his Eastern conquests.

The legacy of Cyrus

It is a testimony to the capability of the founder of the Achaemenid empire that it continued to expand after his death and lasted for more than two centuries. But Cyrus was not only a great conqueror and administrator; he held a place in the minds of the Persian people similar to that of Romulus and Remus in Rome or Moses for the Israelites. His saga follows in many details the stories of hero and conquerors from elsewhere in the ancient world. The manner in which the baby Cyrus was given to a shepherd to raise is reminiscent of Moses in the bulrushes in Egypt, and the overthrow of his tyrannical grandfather has echoes in other

myths and legends. There is no doubt that the Cyrus saga arose early among the Persians and was known to the Greeks. The sentiments of esteem or even awe in which Persians held him were transmitted to the Greeks, and it was no accident that Xenophon chose Cyrus to be the model of a ruler for the lessons he wished to impart to his fellow Greeks.

In short, the figure of Cyrus has survived throughout history as more than a great man who founded an empire. He became the epitome of the great qualities expected of a ruler in antiquity, and he assumed heroic features as a conqueror who was tolerant and magnanimous as well as brave and daring. His personality as seen by the Greeks influenced them and Alexander the Great, and, as the tradition was transmitted by the Romans, may be considered to influence our thinking even now. In the year 1971, Iran celebrated the 2,500th anniversary of the founding of the monarchy by Cyrus.

Notes for Nabuchadrezzar II, Prince of Babylon:
Nebuchadrezzar II (b. c. 630--d. c. 561 BC), the second and greatest king of the Chaldean dynasty of Babylonia (reigned c. 605-c. 561 BC). He was known for his military might, the splendour of his capital, Babylon, and his importa nt part in Jewish history.

Nebuchadrezzar II was the oldest son and successor of Nabopolassar, founder of the Chaldean empire. He is known from cuneiform inscriptions, the Bible and later Jewish sources, and classical authors. His name, from the Akkadian Nabu-kudurri-usur, means "O Nabu, watch over my heir."

While his father disclaimed royal descent, Nebuchadrezzar claimed the third-millennium Akkadian ruler Naram-Sin as ancestor. The year of his birth is uncertain, but it is not likely to have been before 630 BC, for according to tradition Nebuchadrezzar began his military career as a young man, appearing as a military administrator by 610. He is first mentioned by his father as working as a labourer in the restoration of the temple of Marduk, the chief god of the city of Babylon and the national god of Babylonia.

In 607/606, as crown prince, Nebuchadrezzar commanded an army with his father in the mountains north of Assyria, subsequently leading independent operations after Nabopolassar's return to Babylon. After a Babylonian reverse at the hands of Egypt in 606/605, he served as commander in chief in his father's

place and by brilliant generalship shattered the Egyptian army at Carchemish and Hamath, thereby securing control of all Syria. After his father's death on Aug. 16, 605, Nebuchadrezzar returned to Babylon and ascended the throne within three weeks. This rapid consolidation of his accession and the fact that he could return to Syria shortly afterward reflected his strong grip on the empire.

On expeditions in Syria and Palestine from June to December of 604, Nebuchadrezzar received the submission of local states, including Judah, and captured the city of Ashkelon. With Greek mercenaries in his armies, further campaigns to extend Babylonian control in Palestine followed in the three succeeding years. On the last occasion (601/600), Nebuchadrezzar clashed with an Egyptian army, with heavy losses; this reverse was followed by the defection of certain vassal states, Judah among them. This brought an intermission in the series of annual campaigns in 600/599, while Nebuchadrezzar remained in Babylonia repairing his losses of chariots. Measures to regain control were resumed at the end of 599/598 (December to March). Nebuchadrezzar's strategic planning appeared in his attack on the Arab tribes of northwestern Arabia, in preparation for the occupation of Judah. He attacked Judah a year later and captured Jerusalem on March 16, 597, deporting King Jehoiachin to Babylon. After a further brief Syrian campaign in 596/595, Nebuchadrezzar had to act in eastern Babylonia to repel a threatened invasion, probably from Elam (modern southwestern Iran). Tensions in Babylonia were revealed by a rebellion late in 595/594 involving elements of the army, but he was able to put this down decisively enough to undertake two further campaigns in Syria during 594.

Nebuchadrezzar's further military activities are known not from extant chronicles but from other sources, particularly the Bible, which records another attack on Jerusalem and a siege of Tyre (lasting 13 years, according to the Jewish historian Flavius Josephus) and hints at an invasion of Egypt. The siege of Jerusalem ended in its capture in 587/586 and in the deportation of prominent citizens, with a further deportation in 582. In this respect he followed the methods of his Assyrian predecessors.

Much influenced by the Assyrian imperial tradition, Nebuchadrezzar consciously pursued a policy of expansion, claiming the grant of universal kingship by Marduk and praying to have "no opponent from horizon to sky." From cuneiform fragments he is known to have attempted the invasion of Egypt, the culmination of his expansionist policy, in 568/567.

In addition to being a brilliant tactician and strategist, Nebuchadrezzar was also prominent in international diplomacy, as shown in his sending an ambassador (probably Nabonidus, a successor) to mediate between the Medes and Lydians in Asia Minor. He died about 561 and was succeeded by his son Awil-Marduk (Evil-Merodach of 2 Kings).

Nebuchadrezzar's main activity, other than as military commander, was the rebuilding of Babylon. He completed and extended fortifications begun by his

father, built a great moat and a new outer defense wall, paved the ceremonial Processional Way with limestone, rebuilt and embellished the principal temples, and cut canals. This he did not only for his own glorification but also in honour of the gods. He claimed to be "the one who set in the mouth of the people reverence for the great gods" and
disparaged predecessors who had built palaces elsewhere than at Babylon and had only journeyed there for the New Year Feast.

Little is known of his family life beyond the tradition that he married a Median princess, whose yearning for her native terrain he sought to ease by creating gardens simulating hills. A structure representing these hanging gardens cannot be positively identified in either the cuneiform texts or the archaeological remains.

Despite the fateful part he played in Judah's history, Nebuchadrezzar is seen in Jewish tradition in a predominantly favourable light. It was claimed that he gave orders for the protection of Jeremiah, who regarded him as God's appointed instrument whom it was impiety to disobey, and the prophet Ezekiel expressed a similar view at the attack on Tyre. A corresponding attitude to Nebuchadrezzar, as God's instrument against wrongdoers, occurs in the Apocrypha in 1 Esdras and, as protector to be prayed for, in Baruch. In Daniel (Old Testament) and in Bel and the Dragon (Apocrypha), Nebuchadrezzar appears as a man, initially deceived by bad advisers, who welcomes the situation in which truth is triumphant
and God is vindicated.

There is no independent support for the tradition in Daniel of Nebuchadrezzar's seven years' madness, and the story probably arose from a fanciful later interpretation of texts concerned with events under Nabonidus, who showed apparent eccentricity in deserting Babylon for a decade to live in Arabia.

In modern times Nebuchadrezzar has been treated as the type of godless conqueror; Napoleon was compared to him. The story of Nebuchadrezzar is the basis of Giuseppe Verdi's opera Nabucco, while his supposed madness is the theme of William Blake's picture "Nebuchadnezzar." (H.W.F.S.)

King Ugaine Mor "The Great," 66th Monarch of Ireland, succeeded B.C.633 and reigned until 593.  He was called "Mor" on account of his extensive dominions, being Sovereign of all the Islands of Western Europe.  He married Caesair, daughter of the King of France, and by her had issue of twenty-two sons and three daughters, and divided his kingdom in twenty-fove parts among them.  Taxes were collected by this division for 300 years.

Ugaine was slain B.C.593 by Badhbhchadh.  Lorc, the murdered Monarch's son, became the 68th Monarch.

Notes for Cyaxares, King Of Media:
Cyaxares (d. 585 BC), king of Media (located in what is now northwestern Iran), who reigned from 625 to 585 BC. According to the 5th-century-BC Greek historian Herodotus, Cyaxares renewed the war with the Assyrians after his father, Phraortes, had been slain in battle. While besieging Nineveh, he was attacked and defeated by a great army of Scythians, who then ruled Media (653-625) until their chiefs were slain by Cyaxares at a banquet. It was probably Cyaxares, not his father, as is maintained by Herodotus, who united the tribes of ancient
Iran. He also reorganized the Median army, dividing it into spearmen, bowmen, and cavalry and instituting changes in clothing and weapons.

Cyaxares once more renewed the war with Assyria; in 614 the Medes took Ashur, and in 612 they occupied and sacked Nineveh. About the same time they seem to have conquered the kingdom of Mannai in modern Iranian Azerbaijan and in 609 invaded and afterward subjected Urartu in the Armenian highlands. The Median army took part in the final defeat of the Assyrians in northern Mesopotamia (612-609); and, when the territory of Assyria was divided between Media and Babylonia, Media took Assyria with Harran. Five years of war between Media and Lydia in Anatolia (590-585) ended when the two countries accepted the Halys River as their boundary. Cyaxares died shortly afterward.

Notes for Nabopolassar, King Of Babylon:
The History of Ancient Mesopotamia

THE NEO-BABYLONIAN EMPIRE

The Chaldeans, who inhabited the coastal area near the Persian Gulf, had never been entirely pacified by the Assyrians. About 630 Nabopolassar

became king of the Chaldeans. In 626 he forced the Assyrians out of Uruk and crowned himself king of Babylonia. He took part in the wars aimed at the destruction of Assyria. At the same time, he began to restore the dilapidated network of canals in the cities of Babylonia, particularly those in Babylon itself. He fought against the Assyrian
Ashur-uballit II and then against Egypt, his successes alternating with misfortunes. In 605 Nabopolassar died in Babylon.

Ancient Middle Eastern Arts and Architecture

NEO-BABYLONIAN PERIOD

During the half century following the fall of Nineveh, in 612 BC, there was a final flowering of Mesopotamian culture in southern Iraq under the last dynasty of Babylonian kings. During the reigns of Nabopolassar (625-605 BC) and his son Nebuchadrezzar II (604-562 BC), there was widespread building activity. Temples and ziggurats were repaired or rebuilt in almost all the old dynastic cities, while Babylon itself was enormously enlarged and surrounded by a double enceinte, or line of fortification, consisting of towered and moated fortress walls. Inside the city the most grandiose effect was obtained by the disposal of public buildings along a wide processional way, leading through the centre of the town to the temple and ziggurat of its patron god, Marduk. Where the street passed through the inner-city wall, the facades of the famous Ishtar Gate (Pergamon Museum, Berlin) and those facing the adjoining street were ornamented in brightly glazed brickwork, with huge figures of bulls, lions, and dragons modeled in relief. This form of decoration--a costly process, since each of the bricks composing the figures had to be separately cast--provided a solution for the problem of embellishing mud-brick facades. It appears again in the court of honour of Nebuchadrezzar's palace, using a more sophisticated design that suggests familiarity with Greek ornament. For the rest, there are few innovations in the planning of either palaces or temples during the Neo-Babylonian period. Also (strangely enough, in view of the prolonged excavations that took place at this site), examples of contemporary art are limited almost exclusively to cylinder seals and terra-cotta figurines of unpretentious design.

Deioces, First King Of Media**.

Notes for Phraortes, King Of Media:
Phraortes, Iranian FRAVARTISH, also called KHSHATHRITA, Assyrian KASHTARITI (d. 653 BC), king of Media from 675 to 653 BC. Phraortes, who was known by that name as a result of the writings of the 5th-century-BC Greek historian Herodotus, was originally a village chief of Kar Kashi, but he later subjugated the Persians and a number of other Asian peoples, eventually forming an anti-Assyrian coalition of Medes and Cimmerians. In his attack on Assyria, however, he was defeated and killed in battle.

Another Phraortes was a usurper who reigned for a short time in Media during a rebellion against the Achaemenian king Darius I in 522 BC. Darius' rock inscription at Bisitun relates that "a man of the name of Fravartish [i.e., Phraortes], a Mede, rebelled in Media and spoke to the people thus 'I am Khshathrita, of the family of Uvakhshtra [Cyaxares].' " After a short reign this king was defeated and executed at Ecbatana, the Median capital. The deception of the usurper Phraortes may have led to Herodotus' mistake about the name of the earlier king.

Notes for Ariaramnes, King of Parsa:
Ariaramnes, also spelled ARIYARAMNA (fl. late 7th century BC), early Achaemenid king of Persia (reigned c. 640-c. 615).

The son of the previous king, Teispes, Ariaramnes ruled over Persis (modern Fars, in southwestern Iran); his brother Cyrus I was given control of Anshan in Elam, north of the Persian Gulf. A campaign by the Medes, however, broke the power of Ariaramnes, and he and his son Arsames, who succeeded him, became vassals of Media (in modern northwest Iran). Dating to the reign of Ariaramnes is an important gold tablet written in cuneiform--the first historical inscription in Old Persian from Achaemenid times. The tablet not only traces the royal line of Ariaramnes but also provides the first Persian mention of Ahura Mazda, the supreme god.

Partia, antiguo paks de Asia, situado aproximadamente en lo que actualmente es Irin y el noroeste de Afganistin. Sus habitantes, los partos, descendkan probablemente de los escitas y adoptaron la indumentaria meda y la lengua aria. Eran excelentes jinetes y arqueros. En combate a caballo, los partos descargaban frecuentemente sus flechas hacia el enemigo mientras simulaban la huida; éste es el origen del dicho "disparar la flecha del parto" (anadir alguna palabra hiriente a un interlocutor en el momento de retirarse).
Partia estuvo sometida sucesivamente a Asiria, a Media, a Persia, a Macedonia bajo el reinado de Alejandro Magno, y al reino Seléucida. Hacia el 250a.C. los reyes partos de la dinastka de los Arsicidas fundaron un reino independiente que durante el siglo I a.C. se convirtió en un imperio que se extendka desde el rko Éufrates hasta el Indo, y desde el rko Oxus (actual Ams Daryi) al océano Kndico. Las principales ciudades partas eran Seleucia del Tigris, Ctesifonte y Hecatómpilos. Después de mediados del siglo I a.C. Partia fue rival de Roma, y se produjeron varias guerras entre ambas potencias. En el 226d.C. Partia fue conquistada por Ardachir I, rey de Persia y fundador de la dinastka Sasinida.

Notes for Cyrus I, King Of Persia:
Cyrus I (fl. late 7th century BC), Achaemenid king, the son of Teispes and grandfather of Cyrus II the Great; he had control over Anshan (northeast of Susa in Elam) and possibly also over Parsumash to the east during the second half of the 7th century. Although he sent aid to Shamash-shum-ukin of Babylon (651), who was in revolt against Assyria, Cyrus was forced to accept Assyrian overlordship about 639, after the conquest of Elam by Ashurbanipal; and he sent his eldest son, Arukku, with tribute to Nineveh.

Notes for Deioces, First King Of Media:
Deyoeces, Primer Rey de Media

96. Reinando los asirios en el Asia oriental por espacio de quinientos veinte anos, los medos fueron los que empezaron a sublevarse contra ellos, y como peleaban por su libertad, se mostraron valerosos, rechazaron la servidumbre y se hicieron independientes. Después de ellos las demis naciones hicieron lo mismo.

Libres, pues, todas las naciones del continente, volvieron otra vez a caer en tiranka de este modo: hubo entre los medos un sabio varón llamado Deyoces, hijo de Fraortes. Este Deyoces, prendado de la tiranka, hizo lo siguiente: vivkan los medos en diversos pueblos; Deyoces, conocido ya en el suyo por persona respetable, puso el mayor esmero en practicar la justicia, y esto lo hacia en un tiempo en que la licencia dominaba en toda la Media, sabiendo que la injusticia es enemiga de la justicia. Los medos de su mismo pueblo, viendo su modo de proceder, le eligieron juez y él con la idea de apoderarse del mando se manifestó recto y justo. Granjeóse de esta manera no pequena fama entre sus conciudadanos, de tal modo que. oyendo los de los otros pueblos que solamente Deyoces administraba bien la justicia, acudkan a él gustosos de decidir sus pleitos todos los que habkan sufrido sentencias injustas, hasta que por fin a ningsn otro se confiaron ya los negocios.

97. Creciendo cada dka el nsmero de los concurrentes, porque todos okan decir que allk se juzgaba con rectitud, y viendo Deyoces que ya todo pendka de su arbitrio, no quiso sentarse mis en el lugar donde antes daba audiencia, y sel negó a continuar juzgando, porque, alegaba, no le convenka desatender a sus propios negocios por juzgar todo el dka los del prójimo. Como los hurtos y la injusticia eran por los pueblos todavka mis grandes que antes, se juntaron los medos en un mismo lugar para cambiar opiniones; hablaron de la situación presente (y segsn me parece hablaron sobre todo los amigos de Deyoces): "Ya

que no es posible que vivamos en el paks en la condición actual, ea, alcemos por rey a uno de nosotros; ask, el paks estari bien regido, y nosotros nos dedicaremos a nuestros trabajos y no pereceremos por el desorden". Con estas palabras se persuadieron a someterse a un rey.

98. A1 punto propusieron a quién alzar por rey y todos proponkan y elogiaban a Deyoces, hasta que convinieron en que fuese rey. Entonces mandó se le edificase un palacio digno de su au toridad real y se con solidase su poder con una guardia. Ask lo hicieron los medos; le edificaron un palacio grande y fortificado en el sitio que él senaló, y le permitieron elegir guardias entre todos los medos. Deyoces ask que se apoderó del mando, obligó a los medos a formar una sola ciudad y a guarnecerla, cuidando menos de las otras. Obedeciéndole también en esto los medos construyó una fortaleza grande y fuerte, esta que ahora se llama Ecbitana, formada de murallas concéntricas. La plaza esti ideada de suerte que un cerco sobrepasa al otro sólo en la altura de las almenas. Les favoreció hasta cierto punto el sitio mismo, que es una colina redonda, pero mis todavka el artificio, porque siendo en total siete cercos, en el sltimo se halla colocado el palacio y el tesoro. La muralla mis grana de tiene mis o menos el mismo circuito que los muros de Atenas. Las almenas del primer cerco son blancas, las dell segundo negras, las del tercero rojas, las del cuarto azules,y las del quinto anaranjadas, de suerte que todas ellas estin pintadas de colores; pero los dos sltimos cercos tienen el uno almenas plateadas y el otro doradas.

Deioces (fl. late 8th and early 7th centuries BC), petty Median chieftain subject to the kingdom of Mannai in modern Iranian Azerbaijan; later tradition made him the founder of the Median empire.

According to the 5th-century-BC Greek historian Herodotus, Deioces was the first king of the Medes. Herodotus claimed that the Median tribes at first lived in villages without any political organization; when they decided to elect a king, they chose Deioces, a village judge renowned for the justice of his decisions. Deioces united all the Median tribes, built Ecbatana (modern Hamadan, Iran) as their capital, and ruled for 53 years (728-675 BC). Modern scholarship has shown that Herodotus probably confused Deioces with Phraortes, who established a kingdom in Media and ruled from about 675 to about 653 BC.

Iran

The kingdom of the Medes.

Traditionally, the creator of the Median kingdom was one Deioces, who, according to Herodotus, reigned from 728 to 675 BC and founded the Median

capital Ecbatana (modern Hamadan). Attempts have been made to associate Daiaukku, a local Zagros king mentioned in a cuneiform text as one of the captives deported to Assyria by Sargon II in 714 BC, with the Deioces of Herodotus, but such an association is highly unlikely. To judge from the Assyrian
sources, no Median kingdom such as Herodotus describes for the reign of Deioces existed in the early 7th century BC; at best, he is reporting a Median legend of the founding of their kingdom.

According to Herodotus, Deioces was succeeded by his son Phraortes (675-653 BC), who subjugated the Persians and lost his life in a premature attack against the Assyrians. Some of this tale may be true. Assyrian texts speak of a Kashtariti as the leader of a conglomerate group of Medes, Scythians, Mannaeans, and miscellaneous other local Zagros peoples that seriously threatened the peace of Assyria's eastern borderlands during the reign of Esarhaddon (680-669
BC). It is possible that Phraortes is this Kashtariti, though the suggestion cannot be proved either historically or linguistically. That a Median king in this period exerted political and military control over the Persians is entirely reasonable, though it cannot be proved.

Beginning as early as the 9th century, and with increasing impact in the late 8th and early 7th centuries, groups of nomadic warriors entered western Iran, probably from across the Caucasus. Dominant among these groups were the Scythians, and their entrance into the affairs of the western plateau during the 7th century may perhaps mark one of the important turning points in Iron Age history. Herodotus speaks in some detail of a period of Scythian domination, the so-called Scythian interregnum in Median dynasty history. His dating of this event remains uncertain, but traditionally it is seen as falling between the reigns of Phraortes and Cyaxares and as covering the years 653 to 625 BC. Whether such an interregnum ever actually occurred and, if it did, whether it should not be dated later than this are open questions. What is clear is that, by the mid-7th century BC, there were a great many Scythians in western Iran, that they, along with the Medes and other groups, posed a serious threat to Assyria, and that their appearance threw previous power alignments quite out of balance.

Herodotus reports how, under Cyaxares of Media (625-585 BC), the Scythians were overthrown when their kings were induced at a supper party to get so drunk that they were then easily slain. It is more likely that about this time either the Scythians withdrew voluntarily from western Iran and went off to plunder elsewhere or they were simply absorbed into a rapidly developing confederation under Median hegemony. Cyaxares is a fully historical figure who appears in the cuneiform sources as Uvakhshatra. Herodotus speaks of how Cyaxares reorganized the Median army into units built around specialized armaments: spearmen, bowmen, and cavalry. The unified and reorganized Medes were a match for the Assyrians. They attacked one of the important Assyrian border cities, Arrapkha, in 615 BC, surrounded Nineveh in 614 BC but were unable to capture it, and instead successfully stormed the Assyrian religious capital, Ashur. An alliance between Babylon and the Medes was sealed by the

betrothal of Cyaxares' granddaughter to Nabopolassar's son, Nebuchadrezzar II (605-562 BC). In 612 BC the attack on Nineveh was renewed, and the city fell in late August (the Babylonians arrived rather too late to participate fully in the battle). The Babylonians and the Medes together pursued the fleeing Assyrians westward into Syria. Assyrian appeals to Egypt for help came to nought, and the last Assyrian ruler, Ashur-uballit II, disappeared from history in 609 BC.

The problem, of course, was how to divide the spoils among the victors. The cuneiform sources are comparatively silent, but it would seem that the Babylonians fell heir to all of the Assyrian holdings within the fertile crescent, while their allies took over all of the highland areas. The Medes gained control over the lands in eastern Anatolia that had once been part of Urartu and eventually became embroiled in war with the Lydians, the dominant political power in western Asia Minor. In 585 BC, probably through the mediation of the Babylonians, peace was established between Media and Lydia, and the Halys (Kizil) River was fixed as the boundary between the two kingdoms. Thus a new balance of power was established in the Middle East among Medes, Lydians, Babylonians, and, far to the south, Egyptians. At his death, Cyaxares controlled vast territories: all of Anatolia to the Halys, the whole of western Iran eastward, perhaps as far as the area of modern Tehran, and all of southwestern Iran, including Fars. Whether it is appropriate to call these holdings a kingdom is debatable; one suspects that authority over the various peoples, Iranian and non-Iranian, who occupied these territories was exerted in the form of a confederation such as is implied by the ancient Iranian royal title, king of kings.

Astyages followed his father, Cyaxares, on the Median throne (585-550 BC). Comparatively little is known of his reign. All was not well with the alliance with Babylon, and there is some evidence to suggest that Babylonia may have feared Median power. The latter, however, was soon in no position to threaten others, for Astyages was himself under attack. Indeed, Astyages and the Medians were soon overthrown by the rise to power in the Iranian world of Cyrus II the Great of Persia.

Media, ancient country of northwestern Iran, generally corresponding to the modern regions of Azerbaijan, Kurdistan, and parts of Kermanshah. Media first appears in the texts of the Assyrian king Shalmaneser III (858-824 BC), in which peoples of the land of "Mada" are recorded. The inhabitants came to be known as Medes.

Although Herodotus credits "Deioces son of Phraortes" (probably c. 715) with the creation of the Median kingdom and the founding of its capital city at Ecbatana (modern Hamadan), it was probably not before 625 BC that Cyaxares, grandson of Deioces, succeeded in uniting into a kingdom the many Iranian-speaking Median tribes. In 614 he captured Ashur, and in 612, in alliance with Nabopolassar of Babylon, his forces stormed Nineveh, putting an end to the

Assyrian empire. The victors divided the Assyrian provinces among themselves, with the Median king taking over a large part of Iran, northern Assyria, and parts of Armenia.

In many respects the internal organization of the Median empire probably resembled that of Assyria, but little is actually known. Few identifiable "Median" objects have been found, but the Medes apparently favoured rich ornamentation and also received a strong artistic influence from Assyria. Since no Median written documents of any kind have ever been uncovered, their spiritual
and economic life is also a matter of conjecture.

By the victory in 550 of the Persian chief Cyrus II the Great over his suzerain, Astyages of Media, the Medes were made subject to the Persians. In the new Achaemenian Empire they retained a prominent position; in honour and war they stood next to the Persians, and their court ceremonial was adopted by the new sovereigns, who in the summer months resided in Ecbatana.

Alexander the Great occupied Media in 330, and in the partition of his empire, southern Media was given to the Macedonian commander Peithon and eventually passed to the Seleucids, but the north was left to Atropates, a former general of Darius III, who succeeded in founding an independent kingdom, named Atropatene, with its capital at Gazaca. In later times Atropatene came under the control of Parthia, Armenia, and Rome.

Southern Media remained a province of the Seleucid empire for a century and a half, and Hellenism was introduced everywhere. About 152 BC, however, Media was taken by the Parthian king Mithradates I, and it remained subject to the Arsacids until about AD 226, when it passed, together with Atropatene, to the Sasanians. By that time the Medes had lost their distinctive character and had been amalgamated into the one nation of the Iranians.

Media (antigua región), antiguo paks de Asia, que corresponde a la zona noreste del actual Irin. Sus habitantes, conocidos como medos, y sus vecinos, los persas, hablaban lenguas indoiranias, muy relacionadas con el antiguo persa. Los historiadores saben muy poco sobre la cultura meda, excepto que practicaban una religión politeksta y que existka una casta sacerdotal a cuyos componentes denominaban magos.
Desde aproximadamente el 835 a.C. las tribus medas estuvieron sometidas intermitentemente a los reyes de Asiria. Hacia el 715 a.C. el jefe meda Dayaukku, denominado por el historiador griego Heródoto Deloces, condujo a los medos a una rebelión sin éxito contra el rey asirio Sargón II (que reinó en 722-705 a.C.). Los gobernantes posteriores de Media consideraron a Dayaukku fundador de la dinastka meda. Posteriormente, otro jefe llamado Khshathrita (que reinó hacia 675-653 a.C.), conocido por los griegos como Fraortes, unió

las tribus medas y expulsó a los asirios. Khshathrita fue muerto por los escitas, que invadieron Media desde el noroeste.
El hijo de Khshathrita, Ciaxares (que reinó en 625-585 a.C.) eligió Ecbatana (actualmente Hamadan, Irin) como su capital. En el 625 a.C. expulsó a los escitas de Media e impuso su dominio sobre los persas. Posteriormente atacó a los asirios y capturó la destruyendo Assur en el 614 a.C. En alianza con el reino de Babilonia, que hacka poco tiempo se habka independizado, tomó la ciudad de Nknive y derrotó al Imperio asirio en el 612. Después Ciaxares aumentó el territorio de su reino incluyendo todo el este de Anatolia. Ciaxares fue sucedido por su hijo Astiages (que reinó hacia el 584-550 a.C.). Los persas, bajo el mando de Ciro el Grande, se rebelaron contra él hacia el 550 a.C. Reforzados por una parte del Ejército meda comandado por un jefe llamado Harpagus, tomaron Ecbatana y depusieron al rey meda. Desde este momento en adelante, Media estuvo polkticamente sometida a Persia; sin embargo, los persas, trataron a los medos como sus iguales, y posteriormente ambos pueblos se consideraron como uno solo. Media se constituyó desde entonces en una satrapka del Imperio persa, hasta que la peculiaridad meda decayó con el reinado de la dinastka persa de los Sasinidas desde el siglo III d.C.

Teispes, Old Persian CHISHPISH (fl. mid-7th century BC), early Achaemenid Persian king (reigned c. 675-c. 640), the forefather of the great kings Darius I and Cyrus II.

He was the son of Achaemenes, whose name was given to the Achaemenid dynasty. Teispes ruled the district of Anshan in Elam (north of the Persian Gulf) and tried to maintain a neutral position between the powerful kingdoms of Elam and Assyria. At his death, Teispes either divided his kingdom between his sons, Ariaramnes and Cyrus I, or provided for an alternation in succession between the senior and junior lines.

Argead DYNASTY
---

Ruling house of ancient Macedonia from about 700 to about 311 BC; under their leadership the Macedonian kingdom was created and gradually gained predominance throughout Greece.

From about 700 the founder of the dynasty, Perdiccas I, led the people who called themselves Macedonians eastward from their home on the Haliacmon (modern Aliikmon) River. Aegae (Edessa) became the capital, and by the reign of Amyntas I (6th century BC) Macedonian power extended eastward beyond the Axius (Axiós) River to dominate the neighbouring Thracian tribes.

Amyntas' successor, Alexander I (reigned before 492-c. 450), advanced his frontiers eastward to the Strymon (Struma) River. His byname, "the Philhellene," indicates his efforts to win Greek sympathies. He spread the legend deriving his Argead house from the Temenids of Argos and thus obtained admission to the Olympic Games.

Alexander's son Perdiccas II (reigned c. 450-c. 413) asserted his succession against various brothers and united the Greek cities of Chalcidice in a federation centring on the city of Olynthus. Perdiccas' son Archelaus (reigned c. 413-399) adopted a strongly philhellenic policy, introducing Greek artists to his new capital at Pella. He strengthened Macedonia by building roads and fortresses, improving army equipment, and encouraging city life, and his assassination in 399 was followed by seven years of murder and anarchy.

Finally, a great-grandson of Alexander I, Amyntas III, took the throne in 393/392. Although his reign was filled with anarchy and intrigue, he successfully brought unity to Macedonia. His death in 370/369 left three lawful sons, of whom the first two, Alexander II and Perdiccas III, ruled only briefly. In 359 Amyntas' third son, Philip II, assumed control in the name of Perdiccas' infant heir; having restored order he made himself king (reigned 359-336) and raised Macedonia to a predominant position throughout the whole of Greece. Philip's son Alexander III the Great (reigned 336-323) overthrew the Achaemenian Empire and carried Macedonian arms to the Nile and Indus rivers. On Alexander III's death at Babylon his generals divided up the satrapies of his empire. Although Alexander's two successors, his half-brother Philip III Arrhidaeus and his son Alexander IV, furnished a nominal focus for loyalty until about 311, the real power in the empire lay in other hands.

Macedonia
---

Ancient kingdom centred on the plain in the northeastern corner of the Greek peninsula, at the head of the Gulf of Thérmai. In the 4th century BC it achieved hegemony over Greece and conquered lands as far east as the Indus River, establishing a short-lived empire that introduced the Hellenistic Age of ancient Greek civilization.

The cultural links of prehistoric Macedonia were mainly with Greece and Anatolia. A people of unknown ethnic origins who called themselves Macedonians are known from about 700 BC, when they pushed eastward from their home on the Haliacmon (Aliikmon) River under the leadership of King Perdiccas I and his successors. By the 5th century BC the Macedonians had adopted the Greek language and had forged a unified kingdom. Athenian control of the coastal regions forced Macedonian rulers to concentrate on bringing the uplands and plains of Macedonia under their sway--a task finally achieved by their king Amyntas III (reigned c. 393-370/369).

Two of Amyntas' sons, Alexander II and Perdiccas III, reigned only briefly. Amyntas' third son, Philip II, assumed control in the name of Perdiccas' infant heir; but having restored order he made himself king (reigned 359-336) and raised Macedonia to a predominant position in Greece.

Philip's son Alexander III (reigned 336-323; see Alexander the Great) overthrew the Achaemenian (Persian) Empire and expanded Macedonia's dominion to the Nile and Indus rivers. On Alexander's death at Babylon his generals divided up the satrapies (provinces) of his empire and used them as

bases in a struggle to acquire the whole. From 321 to 301 warfare was almost continual. Macedonia itself remained the heart of the empire, and its possession (along with the control of Greece) was
keenly contested. Antipater (Alexander's regent in Europe) and his son Cassander managed to retain control of Macedonia and Greece until Cassander's death (297), which threw Macedonia into civil war. After a six-year rule (294-288) by Demetrius I Poliorcetes, Macedonia again fell into a state of internal confusion, intensified by Galatian marauders from the north. In 277 Antigonus II Gonatas, the capable son of Demetrius, repulsed the Galatians and was hailed as king by the Macedonian army. Under him the country achieved a stable monarchy--the Antigonid dynasty, which ruled Macedonia from 277 to 168.

Under Philip V (reigned 221-179) and his son Perseus (reigned 179-168), Macedonia clashed with Rome and lost. Under Roman control Macedonia at first (168-146) formed four independent republics without common bonds. In 146, however, it became a Roman province with the four sections as administrative units. Macedonia remained the bulwark of Greece, and the northern frontiers saw frequent campaigning against neighbouring tribes. Toward AD 400 it was divided into the provinces of Macedonia and Macedonia secunda, within the diocese of Moesia.

Notes for Judah:
Judi, en el Antiguo Testamento, nombre del cuarto hijo de Jacob y de una de las 12 tribus de Israel. Es posible que el relato de este hijo de Jacob refleje la historia primigenia de su tribu (Gén. 29; 35; 38). Segsn el libro de Éxodo, la tribu formó la vanguardia de la traveska del desierto tras la salida de Egipto, y los siguientes libros bkblicos que registran la historia posterior de Israel destacan a Judi como predominante. Tras el reino de Salomón, rey de Israel y de Judi, las tribus de Judi y de Benjamkn formaron un reino separado (1 Re. 12; 2 Re. 25) y quedó el reino de Israel en el norte y el de Judi en el sur.

**188904842516647866608640. Achaemenes (Hakamanish), King Of Anshan,** born in c 740 a.c..

Notes for Achaemenes (Hakamanish), King Of Anshan:
Achaemenes, Old Persian HAKHAMANISH (fl. early 7th century BC), eponymous ancestor of the Persian Achaemenid dynasty; he was the father of Teispes (Chishpish) and an ancestor of Cyrus II the Great and Darius I the Great. Although Achaemenes probably ruled only Parsumash, a vassal state of the kingdom of Media, many scholars believe that he led armies from Parsumash and Anshan (Anzan, northwest of Susa in Elam) against the Assyrian king Sennacherib in 681.

The rise of the Persians under Cyrus II.

The ruling dynasty of the Persians settled in Fars in southwestern Iran (possibly the Parsumash of the later Assyrian records) traced its ancestry back to an eponymous ancestor, Haxamanish, or Achaemenes. Traditionally, three rulers fall between Achaemenes and Cyrus II: Teispes, Cyrus I, and Cambyses I. Teispes, freed of Median domination during the so-called Scythian interregnum, is thought to have expanded his kingdom and to have divided it on his death between his two sons, Cyrus I and Ariaramnes. Cyrus I may have been the king of Persia who appears in the records of Ashurbanipal swearing allegiance to Assyria after the devastation of Elam in the campaigns of 642-639 BC, though there are chronological problems involved with this equation. When Median control over the Persians was supposedly reasserted under Cyaxares, Cambyses I is thought to have been given a reunited Persia to administer as a Median vassal. His son, Cyrus II, married the daughter of Astyages and in 559 BC inherited his father's position within the Median confederation. Cyrus II certainly warranted his later title, Cyrus the Great. He must have been a remarkable personality, and certainly he was a remarkable king. He united under his authority several Persian and Iranian groups who apparently had not been under his father's control. He then initiated diplomatic exchanges with Nabonidus of Babylon
(556-539 BC), which justifiably worried Astyages. Eventually, he openly rebelled against the Medes, who were beaten in battle when considerable numbers of Median troops deserted to the Persian standard. Thus, in 550 BC, the Median Empire became the first Persian Empire, and the Achaemenid kings appeared on the international scene with a suddenness that must have frightened many.

BRITANICA

Aqueménidas, dinastka que gobernó Persia aproximadamente desde el 550 hasta el 330a.C. Aunque iniciada durante el siglo VIIa.C. por Aquemenes (Hakhamanish), soberano menor del reino de Anzin, situado en el suroeste del actual Irin, el verdadero fundador de la dinastka fue su biz-biznieto Ciro II el Grande, creador del Imperio persa. En el apogeo de su poder, con Darko I el

Grande, los Aqueménidas gobernaron en un imperio que se extendka desde el rko Indo, al este, hasta Libia y Tracia, al oeste, y desde el golfo Pérsico, al sur, hasta el Ciucaso y el rko Jaxartes (actual Syr Daryi), al norte. Proporcionaron a Persia una magnkfica administración basada en la división del Imperio en 20 provincias regidas por sitrapas, un extenso código legal, una moneda solvente y un servicio postal eficaz. Aunque eran seguidores de las doctrinas de Zoroastro, fueron tolerantes con otras religiones y durante su mandato se desarrollaron el arte y la arquitectura, como evidencian las magnkficas ruinas de Persépolis. La dinastka acabó con la muerte de Darko III, que fue asesinado por sus propios hombres tras su derrota frente Alejandro Magno en el 334a.C.

El primer lkder destacable de los persas fue el jefe guerrero Aquemenes, que vivió hacia el 681 a.C.

Notes for Jacob:
Jacob, en el Antiguo Testamento, uno de los patriarcas hebreos, hijo de Isaac y Rebeca y nieto de Abraham. Tras privar con un engano a su hermano Esas de la bendición de su padre y de sus derechos de primogenitura, Jacob huyó a la casa de su tko, Labin, para quien trabajó durante muchos anos, y cuyas hijas, Lka y Raquel desposó. Sus esposas y sus esclavas, Zilpi y Bilhi, le dieron 12 hijos, que se convertirkan en los patriarcas de las 12 tribus de Israel. Lka dio a luz a Isacar, Judi, Levk, Rubén, Simeón y Zebulón; Raquel, a José y Benjamkn; Zilpi a Gad y Aser, y Bilhi a Dan y Neftalk.
El relato de Jacob se narra en Génesis 25-35. Los acontecimientos mis sobresalientes de su existencia fueron la visión de la "escalera de Jacob", la bendición que recibió en Betel (Gén. 28,10-22) y la concesión del nombre Israel por un adversario divino tras luchar contra él (Gén. 32,24-32). Ask como la figura de Esas esti considerada como la representación de la nación de Edom (Gén. 36,8), la de Jacob, o Israel, personifica a la nación de Israel. Ask, el profeta Oseas traza un paralelo entre la experiencias de Jacob y las de su pueblo (Os. 12) hacia el 1700 a.C.

Notes for Isaac:
Isaac (en hebreo, 'hari rekr'), patriarca del Antiguo Testamento, hijo de Abraham, medio hermano de Ismael y padre de Jacob y Esas. El nacimiento de Isaac fue prometido por Dios (Gén. 17, 19 y 21) a Abraham y a su esposa Sara, después de muchos anos de matrimonio sin descendencia, como senal de que las bendiciones que Dios otorgó en un principio a Abraham tendrkan su continuidad en Isaac, heredero de la Alianza. Los acontecimientos de la vida de Isaac son relatados en el libro del Génesis desde el capktulo 21 al 28.
El relato dominante en la narración, que constituye uno de los episodios mis conocidos de la Biblia, es la del proyectado sacrificio de Isaac (Gén. 22). Segsn esta historia, Dios quiso probar la fe de Abraham ordenindole que sacrificara a su amado hijo. En sltimo momento, tras quedar Dios convencido de la incondicional obediencia de ambos, padre e hijo, aceptó un carnero en lugar del joven. Se cree que este relato expresa el rechazo de los hebreos a los sacrificios humanos, practicados por las naciones vecinas. En la sinagoga actual, el carnero es recordado en el ritual de soplar el shofar, o cuerno de carnero, durante los dkas Solemnes del judaksmo: Rosh ha-Shani y Yom Kippur.
El Nuevo Testamento alude a Isaac como precursor de Cristo y de la Iglesia (Gil. 3,16; 4,21-31); la obediencia de Isaac a su padre, hasta el punto de estar dispuesto a la inmolación, se asocia con la de Cristo (Heb. 11,17-19). Estos temas fueron desarrollados por varios de los autores patrksticos e Isaac aparece con frecuencia en el arte cristiano, en concreto, asociado a la Eucaristka.
Los arqueólogos y demis cientkficos bkblicos han trazado similitudes entre la narración bkblica de Isaac y la historia de las tribus semitas. Se considera que Abraham constituye el tronco nómada del que surgieron las tribus hebreas e idumeas (edomitas). Isaac representarka entonces a las tribus que se unieron para constituir la confederación hebrea y obedecer a Dios, Yahvé, una deidad tribal, en origen. Por su parte, Ismael representarka a las tribus de Edom. Comparado con los otros dos grandes patriarcas bkblicos, su padre Abraham y su hijo Jacob, Isaac aparece como una figura menos importante. Sin embargo, los especialistas ven por una serie de detalles del relato bkblico, en Isaac, mis elementos simbólicos importantes. La hipótesis es que la narración de su nacimiento es un intento deliberado, de los primeros escritores israelitas, de modificar la tradición de las tribus semitas a fin de promover la adhesión a la confederación hebrea, una alianza polktica y militar, al sugerir que dicha alianza estaba inspirada por una poderosa divinidad. Al convertir a Isaac en hijo legktimo y a Ismael en hijo ilegktimo del antepasado comsn, se afirma la superioridad de los hebreos sobre las tribus idumeas independientes. Al fin, la rivalidad entre los dos hijos de Isaac podrka reflejar de nuevo la rivalidad entre Edom y los hebreos.

Notes for Abraham:
Abraham, patriarca bkblico y segsn el libro del Génesis (11,27; 25,10) padre de los hebreos, que parece vivió entre los anos 2000 y 1500 a.C. Abraham es considerado por los musulmanes, quienes le llaman Ibrahkm, como un antepasado de los irabes por medio de Ismael (uno de sus hijos). En otro tiempo se le consideró contemporineo de Hammurabi, rey de Babilonia. Debido a que el relato bkblico de su vida se basa en tradiciones conservadas por transmisión oral mis que en documentos históricos, no puede escribirse una biografka tal y como hoy la conocemos.
Llamado Abram originalmente, Abraham fue el hijo de Tare, un descendiente de Sem, y nació en la ciudad caldea de Ur, donde se casó con su hermanastra Saray, o Sara. Abandonaron Ur junto a su sobrino Lot y su familia, por inspiración divina y se dirigieron a Harin. Al recibir la promesa de que Dios harka de él una 'nación grande', Abram se trasladó a Canain, donde vivió como un nómada. El hambre le llevó a Egipto, pero fue expulsado por presentar a Saray, su mujer, como su hermana. Una vez de vuelta a Canain, Abram y Lot

se separaron tras las disputas surgidas entre ellos y sus pastores, quedindose Lot cerca de Sodoma y continuando Abram su vida errante. Mis tarde rescató a Lot de la cautividad del rey Cordorlahomor de Elam y fue bendecido por el sacerdote Melquisedec, rey de Salem. Entonces, Dios prometió a Abram un hijo de su esposa Saray, le repitió sus primeras promesas y las confirmó con una alianza.
Cuando Abram renovó esta alianza, se estableció el rito de la circuncisión, su nombre se transformó en Abraham, y el de Saray en Sara. Dios, a través de unos ingeles, volvió a prometerle que tendrka un hijo varón de Sara.
Cuando Dios le informó de que iba a destruir las ciudades de Sodoma y Gomorra a causa de la depravación de sus habitantes, Abraham le suplicó que no lo hiciera. Dios le prometió que salvarka las ciudades si pudiera encontrar sólo diez hombres justos. Al no encontrar ninguno Dios cumplió su amenaza.
Ismael, primer hijo de Abraham y de Agar, una esclava egipcia, nació cuando Abraham tenka 86 anos. Los musulmanes irabes consideran a Ismael como su progenitor. Isaac, hijo de Abraham alumbrado por Sara cuando éste tenka 100 anos, fue el primero de sus descendientes legktimos. Dios exigió que Abraham sacrificara a su hijo, como prueba de fe, aunque por la incondicional obediencia de Abraham, Dios le permitió salvarle y le recompensó con una renovación formal de su promesa. La tradición islimica cita a Ismael, no a Isaac, como el sacrificio perdonado. Después de la muerte de Sara, Abraham se casó con Cetura y tuvo seis hijos. Murió a la bkblica edad de 175 anos y fue enterrado junto a Sara en la gruta de Macpeli, en lo que ahora es Hebrón.
Cristianos, musulmanes y judkos aceptan a Abraham como encarnación del hombre de fe inquebrantable, visión que aparece reflejada en el Nuevo Testamento.

Notes for Neoptolemus:
[TESALONICA.FTW]

Neoptolemus, in Greek legend, the son of Achilles, the hero of the Greek army at Troy, and of Deldamia, daughter of King Lycomedes of Scyros; he was sometimes called Pyrrhus, meaning Fair. In the last year of the Trojan War the Greek hero Odysseus brought him to Troy after the Trojan seer Helenus had declared that the city could not be captured without the aid of a descendant of Aeacus, who had helped to build its walls; Neoptolemus was Aeacus' great-grandson. He fought bravely and took part in the capture of Troy but committed the sacrilege of slaying the aged king Priam at an altar. By Andromache, Priam's
daughter-in-law, he was the father of Molossus, ancestor of the Molossian kings. He later married Hermione but shortly thereafter was murdered at Delphi.

Notes for Andromache:
[TESALONICA.FTW]

Andromache, in Greek legend, the daughter of Eetion (prince of Thebe in Mysia) and wife of Hector (son of King Priam of Troy). All her relations perished in or shortly after the taking of Troy by the Greek warrior Neoptolemus (Pyrrhus). When the captives were allotted, Andromache fell to Neoptolemus, the son of Achilles, whom she accompanied to Epirus and to whom she bore three sons. Neoptolemus was slain at Delphi, and he left Andromache and the kingdom as well to Helenus, the brother of Hector. After the death of Helenus, Andromache returned to Asia Minor with her youngest son, Pergamus, who there founded a town named after himself.

King Aongus Olmucach, 20th Monarch of Ireland, succeeded B.C.1427 to 1409. In his reign the Picts again refused to pay the tribute imposed on them 250 years before by Heremon.  But this Monarch went with a strong army into Alba and, in thirty pitched battles, overcame them and forced them to pay the required tribute.  Aongus secured the conquest of all of Alba, begun by his father Fiocha Labhrainn.  He died in B.C.1409.

Notes for Achilles:
[TESALONICA.FTW]

Achilles, in Greek mythology, son of the mortal Peleus, king of the Myrmidons, and the Nereid, or sea nymph, Thetis. He was the bravest, handsomest, and

greatest warrior of the army of Agamemnon in the Trojan War. According to Homer, Achilles was brought up by his mother at Phthia with his cousin and inseparable companion Patroclus. One of the non-Homeric tales of his childhood relates that Thetis dipped Achilles in the waters of the River Styx, by which he became invulnerable, except for the part of his heel by which she held him--the proverbial "Achilles' heel."

The later mythographers related that Peleus, having received an oracle that his son would die fighting at Troy, sent Achilles to the court of Lycomedes on Scyros, where he was dressed as a girl and kept among the king's daughters (one of whom, Deldamia, bore him Neoptolemus). Hearing from the soothsayer Calchas that Troy could not be taken without Achilles, the Greeks searched for and found him.

During the first nine years of the war, Achilles ravaged the country around Troy and took 12 cities. In the 10th year a quarrel with Agamemnon occurred when Achilles insisted that Agamemnon restore Chryseis, his prize of war, to her father, a priest of Apollo, so as to appease the wrath of Apollo, who had decimated the camp with a pestilence. An irate Agamemnon recouped his loss by depriving Achilles of his favourite slave, Briseis.

Achilles refused further service, and consequently the Greeks floundered so badly that at last Achilles allowed Patroclus to impersonate him, lending him his chariot and armour. Hector (the eldest son of King Priam of Troy) slew Patroclus, and Achilles, having finally reconciled with Agamemnon, obtained new armour from the god Hephaestus and slew Hector. After dragging Hector's body behind his chariot, Achilles gave it to Priam at his earnest entreaty. The Iliad concludes with the funeral rites of Hector. It makes no mention of the death of Achilles, though the Odyssey mentions his funeral. The poet Arctinus in his Aethiopis took up the story of the Iliad and related that Achilles, having slain the Ethiopian king Memnon and the Amazon Penthesilea, was himself slain in battle by Priam's son Paris, whose arrow was guided by Apollo.

Notes for Peleus, King of the Myrmidons:
[TESALONICA.FTW]

Peleus, in Greek mythology, king of the Myrmidons of Thessaly; he was most famous as the husband of Thetis (a sea nymph) and the father of the hero Achilles, whom he outlived. When Peleus and his brother Telamon were banished from their father Aeacus' kingdom of Aegina, Peleus went to Phthia to be purified by his uncle King Eurytion, whose daughter Antigone he married, receiving a third of Eurytion's kingdom. During the Calydonian boar hunt he accidentally killed Eurytion. He then went to Iolcos to be purified by King Acastus, whose wife Astydameia made advances to him. When he refused her, she told
Antigone that he wanted to marry her daughter, causing Antigone to hang herself. Peleus later won the sea nymph Thetis by capture, and all the gods except Eris (the goddess of discord) were invited to the wedding. The golden apple that Eris spitefully sent to the wedding guests led to the "judgment of Paris" and thence to the Trojan War. Peleus was too old to fight in that conflict and gave his armour to his son Achilles. Thetis, who had returned to the sea after bearing Achilles, eventually fetched Peleus to dwell with her.

Notes for Thetis:
[TESALONICA.FTW]

Thetis, in Greek mythology, a Nereid loved by Zeus and Poseidon. When Themis (goddess of Justice), however, revealed that Thetis was destined to bear a son who would be mightier than his father, the two gods gave her to Peleus, king of the Myrmidons of Thessaly. Thetis, unwilling to wed a mortal, resisted Peleus' advances by changing herself into various shapes. But, assisted by the wise centaur Chiron, Peleus finally captured her.

All the gods brought gifts to their wedding. The child of their union was the warrior Achilles, but, according to some authorities, Thetis bore seven children, all of whom perished either when she attempted to render them immortal by fire or when she destroyed them as the tokens of an unwilling alliance. She befriended Zeus when the other gods revolted, and she rescued both Hephaestus and Dionysus from the sea. She had a sanctuary at Sparta.

Notes for Noah:
Noé, en el Antiguo Testamento (y en el Corin), hijo de Limek, descendiente de Adin en décima generación y, por sobrevivir con su familia al Diluvio, padre de toda la humanidad (Gen. 6-9). Segsn el relato bkblico, Noé fue salvado por su piedad cuando Dios, encolerizado por la corrupción reinante en el mundo, lo destruyó con un diluvio que duró 40 dkas y 40 noches. Ordenó a Noé que construyera un arca, una gran nave, y que subiera a ella con su esposa, sus tres hijos -Sem, Cam y Jafet-, sus nueras y una pareja de todo ser viviente existente sobre la tierra. El islam considera a Noé (Nuj) como uno de sus profetas. En un episodio posterior al Diluvio, se atribuye a Noé el descubrimiento de la elaboración del vino, por plantar una vina, una vez finalizado el diluvio, y beber del vino hasta embriagarse (Gén. 9,20-27). Se dice que Noé vivió 950 anos (Gén. 9,29). En las culturas babilonia, griega y otras aparecen héroes similares.

---
Arca de Noé, en el Génesis (capktulos 6-9), la nave en la que Noé se salvó a sk mismo, a su familia y a "una pareja… de todo ser viviente… macho y hembra" del diluvio enviado por Yahvé para destruir a la humanidad. La palabra castellana arca viene del latkn arca, que significa basl o cofre. En la historia religiosa judka, Arca de la Alianza significa el recepticulo en que se guardaban las tablas de la ley. Yahvé dio a Noé instrucciones precisas acerca de la estructura y de las dimensiones del arca, de los materiales y modo de usarlos (Gén. 6,14-16), y le ordenó que llevase a bordo una pareja de cada animal existente.
Antes del desarrollo de la geologka cientkfica y de la aparición de las teorkas de la evolución, en el siglo XIX, solka pensarse que el Diluvio bkblico fue un acontecimiento histórico (se creka que se habkan conservado como reliquias fragmentos del arca), aunque los estudios comparativos de la mitologka mundial han manifestado la existencia de numerosos mitos que hablan de la destrucción de la antigua sociedad humana por un diluvio, y de la preservación de determinadas criaturas escogidas en una nave similar al arca. El antecedente mis evidente del mito bkblico es la narración sumeria del diluvio, que existe en diversas versiones en la mitologka mesopotimica. Una

caracterkstica comsn es que un hombre -que segsn la versión se llama rey Ziusudra, Atrahasis o Utnapishtim- es advertido de la intención de los dioses y construye una nave para sobrevivir. En la mitologka griega, quien construye el arca es Deucalión, en tanto que en la India, es el antepasado de la humanidad, Manu, quien, guiado por un pez al que habka salvado, construye un arca en el que se puede conservar la semilla de todas las cosas. Tras el diluvio, el arca se posa en lo alto de una cima montanosa, denominada Ararat en la Biblia, y Parnaso, Etna u otros en la mitologka griega. Los pasajeros humanos y animales desembarcan, una vez cumplido el propósito del navko. El arca sigue siendo un poderoso skmbolo de seguridad, es la guka en medio de la catistrofe. En este sentido, la supervivencia del Arca de Noé en innumerables canciones, juegos y juguetes de los ninos occidentales destaca de entre las demis imigenes bkblicas.

Noah, also spelled NOE, the hero of the biblical Flood story in the Old Testament book of Genesis, the originator of vineyard cultivation, and, as the father of Shem, Ham, and Japheth, the representative head of a Semitic genealogical line. A synthesis of at least three biblical source traditions, Noah is the image of the righteous man made party to a covenant with Yahweh, the God of Israel, in which nature's future protection against catastrophe is assured.

Noah appears in Gen. 5:29 as the son of Lamech and ninth in descent from Adam. In the story of the Deluge (Gen. 6:11-9:19), he is represented as the patriarch who, because of his blameless piety, was chosen by God to perpetuate the human race after his wicked contemporaries had perished in the Flood. A righteous man, Noah "found favour in the eyes of the Lord" (Gen. 6:8). Thus, when God beheld the corruption of the earth and determined to destroy it, he gave Noah divine warning of the impending disaster and made a covenant with him, promising to save him and his family. Noah was instructed to build an ark, and in accordance with God's instructions he took into the ark male and female specimens of all the world's species of animals, from which the stocks might be replenished. Consequently, according to this narrative, the entire surviving human race descended from Noah's three sons. Such a genealogy sets a universal frame within which the subsequent role of Abraham, as the father of Israel's faith, could assume its proper dimensions.

The story of the Flood has close affinities with Babylonian traditions of apocalyptic floods in which Utnapishtim plays the part corresponding to that of Noah. These mythologies are the source of such features of the biblical Flood story as the building and provisioning of the ark, its flotation, and the subsidence of the waters, as well as the part played by the human protagonist. Tablet XI of the Gilgamesh epic introduces Utnapishtim, who, like Noah, survived cosmic
destruction by heeding divine instruction to build an ark.

The religious meaning of the Flood is conveyed after Noah's heroic survival. He then built an altar on which he offered burnt sacrifices to God, who then bound himself to a pact never again to curse the earth on man's account. God then set

a rainbow in the sky as a visible guarantee of his promise in this covenant. God also renewed his commands given at creation but with two changes: man could now kill animals and eat meat, and the murder of a man would be punished by men.

Despite the tangible similarities of the Mesopotamian and biblical myths of the flood, the biblical story has a unique Hebraic perspective. In the Babylonian story the destruction of the flood was the result of a disagreement among the gods; in Genesis it resulted from the moral corruption of human history. The primitive polytheism of the Mesopotamian versions is transformed in the biblical story into an affirmation of the omnipotence and benevolence of the one righteous God. Again, following their survival, Utnapishtim and his wife are admitted to the circle of the immortal gods; but Noah and his family are commanded to undertake the renewal of history.

The narrative concerning Noah in Gen. 9:20-27 belongs to a different cycle, which seems to be unrelated to the Flood story. In the latter, Noah's sons are married and their wives accompany them in the ark; but in this narrative they would seem to be unmarried, nor does the shameless drunkenness of Noah accord well with the character of the pious hero of the Flood story. Three different themes may be traced in Gen. 9:20-27: first, the passage attributes the beginnings of agriculture, and in particular the cultivation of the vine, to Noah; second, it attempts to
provide, in the persons of Noah's three sons, Shem, Ham, and Japheth, ancestors for three of the races of mankind and to account in some degree for their historic relations; and third, by its censure of Ham, it offers a veiled justification for the later Israelite conquest and subjugation of the Canaanites. Noah's drunkenness and the disrespect it provokes in his son Ham, (or Canaan) result in Noah's laying of a curse on Ham and his descendants. This incident may symbolize the ethnic and social division of Palestine: the Israelites (from the line of Shem) will separate from the pre-Israelite population of Canaan (which is depicted as licentious), who will live in subjection to the Hebrews.

The symbolic figure of Noah was known in ancient Israel, before the compilation of the Pentateuch. Ezekiel (14:14;20) speaks of him as a prototype of the righteous man who, alone among the Israelites, would be spared God's vengeance. In the New Testament, Noah is mentioned in the genealogy of the Gospel According to Luke (3:36) that delineates Jesus' descent from Adam. Jesus also uses the story of the Flood that came on a worldly generation of men "in the days of Noah" as an example of Baptism, and Noah is depicted as a preacher of repentance to the men of his time, itself a predominant theme in Jewish apocryphal and rabbinical writings.

King Tighernmas, 13th Monarch of Ireland, succeeded B.C.1620 to 1543. He fought twenty-seven battles with the followers of the family of Heber Fionn, in all of which he gained. In his reign gold was mined near the Liffey River and skillfully worked by Inchadhan.

According to historians, King Tighernmas was the first to introduce Image Worship into Ireland. He set up the famous idol called "Crom-Cruach," which was worshipped down to the time of St. Patrick, by whom it was destroyed. He

introduced certain distinctions in social rank, indicated by the wearing of certain colors by each grade of society -- slaves one color, soldiers another, etc.

Tighernmas died in B.C.1543, on the eve of the 1st of November (Halloween, All Hallow's Eve, etc.), in the presence of two-thirds of the people of Ireland, at Magh-Sleaght (The Field of Adoration) in the County of Leitrim, while adoring the sun god Crom-Cruach.

Notes for Heremon, King:
[Fergus Mor Mac Earca.FTW]

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]

Heremon was the seventh son of Milesius and from him were descended the kings, nobility and gentry of the kingdoms of Connaught, Dalriada, Leinster, Meath, Orgiall, Ossory; of Scotland since the fifth century; of Ulster since the fourth century; and of England from the reign of Henry II down to the present time. "The House of Heremon" writes O'Callaghan, "from the number of princes of great families and the extensive territories acquired by those belonging to it, was regarded by far as the most illustrious, so much so, according to the best authority, that it would be as reasonable to affirm that one pound is equal in value to one hundred pounds as it would be to compare any other line with that of Heremon."

King Heremon, together with his brother Heber, were jointly the 1st Milesian Monarchs of Ireland. They began to reign in B.C.1698. Heremon and Heber reigned jointly only one year, when upon a difference between their ambitious wives, they fought the Battle of Ardcath, where Heber was slain by Heremon. Heremon then reigned singly, as 2nd Monarch of Ireland, for 14 years, during which time a certain colony of Picts, called by the Irish Cruitneargh (English Cruthmeans), arrived in Ireland and requested Heremon to assign to them a part of the country in which to settle, which he refused to do. But, giving them as wives the widows of the Tuatha-de-Danan slain in battle, he sent them with a strong part of his own forces to a conquered country then called Alba, but now called Scotland, conditionally, that they and their posterity should be tributary to the Monarchs of Ireland.

Heremon died in B.C.1683 and was succeeded by three of his four sons -- Muimne, Luigne and Laighean -- who reigned for three years and were slain by their brother and successor, Heberian

Notes for Tea Tephi, Princess:
[Fergus Mor Mac Earca.FTW]

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]

Princess Tea (Tamar) Tephi was the daughter of King Zedekiah of Judah. She took with her the Stone (or Scone; the Pillow of Rock used by Jacob when he had his famous dream), which today remains with her descendants, Kings of Great Britain and Ireland.

NOTE: Records say Tea Tephi flourished in B.C.580 but her husband, King Heremon of Ireland, reigned in B.C.1698. From this point back, years will reflect the B.C.580 starting point, to retain the continuity of the records used at present ("The Annals of the Four Masters, Royal Geneologies," Anderson).

Notes for Milesius Of Galicia, Prince:
In his youth and during his father's lifetime, Milesius went into Scythia, where he was kindly received by the King of the country, who gave him his daughter in marriage and appointed him General of the forces. Milesius defeated the King's enemies and gained much fame and the love of the King's subjects. His growing greatness and popularity excited against him the jealousy of the King, who fearing the worst, resolved on privately dispatching Milesius out of the way, for openly he dared not attempt it. Admonished of the King's intentions, Milesius slew him and retired into Egypt with a fleet of sixty sail.

Phraoh Nectonibus (Necho ? AVC), then ruler of Egypt. being informed of his arrival, and of his great valor, wisdom and conduct in arms, made Milesius general of all his forces against the King of Ethiopia, then invading his country.

Milesius was victorious, forcing the enemy to submit to the conqueror's own terms of peace. He found great favor with the Pharaoh, who gave him, then being a widower, his daughter, the Princess Scota in marriage and kept him eight years afterwards in Egypt. During the sojourn of Milesius in Egypt he employed the most ingenious and able persons among his people to be instructed in the several trades, arts and sciences used in Egypt, in order to have them taught to the rest of his people on his return to Spain.

At length Milesius took leave of his father-in-law, and steered towards Spain, where he arrived to the great joy and comfort of his people, who were much harassed by the rebellion of the natives and the intrusion of other foreign nations that had forced their way in after his father's death and during his long absence from Spain. With both he often met, and in fifty-four battles he routed, destroyed and totally extirpated them out of the country, which he settled in peace and quietness.

In his reign a great famine occurred in Spain, of twenty-six years continuance. Milesius, superstitiously believing it a punishment from their negligence in seeking out the country destined for their final settlement, sent his uncle Ithe, with his son Lugadius and 150 stout men, to bring them an account of those western islands; who accordingly arriving at the island since then called Ireland, and landing in that part of it now called Munster, left his son with fifty of his men to guard the ship, and with the rest travelled about the island. Ithe's force was routed and he was killed at Magh Ithe, "The Plain of Ithe," from whence his son brought his dead and mangled body back into Spain and there exposed it to the people to excite them to avenge his murder.

The Irish Chronicles all observe that all the invaders and planters of Ireland, namely Partholan, Neiruhedle, the Fir-bolgs, Tuatha-de-Danan and Clan-na-Mile were originally Scythians of the line of Japhat, who had the language called Bearla-Tabbai (Gaelic) common amongst them all, and Ithe understood the Tuathe-de-Danan without an interpreter.

Milesius died before he could avenge the murder of his uncle Ithe, but his eight sons, with numerous fleet, sailed for Ireland, landed there, fought and routed the three Tuatha-de-Danan kings at Slieve-Mis, and thence pursued and overtook them at Tailten, where the three kings and their queens were slain and their army destroyed, and thus gained possession of the country as foretold by Cachear some years before.

Sons Heber and Heremon divided the kingdom between them and became jointly the first of 183 sole Monarchs of the Gaelic, Milesian or Scottish race that ruled and governed Ireland successively for 2885 years from A.M.3500 (*) to their submission to King Henry II of England. Their invasion of Ireland took place in the year of the world 3500, or the next year after Solomon began the foundation of the Temple of Jerusalem.

Milesius of Spain bore three lions on his shield and standard in commemoration of his killing, in one morning while in Africa, by his cunning and valor, three lions. His two sons, Heber and Heremon, and his grandson Heber Donn (son of

Ir), divided the lions among them, each taking one, which the chiefs of their posterity commemorate to this day. When these three men divided amongst them the will of Milesius, as they did the country of Ireland, each of them bore a Lion on his shield, between two (others?), and of different colors. (Three Lions -- three adorn the Royal Arms of Great Britain.)

Of the eight sons of Milesius, three became ancestors of the Kings of Ireland, viz: Heber, Ir and Heremon. The history of the Kings of Ireland is the history of the war for the throne between the descendants of these three. In the line of Heremon, as given, not all sat on the Throne of Ireland.

(*)The Jewish Era in use today is that dated from the supposed year of the Creation (designated anno mundi or AM) with its epoch, or beginning, in 3761 BC. For example, the Jewish year 5745 AM, the 7th in the 303rd lunar cycle and the 5th in the 206th solar cycle, is a regular year of 12 months, or 354 days. The qevi'a is, using the three respective letters of the Hebrew alphabet as two numerals and an initial in the manner indicated above, HKZ, which indicates that Rosh Hashana (New Year) begins on the fifth (H = 5) and Passover on the seventh (Z = 7) day of the week and that the year is regular (K = ke-sidra); i.e., Heshvan is defective--29 days, and Kislev full--30 days. The Jewish year 5745 AM corresponds with the
Christian Era period that began September 27, 1984, and ended September 15, 1985. Neglecting the thousands, current Jewish years AM are converted into years of the current Christian Era by adding 239 or 240--239 from the Jewish New Year (about September) to December 31 and 240 from January 1 to the eve of the Jewish New Year. The adjustment differs slightly for the conversion of dates of now-antiquated versions of the Jewish Era of the Creation and the Christian Era, or both. Tables
for the exact conversion of such dates are available.

He was the son of Necho I, Pharaoh Of Egypt, ruled 672-664 BC.

Notes for PharaohPsammetichus I, ruled 664-610 BC:
[Fergus Mor  Mac Earca.FTW]

Psamtik I (d. 610 BC), governor, later king (reigned 664-610 BC) of Egypt, who expelled the Assyrians from Egypt and reunited the country, founding its 26th dynasty.

According to the Greek historian Herodotus, he was one of 12 co-rulers and secured the aid of Greek mercenaries in order to become sole ruler. After an abortive rebellion by his vassals against the Assyrian ruler of Egypt in 663, Psamtik was unexpectedly restored as governor of Athribis, a city of the Nile Delta, by the Assyrian king. Later, rejecting his vassal status, he negotiated an alliance with Gyges, the king of Lydia in Asia Minor, which enabled him to subdue the other Assyrian princes and vassals in the Delta (658-651). He established his capital at Sais, his native city, in the western Delta, and proceeded to reform Egypt's government. To remove the last vestiges of the rule of the kings of Cush--the African kingdom south of Egypt, which had persisted after the Assyrian raid of 663--he negotiated the adoption of his daughter by the priestess of the Theban god Amon, thus securing control over the considerable wealth of the temples. Thebes remained under its own

governor, an appointee of the Cushites, but Psamtik installed a new official as governor of the South and also created the post of administrator of Middle Egypt. In addition, he placed military garrisons along the Nile throughout Upper and Middle Egypt.

To counteract the power of the resident military class, Psamtik organized a Greek mercenary corps as part of his army. As a check against feudal tendencies, he also encouraged a policy of large property donations to temples by the wealthy nobility. Partly as a response to the recent foreign domination, he encouraged a revival of Old Kingdom ideals in religion and art in Egypt.

Psamtik probably remained neutral following the death of Gyges, his Lydian ally, in 653. With the spectacular rise of Babylon, however, he sent reinforcements to the beleaguered Assyrians in 614. Having successfully regained Egypt's independence and fostered its prosperity, he left a strong kingdom to his son.

Notes for Pepin II, Of Heristal:
Pepin II,

byname PEPIN OF HERSTAL, French PÉPIN D'HÉRISTAL (d. Dec. 16, 714, Jupille, near Licge [now in Belgium]), ruler of the Franks (687-714), the first of the great Carolingian mayors of the palace.

The son of Begga and Ansegisel, who were, respectively, the daughter of Pepin I and the son of Bishop Arnulf of Metz, Pepin established himself as mayor of the palace in Austrasia after the death of Dagobert II in 679 and defended its autonomy against Theodoric III of Neustria and Ebroln, Theodoric's mayor of the palace. Defeated by Ebroln in 680 at Lucofao (near Laon), Pepin gained his revenge on the Neustrians in 687 at Tertry (near Péronne) and became sole effective ruler of the Franks. He nevertheless retained Theodoric III on the throne and after his death replaced him with three successive Merovingian kings. After several years of warfare Pepin defeated the Frisians on his northeastern border (689) and married his son Grimoald to Theodelind, daughter of the Frisian chief Radbod. He also forced the Alemanni to recognize Frankish authority again and
encouraged Christian missionaries in Alemannia and Bavaria. Charles Martel was his son.

Children of Pepin II, Of Heristal and Aupais (Alpaida) are:

i. Charles Martel, born 689 in HERISTAL LIEGE BELGIUM (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); died 22 Octubre 741 in QUIERZY-SUR-OISE FRANCE (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); married (1) Rotrou WFT Est. 706-721 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); born Abt. 690 in AUSTRASIA (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); died 724 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); married (2) Suanhilde, Of Bavaria WFT Est. 706-732 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); born WFT Est. 685-704 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); died WFT Est. 710-789 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997).

Notes for Charles Martel:

Charles MARTEL, Latin CAROLUS MARTELLUS, German KARL MARTELL (b. c. 688--d. Oct. 22, 741, Quierzy-sur-Oise, France), mayor of the palace of Austrasia (the eastern part of the Frankish kingdom) from 715 to 741, who reunited and ruled the entire Frankish realm and stemmed the Saracen invasion at Poitiers in 732. His byname, Martel, means "the hammer." A man of valiant determination, ambition, and ability, he strove incessantly to consolidate his power.

Background.

After the death of Dagobert I in 639, there had been no king of any worth in the Frankish kingdom. All of them were of the Merovingian line--idle, slothful, and bent on ease and luxury. The burden of rule lay upon the mayors of the palace, who in reality governed Austrasia, the eastern part of the Frankish kingdom, and Neustria, its western portion. These mayors not only controlled routine in the royal palace but also directed the political, social, and commercial life of the Franks. Neustria bitterly resented its conquest and annexation in 687 by Pepin of Herstal, mayor of Austrasia and father of Charles Martel, at the Battle of Tertry (Testry), near Péronne.

When in 714 Pepin of Herstal died, he left as heirs three grandsons, his legitimate children all being dead. Until his grandchildren came of age, Plectrude, Pepin's widow, was to hold power. As an illegitimate son, Charles Martel was entirely neglected in the will. But he was young, strong, and determined, and a struggle for control at once began between him and Plectrude.

Both Charles and Plectrude faced rebellion throughout the Frankish kingdom when Pepin's will was made known. The king, Chilperic II, was in the power of Ragenfrid, mayor of the palace of Neustria, who joined forces with an enemy of the Franks, Radbod, king of the Frisians in Holland, in order to eliminate Charles. Plectrude managed to imprison Charles, but he escaped, gathered an army, defeated King Chilperic and Mayor Ragenfrid, and conquered the hostile Neustrians. His success made resistance by Plectrude and the Austrasians useless; realizing the spirit and power of young Charles, they submitted, and by 719 Charles alone governed the Franks as mayor. Peace and order reigned in Austrasia and Neustria, so that by 724 Charles was free to deal with hostile elements elsewhere. This involved expeditions against the Saxons and the peoples of the lands near the Rhine and the Danube.

Battle of Poitiers.

Charles next crossed the Loire into Aquitaine, where one Eudes (Odo) was duke.
Eudes, once an ally of Charles, had become disloyal and promptly called to his aid the Saracens, Moors from Africa, who, entering Spain in 711, had soon conquered it and were now (732) threatening Gaul. Led by their king, 'Abd ar-Rahman, they marched for Bordeaux, there to burn churches and to plunder. From Bordeaux they went across Aquitaine to Poitiers. It was outside this city that Charles Martel came upon them and put them to flight.

In 733 Charles forced Burgundy to yield to his rule, and in 734 he subdued the Frisians. During 735 word arrived that Eudes was dead, and Charles marched rapidly across the Loire River in order to make his power felt around Bordeaux. In 736 he fought to secure his conquest of Burgundy, and there were further engagements against the Saracens during the 730s.

Charles Martel's health began to fail in the late 730s, and in 741 he retired to his palace at Quierzy-sur-Oise, where he died soon after. Before his death he divided the Merovingian kingdom between his two legitimate sons, Pepin and Carloman. He had maintained the fiction of Merovingian rule all of his life, refraining from transferring the royal title to his own dynasty.

Notes for Bishop Of Metz Arnulf St.:
Arnulf OF METZ, SAINT, French SAINT ARNOUL DE METZ (b. c. 580, near Nancy [France]--d. July 18, 640?, Remiremont; feast day August 16 or 19), bishop of Metz and, with Pepin I, the earliest known ancestor of Charlemagne.

A Frankish noble, Arnulf gave distinguished service at the Austrasian court under Theudebert II (595-612). In 613, however, with Pepin, he led the aristocratic opposition to Brunhild that led to her downfall and to the reunification of Frankish lands under Chlotar II. About the same year, he became bishop.

From 623, again with Pepin, now mayor of the Austrasian palace, Arnulf was adviser to Dagobert I, before retiring (629?) to become a hermit. Arnulf's son

Ansegisel married Pepin's daughter Begga; the son of this marriage, Pepin II, was Charlemagne's great-grandfather.

Notes for Pepin I, Of Landen:
Pepin I, byname PEPIN OF LANDEN, or PEPIN THE ELDER, French PÉPIN DE LANDEN, or PÉPIN LE VIEUX (d. c. 640), councillor of the Merovingian king Chlotar II and mayor of the palace in Austrasia.

Through the marriage of his daughter Begga with Ansegisel, son of Arnulf (d. 641; bishop of Metz), Pepin was the founder of the Carolingian dynasty. Deprived of his mayoralty at the accession (629) of Dagobert I, he regained power in Austrasia after that king's death (January 639) but did not long survive to enjoy it.

Notes for Teodeberto I, rey de Reims (534-548):
Theodebert I (b. c. 495/500--d. 547 or 548), Merovingian king of Reims who succeeded his father, Theodoric I, in 533 or 534 and greatly expanded the area under Frankish hegemony.

A proven soldier before he came to the throne, Theodebert exploited the war in Italy between Byzantium and the Ostrogoths to gain extensive territory in the Alpine regions and the northeast of the peninsula, though most of this was lost after his death. With expansion also in the east as far as the later Brandenburg, Theodebert claimed control of peoples from the Baltic to beyond the Danube.

By minting coins bearing his, rather than the Byzantine emperor's, effigy and name,
Theodebert asserted his independence of Constantinople, against which he apparently even envisaged mounting an expedition. Just and generous, especially to the church, Theodebert is the most appealing of the Merovingians and, Clovis apart, perhaps the most remarkable personality among them. He was succeeded by his son, Theodebald.

Waccho (d. c. 539), king of the Lombards in the period preceding the invasion of Italy, when they occupied territory roughly coinciding with Austria north of the Danube. Waccho assassinated his uncle Tato and usurped the throne c. 510, ruling for 30 years.

Tato's son and grandson took refuge with the king of a neighbouring people, the Gepidae, making several fruitless attempts to recover rule over the Lombards. Shortly after 536 Waccho made a treaty with the Byzantine emperor Justinian I against the Gepidae. In 539 the Ostrogoth king of Italy, Witigis, hard-pressed by Justinian's general Belisarius, sent ambassadors to Waccho, offering him money in exchange for military aid. Waccho refused, preferring to remain on good terms with Constantinople. Married successively to daughters of the kings of the Thuringians, of the Gepidae, and of the Heruli, Waccho was succeeded by a young son who died during the regency of the Lombard chief Audoin; this regent's son Alboin became the king who destroyed the Gepidae and invaded Italy.

Notes for Teodorico I rey de Reims:
Theodoric I (d. 533 or 534), Merovingian king of Reims from 511. Theodoric was the eldest son of Clovis I, but born of an unknown woman, unlike the other sons, whose mother was Clotilda. An able soldier, he played an important part in his father's campaigns against the Visigoths. On Clovis' death in 511 a fourfold division of his kingdom took place, each of his sons receiving some territories north of the Loire River and some to its south. No doubt as the most experienced of the four, Theodoric received those northern lands (the future Austrasia) most exposed to attack; their axis was the Rhine. In the 520s Theodoric gained a share of his brother Clodomir's kingdom when the dead king's sons were murdered by Theodoric's two other half-brothers, Childebert and Chlotar. Theodoric campaigned with Clodomir against the Burgundians in 524 and with Chlotar against the Visigoths in 532. His greatest success lay in the subjection of the Thuringians, achieved with the help of Chlotar c. 531. It was perhaps now that the Saxons were temporarily also reduced to dependence. As violent and unscrupulous as most of the other Merovingian rulers, Theodoric was arguably the most vigorous and effective of Clovis' sons. He was succeeded by his son, Theodebert I.

Notes for Clovis I Merovingian King:
Clovis I (b. c. 466--d. Nov. 27, 511, Paris), Merovingian founder of the Frankish kingdom that dominated much of western Europe in the early Middle Ages.

Clovis was the son, and probably the only son, of Childeric I, king of the Salian Franks of Tournai. To judge from the remains of Childeric's burial at Tournai, he seems to have been a federate chieftain of some standing and certainly a pagan. Under the same pagan gods, his son Clovis, who succeeded him in 481, advanced south to conquer northern Gaul. There survives a letter to him written by Bishop Remigius (Rémi) of Reims, congratulating him on taking over the administration of Belgica Secunda and advising him to listen to the bishops. At Soissons, in 486, Clovis defeated Syagrius, the last Roman ruler in Gaul. This opened to him the whole area of the Somme and the Seine and in particular brought him the extensive properties of the Roman treasury in that area. Clovis appears to have met with some resistance from the cities, and Franks not of his following seem to have been slow in coming to his aid. But he established his power at least as far south as Paris between the years 487 and 494. The Armoricans of western Gaul and the Germanic peoples of the Rhineland offered more serious opposition; and at the Loire he made contact with the Visigoths, protégés of Theodoric, the formidable ruler of Ostrogothic Italy.

Of the history of these early years, virtually nothing is known that is not recorded by Bishop Gregory of Tours, who wrote toward the end of the 6th century. Gregory's aim was to depict a heroic pagan warrior who owed his success to conversion to the true faith of Christianity. The outlines of his story are acceptable as historical fact, being based partly on the epic traditions of the Merovingian family itself and partly on annalistic records kept by the Christian church. (The name Merovingian derives from Merovich, a close relative of Childeric.)

The king whom Gregory portrays is primarily a warrior--bold, subtle, and unscrupulous in dealing with possible rivals among the Frankish chieftains of the northeast. A famous story told of him by Gregory best illustrates his qualities. A splendid vase was seized by Clovis' followers from a church (perhaps Reims), and the bishop begged for its return. At the next division of booty, which took place at Soissons, the king asked for the vase in addition to his agreed share of booty. One Frank objected and smashed the vase with his axe. The king restored it, broken as it was, to the bishop and said nothing. But a year later, at a military assembly, he recognized the offending warrior and took occasion to rebuke him for his ill-kept weapons, flinging his axe to the ground. As the man bent to pick it up, the king split his skull with his own axe, remarking, "Thus you treated the vase at Soissons." Gregory entirely approved: the church was avenged and so was the king; and the rest of Clovis' following was terrified.

But Clovis was also pious and credulous, as befitted a warrior whose gods had brought him great success. Though master of a Roman province effectively controlled by dynasties of able Gallo-Roman bishops, he showed no disposition to seek conversion until after his marriage to a Catholic princess, the Burgundian Clotilda (later St. Clotilda), in about 493. Three years later he undertook a campaign against the Alamanni of the middle Rhine, and at Zülpich (Tolbiac) his forces faced defeat. Only at this point did he think of invoking the help of his wife's god; and defeat was turned to victory. Even then a period of some two years elapsed before the combined efforts of Clotilda and Bishop Remigius (later St. Remigius of Reims) persuaded him to seek baptism. This took place at Reims, after a visit to Tours and due consultation with his warriors, several of whom were baptized with him. The Frankish settlers of the countryside remained pagan, and their conversion was a slow and spasmodic business. Their grave-site goods were to betray a rustic paganism at least until the 7th century.

It was to Catholicism, not to Arianism, that Clovis had turned. This may have affected his abortive intervention in the political affairs of Burgundy shortly afterward, for the Burgundians were mostly Arians. Some Burgundian detachments followed him on his subsequent campaigns, but he cannot be said to have conquered Burgundy or annexed it to Francia. A letter to him from Avitus, bishop of Burgundian Vienne, fully recognizes the risk to his barbarian charisma that the king ran in denying the pagan gods of his ancestors. In place of pagan fortuna, the bishop urges, the king has acquired Christian sanctitas, which will equally see him to victory.

In 506 Clovis was still active in the Rhineland against both the Alamanni and the Thuringians. In 507 he finally turned against the powerful Visigoths of Gaul south of the Loire. But first he sought the patronage of St. Martin of Tours, greatest of the Gallo-Roman saints. His subsequent victory over the Arian Visigoths at Vouillé, near Poitiers, was attributed by him to that patronage. His family had acquired a spiritual patron revered by all his Gallo-Roman subjects. Though he
penetrated as far south as Bordeaux and sent his son to capture the Visigoth capital of Toulouse, he did not expel the Goths from Septimania or turn southern Gaul into a settlement area for his people. He contented himself with returning to Tours, where he gave thanks to St. Martin for victory and received the insignia of an honorary consulate from the Eastern emperor, Anastasius. He abandoned the Gallo-Roman south to its own devices and established himself at Paris, a good forward post from which to control the Armoricans of the west, the Thuringians on
the Rhine, and the still-troublesome Franks of the north and east. In Paris he built a church dedicated to the Apostles (later Sainte-Genevicve).

Two revealing actions belong to the last year or so of Clovis' life. The first was the summoning of a church council at Orléans, attended by 32 bishops. Its canons, which survive, reveal the extent to which the king personally concerned himself with its deliberations. The second was the promulgation of Lex Salica, the law of the Salian Franks who accepted his authority. This constitutes 65 clauses regulating the life of the countryside. Uninfluenced by Christianity, they

are a political manifesto rather than a precise legal statement of how the Franks ordered their lives. What they certainly reveal is the enhanced authority of the king and his willingness to make use of Gallo-Roman skills in ruling his own barbarians. Clovis died at the age of 45 and was buried in his Church of the Apostles. His Christian grave has never been found.

Making every allowance for Gregory of Tours's intention to represent him as a second Constantine, Clovis still stands out as a barbarian of heroic stature. Starting from small beginnings, he had been accepted as ruler by the Gallo-Romans; with imperial approval he had made the first serious attack on the Arian-Gothic confederation of western Europe; he had taken for his people the momentous decision that they were ultimately to be converted to Catholicism, not Arianism; and, perhaps most difficult of all, he had made one political people of the various Frankish tribes of modern Belgium and the Rhineland. Henceforward, Frankish power was to penetrate and colonize east of the Rhine. His family was secure in an unrivaled dominance that was to last until the 8th
century.

De sus orkgenes nada sabemos. Naturalmente, como en los demis pueblos birbaros, la ascendencia del monarca, persona sagrada, jefe y sacerdote a la vez, entroncaba con los dioses paganos, parentesco mkstico del que derivaba su posición. Pero con la conversión de Clodoveo en 506 se cortó la tradición y ello en forma expresa. Se Conserva el texto de la carta que San Avito escribio al rey franco con motivo de su bautismo, en la que senala: "De todo el pasado de tu antigua estirpe conserva snicamente tu nobleza de sangre; pero desde hoy todo lo demis que pueda aumentar el orgullo de linaje de tus descendientes ha de arrancar snicamente de ti mismo, porque en este mundo imperas como tus mayores, pero para tus descendientes eres ts, en adelante, la norma en el reino de Dios y su derecho y autoridad divinos han de estar en la fe católica de su antecesor Clodoveo".

Notes for Childeric I king of the Salian Franks:
Childeric I (d. 481/482), king of the Salian Franks, one of the first of the Merovingians and the father of Clovis I.

The Salian Franks, in treaty with the Roman Empire, had settled in Belgica Secunda, between the Meuse and Somme rivers, making their capital at Tournai. Childeric's role as a barbarian ally of the Romans was important. He helped the Roman military commander Aegidius to repel the Visigoths near Orléans (463); at the request of Aegidius' successor, Count Paulus, he attacked the Visigoths again in 469. Soon afterward he cleared Anglo-Saxon pirates from the district southwest of Orléans around Angers. Childeric's tomb at Tournai was discovered in 1653.

The nephew of the barbarian emperor-maker Ricimer, Gundobad briefly held the supreme military command in the Roman service. In 473 he emulated his uncle when he himself placed a puppet, Glycerius, on the throne of Ravenna, but the subsequent deposition of Glycerius by Julius Nepos, the appointee of the eastern emperor, sent Gundobad fleeing back to his Burgundians.
After becoming joint ruler (with his brothers) of the Burgundians, he murdered his brother Chilperic; the latter's daughter, Clotilda, later (c. 493) married the Frankish king Clovis. In 500 Gundobad fought off a Frankish attack and killed another brother, Godegisel, who had brought it about.

Though formally an Arian, Gundobad was in fact a secret Catholic sympathizer and enjoyed good relations with the orthodox clergy, as with the Romans in general over whom he ruled. The most important act of Gundobad's reign in Burgundy was his promulgation, early in the 6th century, of two codes of law, the Lex Gundobada, applying to all his subjects, and, somewhat later, the Lex Romana Burgundionum, applying to his Roman subjects.

His father Gundioc, king of Burgundy, was related to the Visigothic kings and shared their Arian Christian faith. At Gundioc's death his kingdom was divided between his four sons, Gundobad, Godegesil, Chilperic, and Gundomar.

Notes for Merovee, King Of France:
Merovech, also spelled MEROVICH, MEROVEUS, MERWICH, or MEROWIG, French MÉROVÉE, German MEROWECH (fl. c. AD 450), king of the Salian Franks, from whom Frankish tradition held the Merovingian dynasty to have taken its name. He was the father of Childeric I (d. 481/482) and grandfather of Clovis I (c. 466-511).

Nothing definite is known of Merovech's life. He is mentioned in Gregory of Tours's History of the Franks and, according to later sources, fought against Attila the Hun at the Battle of the Catalaunian Plains (451).

MEROVINGIAN DYNASTY,

Frankish dynasty (AD 476-750) traditionally reckoned as the "first race" of the kings of France.

A brief treatment of the Merovingians follows. For full treatment, see France: Merovingian andCarolingian age.

The name Merovingian derives from that of Merovech, of whom nothing is known except that he was the father of Childeric I, who ruled a tribe of Salian Franks from his capital at Tournai. Childeric was succeeded by his son Clovis I in 481 or 482. Clovis I extended his rule over all the Salian Franks, conquered or annexed the territories of the Ripuarian Franks and the Alemanni, and united nearly all of Gaul except for Burgundy and what is now Provence. Of equal importance, he was converted to Christianity in either 496 or 506. At Clovis I's death in 511, his realm was divided among his four sons, Theuderic I, Chlodomer, Childebert I, and Chlotar I. Despite the frequently bloody competition among the brothers, they managed among them to extend Frankish rule over Thuringia in approximately 531 and Burgundy in 534 and to gain sway over, if not possession of, Septimania on the Mediterranean coast, Bavaria, and the lands of the Saxons to the north. By 558 Chlotar I was the last suriviving son of Clovis I, and until his death in 561 the Frankish realm was once again united.

In 561 the realm was again divided among the brothers Charibert I, Guntram, Sigebert, and Chilperic I, and again family strife and intrigue ensued, particularly between Chilperic and his wife Fredegund in the northwest of Gaul and Sigebert and his wife Brunhilda in the northeast. Dynastic struggles and increasing pressures exerted on the realm by neighbouring peoples--Bretons and Gascons in the west, Lombards in the southeast, Avars in the east--prompted a

reorganization of the Frankish kingdoms. Several eastern regions were merged into the kingdom of Austrasia, with its capital at Metz; in the west Neustria emerged, with its capital first at Soissons and later at Paris; to the south was the enlarged kingdom of Burgundy, with its capital at Chalon-sur-Saone. Overall Frankish unity was again achieved in 613, when Chlotar II, son of Chilperic I and king of Neustria, inherited the other two kingdoms as well. On the death of Chlotar's son Dagobert in 639 the realm was divided yet again, but by that time the kings of the two regions, Neustria and Burgundy on the one hand and Austrasia on the other, had been forced to yield much of their power to household
officials known as mayors of the palace. The later Merovingian kings were little more than puppets and were enthroned and deposed at will by powerful mayors of the palace. The last Merovingian, Childeric III, was deposed in 750 by Pepin III the Short, one of a line of Austrasian mayors of the palace who finally usurped the throne itself to establish the Carolingian dynasty.

Notes for Clodion "The Long Haired" King Of Westphalia:
Chlodio, also spelled CLODION, French CHLODION (d. c. 447), king of a tribe of Salian Franks, considered the founder of the Merovingian dynasty. Chlodio's tribe renounced the suzerainty of Rome after 428 and broke across the Scheldt River, spreading southward into Gaul until they reached Tournai and Cambrai. Their defeat (c. 431) by the Roman general Aetius at Helena (Hélesme), between Tournai and Cambrai, prevented further expansion. Chlodio did occupy all the country as far as the Somme River, however, and he made Tournai the capital of the Salian Franks. His successor was Merovech.

Notes for King Of the Franks Farabert:
Westphalia, German WESTFALEN, historic region of northwestern Germany, comprising (with the former state of Lippe) the present federal Land (state) of North Rhine-Westphalia and parts of the Länder (states) of Lower Saxony and Hesse.

The ancient Saxons were divided into three main groups: the Westphalians, the Angrians (German: Engern), and the Eastphalians (Ostfalen). The

Westphalians, who had settled in the area of the Ems and Hunte rivers about AD 700, spread south almost as far as Cologne and in 775 resisted the advance of the Franks under Charlemagne. For about three centuries, this region retained its separate identity in spite of the rise of the more powerful aggregated Saxon stem duchy. In the 12th century the old distinction between Westphalians and Angrians fell into disuse, and all Saxony west of the Weser River came to be called Westphalia.

---

Saxon, member of a Germanic people who in ancient times lived in the area of modern Schleswig and along the Baltic coast. The period of Roman decline in the West was marked by vigorous Saxon piracy in the North Sea. During the early part of the 5th century AD, the Saxons spread rapidly through north Germany and along the coasts of Gaul and Britain. The coastal stretch from the Elbe to the Scheldt rivers, however, was held by the Frisians, on whom the Saxons had great influence.

The expansion of the Saxons brought collision with the Franks. In 772 the Frankish ruler Charlemagne decided on a campaign of conquest and conversion of the Saxons. With interruptions, the Saxon wars lasted 32 years and ended with the incorporation of the Saxons into the Frankish empire.

The Venerable Bede (in Historia ecclesiastica) described the Germanic invaders of Britain as Angles, Saxons, and Jutes and said that the East, West, and South Saxons (of Essex, Wessex, and Sussex) were descended from the Saxons. However, Bede was not always careful to distinguish Angles and Saxons; and, furthermore, all the invaders of Britain were closely related and spoke dialects similar to each other and to the Frisian language. The dialects of the continental
Saxons, on the other hand, underwent considerable approximation to High German, and their affinity to those of the English and the Frisians is only to be traced in sporadic spellings in texts now extant, of which none is older than the 9th century. When Procopius (Gothic Wars, c. 550) alleged that the inhabitants of Britain were Britons, Angles, and Frisians, he was no doubt confusing Frisians and Saxons, owing to their close relationship and to the extensive Saxon
settlements among the Frisians.

Notes for Prasutagus, Druid King Of Icenians:

ROMAN BRITAIN

The conquest.

Julius Caesar conquered Gaul between 58 and 50 BC and invaded Britain in 55 or 54 BC, thereby bringing the island into close contact with the Roman world. Caesar's description of Britain at the time of his invasions is the first coherent account extant. From about 20 BC it is possible to distinguish two principal powers: the Catuvellauni north of the Thames led by Tasciovanus, successor of Caesar's adversary Cassivellaunus, and, south of the river, the kingdom of the Atrebates ruled by Commius and his sons Tincommius, Eppillus, and Verica. Tasciovanus was succeeded in about AD 5 by his son Cunobelinus, who, during a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Beyond these kingdoms lay the Iceni in what is now Norfolk, the Corieltavi in the Midlands, the Dobuni (Dobunni) in the area of Gloucestershire, and the Durotriges in that of Dorset, all of whom issued coins and probably had Belgic rulers. Behind these again lay further independent tribes--the Dumnonii of Devon, the Brigantes in the north, and the Silures and

Ordovices in Wales. The Belgic and semi-Belgic tribes later formed the civilized nucleus of the Roman province and thus contributed greatly to Roman Britain.

The client relationships that Caesar had established with certain British tribes were extended by Augustus. In particular, the Atrebatic kings welcomed Roman aid in their resistance to Catuvellaunian expansion. The decision of the emperor Claudius to conquer the island was the result partly of his personal ambition, partly of British aggression. Verica had been driven from his kingdom and appealed for help, and it may have been calculated that a hostile Catuvellaunian supremacy would endanger stability across the Channel. Under Aulus Plautius an army of four legions was assembled, together with a number of auxiliary regiments consisting of cavalry and infantry raised among warlike tribes subject to the empire. After delay caused by the troops' unwillingness to cross the ocean, which they then regarded as the boundary of the human world, a landing was made at Richborough, Kent, in AD 43. The British under Togodumnus and Caratacus, sons and successors of Cunobelinus, were taken by surprise and defeated. They retired to defend the Medway crossing near Rochester but were again defeated in a hard battle. The way to Camulodunum lay open, but Plautius halted at the Thames to await the arrival of the emperor, who took personal command of the closing stages of the campaign. In one short season the main military opposition had been crushed: Togodumnus was dead and Caratacus had fled to Wales. The rest of Britain was by no means united, for Belgic expansion had created tensions. Some tribes submitted, and subduing the rest remained the task for the year 44. For this purpose smaller expeditionary forces were formed consisting of single legions or parts of legions with their auxilia (subsidiary allied troops). The best-documented campaign is that of Legion II under its legate Vespasian starting from Chichester, where the Atrebatic kingdom was restored; the Isle of Wight was taken and the hill forts of Dorset reduced. Legion IX advanced into Lincolnshire, and Legion XIV probably across the Midlands toward Leicester. Colchester was the chief base, but the fortresses of individual legions at this stage have not yet been identified.

By the year 47, when Plautius was succeeded as commanding officer by Ostorius Scapula, a frontier had been established from Exeter to the Humber, based on the road known as the Fosse Way; from this fact it appears that Claudius did not plan the annexation of the whole island but only of the arable southeast. The intransigence of the tribes of Wales, spurred on by Caratacus, however, caused Scapula to occupy the lowlands beyond the Fosse Way up to the River Severn and to move forward his forces into this area for the struggle with the Silures and Ordovices. The Roman forces were strengthened by the addition of Legion XX, released for this purpose by the foundation of a veteran settlement (colonia) at Camulodunum in the year 49. The colonia would form a strategic reserve as well as setting the Britons an example of Roman urban organization and life. A provincial centre for the worship of the emperor was also established. Scapula's right flank was secured by the treaty relationship that had been established with Cartimandua, queen of the Brigantes. Hers was the largest kingdom in Britain, occupying the whole area between Derbyshire and the Tyne; unfortunately it lacked stability, nor

was it united behind its queen, who lost popularity when she surrendered the British resistance leader, Caratacus, to the Romans. Nevertheless, with occasional Roman military support, Cartimandua was maintained in power until 69 against the opposition led by her husband, Venutius, and this enabled Roman governors to concentrate on Wales.

By AD 60 much had been achieved; Suetonius Paulinus, governor from 59 to 61, was invading the island of Anglesey, the last stronghold of independence, when a serious setback occurred: this was the rebellion of Boudicca, queen of the Iceni. Under its king PRASUTAGUS the tribe of the Iceni had enjoyed a position of alliance and independence; but on his death (60) the territory was forcibly annexed and outrages occurred. Boudicca was able to rally other tribes to her assistance; chief of these were the Trinovantes of Essex, who had many grievances against the settlers of Camulodunum for their arrogant seizure of lands. Roman forces were distant and scattered; and, before peace could be restored, the rebels had sacked Camulodunum, Verulamium (St. Albans), and London, the three chief centres of Romanized life in Britain. Paulinus acted harshly after his victory, but the procurator of the province, Julius Classicianus, with the revenues in mind and perhaps also because, as a Gaul by birth, he possessed a truer vision of provincial partnership with Rome, brought about his recall.

In the first 20 years of occupation some progress had been made in spreading Roman civilization. Towns had been founded, the imperial cult had been established, and merchants were busily introducing the Britons to material benefits. It was not, however, until the Flavian period, AD 69-96, that real advances were made in this field. With the occupation of Wales by Julius Frontinus (governor from 74 to 78) and the advance into northern Scotland by Gnaeus Julius Agricola (78-84), troops were removed from southern Britain, and self-governing civitates, administrative areas based for the most part on the indigenous tribes, took over local administration. This involved a large program of urbanization and also of education, which continued into the 2nd century; Tacitus, in his biography of Agricola, emphasizes the encouragement given to it. Roman conquest of Wales was complete by 78, but Agricola's invasion of Scotland failed because shortage of manpower prevented him from completing the occupation of the whole island. Moreover, when the British garrison was reduced (c. AD 90) by a legion because of continental needs, it became evident that a frontier would have to be maintained in the north. After several experiments, the Solway-Tyne isthmus was chosen, and there the emperor
Hadrian built his stone wall (c. 122-130).

BRITANICA

Iceni, in ancient Britain, a tribe that occupied the territory of modern Norfolk and Suffolk and, under its queen Boudicca (Boadicea), revolted against Roman rule.

Having controlled the Iceni through a client-king, PRASUTAGUS, the Romans attempted to annex his territory after his death (AD 60), thus provoking his queen to lead a revolt of all East Anglia. After several initial successes by the

Britons, the Romans ultimately defeated them and regained the province. They severely punished the Iceni, who eventually became a small tribal community with a capital at Venta Icenorum (modern Caister St. Edmund in Norfolk).

Notes for Boadicea Victoria, Queen Of Britain:
Boudicca, also spelled BOADICEA (d. AD 60), ancient British queen who in AD 60 led a revolt against Roman rule.

Boudicca's husband, Prasutagus, was king of the Iceni (in what is now Norfolk) as a client under Roman suzerainty. When Prasutagus died in 60 with no male heir, he left his private wealth to his two daughters and to the emperor Nero, trusting thereby to win imperial protection for his family. Instead, the Romans annexed his kingdom, humiliated his family, and plundered the chief tribesmen. While the provincial governor Suetonius Paulinus was absent in 60, Boudicca raised a rebellion throughout East Anglia. The insurgents burned Camulodunum (Colchester), Verulamium, the mart of Londinium (London), and several military posts; massacred (according to Tacitus) 70,000 Romans and pro-Roman Britons; and cut to pieces the Roman 9th Legion. Paulinus met the Britons at a point thought to be near present-day Fenny Stratford on Watling Street and in a desperate battle regained the province. Boudicca took poison or died of shock.

Notes for Cunobelinus, King Of Britain:
Cunobelinus (d. c. AD 42), ruler of a large area of southeastern Britain from about AD 10 to 42. He is the Cymbeline in William Shakespeare's play of the same name, although the play's fanciful plot bears no relation to the events in Cunobelinus' career.

Cunobelinus succeeded his father, Tasciovanus, as chief of the Catuvellauni, a tribe centred north of what is now London. During a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Either shortly before or shortly after his accession, Cunobelinus conquered the territory of the Trinovantes, in modern Essex. He made Camulodunum (Colchester) his capital and the seat of his mint. His power and influence were so extensively felt in Britain that the Roman biographer Suetonius referred to him as "Britannorum rex." About AD 40 Cunobelinus banished his son Adminius, who thereupon fled to Rome and persuaded the emperor Caligula to make preparations to invade Britain. The expedition was assembled, but it never left the continent. After Cunobelinus' death, his two other sons, Caratacus and Togodumnus, displayed the hostility toward Rome that gave the emperor Claudius an excuse to impose Roman rule on the island.

BRITANICA

Cymbeline.

The main theme of Cymbeline--Posthumus' wager on the chastity of his wife, Imogen--Shakespeare derived from a story in Boccaccio's Decameron. But he put this Italianate intrigue into a setting that, for his audience, was authentic. Cymbeline, king of Britain, and his two sons, Guiderius and Arviragus, who succeeded him, were, for Shakespeare's audience, historical monarchs. The play is carefully set in the pre-Christian Roman world. The Romans who invade Britain are recognizably derived from the same kind of exploration of the antique world that had produced Julius Caesar, Antony and Cleopatra, and Coriolanus.

Notes for Claudius, Roman Emperor:
Claudius, in full TIBERIUS CLAUDIUS CAESAR AUGUSTUS GERMANICUS, original name (until AD 41) TIBERIUS CLAUDIUS NERO GERMANICUS (b. Aug. 1, 10 BC, Lugdunum [Lyon], Gaul--d. Oct. 13, AD 54), Roman emperor (AD 41-54), who extended Roman rule in North Africa and made Britain a province.

Early life.

The son of Nero Claudius Drusus, a popular and successful Roman general, and the younger Antonia, he was the nephew of the emperor Tiberius and a grandson of Livia Drusilla, the wife of the emperor Augustus. Ill health, unattractive appearance, clumsiness of manner, and coarseness of taste did not recommend him for a public life. The imperial family seems to have considered him
something of an embarrassment, and he was long left to his own private studies and amusements. It was the historian Livy who recognized and encouraged his inclination for historical studies. Claudius wrote a pamphlet defending the republican politician and orator Cicero, who was executed by the triumvirs; and,

having discovered that it was difficult to speak freely on the civil wars toward the end of the Roman Republic, he began a history of Rome with the principate of Augustus. He composed 20 books of Etruscan and 8 books of Carthaginian history, all in Greek; an autobiography; and a historical treatise on the Roman alphabet with suggestions for orthographical reform--which as emperor he later tried not very successfully to implement. He also wrote on dice playing, of which he was fond. All his works are lost, and their importance cannot be measured. The Etruscan history may have had original material: his first wife, Plautia Urgulanilla, had Etruscan blood, and her family was probably able to put Claudius in touch with authentic Etruscan traditions. After divorcing Urgulanilla, he in turn married Aelia Paetina, Valeria Messalina, who was his wife at his accession, and, finally, Agrippina the Younger. By his first three wives he had five children, of whom Drusus and Claudia died before he became emperor. As a young man Claudius was made a member of various religious colleges, but he became consul only under the reign of his older brother's son Gaius (Caligula) in 37. There was, however, little cordiality between the two.

Emperor and colonizer

Power came to Claudius unexpectedly after Gaius' murder on Jan. 24, 41, when he was discovered trembling in the palace by a soldier. The Praetorian Guards, the imperial household troops, made him emperor on January 25. By family tradition and antiquarian inclinations, Claudius was in sympathy with the senatorial aristocracy; but soldiers and courtiers were his real supporters, while freedmen and foreigners had been his friends in the days of neglect. Initially, the attitude of the Senate was at best ambiguous. In 42 many senators supported the ill-fated rebellion of the Governor of Dalmatia. Even later, several attempts on Claudius' life involved senators and knights. Though paying homage to the dignity of the Senate (to whose administration he returned the provinces of Macedonia and Achaea) and giving new opportunities to the knights, Claudius was ruthless and occasionally cruel in his dealings with individual members of both orders. From the very beginning he emphasized his friendship with the army and paid cash for his proclamation as emperor.

Claudius' decision to invade Britain (43) and his personal appearance at the climax of the expedition, the crossing of the Thames and the capture of Camulodunum (Colchester), were prompted by his need of popularity and glory. But concern with the anti-Roman influence of the Druid priesthood, which he tried to suppress in Gaul, and a general inclination toward expanding the frontiers were other reasons. Claudius planted a colony of veterans at Camulodunum and established client-kingdoms to protect the frontiers of the province; these were afterward a source of trouble, such as the revolt in 47 of Prasutagus, client-king of the Iceni, and later the general revolt instigated by his wife Boudicca (also called Boadicea). He also annexed Mauretania (41-42) in North Africa, of which he made two provinces (Caesariensis in the east and Tingitana in the west), Lycia in Asia Minor (43), and Thrace (46). Though he enlarged the kingdom of Herod Agrippa I, he later made Judaea a province on Agrippa's death in 44.

In 49 he annexed Iturea (northeastern Palestine) to the province of Syria. He was careful not to involve the empire in major wars with the Germans and the Parthians. Claudius supported Roman control of Armenia, but in 52 he preferred the collapse of the pro-Roman government to a war with Parthia, leaving a difficult situation to his successor.

In the civil administration, many measures demonstrate Claudius' enlightened policy. He improved in detail the judicial system, and, in his dealings with the provinces, he favoured a moderate extension of Roman citizenship by individual and collective grants: in Noricum, a district south of the Danube comprising what is now central Austria and parts of Bavaria, for instance, five communities became Roman municipalities. He encouraged urbanization and planted several
colonies, for example, at Camulodunum and at Colonia Agrippinensis (modern Cologne) in Germany in 51. In his religious policy Claudius respected tradition; he revived old religious ceremonies, celebrated the festival of the Secular Games in 47 (three days and nights of games and sacrifice commemorating the 800th birthday of Rome), made himself a censor in 47, and extended in 49 the pomerium of Rome (i.e., the boundary of the area in which only Roman gods could be worshipped and magistrates ruled with civil, not military, powers). He protected the haruspices (diviners) and probably Romanized the cult of the Phrygian deity Attis. According to the biographer Suetonius in Claudius, during a period of troubles Claudius expelled the Jews from Rome for a short time; Christians may have been involved. Elsewhere he confirmed existing Jewish rights and privileges, and in Alexandria he tried to protect the Jews without provoking Egyptian nationalism. In a surviving letter addressed to the city of Alexandria, he asked Jews and non-Jews "to stop this destructive and obstinate mutual enmity." Although personally disinclined to accept divine honours, he did not seriously oppose the current trend and had a temple erected to himself in Camulodunum. His public works include the reorganization of the grain supply of Rome and construction of a new harbour at Ostia, which was later improved by the emperor Trajan.

Administrative innovations.

Claudius' general policy increased the control of the emperor over the treasury and the provincial administration and apparently gave jurisdiction in fiscal matters to his own governors in the senatorial provinces. He created a kind of cabinet of freedmen, on whom he bestowed honours, to superintend various branches of the administration. An impressive series of documents, such as a speech for the admission of Gauls to the Senate recorded on a partly defective inscription at Lugdunum (Lyon), the edict for the Anauni (an Alpine population who had usurped the rights of Roman citizenship and whom Claudius confirmed in these rights), and the aforementioned letter to the city of Alexandria (AD 41), survive as evidence of his personal style of government: pedantic, uninhibited, alternately humane and wrathful, and ultimately despotic. The inscription from Lugdunum is an interesting comparison with the version of the historian Tacitus in his Annals, which gives an account of the same speech. The speech as recorded in the inscription, in spite of irrelevance, inconsequence, and fondness for digression (much of which is absent in the version of Tacitus), shows that

Claudius knew what he wanted and that he appreciated the latent forces of Roman tradition.

His marriage with Messalina ended in 48, when she apparently conspired against him and, according to Tacitus, conducted a public marriage ceremony with her lover, Gaius Silius. Messalina and Silius were killed, and Claudius married his niece Agrippina, an act contrary to Roman law, which he therefore changed. To satisfy Agrippina's lust for power, Claudius had to adopt her son Lucius Domitius Ahenobarbus (later the emperor Nero), to the disadvantage of his own son Britannicus. In addition, the new commander of the guards, Afranius Burrus, was protected by Agrippina. Roman tradition is unanimous in stating that Claudius was poisoned by Agrippina on Oct. 13, AD 54, though the details differ. A version of poisoning by mushrooms prevailed. Lucius Annaeus Seneca, the politician and satirist, who had been exiled by Claudius at his accession but had been recalled at Agrippina's urging to educate Nero, derided the dead emperor and his apotheosis (duly decreed by the Senate) in the satire Apocolocyntosis divi Claudii ("The Pumpkinification of the Divine Claudius"; the title and its exact meaning are both subject to dispute).

The picture of Claudius that appears in this work has much in common with that of later Roman historians who give details of the unpopular side of Claudius' administration. The Apocolocyntosis ridicules his physical appearance and his speaking ability and casts aspersions on his abilities as a judge, depicting him as arbitrary--of giving legal judgments without a fair hearing and of summarily ordering the executions of relatives, senators, and knights.

Tacitus, Suetonius, and the later historian Dio Cassius attribute Claudius' mistakes to infirmity of character and the influence of his wives and freedmen. They echo the hostility of the upper classes against an emperor who, in spite of his words, had been unfavourable to them. That this tradition is one-sided is shown by the surviving documents of the reign and the energy with which Claudius carried out the affairs of government.

Notes for Deiotarus I, King Of Galatia (63-41 a.c.):
Deiotarus (d. 40 BC), tetrarch of the Tolistobogii (of western Galatia, now in western Turkey), later king of all Galatia, who, as a faithful ally of the Romans, became involved in the struggles between the Roman generals that led to the fall of the republic.

At the beginning of the Third Mithradatic War (74), Deiotarus drove the invading troops of Mithradates VI of Pontus from Phrygia. For this support, Pompey (Gnaeus Pompeius) rewarded him in 64 with the title of king and with part of eastern Pontus. In addition, the Senate granted him Lesser Armenia and most of Galatia.

Siding with Pompey and the Optimates against Julius Caesar in the Civil War (49-45), Deiotarus escaped with his ally to Asia after the defeat at Pharsalus in 48. The next year the king was pardoned by Caesar. As a consequence of the complaints of certain Galatian princes, however, Deiotarus was deprived of part of his dominions.

In 45, Deiotarus was accused at Rome of having attempted to murder Caesar when the dictator was his guest in Galatia. Cicero undertook Deiotarus' defense, but the assassination of Caesar in 44 prevented a verdict. Then Mark Antony, bribed with a large sum of money, announced that Caesar had left instructions that specified Deiotarus was to resume rule of his former possessions. Nevertheless, Deiotarus continued to support the anti-Caesarian party until its defeat at Philippi (42), when he went over to the triumvirs. He remained in possession of his kingdom until his death.

Galatia, ancient district in central Anatolia that was occupied early in the 3rd century BC by Celtic tribes, whose bands of marauders created havoc among neighbouring Hellenistic states. Invited from Europe to participate in a Bithynian civil war (278 BC), the Gallic horde plagued western Anatolia until checked by the Seleucid king Antiochus I at the so-called Elephant Battle (275 BC). At that point the Celts, called Galatae (Galatians) by 3rd-century writers, settled in the territory to which they gave their name. The Galatians, having joined the Seleucids against Rome (winter 190-189 BC), brought upon themselves a Roman punitive expedition (189 BC) from which they never recovered. Passing successively under the rule of Pergamum and Pontus, Galatia became a Roman protectorate (85 BC) ruled by puppet kings. Though originally possessing a strong cultural identity, the Galatians by the 2nd century AD had become absorbed into the Hellenistic civilization of Anatolia.

Notes for Tasciovanus, King Of Britain:
Tasciovanus, chief of the Catuvellauni, a tribe centred north of what is now London.

Catuvellauni, probably the most powerful Belgic tribe in ancient Britain; it occupied the area directly north of the River Thames. The first capital of the Catuvellauni was located near Wheathampstead, but after their defeat by Julius Caesar in 54 BC, they expanded to the north and northwest, building anew capital at Verulamium, near St. Albans. The Catuvellauni practiced agriculture extensively and apparently had a prosperous economy.

ROMAN BRITAIN

The conquest.

Julius Caesar conquered Gaul between 58 and 50 BC and invaded Britain in 55 or 54 BC, thereby bringing the island into close contact with the Roman world. Caesar's description of Britain at the time of his invasions is the first coherent account extant. From about 20 BC it is possible to distinguish two principal powers: the Catuvellauni north of the Thames led by Tasciovanus, successor of Caesar's adversary Cassivellaunus, and, south of the river, the kingdom of the Atrebates ruled by Commius and his sons Tincommius, Eppillus, and Verica.

Tasciovanus was succeeded in about AD 5 by his son Cunobelinus, who, during a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Beyond these kingdoms lay the Iceni in what is now Norfolk, the Corieltavi in the Midlands, the Dobuni (Dobunni) in the area of Gloucestershire, and the Durotriges in that of Dorset, all of whom issued coins and probably had Belgic rulers. Behind these again lay further independent tribes--the Dumnonii of Devon, the Brigantes in the north, and the Silures and Ordovices in Wales. The Belgic and semi-Belgic tribes later formed the civilized nucleus of the Roman province and thus contributed greatly to Roman Britain.

The client relationships that Caesar had established with certain British tribes were extended by Augustus. In particular, the Atrebatic kings welcomed Roman aid in their resistance to Catuvellaunian expansion. The decision of the emperor Claudius to conquer the island was the result partly of his personal ambition, partly of British aggression. Verica had been driven from his kingdom and appealed for help, and it may have been calculated that a hostile Catuvellaunian supremacy would endanger stability across the Channel. Under Aulus Plautius an army of four legions was assembled, together with a number of auxiliary regiments consisting of cavalry and infantry raised among warlike tribes subject to the empire. After delay caused by the troops' unwillingness to cross the ocean, which they then regarded as the boundary of the human world, a landing was made at Richborough, Kent, in AD 43. The British under Togodumnus and Caratacus, sons and successors of Cunobelinus, were taken by surprise and defeated. They retired to defend the Medway crossing near Rochester but were again defeated in a hard battle. The way to Camulodunum lay open, but Plautius halted at the Thames to await the arrival of the emperor, who took personal command of the closing stages of the campaign. In one short season the main military opposition had been crushed: Togodumnus was dead and Caratacus had fled to Wales. The rest of Britain was by no means united, for Belgic expansion had created tensions. Some tribes submitted, and subduing the rest remained the task for the year 44. For this purpose smaller expeditionary forces were formed consisting of single legions or parts of legions with their auxilia (subsidiary allied troops). The best-documented campaign is that of Legion II under its legate Vespasian starting from Chichester, where the Atrebatic kingdom was restored; the Isle of Wight was taken and the hill forts of Dorset reduced. Legion IX advanced into Lincolnshire, and Legion XIV probably across the Midlands toward Leicester. Colchester was the chief base, but the fortresses of individual legions at this stage have not yet been identified.

By the year 47, when Plautius was succeeded as commanding officer by Ostorius Scapula, a frontier had been established from Exeter to the Humber, based on the road known as the Fosse Way; from this fact it appears that Claudius did not plan the annexation of the whole island but only of the arable southeast. The intransigence of the tribes of Wales, spurred on by Caratacus, however, caused Scapula to occupy the lowlands beyond the Fosse Way up to the River Severn and to move forward his forces into this area for the struggle with the Silures and Ordovices. The Roman forces were strengthened by the addition of Legion XX, released for this purpose by the foundation of a veteran settlement (colonia) at Camulodunum in the year 49. The colonia would form a strategic reserve as well as setting the Britons an example of Roman urban organization and life. A provincial centre for the worship of the emperor was also established. Scapula's right flank was secured by the treaty relationship that had been established with Cartimandua, queen of the Brigantes. Hers was the largest kingdom in Britain, occupying the whole area between Derbyshire and the Tyne; unfortunately it lacked stability, nor was it united behind its queen, who lost popularity when she surrendered the British resistance leader, Caratacus, to the Romans. Nevertheless, with occasional Roman military support, Cartimandua was maintained in power until 69 against the opposition led by her husband, Venutius, and this enabled Roman governors to concentrate on Wales.

By AD 60 much had been achieved; Suetonius Paulinus, governor from 59 to 61, was invading the island of Anglesey, the last stronghold of independence, when a serious setback occurred: this was the rebellion of Boudicca, queen of the Iceni. Under its king Prasutagus the tribe of the Iceni had enjoyed a position of alliance and independence; but on his death (60) the territory was forcibly annexed and outrages occurred. Boudicca was able to rally other tribes to her assistance; chief of these were the Trinovantes of Essex, who had many grievances against the settlers of Camulodunum for their arrogant seizure of lands. Roman forces were distant and scattered; and, before peace could be restored, the rebels had sacked Camulodunum, Verulamium (St. Albans), and London, the three chief centres of Romanized life in Britain. Paulinus acted harshly after his victory, but the procurator of the province, Julius Classicianus, with the revenues in mind and perhaps also because, as a Gaul by birth, he possessed a truer vision of provincial partnership with Rome, brought about his recall.

In the first 20 years of occupation some progress had been made in spreading Roman civilization. Towns had been founded, the imperial cult had been established, and merchants were busily introducing the Britons to material benefits. It was not, however, until the Flavian period, AD 69-96, that real advances were made in this field. With the occupation of Wales by Julius Frontinus (governor from 74 to 78) and the advance into northern Scotland by Gnaeus Julius Agricola (78-84), troops were removed from southern Britain, and self-governing civitates, administrative areas based for the most part on the indigenous tribes, took over local administration. This involved a large program of urbanization and also of education, which continued into the 2nd century; Tacitus, in his biography of Agricola, emphasizes the encouragement given to it. Roman conquest of Wales was complete by 78, but Agricola's invasion of

Scotland failed because shortage of manpower prevented him from completing the occupation of the whole island. Moreover, when the British garrison was reduced (c. AD 90) by a legion because of continental needs, it became evident that a frontier would have to be maintained in the north. After several experiments, the Solway-Tyne isthmus was chosen, and there the emperor Hadrian built his stone wall (c. 122-130).

Notes for Caligula, Roman Emperor:
Calígula, Cayo Julio César (12-41d.C.), emperador romano (37-41d.C.), famoso por su crueldad y por su extravagancia. Nacido en Antium (ahora Anzio, en Italia), era el hijo más joven del general romano Julio César Germánico y de Agripina la Mayor, y nieto por adopción del emperador Tiberio. Su juventud en los campamentos militares le hicieron merecedor del sobrenombre de Calígula (en latín, diminutivo del calzado militar romano), debido a los pequeños zapatos militares que usaba. Tiberio le nombró, junto con su nieto, Tiberio Gemelo, coheredero al trono, pero el Senado romano y el pueblo optaron por Calígula como único emperador. Adoptó a Gemelo como hijo, pero más tarde ordenó su asesinato. Fue un dirigente clemente durante los seis primeros meses, pero se convirtió en un tirano depravado después de una enfermedad mental. Derrochó su fortuna (conseguida, en parte, por las confiscaciones de miembros del Senado) en espectáculos públicos y proyectos de construcción de edificios, desterró o asesinó a la mayoría de sus familiares, nombró a su caballo cónsul, se proclamó dios construyendo templos y realizando sacrificios en su honor. En el 41, los oficiales de su guardia conspiraron contra él y le asesinaron, nombrando como sucesor a su tío Claudio.

**288230376822800448. Cassivellaunus, King Of Britain,** born in Aprox 80 AC.

Notes for Cassivellaunus, King Of Britain:
Cassivellaunus, also spelled CASSIVELAUNUS (fl. 1st century BC), powerful British chieftain who was defeated by Julius Caesar during his second raiding expedition into Britain (54 BC).

Cassivellaunus led his tribe, the Catuvellauni (a Belgic people who lived in modern Hertfordshire), against the Roman invaders, making effective use of guerrilla tactics and chariot warfare. Finally Caesar captured the principal fortified settlement, since identified as a site in present-day Wheathampstead, Hertfordshire. The British leader was granted peace when he agreed to provide hostages and pay an annual tribute to Rome. These promises, however, were probably not meant to be kept, and it appears certain that the tribute was never paid.

She was the daughter of **576460753645600914. Marcus Livius Drusus Claudianus**.

Notes for Livia Drusilla:
Livia Drusilla, also called (from AD 14) JULIA AUGUSTA (b. Jan. 30, 58 BC--d. AD 29), Caesar Augustus' devoted and influential wife who counselled him on affairs of state and who, in her efforts to secure the imperial succession for her son Tiberius, was reputed to have caused the deaths of many of his rivals.

Her father was Marcus Livius Drusus Claudianus, an adoptive son of the tribune of 91, Marcus Livius Drusus. She married her cousin Tiberius Claudius Nero and in 42 bore him Tiberius. Livia Drusilla, may have been only 13 years old when Tiberius was born. She was still pregnant with her second son, Nero Claudius Drusus, when early in 38, Octavian (later Augustus) compelled her to divorce Nero and marry him. Her second marriage was childless. After the death of Augustus (Aug. 19, AD 14) she assumed the name Julia Augusta.

Livia's power and ambition proved embarrassing to Tiberius after his accession. He forbade her to accept certain honours and even refused to carry out the terms of her will. She was, however, deified (42) by her grandson Claudius. Surviving portraiture confirms her reputation for dignified beauty.

Notes for Tiberius, Emperor Of Rome:
Tiberio Julio César (42a.C.-37d.C.), segundo emperador de Roma (14-37d.C.), instituyó de forma permanente la magistratura que había ejercido su antecesor. Era el hijo mayor de Tiberio Claudio Nerón y de Livia Drusilla.
Nació en Roma el 16 de noviembre del 42a.C. Cuatro años después su madre se divorció y se casó con el triunviro Octavio, más tarde el emperador Augusto, quien supervisó la educación de Tiberio. Mandó una expedición a Armenia en el 20a.C., y luchó contra los retios y los panonios (12-9a.C.). En el 11a.C., siguiendo órdenes de su padrastro, disolvió su feliz matrimonio con Vipsania Agripina, hija del general romano Marco Vipsanio Agripa, y se casó con la hija de Augusto, Julia, viuda de Agripa. Desde el 6a.C., vivió en exilio virtual, en la isla de Rodas, donde se dedicó a estudiar.
Campañas militares
Cuando regresó a Roma en el 2d.C., Julia estaba desterrada por adulterio, y Augusto tras la muerte de sus dos nietos, Lucio y Cayo, se vio obligado a reconocer a Tiberio como único posible sucesor al título imperial y a adoptarle oficialmente en el 4d.C. Ese mismo año partió para dirigir una expedición en el norte de Germania contra los marcomanos. También tuvo éxito al sofocar los levantamientos de Panonia y Dalmacia, y finalmente afianzó la frontera y se vengó de los germanos, que habían destruido el ejército del general romano Varo, en los bosques de Teutoburgo, en el 9d.C. Acompañado de Julio César Germánico, su sobrino e hijo adoptivo, realizó otras dos marchas al corazón de Germania; regresó a Roma varios años más tarde para recibir los honores del triunfo, el tributo oficial más alto que se daba a un guerrero victorioso.
Su reinado
Cuando Augusto murió en Nola, cerca de Nápoles, en el 14d.C., Tiberio heredó el trono. Mejoró los servicios civiles, impuso al Ejército una disciplina estricta y dirigió las finanzas del Imperio con gran habilidad; también ejerció un mayor control sobre los gobernadores de las provincias. Sin embargo, estallaron sublevaciones y revueltas en Panonia, Germania, Galia, y otros territorios. La última época de su reinado estuvo marcada por las

conspiraciones y las ejecuciones. Durante su reinado se crucificó a Jesucristo.
En el 26d.C. abandonó Roma, a la que llegó a tener una gran aversión, y se retiró a la región de Campania. El año siguiente se fue a la isla de Capreae (la actual Capri), dejando Roma bajo el mando de Lucio Elio Sejano, el prefecto de la Guardia Pretoriana. Finalmente se dio cuenta de que Sejano intentaba hacerse con el poder imperial, por lo que mandó ejecutarle junto con sus partidarios en el 31. Continuó viviendo en Capri hasta el 37. Murió el 16 de marzo del 37, en Misena, cerca de Nápoles, tras lo cual se rumoreó que había sido asfixiado por el prefecto de la Guardia Pretoriana.

Notes for Marcus Vipsanius Agrippa:
Agrippa, Marcus Vipsanius (b. 63 BC?--d. March, 12 BC, Campania [Italy]), powerful deputy of Augustus, the first Roman emperor. He was chiefly responsible for the victory over Mark Antony at the Battle of Actium in 31 BC, and during Augustus' reign he suppressed rebellions, founded colonies, and administered various parts of the Roman Empire. Of modest birth but not a modest man, Agrippa was disliked by the Roman aristocracy. In his own interest he scrupulously maintained a subordinate role in relation to Augustus, but he felt himself inferior to no one else.

Virtually nothing is known of his early life until he is found as the companion of Octavian (the future emperor Augustus) at Apollonia, in Illyria, at the time of Julius Caesar's murder in 44. Octavian, the adopted son of Caesar, returned with Agrippa to Italy to make his political claim as Caesar's heir. In 43 Agrippa is thought to have held the office of tribune of the plebs; presumably in this capacity he prosecuted the tyrannicide Cassius, then absent in the East.

In the struggle for power after Julius Caesar's death, Agrippa served as one of Octavian's key military commanders. In 41-40 he fought against Mark Antony's brother Lucius. In 40 he held the post of praetor urbanus (magistrate mainly in charge of administration of justice at Rome) and was a major figure in negotiating a settlement between Octavian and Antony at Brundisium. During the next two years he was away on campaigns in Aquitania and on the Rhine River. When
he returned to Italy, he conspicuously refused to celebrate a triumph for his successes in the north, but in 37 he held the office of consul. In the spring of 37 Octavian and Antony came to an agreement at Tarentum, and it must have been then that Antony arranged the marriage of Agrippa to the daughter of Titus Atticus, a wealthy friend of Cicero.

Octavian's efforts to resist at sea the son of the republican general Gnaeus Pompey, Sextus Pompeius, had not met with success. Agrippa therefore took charge of the operations. He constructed a fine harbour at Puteoli in the Bay of Naples and then won, in 36, two decisive naval victories (at Mylae and Naulochus), ending the threat from Pompeius. For this achievement
Agrippa was awarded a golden crown. In 35-34 Octavian waged a vigorous campaign in Dalmatia, and in this Agrippa had a distinguished military role. In 33 Agrippa served as curule aedile (magistrate of public buildings and works) at Rome, even though it was a much lower post than the consulate that he had already held. He used the opportunity to win favour for Octavian by spending his own funds lavishly on building baths, cleaning sewers, and improving the water
supply. When Octavian and Antony finally came into direct conflict at the Battle of Actium in 31, Agrippa commanded the fleet and was primarily responsible for Octavian's victory.

During Octavian's absence from Rome after Actium, Agrippa managed affairs in the city together with Maecenas, the great patron of poets. In 29-28 Agrippa and Octavian jointly conducted a census and carried out a purge of the Senate; in 28 and 27 Agrippa held the consulate again, both times with Octavian (from 27, Augustus) as his colleague. In 23, a year of constitutional crisis, Augustus fell ill and presented his signet ring to Agrippa, who seemed thus to be designated the
emperor's successor. Agrippa took Augustus' daughter Julia as his wife after divorcing a niece of Augustus (Marcella the Elder), who had replaced Atticus' daughter as his wife some four or five years previously.

Agrippa went immediately to Mytilene on the island of Lesbos, from which he administered affairs in the East. The nature of Agrippa's constitutional power (imperium) at this time is controversial. It has been argued whether the Senate in 23 gave him an imperium greater than that of any other provincial governor in the East (imperium majus). After Augustus' death Roman historians claimed that Agrippa's sojourn at Mytilene was a kind of exile as a result of Augustus' preference for his own nephew Marcellus. This appears implausible. Agrippa was soon back in Rome to act on behalf of the emperor, who himself left for the East in 22. Before Augustus' return, in 19, Agrippa had left for Gaul and Spain. In Spain he finally subdued the recalcitrant Cantabrians.

Returning to Rome in 18, Agrippa received the power of a tribune (tribunicia potestas), which Augustus also possessed. Perhaps, too, he received an imperium majus, if he had not been granted it in 23. He participated in Augustus' celebration of the Secular Games at Rome in 17, after which he returned to the East as vicegerent of the emperor. In 15 he accepted an invitation from Herod I the Great to visit Judaea; while in the East, he established colonies of veterans
at Berytus and Heliopolis, in Lebanon. He next settled an uprising in the Bosporan kingdom on the Black Sea and set up the cultivated dynast Polemo as king. Herod led a fleet to support Agrippa in the Bosporan affair, and, when it was over, the two traveled together along the coast of western Asia Minor.

In 13 Agrippa's tribunicia potestas was renewed, and at this time without doubt he received (or had renewed) a grant of imperium majus. Troubles in Pannonia required his presence, but the rigours of the winter of 13-12 caused a fatal illness; he died in March of 12 BC. Augustus delivered a funeral oration in honour of his colleague; a fragment of that oration, in Greek translation, has recently come to light.

Agrippa deserved the honours Augustus heaped upon him. It is conceivable that without Agrippa, Octavian would never have become emperor. Rome remembered him for his generosity in attending to aqueducts, sewers, and baths; and in the mid-20s he completed the celebrated Pantheon. One of Agrippa's five children by Julia, Agrippina the Elder, was the mother of one emperor (Caligula) and the grandmother of another (Nero). Agrippa's autobiography is lost,
but an extensive geographical commentary that he wrote influenced the extant works of the geographer Strabo and of Pliny the Elder.

Notes for Attalus III, King Of Pergamum (138-133 a.c.):
[MARINOS HASTA PERSIA.FTW]

Attalus III PHILOMETOR EUERGETES ("Loving-his-mother Benefactor") (b. c. 170 BC--d. 133), king of Pergamum from 138 to 133 BC who, by bequeathing his domains to Rome, ended the history of Pergamum as an independent political entity. He was the son of Eumenes II (reigned 197-159) and nephew of Attalus II Philadelphus (reigned 159-138). Little is known of his reign. Attalus is said to have behaved tyrannically at first, but he evidently settled down to a quiet and studious life. His motives for bequeathing Pergamum to Rome are obscure. In 129 Rome organized the kingdom into the province of Asia.

Notes for Octavius Augustus 1st. Roman Emperor:
Introduction

Gaius Octavius, subsequently known as Gaius Julius Caesar Octavianus and still later as Augustus or Caesar Augustus, was the first Roman emperor, following the republic, which had been finally destroyed by the dictatorship of Julius Caesar, his great-uncle and adoptive father. His autocratic regime is known as the principate because he was the princeps, the first citizen, at the head of that array of outwardly revived republican institutions that alone made his autocracy palatable. With unlimited patience, skill, and efficiency, he overhauled every aspect of Roman life and brought durable peace and prosperity to the Greco-Roman world.

Gaius Octavius was born on September 23, 63 BC, of a prosperous family that had long been settled at Velitrae (Velletri), southeast of Rome. His father, who died in 59 BC, had been the first of the family to become a Roman senator and was elected to

the high annual office of the praetorship, which ranked second in the political hierarchy to the consulship. Gaius Octavius' mother, Atia, was the daughter of Julia, the sister of Julius Caesar; and it was Caesar who launched the young Octavius in Roman public life. At the age of 12 he made his debut by delivering the funeral speech for his grandmother Julia. Three or four years later he received the coveted membership of the board of priests (pontifices). In 46 he accompanied Caesar, now dictator, in his triumphal procession after his victory in Africa over his opponents in the Civil War; and in the following year, in spite of ill health, he joined the dictator in Spain. He was at Apollonia (now in Albania), completing his academic and military studies when, in 44 BC, he learned that Julius Caesar had been murdered.

Rise to power.

Returning to Italy, he was told that in his will Caesar had adopted him as his son and had made him his chief personal heir. He was only 18 when, against the advice of his stepfather and others, he decided to take up this perilous inheritance and proceeded to Rome. Mark Antony (Marcus Antonius), Caesar's chief lieutenant, who had taken possession of his papers and assets and had expected that he himself would be the principal heir, refused to hand over any of Caesar's funds, forcing Octavius to pay the late dictator's bequests to the Roman populace from such resources as he could raise. Caesar's assassins, Brutus and Cassius, ignored him and withdrew to the east. Cicero, the famous orator who was one of Rome's principal elder statesmen, hoped to make use of him but underestimated his abilities.

Celebrating public games, instituted by Caesar, to ingratiate himself with the city populace, Octavius succeeded in winning considerable numbers of the dictator's troops to his own allegiance. The Senate, encouraged by Cicero, broke with Antony, called upon Octavius for aid (granting him the rank of senator in spite of his youth), and joined the campaign of Mutina (Modena) against Antony, who was compelled to withdraw to Gaul. When the consuls who commanded the Senate's forces lost their lives, Octavius' soldiers compelled the Senate to confer a vacant consulship on him. Under the name of Gaius Julius Caesar he next secured official recognition as Caesar's adoptive son. Although it would have been normal to add "Octavianus" (with reference to his original family name), he preferred not to do so. Today, however, he is habitually described as Octavian (until the date when he assumed the designation Augustus).

Octavian soon reached an agreement with Antony and with another of Caesar's principal supporters, Lepidus, who had succeeded him as chief priest. On November 27, 43 BC, the three men were formally given a five-year dictatorial appointment as triumvirs for the reconstitution of the state (the Second Triumvirate--the first having been the informal compact between Pompey, Crassus, and Julius Caesar). The east was occupied by Brutus and Cassius, but the triumvirs divided the west among themselves. They drew up a list of "proscribed" political enemies, and the consequent executions included 300 senators (one of whom was Antony's enemy Cicero) and 2,000 members of the class below the senators, the equites or knights. Julius Caesar's recognition as a god of the Roman state in January 42 BC enhanced Octavian's prestige as son of a god.

He and Antony crossed the Adriatic and under Antony's leadership (Octavian being ill) won the two battles of Philippi against Brutus and Cassius, both of whom committed suicide. Antony, the senior partner, was allotted the east (and Gaul); and Octavian returned to Italy, where difficulties caused by the settlement of his veterans involved him in the Perusine War (decided in his favour at Perusia, the modern Perugia) against Antony's brother and wife. In order to appease another potential enemy, Sextus Pompeius (Pompey the Great's son), who had seized Sicily and the sea routes, Octavian married Sextus' relative Scribonia (though before long he divorced her for personal incompatibility). These ties of kinship did not deter Sextus, after the Perusine War, from making overtures to Antony; but Antony rejected them and reached a fresh understanding with Octavian at the treaty of Brundisium, under the terms of which Octavian was to have the whole west (except for Africa, which Lepidus was allowed to keep) and Italy, which, though supposedly neutral ground, was in fact controlled by Octavian. The east was again to go to Antony, and it was arranged that Antony, who had spent the previous winter with Queen Cleopatra in Egypt, should marry Octavian's sister Octavia. The peoples of the empire were overjoyed by the treaty, which seemed to promise an end to so many years of civil war. In 38 BC Octavian formed a significant new link with the aristocracy by his marriage to Livia Drusilla.

But a reconciliation with Sextus Pompeius proved abortive, and Octavian was soon plunged into serious warfare against him. When his first operations against Sextus' Sicilian bases proved disastrous, he felt obliged to make a new compact with Antony at Tarentum (Taranto) in 37 BC. Antony was to provide Octavian with ships, in return for troops Antony needed for his forthcoming war against the empire's eastern neighbour Parthia and its Median allies. Antony handed over the ships, but Octavian never

sent the troops. The treaty also provided for renewal of the Second Triumvirate for five years, until the end of 33 BC.

Military successes.

In the following year the balance of power began to change: whereas Antony's eastern expedition failed, Octavian's fleet, commanded by his former schoolmate, Marcus Agrippa, who, although unpopular with the influential nobles, was an admiral of genius, totally defeated Sextus Pompeius off Cape Naulochus (Venetico) in Sicily. At this point the third triumvir, Lepidus, seeking to contest Octavian's supremacy in the west by force, was disarmed by Octavian,
deprived of his triumviral office, and forced into retirement. Ignoring Antony's right to settle his own veterans in Italy and recruit fresh troops, Octavian discharged many legionaries and founded settlements for them. His deliberate rivalry with Antony for the eventual mastership of the Roman world became increasingly apparent. Octavian's marriage two years earlier had begun to win over some of the nobles who had previously been Antony's supporters. Octavian also launched elaborate religious and patriotic publicity, centring on the classical god of order, Apollo, in contrast to Antony's more un-Roman patron, Dionysus (Bacchus). In addition, Octavian had started to prefix his name with the designation "Imperator," to suggest that he was the commander par excellence; and now, although he continued to use his triumviral powers, he omitted all reference to them from his coins, gradually concentrating on the plain, emotive name "Caesar Son of a God."

But, if Octavian was to compete with Antony's military seniority, successes in a foreign war were necessary; and so Octavian between 35 and 33 BC fought three successive campaigns in Illyricum and Dalmatia (parts of modern Slovenia and Croatia) in order to protect the northeastern approaches of Italy. With the help of Agrippa, he also lavished large sums on the adornment of Rome. When Octavian fomented public clamour against Antony's territorial gifts to Cleopatra, it was clear that a clash between the two men was imminent.

In 32 BC the triumvirate had officially ended, and Octavian, unlike Antony, professed no longer to be employing its powers. Amid a virulent exchange of propaganda, Antony divorced Octavia, whereupon her brother Octavian seized Antony's will and claimed to find in it damaging proofs of Cleopatra's power over him. Each leader induced the populations under his control to swear formal oaths of allegiance to his own cause. Then, in spite of grave discontent aroused by his
exactions in Italy, Octavian declared war--not against Antony but against Cleopatra.

Accompanied by her, Antony had brought up his fleet and army to guard strongpoints along the coast of western Greece; but in 31 BC Octavian dispatched Agrippa very early in the year to capture Methone, at the country's southwestern tip. His enemies were taken by surprise; and after Octavian himself arrived--leaving his Etruscan friend and adviser Maecenas in charge of Italy--he and Agrippa soon shut Antony's fleet inside the Gulf of Ambracia (Arta). At the Battle of Actium Antony tried to extricate his ships in the hope of continuing the fight elsewhere. Though Cleopatra and then Antony succeeded in getting away, only a quarter of their fleet was able to follow them. She and Antony fled to Egypt and committed suicide when Octavian captured the country in the following year. Executing Cleopatra's son Ptolemy XV Caesar (Caesarion)--whose father she had claimed was Caesar--he annexed Egypt and retained it under his direct control.

The seizure of Cleopatra's treasure enabled him to pay off his veterans and made him finally master of the entire Greco-Roman world. From this point on, by a long and gradual series of tentative, patient measures, he established the Roman principate, a system of government that enabled him to maintain, in all essentials, absolute control. Gradually reducing his 60 legions to 28, he retained approximately 150,000 legionaries, mostly Italian, and supplemented them by about the same number of auxiliaries drawn from the provinces. A permanent bodyguard (the Praetorians), based on the bodyguards maintained by earlier generals, was stationed partly in Rome and partly in other Italian towns. A superb network of roads was created to maintain internal order and facilitate trade; and an efficient fleet was organized to police the Mediterranean.
In 28 BC Octavian and Agrippa held a census of the civil population, the first of three during the reign. They also reduced the Senate from about 1,000 to 800 (later 600) compliant members; and Octavian was appointed its president.

Government and administration.

Remembering, however, that Caesar had been assassinated because of his resort to naked power, Octavian realized that the governing class would welcome him as the terminator of civil war only if he concealed his autocracy beneath provisions avowedly harking back to republican traditions. From 31 until 23 BC the constitutional basis of his power remained a continuous succession of consulships, but in January 27 BC he ostensibly "transferred the State to the free disposal of the Senate and people," earning the misleading, though outwardly plausible, tribute that he had

restored the republic. At the same time, he was granted a 10-year tenure of an area of government (provincia) comprising Spain, Gaul, and Syria, the three regions containing the bulk of the army. The remaining provinces were to be governed by proconsuls appointed by the Senate in the old republican fashion. Octavian, however, believed that his supreme prestige --crystallized in the meaningful term auctoritas-- safeguarded him against any defiance by these personages; and he was indeed able, more or less indirectly, to influence their appointments, just as he was able (on the rare occasions when he regarded it as desirable) to influence the appointments to the consulships and other metropolitan offices that continued to exist in "republican" fashion.

Four days after these measures, his name Caesar, acquired through adoption in Julius' will, was supplemented by "Augustus," an appellation with an antique religious ring, believed to be linked etymologically with auctoritas and with the ancient practice of augury. The word augustus was often contrasted with humanus; its adoption as the title representing the new order cleverly indicated, in an extraconstitutional fashion, his superiority over the rest of mankind. With the aid of writers such as Virgil, Livy, and Horace, all of whom in their different ways shared the same ideas, he showed his patriotic veneration of the old Italian faith by reviving many of its ceremonials and repairing numerous temples.

Military operations continued in many frontier areas. In 25, recalcitrant Alpine tribes were reduced, and Galatia (central Asia Minor) was annexed. Mauretania, on the other hand, was transferred from Roman provincial status to that of a client-kingdom, for such dependent monarchies, as in the later republic, bore a considerable part of the burden of imperial defense. Augustus himself visited Gaul and directed part of a campaign in Spain until his health gave out; in 23 he fell ill again and seemed on the point of death. Feeling, amid reports of conspiracies, that new constitutional steps were necessary, he proceeded to terminate his series of consulships in favour of a power (imperium majus) that was separated altogether from office and its practical inconveniences. This power raised him above the proconsuls; it was never referred to on the official coinage or in Augustus' political testament but was intended to be exercised mainly in emergencies and on personal visits. He was also awarded the power of a tribune (tribunicia potestas) for life. Earlier, he had accepted certain privileges of a tribune. The full power he now assumed carried with it practical advantages, notably the right to convene the Senate. But, more particularly, the office of a tribune, because of the ancient character of the annually elected tribunes of the people as defenders of the plebs, surrounded him with a "democratic" aura. This was, perhaps, needed all the more because Augustus

himself--while admittedly supporting the interests of poorer people by a great extension of the right of judicial appeal--tended to back the established classes as the keystone of his system.

Agrippa, too, was granted superiority over proconsuls, presumably in order to ensure that the armies would be in safe hands in case one of Augustus' recurrent illnesses proved fatal. The next to die, however, was the emperor's young nephew Marcellus, who had been married to his daughter Julia and might eventually have been envisaged as his successor. In the same year, 23
BC, Agrippa was sent out to the east as deputy princeps; two years later he became Julia's second husband. Meanwhile Augustus himself travelled in Sicily, Greece, and Asia (22-19). Important reorganizations were put into effect wherever he went; and immense satisfaction was caused by an agreement in 20 BC with Parthia, under which the Parthians recognized Rome's protectorate over Armenia and returned the legionary standards captured from Crassus 33 years earlier. In 19 Agrippa completed the subjugation of Spain. In this year there was
some adjustment of Octavian's powers to allow him to exercise them more freely in Italy, and the two following years witnessed social legislation attempting to encourage marriage, regulate penalties for adultery, and reduce extravagance. In 17 there were resplendent celebrations of ancient ritual, known as the Secular Games, to purify the Roman people of their past sins and provide full religious inauguration of the new age.

Although the principate was not an office which could be automatically handed on, Augustus seemed to be indicating his views regarding his ultimate successor when he adopted the two sons of his daughter Julia, boys aged three and one who were henceforward known as Gaius Caesar and Lucius Caesar. Their father Agrippa, whose powers had been renewed along with his master's, returned to the east. But now Augustus also gave important employment to his stepsons--his wife Livia's sons by her former marriage --Tiberius and Drusus the elder. Proceeding across the Alps, they annexed Noricum and Raetia, comprising large parts of what are now Switzerland, Austria, and Bavaria, and extended the imperial frontier from Italy to the upper Danube (16-15).

It was probably during these years that an executive, or drafting, committee (consilium) of the Senate was established in order to help Augustus to prepare senatorial business. His administrative burden was also lightened by the expansion of his own staff (knights, who could also now rise to a number of key posts, and freedmen) to form the beginnings of a civil service, which had never

existed before but was destined to become an essential feature of the imperial system. Gradually, too, a completely reformed administrative structure of Rome, Italy, and the whole empire was evolved. The financial system that made this possible was evidently far more effective than anything the empire had ever seen until then. The system was based on the central treasury (aerarium), but the details of its relationship with the treasuries of the provinces, and particularly
the provincia of Augustus, are still imperfectly understood, partly because, although the emperor proudly recorded his gifts to the central treasury, he did not report what funds passed in the opposite direction.

The taxation providing these resources apparently included two main direct taxes: a poll tax (tributum capitis), paid in some provinces by all adults and in others by adult males only, and a land tax (tributum soli). There were also indirect taxes, which (as in the past) were farmed out to contractors because their yield was unpredictable and the embryonic civil service lacked the resources to handle them. The republican customs dues continued; but its rates were low enough not to hamper trade, which, in the peaceful conditions created by Augustus, flourished in wholly unprecedented fashion. Industries did not exist on a very large scale, but commerce was greatly stimulated by a sweeping reform and expansion of the Roman coinage. Gold and silver pieces, their designs reflecting many facets of imperial publicity, were issued in great quantities at a
number of widely distributed mints. The Rome mint was reopened for this purpose from c. 20 BC. The absence of bronze token coinage, which had been sparse for many decades, was remedied by the creation of abundant mintages in yellow orichalcum and red copper. In the West the principal mint for these pieces, besides Rome, was Lugdunum (Lyon), whose coins displayed a view
of the Altar of Rome and Augustus that formed a model for other provincial capitals. The Roman citizen colonies of the West, many of them established by Augustus to settle his veterans, supplemented this output by their own local coinages, and in the East, particularly Asia Minor and Syria, numerous Greek cities were also allowed to issue small change.

Expansion of the empire.

The death in 12 BC of Lepidus enabled Augustus finally to succeed him as the official head of the Roman religion, the chief priest (pontifex maximus). In the same year, Agrippa, too, died. Augustus compelled his widow, Julia, to marry Tiberius against both their wishes. During the next three years, however, Tiberius was away in the field, reducing Pannonia (Yugoslavia and

Hungary) up to the middle Danube, while his brother Drusus crossed the Rhine frontier and invaded Germany as far as the Elbe, where he died in 9 BC. In the following year, Augustus lost another of his intimates, Maecenas, who had been the adviser of his early days and was an outstanding patron of letters.

Tiberius, who replaced Drusus in Germany, was elevated in 6 BC to a share in his stepfather's tribunician power. But shortly afterward he went into retirement on the island of Rhodes. This was attributed to jealousy of his stepnephew Gaius Caesar, who was introduced to public life with a great fanfare in the following year; and the same compliments were paid to his brother Lucius in 2 BC, the year in which Augustus received his climactic title "father of the country" (pater patriae). Gaius was sent to the East and Lucius to the West. Both, however, soon died. Tiberius returned home in 2, and in 4 Augustus adopted him as his son, who in turn was required to adopt Germanicus, the son of his brother Drusus. The powers conferred upon Tiberius made him almost Augustus' own equal in everything except prestige.

Tiberius' next task was to consolidate the invasion and provincial organization of Germany (4-5). An invasion of Bohemia was planned and had already been launched from two directions when news came in 6 that Pannonia and Illyricum had revolted. It took three years for the rebellion to be put down; and this had only just been completed when Arminius raised the Germans against their Roman governor Varus and destroyed him and his three legions. As Augustus could not readily replace the troops, the annexation of western Germany and
Bohemia was postponed indefinitely; Tiberius and Germanicus were sent to consolidate the Rhine frontier.

Although Augustus was now feeling his age, these years in association with Tiberius were marked by administrative innovations: the annexation of Judaea in AD 6 (its client king Herod the Great had died 10 years previously); the establishment at Rome (in the same year) of a fire brigade with police duties, supplemented seven years later by a regular police force (cohortes urbanae); the
creation of a military treasury (aerarium militare) to defray soldiers' retirement bounties from taxes; and the conversion of the hitherto occasional appointment of prefect of the city (praefectus urbi) into a permanent office (AD 13). When, in the same year, the powers of Augustus were renewed for 10 years--such renewals had been granted at intervals throughout the reign--Tiberius was made his equal in every constitutional respect. In April, Augustus deposited his will at the House of the Vestals in Rome. It included a summary of the military and financial resources of the empire (breviarium totius imperii) and his political testament known as the "Res Gestae Divi Augusti"

("Achievements of the Divine Augustus"). The best preserved copy of the latter document is on the walls of the Temple of Rome and Augustus at Ankara, Turkey (the Monumentum Ancyranum). In 14 Tiberius was due to leave for Illyricum but was recalled by the news that
Augustus was gravely ill. He died on August 19, and on September 17 the Senate enrolled him among the gods of the Roman state. By that time Tiberius had succeeded him as the second Roman emperor, though the formalities involved in the succession proved embarrassing both to himself and to the Senate because the "principate" of Augustus had not, constitutionally speaking, been heritable or continuous. Like other emperors, Tiberius assumed the designation "Augustus" as an additional title of his own. Agrippa Postumus, who had been named his co-heir but was later banished, was put to death. The order to kill him may already have been given by Augustus, but this is not certain.

Notes for Octavius Augustus 1st. Roman Emperor:
Introduction

Gaius Octavius, subsequently known as Gaius Julius Caesar Octavianus and still later as Augustus or Caesar Augustus, was the first Roman emperor, following the republic, which had been finally destroyed by the dictatorship of Julius Caesar, his great-uncle and adoptive father. His autocratic regime is known as the principate because he was the princeps, the first citizen, at the head of that array of outwardly revived republican institutions that alone made his autocracy palatable. With unlimited patience, skill, and efficiency, he overhauled every aspect of Roman life and brought durable peace and prosperity to the Greco-Roman world.

Gaius Octavius was born on September 23, 63 BC, of a prosperous family that had long been settled at Velitrae (Velletri), southeast of Rome. His father, who died in 59 BC, had been the first of the family to become a Roman senator and was elected to the high annual office of the praetorship, which ranked second in the political hierarchy to the consulship. Gaius Octavius' mother, Atia, was the daughter of Julia, the sister of Julius Caesar; and it was Caesar who launched the young Octavius in Roman public life. At the age of 12 he made his debut by delivering the funeral speech for his grandmother Julia. Three or four years later he received the coveted membership of the board of priests (pontifices). In 46 he accompanied Caesar, now dictator, in his triumphal procession after his victory in Africa over his opponents in the Civil War; and in the following year, in spite of ill health, he joined the dictator in Spain. He was at Apollonia (now in Albania), completing his academic and military studies when, in 44 BC, he learned that
Julius Caesar had been murdered.

Rise to power.

Returning to Italy, he was told that in his will Caesar had adopted him as his son and had made him his chief personal heir. He was only 18 when, against the advice of his stepfather and others, he decided to take up this perilous

inheritance and proceeded to Rome. Mark Antony (Marcus Antonius), Caesar's chief lieutenant, who had taken possession of his papers and assets and had expected that he himself would be the principal heir, refused to hand over any of Caesar's funds, forcing Octavius to pay the late dictator's bequests to the Roman populace from such resources as he could raise. Caesar's assassins, Brutus and Cassius, ignored him and withdrew to the east. Cicero, the famous orator who was one of Rome's principal elder statesmen, hoped to make use of him but underestimated his abilities.

Celebrating public games, instituted by Caesar, to ingratiate himself with the city populace, Octavius succeeded in winning considerable numbers of the dictator's troops to his own allegiance. The Senate, encouraged by Cicero, broke with Antony, called upon Octavius for aid (granting him the rank of senator in spite of his youth), and joined the campaign of Mutina (Modena) against Antony, who was compelled to withdraw to Gaul. When the consuls who commanded the
Senate's forces lost their lives, Octavius' soldiers compelled the Senate to confer a vacant consulship on him. Under the name of Gaius Julius Caesar he next secured official recognition as Caesar's adoptive son. Although it would have been normal to add "Octavianus" (with reference to his original family name), he preferred not to do so. Today, however, he is habitually described as Octavian (until the date when he assumed the designation Augustus).

Octavian soon reached an agreement with Antony and with another of Caesar's principal supporters, Lepidus, who had succeeded him as chief priest. On November 27, 43 BC, the three men were formally given a five-year dictatorial appointment as triumvirs for the reconstitution of the state (the Second Triumvirate--the first having been the informal compact between Pompey, Crassus, and Julius Caesar). The east was occupied by Brutus and Cassius, but the triumvirs divided the west among themselves. They drew up a list of "proscribed" political enemies, and the consequent executions included 300 senators (one of whom was Antony's enemy Cicero) and 2,000 members of the class below the senators, the equites or knights. Julius Caesar's recognition as a god of the Roman state in January 42 BC enhanced Octavian's prestige as son of a god.

He and Antony crossed the Adriatic and under Antony's leadership (Octavian being ill) won the two battles of Philippi against Brutus and Cassius, both of whom committed suicide. Antony, the senior partner, was allotted the east (and Gaul); and Octavian returned to Italy, where difficulties caused by the settlement of his veterans involved him in the Perusine War (decided in his favour at Perusia, the modern Perugia) against Antony's brother and wife. In order to appease another potential enemy, Sextus Pompeius (Pompey the Great's son), who had seized Sicily and the sea routes, Octavian married Sextus' relative Scribonia (though before long he divorced her for personal incompatibility). These ties of kinship did not deter Sextus, after the Perusine War, from making overtures to Antony; but Antony rejected them and reached a fresh understanding
with Octavian at the treaty of Brundisium, under the terms of which Octavian was to have the whole west (except for Africa, which Lepidus was allowed to

keep) and Italy, which, though supposedly neutral ground, was in fact controlled by Octavian. The east was again to go to Antony, and it was arranged that Antony, who had spent the previous winter with Queen Cleopatra in Egypt, should marry Octavian's sister Octavia. The peoples of the empire were overjoyed by the treaty, which seemed to promise an end to so many years of civil war. In 38 BC
Octavian formed a significant new link with the aristocracy by his marriage to Livia Drusilla.

But a reconciliation with Sextus Pompeius proved abortive, and Octavian was soon plunged into serious warfare against him. When his first operations against Sextus' Sicilian bases proved disastrous, he felt obliged to make a new compact with Antony at Tarentum (Taranto) in 37 BC. Antony was to provide Octavian with ships, in return for troops Antony needed for his forthcoming war against the empire's eastern neighbour Parthia and its Median allies. Antony handed over the ships, but Octavian never sent the troops. The treaty also provided for renewal of the Second Triumvirate for five years, until the end of 33 BC.

Military successes.

In the following year the balance of power began to change: whereas Antony's eastern expedition failed, Octavian's fleet, commanded by his former schoolmate, Marcus Agrippa, who, although unpopular with the influential nobles, was an admiral of genius, totally defeated Sextus Pompeius off Cape Naulochus (Venetico) in Sicily. At this point the third triumvir, Lepidus, seeking to contest Octavian's supremacy in the west by force, was disarmed by Octavian,
deprived of his triumviral office, and forced into retirement. Ignoring Antony's right to settle his own veterans in Italy and recruit fresh troops, Octavian discharged many legionaries and founded settlements for them. His deliberate rivalry with Antony for the eventual mastership of the Roman world became increasingly apparent. Octavian's marriage two years earlier had begun to win over some of the nobles who had previously been Antony's supporters. Octavian also launched elaborate religious and patriotic publicity, centring on the classical god of order, Apollo, in contrast to Antony's more un-Roman patron, Dionysus (Bacchus). In addition, Octavian had started to prefix his name with the designation "Imperator," to suggest that he was the commander par excellence; and now, although he continued to use his triumviral powers, he omitted all reference to them from his coins, gradually concentrating on the plain, emotive name "Caesar Son of a God."

But, if Octavian was to compete with Antony's military seniority, successes in a foreign war were necessary; and so Octavian between 35 and 33 BC fought three successive campaigns in Illyricum and Dalmatia (parts of modern Slovenia and Croatia) in order to protect the northeastern approaches of Italy. With the help of Agrippa, he also lavished large sums on the adornment of Rome. When Octavian fomented public clamour against Antony's territorial gifts to Cleopatra, it was clear that a clash between the two men was imminent.

In 32 BC the triumvirate had officially ended, and Octavian, unlike Antony, professed no longer to be employing its powers. Amid a virulent exchange of propaganda, Antony divorced Octavia, whereupon her brother Octavian seized Antony's will and claimed to find in it damaging proofs of Cleopatra's power over him. Each leader induced the populations under his control to swear formal oaths of allegiance to his own cause. Then, in spite of grave discontent aroused by his
exactions in Italy, Octavian declared war--not against Antony but against Cleopatra.

Accompanied by her, Antony had brought up his fleet and army to guard strongpoints along the coast of western Greece; but in 31 BC Octavian dispatched Agrippa very early in the year to capture Methone, at the country's southwestern tip. His enemies were taken by surprise; and after Octavian himself arrived--leaving his Etruscan friend and adviser Maecenas in charge of Italy--he and Agrippa soon shut Antony's fleet inside the Gulf of Ambracia (Arta). At the Battle of Actium Antony tried to extricate his ships in the hope of continuing the fight elsewhere. Though Cleopatra and then Antony succeeded in getting away, only a quarter of their fleet was able to follow them. She and Antony fled to Egypt and committed suicide when Octavian captured the country in the following year. Executing Cleopatra's son Ptolemy XV Caesar (Caesarion)--whose father she had claimed was Caesar--he annexed Egypt and retained it under his direct control.

The seizure of Cleopatra's treasure enabled him to pay off his veterans and made him finally master of the entire Greco-Roman world. From this point on, by a long and gradual series of tentative, patient measures, he established the Roman principate, a system of government that enabled him to maintain, in all essentials, absolute control. Gradually reducing his 60 legions to 28, he retained approximately 150,000 legionaries, mostly Italian, and supplemented them by about the same number of auxiliaries drawn from the provinces. A permanent bodyguard (the Praetorians), based on the bodyguards maintained by earlier generals, was stationed partly in Rome and partly in other Italian towns. A superb network of roads was created to maintain internal order and facilitate trade; and an efficient fleet was organized to police the Mediterranean. In 28 BC Octavian and Agrippa held a census of the civil population, the first of three during the reign. They also reduced the Senate from about 1,000 to 800 (later 600) compliant members; and Octavian was appointed its president.

Government and administration.

Remembering, however, that Caesar had been assassinated because of his resort to naked power, Octavian realized that the governing class would welcome him as the terminator of civil war only if he concealed his autocracy beneath provisions avowedly harking back to republican traditions. From 31 until 23 BC the constitutional basis of his power remained a continuous succession of
consulships, but in January 27 BC he ostensibly "transferred the State to the free disposal of the Senate and people," earning the misleading, though outwardly plausible, tribute that he had restored the republic. At the same time,

he was granted a 10-year tenure of an area of government (provincia) comprising Spain, Gaul, and Syria, the three regions containing the bulk of the army. The remaining provinces were to be governed by proconsuls appointed by the Senate in the old
republican fashion. Octavian, however, believed that his supreme prestige -- crystallized in the meaningful term auctoritas-- safeguarded him against any defiance by these personages; and he was indeed able, more or less indirectly, to influence their appointments, just as he was able (on the rare occasions when he regarded it as desirable) to influence the appointments to the consulships and other metropolitan offices that continued to exist in "republican" fashion.

Four days after these measures, his name Caesar, acquired through adoption in Julius' will, was supplemented by "Augustus," an appellation with an antique religious ring, believed to be linked etymologically with auctoritas and with the ancient practice of augury. The word augustus was often contrasted with humanus; its adoption as the title representing the new order cleverly indicated, in an extraconstitutional fashion, his superiority over the rest of mankind. With the aid of writers such as Virgil, Livy, and Horace, all of whom in their different ways shared the same ideas, he showed his patriotic veneration of the old Italian faith by reviving many of its ceremonials and repairing numerous temples.

Military operations continued in many frontier areas. In 25, recalcitrant Alpine tribes were reduced, and Galatia (central Asia Minor) was annexed. Mauretania, on the other hand, was transferred from Roman provincial status to that of a client-kingdom, for such dependent monarchies, as in the later republic, bore a considerable part of the burden of imperial defense. Augustus himself visited Gaul and directed part of a campaign in Spain until his health gave out; in
23 he fell ill again and seemed on the point of death. Feeling, amid reports of conspiracies, that new constitutional steps were necessary, he proceeded to terminate his series of consulships in favour of a power (imperium majus) that was separated altogether from office and its practical inconveniences. This power raised him above the proconsuls; it was never referred to on the official coinage or in Augustus' political testament but was intended to be exercised mainly in emergencies and on personal visits. He was also awarded the power of a tribune (tribunicia potestas) for life. Earlier, he had accepted certain privileges of a tribune. The full power he now assumed carried with it practical advantages, notably the right to convene the Senate. But, more particularly, the office of a tribune, because of the ancient character of the annually elected tribunes of the people as defenders of the plebs, surrounded him with a "democratic" aura. This was, perhaps, needed all the more because Augustus himself--while admittedly supporting the interests of poorer people by a great extension of the right of judicial appeal--tended to back the established classes as the keystone of his system.

Agrippa, too, was granted superiority over proconsuls, presumably in order to ensure that the armies would be in safe hands in case one of Augustus' recurrent illnesses proved fatal. The next to die, however, was the emperor's

young nephew Marcellus, who had been married to his daughter Julia and might eventually have been envisaged as his successor. In the same year, 23 BC, Agrippa was sent out to the east as deputy princeps; two years later he became Julia's second husband. Meanwhile Augustus himself travelled in Sicily, Greece, and Asia (22-19). Important reorganizations were put into effect wherever he went; and immense satisfaction was caused by an agreement in 20 BC with Parthia, under which the Parthians recognized Rome's protectorate over Armenia and returned the legionary standards captured from Crassus 33 years earlier. In 19 Agrippa completed the subjugation of Spain. In this year there was
some adjustment of Octavian's powers to allow him to exercise them more freely in Italy, and the two following years witnessed social legislation attempting to encourage marriage, regulate penalties for adultery, and reduce extravagance. In 17 there were resplendent celebrations of ancient ritual, known as the Secular Games, to purify the Roman people of their past sins and provide full religious inauguration of the new age.

Although the principate was not an office which could be automatically handed on, Augustus seemed to be indicating his views regarding his ultimate successor when he adopted the two sons of his daughter Julia, boys aged three and one who were henceforward known as Gaius Caesar and Lucius Caesar. Their father Agrippa, whose powers had been renewed along with his master's, returned to the east. But now Augustus also gave important employment to his stepsons--his wife Livia's sons by her former marriage --Tiberius and Drusus the elder.
Proceeding across the Alps, they annexed Noricum and Raetia, comprising large parts of what are now Switzerland, Austria, and Bavaria, and extended the imperial frontier from Italy to the upper Danube (16-15).

It was probably during these years that an executive, or drafting, committee (consilium) of the Senate was established in order to help Augustus to prepare senatorial business. His administrative burden was also lightened by the expansion of his own staff (knights, who could also now rise to a number of key posts, and freedmen) to form the beginnings of a civil service, which had never existed before but was destined to become an essential feature of the imperial system. Gradually, too, a completely reformed administrative structure of Rome, Italy, and the whole empire was evolved. The financial system that made this possible was evidently far more effective than anything the empire had ever seen until then. The system was based on the central treasury (aerarium), but the details of its relationship with the treasuries of the provinces, and particularly the provincia of Augustus, are still imperfectly understood, partly because, although the emperor proudly recorded his gifts to the central treasury, he did not report what funds passed in the opposite direction.

The taxation providing these resources apparently included two main direct taxes: a poll tax (tributum capitis), paid in some provinces by all adults and in others by adult males only, and a land tax (tributum soli). There were also indirect taxes, which (as in the past) were farmed out to contractors because their yield was unpredictable and the embryonic civil service lacked the resources to handle them. The republican customs dues continued; but its rates

were low enough not to hamper trade, which, in the peaceful conditions created by Augustus, flourished in wholly unprecedented fashion. Industries did not exist on a very large scale, but commerce was greatly stimulated by a sweeping reform and expansion of the Roman coinage. Gold and silver pieces, their designs reflecting many facets of imperial publicity, were issued in great quantities at a
number of widely distributed mints. The Rome mint was reopened for this purpose from c. 20 BC. The absence of bronze token coinage, which had been sparse for many decades, was remedied by the creation of abundant mintages in yellow orichalcum and red copper. In the West the principal mint for these pieces, besides Rome, was Lugdunum (Lyon), whose coins displayed a view of the Altar of Rome and Augustus that formed a model for other provincial capitals. The Roman citizen colonies of the West, many of them established by Augustus to settle his veterans, supplemented this output by their own local coinages, and in the East, particularly Asia Minor and Syria, numerous Greek cities were also allowed to issue small change.

Eumenes II (d. 160/159 BC), king of Pergamum from 197 until his death. A brilliant statesman, he brought his small kingdom to the peak of its power and did more than any other Attalid monarch to make Pergamum a great centre of Greek culture in the East.

Eumenes was the eldest son and successor of Attalus I Soter (ruled 241-197), and he continued his father's policy of cooperation with Rome. His military skill contributed substantially to the victory of Roman and Pergamene forces over the Seleucid king Antiochus III in the battle of Magnesia, in Lydia (autumn of 190). As his reward Eumenes was given control over the Thracian Chersonese (modern Gallipoli peninsula in European Turkey) and over most of the former Seleucid possessions in Asia Minor. Despite this enlargement of his domain, Eumenes realized that his power rested on Roman might. He therefore cultivated friendship with the Romans, securing their intervention in his struggles against the kings of Bithynia and Pontus, in northern Anatolia.

In 172 Eumenes visited Rome to denounce Perseus, the king of Macedonia, for allegedly plotting aggressions in the East. He then joined the Romans in their struggle against Perseus (Third Macedonian War, 171-168), but when the war dragged on it was rumoured that Eumenes was negotiating secretly with the enemy. Whatever the truth of the report, the mere suspicion of disloyalty was enough to put Eumenes permanently in the shadow of Rome's displeasure.

Eumenes was responsible for the construction of nearly all the main public buildings--together with their splendid sculptures--on the acropolis at Pergamum.

Marco Livio Druso. Polktico romano nacido hacia I24 a. de J. C. Orador elocuente y politico avanzado, fué elegido tribuno de la plebe en el 9I a. de J. C. Presentó un proyecto de reformas legislativas amplias, que pretendkan restaurar las antiguas relaciones económicas entre las clases sociales romanas. Y de otra parte intentó atraerse a Roma a los latinos y a los italiotas. Los proyectos de Druso no pudieron realizarse, y tal vez murió en las revueltas producidas en Roma, si no se dió muerte al ver fracasados sus proyectos.

Drusus, Marcus Livius (b. c. 124 BC--d. 91 BC), son of the tribune of 122 by the same name; as tribune in 91, Drusus made the last nonviolent civilian attempt to reform the government of republican Rome. Drusus began by proposing colonial and agrarian reform bills. He then introduced a judiciary law that probably specified that the law courts, then controlled by the equites, or cavalry, should be
impaneled jointly from senators and equites and that all jurors should be liable to prosecution for corruption.

By this compromise Drusus sought to reconcile the equestrian and senatorial orders, which had come into conflict after the trial by equites of an honest governor who had refused to allow extortion of his province by publicans (contractors or tax collectors). Neither order was satisfied with Drusus' proposal, however, and opposition from all sides increased when he pushed for the enfranchisement of the Italian allies. The Senate declared his legislation invalid on technical grounds. Disturbances involving Drusus' supporters among the allies increased, and the reformer was murdered. His assassin was never discovered.

Notes for Attalus I Soter, King Of Pergamum:
Attalus I SOTER ("Preserver") (b. 269 BC--d. 197 BC), ruler of Pergamum from 241 to 197 BC, with the title of king after about 230. He succeeded his uncle, Eumenes I (reigned 263-241), and by military and diplomatic skill created a powerful Pergamene kingdom.

Attalus' mother, Antiochis, was a princess of the Seleucid house, a dynasty founded in Syria by one of the successors of Alexander the Great. Shortly before 230 Pergamum was attacked by the Galatians (Celts who had settled in central Anatolia in the 3rd century BC) because Attalus had refused to pay them the customary tribute. Attalus crushed his enemy in a battle outside the walls of Pergamum, and, to mark the success, he took the title of king--the first of the Attalids to do so--and the cult name Soter. Next, he defeated the Seleucid king

Antiochus Hierax in three battles and thereby gained control (228) over all the Seleucid domains in Anatolia except Cilicia in the southeast. But by 222 the Seleucids had won back almost all of this.

Attalus then turned to checking the expansionist ambitions of the Macedonian king Philip V (reigned 221-179). He fought against Philip with help from Rome and the Aetolians of south-central Greece during the inconclusive First Macedonian War (214-205). In 201 he took the side of the inhabitants of Rhodes in their war with Philip, and with them he brought about, by diplomatic approaches in Rome, a new Roman intervention against Macedonia (Second Macedonian War, 200-196). Shortly before the final defeat of Philip, Attalus died. The Pergamene ruler had also gained renown as a generous patron of the arts.

Notes for TiberiusSempronius Gracchus, Tribune:
[Claudia.FTW]

Gracchus, Tiberius Sempronius (b. 169-164 BC?--d. June 133 BC, Rome), Roman tribune (133 BC) who sponsored agrarian reforms to restore the class of small independent farmers and who was assassinated in a riot sparked by his senatorial opponents. His brother was Gaius Sempronius Gracchus.

Born into an aristocratic Roman family, Tiberius Sempronius was heir to a nexus of political connections with other leading families--most notably with the Cornelii Scipiones, the most continuously successful of the great Roman houses--through his mother, Cornelia, daughter of the conqueror of Hannibal, and through his sister Sempronia, wife of Scipio Aemilianus, the destroyer of Carthage. He was equally associated with the great rivals of the Scipios, the Claudii Pulchri,
through Tiberius' wife, Claudia, daughter of Appius Claudius Pulcher, the contemporary head of the house.

He was educated in the new Greek enlightenment that had been adopted by the more liberal families after the Roman conquest of the Hellenistic kingdoms, and this gave form and clarity to his natural talent for public speaking. The Stoic

teacher Blossius had special influence with Tiberius, but the central Stoic doctrine of duty merely enhanced his natural determination and obstinacy. Other Greek associates may have instructed him in the democratic theory that later coloured his speeches.

As a Roman aristocrat, Tiberius began a normal military career, serving as a junior officer with distinction under Scipio Aemilianus in the war with Carthage (147-146 BC), and in due course went as quaestor, or paymaster, with the consul Mancinus to the protracted colonial warfare in Spain (137 BC). There his personal integrity and family reputation enabled him to save a Roman army from total destruction at Numantia by an honourable compact with the Spanish tribesmen.
But, at the insistence of Aemilianus, the agreement was disavowed by the Senate at Rome, and Mancinus, the defeated consul, though not his staff and his troops, was returned to his captors. This setback alienated Tiberius from the Scipionic faction in the Senate and drew him closer to his Claudian friends.

His military experience had shown him the latent weakness of Rome. Its manpower was stretched to the limit to maintain its hegemony over the Mediterranean world, while its sources in Italy were beginning to contract. The primitive subsistence economy that in past centuries had nourished a large population of poor peasants was being eroded by new factors, notably the development of large estates owned by magnates enriched in the imperialist wars and devoted to cash crops worked by slaves and day labourers. The landowning peasantry, who alone were thought useful for military service, were declining in numbers, while the landless citizenry were increasing.

Tiberius sought a solution of the manpower problem in a large-scale revival of the traditional Roman policy, abandoned only in the last 30 years, of settling landless men on the extensive public lands acquired by the Roman state during the former conquest of Italy. Much of this land had fallen irregularly but effectively into the hands of the Roman gentry, who regarded it wrongly as their private property. Tiberius, with the support of a small but powerful group of consular senators, primarily of the Claudian faction, who shared his concern and also looked for political advantage from sponsoring such a scheme, concocted a bill for the redistribution of the public lands to landless labourers in plots of viable size. The novelty lay only in the scale of the scheme, which was not limited to a defined area of land or number of persons, and in the institution of a permanent executive of land commissioners. Opposition from vested interests was certain, but Tiberius hoped to pacify it by a generous provision allowing the great occupiers of public land to retain large portions in private ownership.

To implement this measure Tiberius secured the legislative office of tribune, for 133 BC, which was not an essential part of a senatorial career. Tribunes at this period normally legislated in the People's Assembly on the advice of the Senate, but more than once in recent years tribunes had passed reformist measures without senatorial approval. Tiberius in 133 had the support of the sole consul in Rome--Publius Mucius Scaevola, who had helped to draft the agrarian bill--and of

several other leading senators, mostly of the Claudian faction, whose authority could be expected to deflate opposition while hordes of peasants flocked to Rome to use their votes. When, after lengthy public debate, the bill was presented to the voters, the tribune Octavius used his right of veto to stop the proceedings in the interest of the great occupiers. When he refused to give way, Tiberius vainly sought belated approval from the Senate. That should have been the end of the matter, but Tiberius, convinced of the necessity of his bill, devised a novel method of bypassing the veto: a vote of the Assembly removed Octavius from office, contrary to all precedent. The bill was then passed. But the deposition of Octavius alienated many of Tiberius' supporters, who saw that it undermined the authority of the tribunate itself; they rejected the unfamiliar justification, devised by Tiberius, that tribunes who resisted the will of the people ceased to be tribunes.

Fresh complications arose from the lack of financial provision in the agrarian law for the equipment of the new landholders. Tiberius expected the Senate to make the traditional allocation of funds, but Scipio Nasica, an elderly senator from the Scipionic faction, succeeded in limiting these to a derisory sum. Tiberius countered by a second outrageous proposal, of which he failed to see the implication. The King of Pergamum, a city in Anatolia, on his death in 134 had bequeathed his fortune and his kingdom to the Roman state. Tiberius by a fresh bill claimed these monies in the name of the people and assigned them to the land commissioners, thus interfering with the Senate's traditional control of public finance and foreign affairs. The storm over Tiberius' methods continued to rage. He was threatened with prosecution after the end of his tribunate, when he
would have no formal means of protecting his law and would be liable to prosecution before the Centuriate Assembly, in which the wealthier classes had a voting advantage. The charge would have been violation of the immunity of the tribune Octavius.

Lacking the self-assurance to realize that the people were unlikely either to repeal the agrarian law or to pass sentence against its champion, Tiberius sought refuge in yet another impropriety. He proposed to stand for election to a second tribunate in 132, although reelection had not been practiced for 300 years and was widely believed to have been barred by an ambiguous statute. In the Senate the embittered opposition, again led by Nasica, tried to induce the consul Scaevola to stop the elections by force. Scaevola replied evasively that he would see that nothing illegal was done. Meanwhile, in the Assembly, Tiberius and the other tribunes were at loggerheads over the conduct of the election. An abortive vote had shown that the success of Tiberius was assured if only the election could be completed. He expected no violence and made no preparations against it. Enraged by the attitude of the Consul, Nasica and his associates stormed out of the Senate, equally unarmed. Seizing sticks and staves they precipitated a riot. It may well have begun as an attempt to disperse the electoral meeting, but it ended with the clubbing to death of Tiberius and the indiscriminate killing of some scores of citizens.

The political fault lay with Tiberius. After presentation of the agrarian bill, he failed to act in prudent collaboration with his senatorial supporters, and he

added to his troubles by dubious initiatives that were bound to offend the bulk of senatorial opinion. So Scaevola and the others abandoned him and effected a compromise. The Senate recommended that the land commission continue, and, though in 132 it set up a political court that punished many of the lesser followers of Tiberius, it also encouraged Nasica, who barely escaped prosecution, to leave Italy.

Notes for Julius Caesar, Dictator Of Rome:
César, Cayo Julio (100-44a.C.), general y político romano, creó los cimientos del futuro sistema imperial romano al final de la República.
La primera etapa de su vida
Nacido en Roma el 12 o 13 de julio del año 100a.C., perteneció a la prestigiosa familia Julia; desde su más tierna infancia conoció la polémica política. Su tío fue Cayo Mario, líder de los populares.

Este partido apoyó reformas agrarias contra las que estaban los reaccionarios optimates, una fracción senatorial. En su último año como cónsul, Mario provocó muchas bajas entre los optimates, al mismo tiempo que nombraba al joven César flamen dialis, uno de los arcaicos sacerdocios sin poder. Esto lo identificó con la política extremista de su tío, y su matrimonio en el 84a.C. con Cornelia, la hija del socio de Mario, Cinna, reafirmó su confirmación como radical. Cuando Lucio Cornelio Sila, líder de los optimates, fue nombrado dictador en el 82a.C., publicó una lista de adversarios para ser ejecutados. Aunque César no resultó perjudicado, Sila le ordenó que se divorciara de Cornelia. Negándose a cumplir esa orden, creyó prudente salir de Roma. No regresó a la ciudad hasta el 78a.C., tras la dimisión de Sila. César tenía entonces 22 años. Incapaz de obtener un cargo, dejó Roma de nuevo y se fue a Rodas, donde estudió retórica; regresó a Roma en el 73a.C., convertido en un orador muy persuasivo. El año anterior, mientras estaba en Rodas, había sido elegido para el Pontificado, un importante colegio de sacerdotes romanos.

El triunvirato

En el año 71a.C. Pompeyo Magno, que se había hecho acreedor de su epíteto sirviendo bajo el mando de Sila, regresó a Roma, tras derrotar a Quinto Sertorio, el general de los rebeldes populares, en Hispania. Ese mismo año, Marco Licinio Craso, patricio acaudalado, reprimió la sublevación de esclavos dirigida por Espartaco en Italia. Tanto Pompeyo como Craso obtuvieron el consulado en el 70a.C. Pompeyo, quien para entonces había cambiado de bando, era técnicamente inadecuado, pero con la ayuda de César obtuvo el cargo. En el 69a.C., César fue elegido cuestor y en el 65a.C. edil curul, cargo en el que obtuvo gran popularidad con sus generosos juegos de gladiadores. Para pagarlos, pidió dinero prestado a Craso. Esto unió a los dos hombres, quienes también hicieron causa común con Pompeyo. Cuando César regresó a Roma en el 60a.C., después de un año como gobernador de Hispania, se unió a Craso y Pompeyo para formar el primer triunvirato; con el fin de fortalecer aun más su relación, Pompeyo se casó con la hija de César, Julia. Con la ayuda de esta alianza, César fue elegido cónsul en el 59a.C. a pesar de la hostilidad optimate, y en el 58a.C. se le nombró gobernador de la Galia. Durante los siete años siguientes dirigió las campañas conocidas como las guerras de las Galias, al final de las cuales el poder romano se estableció sobre el centro y norte de Europa, al oeste del río Rin.

El juego del poder

Mientras César estaba en las Galias, sus agentes intentaron dominar la política en Roma. Sin embargo, esto amenazó la posición de Pompeyo y fue necesario que los triunviros se reunieran en Lucca en el 56a.C., tras lo cual se reconciliaron. Se decidió que César podía continuar en las Galias otros cinco años, mientras Pompeyo y Craso podían ser cónsules en el 55a.C.;

después de esa fecha, los triunviros tendrían poder proconsular sobre sus respectivas provincias. César se marchó para reprimir una sublevación en las Galias y dirigir una expedición a Britania. Cuando llegó a Britania se supone que dijo "veni, vidi, vinci" ("llegué, vi y vencí"). Craso, siempre ansioso de gloria militar, se marchó a su cargo en Siria. Después de entrar en guerra con Partia, fue derrotado y muerto en Carres en el 53a.C. Esto aumentó las diferencias entre César y Pompeyo, cuyos lazos familiares se habían roto con la muerte de Julia en el 54a.C.

La guerra civil

En el año 52a.C., tras el fallecimiento de Craso, Pompeyo fue nombrado único cónsul. Este cargo, combinado con sus otros poderes, lo situó en una posición privilegiada. Celoso de sus jóvenes rivales, decidió acabar con el poder de César, un objetivo que no podía realizar sin antes quitarle el mando de las Galias. Para protegerse, César sugirió que él y Pompeyo renunciaran a sus mandos simultáneamente, pero esto fue rechazado; incitado por Pompeyo, el Senado pidió a César que renunciara a su mando y disolviera su ejército o sería considerado enemigo público. Los tribunos, que eran agentes de César, vetaron esta moción, pero fueron expulsados del Senado. Entonces éste confió a Pompeyo la seguridad del Estado. Sus fuerzas, muy superiores en número a las de César, estaban dispersas por todas las provincias y sus tropas de la península Itálica no estaban preparadas para la guerra. A principios del año 49a.C. César cruzó el Rubicón, un pequeño río que separaba su provincia gala cisalpina de Italia y se dirigió rápidamente hacia el sur. Pompeyo huyó a Brundisium (la actual Brindisi) y desde allí a Grecia. En el periodo de tres meses, César controló toda la península Itálica y sus fuerzas tomaron Hispania y el puerto clave de Massilia (la actual Marsella, en Francia).

En Roma, César se convirtió en dictador hasta ser elegido cónsul en el 48a.C. A principios de ese año llegó a Grecia y destruyó las fuerzas de Pompeyo en Farsalia. Éste huyó a Egipto, donde fue asesinado. Cuando César visitó Egipto, instaló a Cleopatra, hija del fallecido rey Tolomeo XII, como reina. En el 47a.C. sometió a Asia Menor y regresó a Roma como dictador. Aproximadamente en el 48a.C. todas las fuerzas optimates habían sido derrotadas y el mundo mediterráneo pacificado.

Dictadura y asesinato

La base del poder de César era su posición de dictador 'vitalicio'. Según la constitución tradicional republicana este cargo sólo podía desempeñarse durante seis meses en una situación de gravedad extrema. Sin embargo, esa regla se había roto incluso antes de César. Sila había gobernado como dictador durante varios años y César siguió este precedente. También fue nombrado cónsul por diez años en el año 45a.C. (en el mismo año en que derrotó, en la península Ibérica, a los hijos de Pompeyo Magno en la batalla de Munda) y recibió la inviolabilidad de los tribunos. Además obtuvo honores que

incrementaron su prestigio. Vistió la toga, la corona y el cetro de un general triunfante y usó el título de imperator. Es más, como sumo sacerdote, fue jefe de la religión del Estado, pero sobre todo tenía el mando de todos los ejércitos, lo cual continuó siendo la principal fuente de su poder.

César estableció un programa de reformas muy variado. En las provincias eliminó el corrupto sistema de impuestos, patrocinó el establecimiento de colonias de veteranos y amplió la ciudadanía romana. En la metrópoli reorganizó las asambleas e incrementó el número de senadores. Su reforma del calendario dio a Roma un medio racional para registrar el tiempo.

Sin embargo, varias familias senatoriales sentían que César amenazaba sus posiciones; el honor y los poderes de César les hacían temer que éste quisiera ser rex (rey), un título que, como republicanos, odiaban. En el año 44a.C., un grupo de senadores, entre ellos Cayo Casio y Marco Junio Bruto, conspiraron para llevar a cabo su asesinato. En los idus (el 15) de marzo del 44a.C., cuando César entró en el Senado, el grupo lo asesinó.

Vida íntima

Después de la muerte de la primera esposa de César, Cornelia, en el 68a.C., se casó con Pompeya, nieta de Sila. Cuando los misterios de la Bona Dea, presididos por ella, fueron violados, fue difamada por las habladurías y César se divorció, arguyendo ante el Senado que su esposa debía estar por encima de toda sospecha (no sólo debía ser honrada, sino parecerlo). Su siguiente matrimonio (59a.C.) lo llevó a cabo con Calpurnia y se debió a motivos políticos. Al no tener César herederos varones, en su testamento estableció la condición de que su sobrino nieto, Octavio, se convirtiera en su sucesor. Octavio fue el primer emperador de Roma con el nombre de Augusto.

César fue un escritor de talento, con un estilo claro y sencillo. Sus Comentarios sobre la guerra de las Galias (De bello gallico), en los cuales describe las Galias y sus campañas gálicas, son unas de las principales fuentes de información sobre las primeras tribus celtas y germanas.

Logros

La opinión de los eruditos sobre los logros de César está dividida. Algunos le consideran un tirano sin escrúpulos, con un insaciable apego al poder, y le culpan de la desaparición de la República de Roma. Otros admiten que pudo ser cruel, pero insisten en que la República ya estaba destruida. Mantienen que para salvar el mundo romano del caos debía crearse una nueva clase de gobierno. En realidad, las reformas de César dieron estabilidad al mundo mediterráneo. También fue un general excepcional, que inspiró lealtad a sus soldados. En tanto que una de las figuras más notables del mundo antiguo, fue el tema de muchas obras literarias y biográficas, incluido el drama Julio César (c.1599) del inglés William Shakespeare.

Notes for Ariarathes III, King Of Cappadocia:
[MARINOS HASTA PERSIA.FTW]

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his
general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed

by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

Notes for Antiochus III the Great, King Of Syria:
[MARINOS HASTA PERSIA.FTW]

Antiochus III, byname ANTIOCHUS THE GREAT, Greek ANTIOCHUS MEGAS (b. 242 BC--d. 187, near Susa, Iran), Seleucid king of the Hellenistic Syrian Empire from 223 BC to 187, who rebuilt the empire in the East but failed in his attempt to challenge Roman ascendancy in Europe and Asia Minor. He reformed the empire administratively by reducing the provinces in size, established a ruler cult (with himself and his consort Laodice as divine), and improved relations with neighbouring countries by giving his daughters in marriage to their princes.

The son of Seleucus II, Antiochus succeeded his brother Seleucus III as king. He retained from the previous administration Hermias as chief minister,

Achaeus as governor of Asia Minor, and Molon and his brother Alexander as governors of the eastern provinces, Media and Persis. In the following year, when Molon rebelled and assumed the title of king, Antiochus abandoned a campaign against Egypt for the conquest of southern Syria, on the advice of Hermias, and marched against Molon, defeating him in 220 BC on the far bank of the Tigris and also
conquering Atropatene, the northwestern part of Media. Shortly thereafter he had Hermias killed and was thus rid of most of the influences from the previous administration. In the same year, Achaeus set himself up as king in Asia Minor, but a mutiny in his army kept him from attacking Antiochus.

Antiochus was now free to conduct what has been called the Fourth Syrian War
(219-216), during which he gained control of the important eastern Mediterranean sea ports of Seleucia-in-Pieria, Tyre, and Ptolemais. In 218 he held Coele Syria (Lebanon), Palestine, and Phoenicia. In 217 he engaged an army (numbering 75,000) of Ptolemy IV Philopator, a pharaoh of the Hellenistic dynasty ruling Egypt, at Raphia, the southernmost city in Syria. His own troops numbered 68,000. Though he succeeded in routing the left wing of the Egyptian army, his
phalanx (heavily armed infantry in close ranks) in the centre was defeated by a newly formed Egyptian phalanx. In the subsequent peace settlement, Antiochus gave up all his conquests except the city of Seleucia-in-Pieria.

After the Syrian war, he proceeded against the rebel Achaeus. In alliance with Attalus I of Pergamum, Antiochus captured Achaeus in 213 in his capital, Sardis, and had him executed in a barbaric manner. After the pacification of Asia Minor he entered upon his later to be famous eastward campaign (212-205), pressing forward as far as India. In 212 he gave his sister Antiochis in marriage to King Xerxes of Armenia, who acknowledged his suzerainty and paid him tribute. He occupied Hecatompylos (southeast of the Caspian Sea), the capital of the
Parthian king Arsaces III, and forced him to enter into an alliance in 209 and the following year defeated Euthydemus of Bactria, though he allowed him to continue to rule and retain his royal title. In 206 he marched across the Hindu Kush into the Kabul Valley and renewed a friendship with the Indian king Sophagasenos.

Returning westward via the Iranian provinces of Arachosia, Drangiana, and Carmania, he arrived in Persis in 205 and received tribute of 500 talents of silver from the citizens of Gerrha, a mercantile state on the east coast of the Persian Gulf. Having established a magnificent system of vassal states in the East, Antiochus now adopted the ancient Achaemenid title of "great king," and the Greeks, comparing him to Alexander the Great, surnamed him also "the Great."

After the death of Ptolemy IV, Antiochus concluded a secret treaty with Philip V, ruler of the Hellenistic kingdom of Macedonia, in which the two plotted the division of the Ptolemaic empire outside Egypt. Antiochus' share was to be southern Syria, Lycia, Cilicia, and Cyprus; Philip was to have western Asia

Minor and the Cyclades. Antiochus invaded Coele Syria, defeated the Ptolemaic general Scopas at Panion near the source of the Jordan River in the year
200, gained control of Palestine, and granted special rights to the Jewish temple state. But Philip, marching along the Dardanelles, became involved in a war with Rhodes and Pergamum, both of whom appealed to Rome for help against Macedonia, informing Rome of the alliance between the two Hellenistic kings. Rome intervened decisively in the system of Hellenistic states. Philip was defeated by the Romans in the Second Macedonian War (200-196), and Antiochus refused to help him. Instead, taking advantage of the Romans' involvement with Philip, Antiochus marched against Egypt. Though the Romans had sent ambassadors to Ptolemy V, they could not lend him any serious assistance. When peace was concluded in 195, Antiochus came permanently into possession of southern Syria--which had been fought over for 100 years by the Ptolemies and Seleucids--and of the Egyptian territories in Asia Minor. He also gave his daughter Cleopatra in marriage to Ptolemy V. Egypt practically became a Seleucid protectorate.

In his insatiable expansionist drive, Antiochus occupied parts of the kingdom of Pergamum in 198 and in 197 Greek cities in Asia Minor. In 196 BC he crossed the Hellespont into Thrace, where he claimed sovereignty over territory that had been won by Seleucus I in the year 281 BC. A war of harassment and diplomacy with Rome ensued. A number of times the Romans sent ambassadors demanding that Antiochus stay out of Europe and set free all the autonomous
communities in Asia Minor. To meet these demands would have meant the actual dissolution of the western part of the Seleucid Empire, and Antiochus thus refused. Tensions with Rome increased further when the great Carthaginian general Hannibal, who had fled from Carthage in the aftermath of defeat by the Romans in the Second Punic War, found refuge with Antiochus in 195 BC and became his adviser.

Antiochus offered an alliance to Philip of Macedonia, whom he had previously forsaken, but was rebuffed. Philip, Rhodes, Pergamum, and the Achaean League joined Rome. Only the Aetolians, discontent with Rome's growing influence in Greece, called upon Antiochus to be their liberator and appointed him commander in chief of their league. Relying on them Antiochus landed in Demetrias in the autumn of 192 with only 10,500 men and occupied Euboea. But he found little support in central Greece. In 191 the Romans, numbering more than 20,000, cut him off from his reinforcements in Thrace and outflanked his position at the pass of Thermopylae (in Greece). With the remainder of his troops Antiochus fled to Chalcis on Euboea and from there by sea to Ephesus; his fleet was wiped out by the combined naval forces of Rome, Rhodes, and Pergamum.
Meeting no resistance, the Roman army crossed the Hellespont in 190. Antiochus was now eager to negotiate on the basis of Rome's previous demands, but the Romans insisted that he first evacuate the region west of the Taurus Mountains. When Antiochus refused, he was decisively defeated in the Battle of Magnesia near Mt. Sipylus, where he fought with a heterogeneous

army of 70,000 men against an army of 30,000 Romans and their allies. Although he could have continued the war in the eastern provinces, he renounced all claim to his conquests in Europe and in Asia Minor west of the Taurus at the peace treaty of Apamea. He also was obliged to pay an indemnity of 15,000 talents over a period of 12 years, surrender his elephants and his fleet, and furnish hostages, including his son Antiochus IV. His kingdom was now reduced to Syria, Mesopotamia, and western Iran. In 187 Antiochus was murdered in a Baal temple near Susa, where he was exacting tribute in order to obtain much needed revenue.

   [MARINOS HASTA PERSIA.FTW]

   Seleucus IV PHILOPATOR (b. c. 217 BC--d. 175 BC), seventh king (reigned 187-175 BC) of the Seleucid dynasty, son of Antiochus III the Great.

   Although the empire that Seleucus inherited was not so great as the one over which his father had ruled before the war with Rome (190-189), it was still large, consisting of Syria (including Cilicia and Palestine), Mesopotamia, Babylonia, and nearer Iran (Media and Persia). Because of financial difficulties, created in part by the heavy war indemnity exacted by Rome, Seleucus was compelled to pursue a policy devoid of expensive adventures. His unambitious policy and care were also dictated by the fact that his son and heir, Demetrius, had been sent to Rome as a hostage for his father. When Seleucus was assassinated in 175 by his chief minister Heliodorus, his brother Antiochus seized the throne.

[MARINOS HASTA PERSIA.FTW]

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

iii. Cleopatra I, Queen Of Egypt, born in c 205 a.c.; died in 176 a.c; married Ptolomy V Epiphanes, King Of Egypt; born in 210 a.c..

Notes for Cleopatra I, Queen Of Egypt:

Cleopatra I SYRA (d. 176 BC), queen of Egypt (193-176 BC), wife of Ptolemy V Epiphanes and regent for her minor son, Ptolemy VI Philometor.

Daughter of Antiochus III the Great of the Syrian Empire, Cleopatra was married to Ptolemy V in 193 as part of the Peace of Lysimacheia, concluding warfare and border conflicts between Syria and Egypt. She brought as her dowry the revenues (but apparently not the ownership) of Coele-Syria, a land that Egypt had long sought to recover; and the total agreement helped to ensure Egypt's neutrality in Syria's continuing struggles with the Romans. When Ptolemy V died
(180), Cleopatra became the true ruler of Egypt as regent for her young son, and she ruled equitably, keeping peace with Syria while doing nothing to alienate Rome, and thereby kept Egypt free of invasion.

Notes for Ptolomy V Epiphanes, King Of Egypt:
Tolomeo V Epífanes (c.210-181 a.C.), rey de Egipto (205-181 a.C.), perteneciente a la dinastía Tolemaica, nieto de Tolomeo III Evergetes. Al comienzo de su reinado, Antíoco III de Siria y Filipo V de Macedonia acordaron dividir las posesiones extranjeras de Egipto y repartírselas, pero la derrota de Antíoco en Magnesia frente a los romanos permitió la salvación de la dinastía Tolemaica. La coronación oficial de Tolomeo V se realizó en el 197 a.C.; fue la ocasión en la que el sacerdocio egipcio publicó el decreto que forma la inscripción trilingüe de la Piedra de Rosetta. En el 193 a.C., Tolomeo contrajo matrimonio con la princesa Seléucida Cleopatra I, hija de Antíoco III y madre de Tolomeo VI.

Ptolemy V EPIPHANES (Greek: Illustrious) (b. c. 210--d. 180 BC), Macedonian king of Egypt from 205 BC under whose rule Coele Syria and most of Egypt's other foreign possessions were lost.

After Sosibius, Ptolemy IV's corrupt minister, had murdered Ptolemy V's mother, the five-year-old king was officially elevated to the throne; Sosibius became his guardian. According to the 2nd-century BC Greek historian Polybius, all prominent officials were banished from Egypt while Sosibius' clique announced the young king's accession and the death of his parents. The rulers of Macedonia and of the Syrian-based Seleucid kingdom, however,

realizing Egypt's weakness, conspired to partition that Kingdom's Asiatic and Aegean possessions.

When Sosibius retired about 202, Agathocles, another member of the clique, became Ptolemy's guardian. Soon, however, he provoked Tlepolemus, the governor of Pelusium (Egypt's eastern frontier city), who marched on Alexandria, where his supporters roused a mob, compelling Agathocles to resign in favour of another courtier. When the boy king, enthroned in the stadium while the mob clamoured for the murderers of his parents, nodded in confusion at the prompting of a courtier, the mob searched out and butchered Agathocles and his family. Tlepolemus, however, soon proved incompetent and was removed.

During the confusion in Egypt, Antiochus III, the Seleucid king, made serious inroads into Coele Syria. Ptolemy's forces mounted a counteroffensive, capturing Jerusalem; but in 201 the Seleucid king returned, defeating the Ptolemaic army and later seizing the Ptolemaic lands in Asia Minor. Roman diplomatic intervention finally halted the war; and in 194/193 BC, as part of the peace treaty, Cleopatra I, a daughter of Antiochus, was married to Ptolemy.

Within Egypt the revolts that had begun under Ptolemy's father continued; in 197 the King fought rebels in the Nile Delta, exhibiting great cruelty toward those of their leaders who capitulated. In Upper Egypt troubles persisted until 187/186. Though an adult, the King still was under the control of his guardians and advisers. To forestall further insurrections, he extended the authority of the
governor of Thebes to include all Upper Egypt. In 196 he promulgated the decree inscribed on the Rosetta Stone; found in 1799, it provided the key to the hieroglyphic, or pictographic writing, of ancient Egypt. The decree, which reveals the increasing influence of Egyptian natives, remitted debts and taxes, released prisoners, pardoned rebels who surrendered, and granted increased
benefactions to the temples.

Ptolemy retained existing alliances in Greece. Late in his reign an able eunuch was sent to recruit Greek mercenaries; but whatever the King's plans may have been, he died suddenly, about May 180, leaving two sons and a daughter, with the Queen as their regent.

Notes for TiberiusSempronius Gracchus, Praetor:
Tiberio Semprornio Graco. Elegido tribuno de la plebe, tuvo, en I8I a. de J. C., la nobleza de defender a Publio y Lucio Escipión, a los que Catón habka hecho acusar de haber vendido la paz al rey de Siria; se opuso también a que se les condenase en ausencia. El primer Africano, agradecido a Sempronio, le casó con su hija.
Marchó éste en I85 con una embajada a Macedonia y en I 80 fué nombrado pretor de la Espana Citerior, que estaba levantada en armas. Penenetró hasta el corazón de la Celtiberia, apoderindose de treseientos pueblos, y cuando los enemigos se dieron por vencidos, ajustó la paz en condiciones nada duras para ellos; a fin de atraerles a la civilización romana, fundó varias ciudades y les concedió leyes justas, con lo cual se conquistó el respeto y el afecto de los espanolrs. A su vuelta de Roma se le otorgaron los honores triunfales; En 177 llegó al consulado con Claudio Pulcher y se encargó de dominar el levantamiento de Córcega y Cerdena. Pronto logró reducir a los corsos, pero los sardos se resistieron bravamente, perdiendo 27.000 hombres en la lucha, por lo que Sempronio les trató con dureza, vendiendo tantos como esclavos,

que quedó como proverbio la frase de "sardos en venta" para indicar lo que se vendka a bajo precio.
Ejerció luego la Censura con extraordinario tacto, asi como otras dos embajadas a Asia y a Roma. De Cornelia, la hija de Escipión, a la que amaba mucho, tuvo doce hijos, de que sólo se lograron tres a los que dió la mis selecta educación Ella encarnaba las virtudes de la matrona romana y era mujer muy ilustrada, sus cualidades le atraian el respeto de todos, aunque no parece fuese extrana a la muerte de su yerno Escipión el Joven, replesentante de la aristocracia y enemigo polktico de sus hijos.
Sempronio era un hombre culto y refinado y -buen orador- conocka el griego a la perfección, tanto que pronunció discursos en esta lengua.

Notes for Cornelia:

Cornelia (c.189-c.110a.C.), matrona romana, hija del general Escipión el Africano. Cornelia se casó con el general y polktico Tiberio Sempronio Graco; después de la muerte de su esposo (153a.C.), se negó a casarse de nuevo y se dedicó a educar a sus hijos. Segsn la leyenda, cuando un visitante le pedka ver sus joyas, senalaba a sus hijos y contestaba, "éstas son mis joyas". Sólo tres de sus doce hijos llegaron a la edad adulta: Cayo Sempronio Graco y Tiberio Sempronio Graco, los grandes tribunos conocidos como los Gracos, y una hija, que se casó con el general romano Publio Cornelio Escipión. Después del asesinato de Cayo (121a.C.), Cornelia se retiró a Misenum (actualmente Miseno, en Italia) para estudiar griego y literatura latina.

---
Cornelia (fl. 2nd century BC), highly cultured mother of the late 2nd-century BC Roman reformers Tiberius and Gaius Sempronius Gracchus.

She was the second daughter of Publius Cornelius Scipio Africanus Major, the hero of the Second Punic War (Rome against Carthage, 218-201). Cornelia married Tiberius Sempronius Gracchus and bore him 12 children. In addition to the two Gracchi brothers, the only child to reach maturity was Sempronia, who married Scipio Aemilianus.

After the death of her husband in 154, Cornelia remained unmarried, refusing even the hand of Ptolemy VIII Euergetes of Egypt. She devoted herself entirely to the education of her surviving sons. Although hostile propaganda later suggested that Cornelia had encouraged her sons to initiate "radical" reforms, other stories suggest that she exercised a restraining influence over them. After Gaius' murder in 121 she retired to Misenum (now Miseno, Italy). Cicero applauded her letters for the beauty of their style; the two fragments preserved in the manuscripts of Cornelius Nepos (1st century BC) may not be genuine.

Claudius Pulcher, Appius (d. c. 130 BC), Roman politician, father-in-law of the agrarian reformer Tiberius Sempronius Gracchus. Claudius served on the Gracchan land commission from 133 until his death. He was consul in 143 and censor in 136. His prestige as princeps senatus ("senior senator") enabled him to provide powerful support for Gracchus' cause and to escape the violence that in 133 destroyed the reformer and many of his followers.

Notes for Eumenes, Macedonian General:
Eumenes fué un general de Alejandro. Nació en Cardia, en el Quersoneso de Tracia, el ano 36I a. de J. C. Parece que era todavka un nino cuando Filipo de Macedonia pasó por Cardia, y admirado de la destreza del muchacho en los ejercicios fksicos, se lo llevó consigo, confiindole el cargo de secretario. A la muerte de Filipo quedó al servicio de Alejandro, que le distinguió siempre con especial benevolencia, y en ocasiones tuvo que apaciguar a los cortesanos, celosos de tal preponderancia, singularmente a su amigo Efestión. Otra prueba de la amistad de que gozaba al lado de Alejandro es que le dió por esposa a una hermana de su propia mujer, Barsine, hija de Artabaces. En vida de Alejandro sólo se dió a conocer como polktico; mas a su muerte apareció en él el caudillo militar, que dirigió todos sus esfuerzos a apaciguar las luchas intestinas, tratando de conciliar los partidos rivales. Cuando se repartieron los territorios ganados por Alejandro, a él le correspondió la Capadocia. Asociado a Perdicas llegó a ser el mis firme apoyo de la familia real. Cuando Perdicas emprendió una campana contra Ptolomeo, Eumenes recibió de él el mando del Asia Menor y el encargo de que vigilara el Helesponto contra Critero y Antkpatro, al que venció al frente de un fuerte ejército. Poco después venció

también a Critero y a Neoptólemo, que se habka aliado con el primero. La muerte de Critero, muy amado de los macedones que tenka en su ejército, le atrajo la enemistad de las tropas; resistió, no obstante, las insidias de Antkgono, que le sitió en Nora, en los confines de la Capadocia. Antkgono no pudo vencerle en esta ocasión, y la muerte de Antkpatro le impulsó a proponer una paz que fué aceptada por Eumenes después de conseguir algunas mejoras en las condiciones estipuladas en favor de Olimpia, madre de Alejandro y demis miembros de la familia reinante. Pero Antkgono no se mostró propicio a aceptar tales mejoras y la lucha se renovó, marchando Eumenes a Cilicia, en el Asia Menor, y de allk a Fenicia, a la Susiana y a Persépolis, donde pasó un invierno. En dos encuentros que tuvieron lugar entre Eumenes y Antkgono, resultó vencedor este sltimo por la indiseiplina de las tropas de Eumenes, hasta que Antkgono se atrajo a los macedones que figuraban en el ejército de Eumenes, lo cuales le dieron muerte, con lo cual desapareció el sltimo sostén de la familia real de Macedonia. Segsn algunos autores, se le deben las "Ephemerides Alexandri", que , como indica su nombre, son unas notas diarias de la expedición de Alejandro, muy estimadas en la antiguedad.

Notes for Antiochus I Soter, King Of Syria:
Antiochus I SOTER (b. 324 BC--d. 262/261), king of the Seleucid kingdom of Syria, who ruled about 292-281 BC in the east and 281-261 over the whole kingdom. Under great external pressures, he consolidated his kingdom and encouraged the founding of cities.

Antiochus was the son of Seleucus I, founder of the Seleucid kingdom, and his Sogdian queen, Apama. When an invasion of nomads threatened the eastern possessions of his father's realm (between the Caspian and Aral seas and the Indian Ocean), Antiochus was appointed king (292). He restored some of the damage caused by the invaders and rebuilt three cities. Because his father still had interest in expanding the eastern trade, Antiochus dispatched a noted geographer and general to explore the environs of the Caspian Sea.

After his father's assassination in 281, Antiochus succeeded to the entire realm, but he was immediately beset by revolts in Syria (probably instigated by Egypt), by independence movements in northern Anatolia, and by a war led by Antigonus II Gonatas, ruler of the Greek cities and Macedonia. In 279, after the Gauls invaded Greece and almost ruined Antigonus, he and Antiochus signed a pact promising not to interfere with one another's territory. The next year, however, 20,000 Gauls crossed into Asia Minor, and the independent states in the northern part recruited them to harass Antiochus. He was preoccupied with the pacification of Syria until 275, when, utilizing Indian elephants brought from the east, he defeated the Gauls, who were afterward settled by their allies in Phrygia to make it a buffer state. The Ionian city-states that Antiochus had spared from the Gauls' ravages hailed him as a god and named him Soter ("Saviour"). In 275 the alliance with Antigonus, now fully in possession of Macedonia, was cemented by marriage to Antiochus' half sister.

Following the Gallic incursions in Greece, Antiochus encouraged Greek immigration to his realm and established many new cities in Asia Minor to serve as counterweights to the Gauls. He built other cities in Iran to forestall the Parthian threat to his eastern frontier, and he probably fostered a revival of Babylonian culture and religion to counteract Persian influence. At Babylon he rebuilt the ancient Esagila shrine, although he moved the city's populace to a great Seleucid city a short distance away on the Tigris River.

The aggressions of Ptolemy II of Egypt caused continuous friction with Antiochus. In 279 he lost Miletus, in southwestern Asia Minor, and in 276 the Egyptians invaded northern Syria. But Antiochus defeated his opponent, repelled him, and secured an alliance with the Egyptian ruler's half brother who ruled Cyrene. After Ptolemy married the energetic Arsinoe II, however, the war turned against the Seleucids, and about 273-272, Phoenicia and the coast of Asia Minor were lost to Egypt.

The continuous troubles in the west caused Seleucid control in the far eastern part of the empire to weaken. In 280 Antiochus made his eldest son king in the east, but he proved incompetent. Between 266 and 261 Antiochus was drawn into a war with Pergamum, and in 262 he suffered a defeat and lost additional territory. Soon afterward he died, leaving his son Antiochus II as successor.

Notes for Stratonice, Queen Of Syria:
In 294 a sensational scandal occurred at the court of Seleucus. Antiochus, his son by Apama, fell in love with his beautiful stepmother, Stratonice, and his unrequited passion affected his health. Seleucus gave him Stratonice, assigned him as commander in chief to the upper satrapies, and appointed him co-regent.

Antiochus II THEOS (b. c. 287 BC--d. 246), king of the Seleucid dominions in the Middle East, who succeeded his father, Antiochus I, in 261 BC and spent much of his reign at war with Egypt, recovering much territory in Anatolia.

Finding a willing ally in Antigonus, ruler of Macedonia, who had suffered at the hands of Ptolemy II of Egypt, Antiochus waged the Second Syrian War (259-255) against Ptolemy to avenge his father's losses. While Antigonus defeated the Egyptian fleet at sea, Antiochus reconquered much of Anatolia, including the cities of Miletus and Ephesus, and also the Phoenician coast.

In Miletus, Antiochus overthrew a tyrant after he recaptured the city, and the citizens worshiped him as a god in thanksgiving. He later organized an empire-wide cult, as suggested by his epithet, Theos (God). He also established the freedom of the other Ionian cities. Further, he continued his predecessors' policies of encouraging the foundation of cities in his realm.

For unknown reasons, around 253, Antiochus dismissed his first queen, Laodice, and married Ptolemy's daughter Berenice. At his death in 246, a civil war erupted between the two queens. He was succeeded by his son Seleucus II, while another son, Antiochus Hierax, established himself in western Anatolia.

Notes for Magas, king of Cyrene:
Cirenaica, región situada al noreste de Libia. Colonizada por los antiguos griegos, la Cirenaica se extendía originalmente a lo largo de la costa africana, desde lo que hoy es el golfo de Sidra al oeste, hasta 80 km al interior del delta del Nilo al este. La región es principalmente una meseta de unos 130 km de anchura, que desciende hacia el mar en una serie de terrazas. El clima mediterráneo, los numerosos oasis y la fertilidad de su suelo la convierten en una destacada región del norte de África. La colonización griega del territorio fue comenzada por Battus I (alrededor del siglo VII a.C.), el primero de los Battiadae, que

fundó Cirene (la Shahhat actual) alrededor del año 630 a.C. Más tarde, los griegos fundaron otras cuatro ciudades notables: Teucheira, más tarde llamada Arsinoë (hoy Tukra); Barce (hoy al-Marj); Hespérides, más tarde Berenice (la Bengasi actual) y Apollonia (hoy Susah o Marsa Susa). En el año 450 a.C. aproximadamente, la monarquía fue derrocada y Cirenaica se convirtió en una república. Fue conquistada en el año 331 a.C. por Alejandro Magno y anexionada, alrededor del año 321 a.C., por el rey egipcio Tolomeo I Sóter. Bajo el reinado de los Tolomeos, Cirenaica se conoció como la Pentápolis, en reconocimiento a sus cinco importantes ciudades. Sin embargo, su economía sufrió una progresiva decadencia durante la dinastía tolemaica. En el año 96 a.C., Tolomeo Apión legó en su testamento la región de Cirenaica a los romanos, que más tarde la convirtieron en una provincia romana. Con la posterior decadencia del Imperio Romano, la región pasó gradualmente a ser dominada por los pueblos nativos camitas (véase camita). Los árabes la invadieron en el año 641 d.C. y a principios del siglo XVIII, se convirtió en una posesión turca, finalmente conocida como Bengasi. En septiembre de 1911, con el estallido de la guerra entre Italia y Turquía, Cirenaica fue ocupada por los italianos. Al final de la guerra, en octubre de 1912, Turquía cedió Cirenaica y Trípoli (que se rebautizó como Tripolitania) a Italia, que las unificó en la colonia de Libia en 1934.

Notes for Seleucus II Callinicus, King Of Syria:
[MARINOS HASTA PERSIA.FTW]

Seleucus II CALLINICUS (d. 225 BC), fourth king (reigned 246-225) of the Seleucid dynasty, son of Antiochus II Theos.

Antiochus II repudiated his wife Laodice (Seleucus' mother) and married Ptolemy's daughter Berenice, but by 246 BC Antiochus had left Berenice in order to live again with Laodice and Seleucus in Asia Minor. Laodice poisoned him and proclaimed her son as King Seleucus II, while her partisans at Antioch made away with Berenice. Berenice's brother, Ptolemy III, who had just succeeded to the Egyptian throne, at once invaded the Seleucid realm and annexed the eastern provinces, while his fleets swept the coasts of Asia Minor. In the interior of Asia Minor Seleucus maintained himself, and when Ptolemy returned to Egypt he recovered northern Syria and the nearer provinces of Iran. At Ancyra (about 235?) Seleucus was defeated by his younger brother Antiochus Hierax, supported by Laodice, and left the country beyond the Taurus to his brother
and the other powers of the peninsula. Of these Pergamum rose to greatness under Attalus I, and Antiochus Hierax perished as a fugitive in Thrace in 228 or 227. A year later Seleucus was killed by a fall from his horse.

Escipión el Africano, Publio Cornelio (c.234-183a.C.), general romano, héroe de la segunda Guerra Psnica entre Cartago y Roma. En el 210a.C., después de servir en las legiones romanas enviadas contra el general cartaginés Ankbal en el norte de Italia, Escipión obtuvo el mando de los ejércitos romanos en Hispania con el tktulo de procónsul. Llegó allk en el 209a.C., dirigió un ataque sorpresa contra el cuartel general del Ejército cartaginés en Cartago Nova (ahora Cartagena), perdiendo los cartagineses su principal base de aprovisionamientos. En el 208a.C. expulsó al general cartaginés Asdrsbal Barca de Hispania, tras obtener la momentinea adhesión de algunos jefes militares indkgenas, como Indkbil y Mandonio, pero no pudo impedir que aquél cruzara los Pirineos para ayudar a su hermano Ankbal en el 207a.C. Escipión regresó triunfal a Roma en el 205a.C., tras conquistar la Hispania meridional, incluida Gades (la actual Cidiz), y le eligieron cónsul. Entre el 204 y el 203a.C., dirigió la invasión del norte de Ifrica, derrotando a los cartagineses en Campi Magni (región situada en la orilla de actual rko Medjerda, en Tsnez). Ankbal recibió ordenes de dejar Italia, pero Escipión obtuvo frente a él una victoria decisiva en la batalla de Zama en el 202a.C. Este triunfo, que terminó con la segunda Guerra Psnica, le proporcionó el tktulo honorkfico de Africano.
En el 190a.C., Escipión se convirtió en legado de su hermano, el cónsul de la provincia de Asia Lucio Cornelio Escipión (conocido como el Asiitico), en la guerra contra el rey Seléucida Antkoco III, a quien aplastaron en la gran victoria romana de Magnesia del Skpilo, en Asia Menor. Al regresar a Roma, su enemigo Marco Porcio Catón (Catón el Viejo) le acusó de aceptar sobornos de Antkoco. Fue absuelto de las acusaciones, pero se retiró de la vida psblica para vivir en su villa en Liternum (Campania). Escipión el Africano es considerado el general romano mis importante anterior a Julio César.

---
Scipio Africanus THE ELDER, Latin SCIPIO AFRICANUS MAJOR, in full PUBLIUS CORNELIUS SCIPIO AFRICANUS (b. 236 BC--d. 184/183, Liternum, Campania [now Patria, Italy]), Roman general noted for his victory over the Carthaginian leader Hannibal in the great Battle of Zama (202 BC), ending the Second Punic War. For his victory he won the surname Africanus (201 BC).

Family background.

Publius Scipio was born into one of the great patrician families in Rome; his father, grandfather, and great-grandfather had all been consuls in their day. In 218 BC Scipio's father, also named Publius, held the consulship in one of the most critical years of Rome's history. While with him during a cavalry engagement on the Ticinus, the young Scipio made his first appearance in history: seeing his father wounded and cut off by the enemy, he charged

forward and saved him. This anecdote is recorded by the historian Polybius on the authority of Scipio's friend Laelius, and it may well be true.

Of Scipio's boyhood or the date of his marriage to Aemilia, daughter of Aemilius Paullus, consul of 216 who fell at Cannae, nothing is known. He had two sons: Publius, who was debarred by ill health from a public career and who adopted Scipio Africanus the Younger; and Lucius, who became praetor in 174. Scipio's physical appearance is shown on some coins minted at Carthago Nova (Cartagena)--which almost certainly bear his portrait--and also probably on a signet ring found near Naples.

Military career

Scipio served as a military tribune at the disastrous Battle of Cannae in 216. He escaped after the defeat to Canusium, where some 4,000 survivors rallied; there he boldly thwarted a plot of some fainthearts to desert Rome. Then in 213 he returned to a civilian career by winning the curule aedileship; the story is told that when the tribunes objected to his candidature because he was under the legal age, he replied "If all the Roman people want to make me aedile, I am old enough." Soon family and national disaster followed: his father and uncle were defeated and killed in Spain, where the Carthaginians swept forward to the line of the Ebro (211).

In 210 the Romans decided to send reinforcements to Spain, but it is said that no senior general would undertake the task and that young Scipio offered himself as a candidate; at any rate, the Roman people decided to invest him with a command there, although he was technically a privatus (not a magistrate). This grant by the people, to a man who had not been praetor or consul, of a military command outside Italy created an important constitutional precedent. Thus
Scipio was given the chance to avenge his father's death in Spain, where he hoped not merely to hold the Carthaginian armies at bay and prevent them sending reinforcements to Hannibal in Italy but to resume his father's offensive policy, to turn back the tide of war, and to drive the enemy out of the peninsula. Such a task must have seemed fantastic in 210, but Scipio had the confidence and ability; it was achieved in the next four years.

From his headquarters at Tarraco (Tarragona) in 209, Scipio suddenly launched a combined military and naval assault on the enemy's headquarters at Carthago Nova, knowing that all three enemy armies in Spain were at least 10 days distant from the city. Helped by a lowering of the water in a lagoon, which exposed the northern wall, he successfully stormed the city. This tidal phenomenon, attributed to the help of Neptune, was perhaps caused by a sudden wind; at any
rate, it increased the troops' belief in their commander's divine support. In Carthago Nova he gained stores and supplies, Spanish hostages, the local silver mines, a splendid harbour, and a base for an advance farther south.

After training his army in new tactics, he defeated the Carthaginian commander Hasdrubal Barca at Baecula (Bailen) in Baetica (208); whereas normally the two

rear ranks of a Roman army closely supported the front line, Scipio in this battle, under a screen of light troops, divided his main forces, which fell upon the enemy's flanks. When Hasdrubal broke away, ultimately to join his brother Hannibal in Italy, Scipio wisely declined the impossible task of trying to stop him and decided rather to accomplish his mission in Spain--the defeat of the other two Carthaginian armies still there. This he brilliantly achieved in 206 at a battle at Ilipa (Alcali del Rko, near Seville), where he held the enemy's main forces while the wings outflanked them. He then secured Gades (Cidiz), thus making Roman control of Spain complete.

Elected consul for 205, Scipio boldly determined to disregard Hannibal in Italy and to strike at Africa. Having beaten down political opposition in the Senate, he crossed to Sicily with an army consisting partly of volunteers. While preparing his troops, he boldly snatched Locri Epizephyrii in the toe of Italy from Hannibal's grasp, though the subsequent misconduct of Pleminius, the man he left in command of the town, gave Scipio's political opponents cause to criticize him. In 204 he landed with perhaps 35,000 men in Africa, where he besieged Utica. Early in 203 he burned the camps of Hasdrubal (son of Gisgo) and his Numidian ally Syphax. Then, sweeping down on the forces that the enemy was trying to muster at the Great Plains on the upper Bagradas (modern Suq al Khamis, on the Majardah in Tunisia), he smashed that army by a double outflanking movement.

Battle of Zama.

After his capture of Tunis, the Carthaginians sought peace terms, but Hannibal's subsequent return to Africa led to their renewing the war in 202. Scipio advanced southwestward to join the Numidian prince Masinissa, who was bringing his invaluable cavalry to his support. Then he turned eastward to face Hannibal at the Battle of Zama; his outflanking tactics failed against the master from whom he had learned them, but the issue was decided when the Roman and Numidian
cavalry, having broken off their pursuit of the Punic horsemen, fell on the rear of Hannibal's army. Victory was complete, and the long war ended; Scipio granted comparatively lenient terms to Carthage. In honour of his victory he was named Africanus.

Late years.

In 199 Scipio was censor and became princeps Senatus (the titular head of the Senate). Though he vigorously supported a philhellenic policy, he argued during his second consulship (194) against a complete Roman evacuation of Greece after the ejection of Philip V of Macedonia, fearing that Antiochus III of Syria would invade it; his fear was premature but not unfounded. In 193 he served on an embassy to Africa and perhaps also to the East. After Antiochus had advanced into Greece and had been thrown out by a Roman army, Scipio's brother Lucius was given the command against him, Publius serving as his legate (190); together the brothers crossed to Asia, but Publius was too ill to take a personal part in Lucius' victory over Antiochus at Magnesia (for which Lucius took the name Asiagenus).

Meantime, in Rome, Scipio's political opponents, led by the elder Cato, launched a series of attacks on the Scipios and their friends. Lucius' command was not prolonged; the generous peace terms that Africanus proposed for Antiochus were harshly modified; the "trials of the Scipios" followed. On the trials the ancient evidence is confusing: in 187 an attack on Lucius for refusing to account for 500 talents received from Antiochus (as war indemnity or personal booty?) was
parried, and Africanus himself may have been accused but not condemned in 184. In any case, his influence was shaken, and he withdrew from Rome to Liternum in Campania, where he lived simply, cultivating the fields with his own hands and living on a villa (country farm) of modest size: Seneca later contrasted its small and cold bathroom with the luxurious baths of his own day. He
had not long to live, however; embittered and ill, he died in 184 or 183, a virtual exile from his country. He is said to have ordered his burial at Liternum and not in the ungrateful city of Rome, where his family tomb lay outside, on the Appian Way.

The legend of Scipio

Such was Scipio's impact upon the Romans that even during his lifetime legends began to cluster around him: he was regarded as favoured by Fortune or even divinely inspired. Not only did many believe that he had received a promise of help from Neptune in a dream on the night before his assault on Carthago Nova but that he also had a close connection with Jupiter. He used to visit Jupiter's temple on the Capitol at night to commune with the god, and later the story circulated that he was even a son of the god, who had appeared in his mother's bed in the form of a snake.

The historian Polybius thought that this popular view of Scipio was mistaken and argued that Scipio always acted only as the result of reasoned foresight and worked on men's superstitions in a calculating manner. But Polybius himself was a rationalist and has probably underestimated a streak of religious confidence, if not of mysticism, in Scipio's character that impressed so many of his contemporaries with its magnanimity and generosity. Thus, although Polybius had an intense admiration for Scipio, whom he called "almost the most famous man of all time," the existence of the legend, a unique phenomenon in Rome's history, indicates that Polybius' portrait is too one-sided.

Significance and influence.

A man of wide sympathies, cultured and magnanimous, Scipio easily won the friendship of such men as Philip, king of Macedonia, and the native princes of Spain and Africa, while he secured the devotion of his own troops. Though essentially a man of action, he may also have been something of a mystic in whom, at any rate, contemporary legend saw a favourite of Jupiter as well as a spiritual descendant of Alexander the Great. One of the greatest soldiers of the ancient world, by his tactical reforms and strategic insight he created an army that defeated even Hannibal and asserted Rome's supremacy in Spain, Africa,

and the Hellenistic East. He had a great appreciation of Greek culture and enjoyed relaxing in the congenial atmosphere of the Greek cities of Sicily, conduct that provoked the anger of old-fashioned Romans such as Cato. Indeed, he was outstanding among those Roman nobles of the day who welcomed the civilizing influences of Greek culture that were beginning to permeate Roman society. His Greek sympathies led him to champion Rome's mission in the world as protector of Greek culture; he preferred to establish Roman protection rather than direct conquest and annexation. For 10 years (210-201) he commanded a devoted army at the people's wish. His position might seem almost kingly; he had been hailed as king by Spanish tribes, and he may have been the first Roman general to be acclaimed as imperator (emperor) by his troops; but, though convinced of his own powers, he offered no challenge to the dominance of the Roman nobility ensconced in the Senate except by normal political methods (in which he showed no outstanding ability). Reaction against his generous
foreign policy and against his encouragement of Greek culture in Roman life led to his downfall amid personal and political rivalries, but his career had shown that Rome's destiny was to be a Mediterranean, not merely an Italian, power.

Scipio's influence outlived the Roman world. Great interest was shown in his life during the early Renaissance, and it helped the early humanists to build a bridge between the classical world and Christendom. He became an idealized perfect hero who was seen to have served the ends of Providence. Petrarch glorified him in a Latin epic, the Africa, which secured his own coronation as poet laureate in 1341 on the Capitol, where, some 1,500 years earlier, the historical Scipio used to commune in the temple of Jupiter.

**18446744077493076418. Darius III, King Of Persia,** born in c 380 a.c.; died in 330 BC, Bactria.

Notes for Darius III, King Of Persia:
Darius III, also called CODOMMANUS (d. 330 BC, Bactria), the last king (reigned 336-330 BC) of the Achaemenid dynasty.

Darius belonged to a collateral branch of the royal family and was placed on the throne by the eunuch Bagoas, who had poisoned the two previous kings, Artaxerxes III and Arses. When Darius asserted his independence, Bagoas also attempted his murder but was forced by the king to drink the poison himself.

In 337 Philip II of Macedon had formed the League of Corinth for the purpose of
liberating the Greek cities under Achaemenid rule and, early in 336, had sent an advance force into Asia Minor. In July, however, he was assassinated, perhaps at the instigation of Darius. In the spring of 334 Philip's son Alexander the Great crossed the Hellespont. Because Darius had made no serious preparations to resist the invasion, Alexander defeated an Achaemenid army at the Granicus and, by the following year, had won most of Asia Minor and reached Cilicia.
Darius finally advanced against him but was defeated at Issus in the autumn of 333. Darius fled from the field, abandoning his mother, wife, and children.

Darius twice sent Alexander a letter of friendship, the second time offering a large ransom for his family, cession of all the Achaemenid Empire west of the Euphrates River, and the hand of his daughter in return for an alliance. Alexander rejected both letters and marched into Mesopotamia. Darius made no attempt to resist his crossing of the Euphrates and Tigris but offered battle at Gaugamela, east of modern Mosul. On Oct. 1, 331, he was decisively defeated, and, as at
Issus, he turned his chariot and fled, although his subordinates fought on. He escaped to Ecbatana, and then, on the approach of Alexander, he retired toward Bactria but was deposed and killed by the Bactrian satrap Bessus.

Darko III Codomano (c.380-330a.C.), rey de Persia (336-330a.C.), biznieto de Darko II. Fue sustituido en el trono por el eunuco Bagoas, responsable del asesinato de Artajerjes III (que reinó en 359-338a.C.), y Arsés (que reinó en 338-336a.C.); y finalmente, Bagoas fue asesinado por el propio Darko III. Durante su reinado, Darko III condujo el Ejército persa contra las fuerzas de Alejandro Magno de Macedonia, pero fue derrotado en las batallas de Issos en el 333a.C. y Arbela (Gaugamela) en el 331. Murió asesinado por uno de sus propios sitrapas mientras huka de Arbela.

Arbela, Batalla de, también llamada batalla de Gaugamela, donde en realidad tuvo lugar, combate librado entre los ejércitos de Alejandro Magno y el monarca persa Darko III, el 1 de octubre del 331a.C. La derrota de los persas en la batalla marcó el declive de su Imperio y la apertura del este a los macedonios. Alejandro invadió el Imperio persa por segunda vez, dirigiéndose al norte desde Egipto en el 331a.C. Darko reunió un ejército de unos 250.000 hombres en la llanura de Gaugamela (a 97km de Arbela, en la actualidad Irbil, o Arbil, en Irak), situada en la alta Mesopotamia, cerca del emplazamiento de Nknive. Los persas formaron una lknea frontal de carros, apoyada por arqueros y caballerka. La infanterka estaba agrupada detris de los carros y la caballerka ligera protegka los flancos. Alejandro, con 40.000 hombres y 7.000 unidades de caballerka, acercó sus fuerzas a la posición persa a finales de septiembre. El 1 de octubre, Alejandro comenzó la batalla atacando el flanco izquierdo de los persas. Realizó pocos progresos hasta que toda la caballerka persa del flanco izquierdo entró en combate, dejando a la infanterka indefensa. Alejandro dirigió una carga de su mejor caballerka contra el centro del enemigo, a quién rompió su posición, atacó a los persas por los flancos y la retaguardia. Darko huyó y el Ejército persa comenzó a retroceder. Los hombres de Alejandro persiguieron a los persas durante 80km matando a muchos de los que hukan. Los persas perdieron entre 40.000 y 90.000 hombres en la batalla; los macedonios perdieron menos de 500.

Notes for Alexander III The Great:
Alejandro III el Magno (356-323a.C.), rey de Macedonia (336-323a.C.), conquistador del Imperio persa, y uno de los líderes militares más importantes del mundo antiguo.
Las primeras conquistas
Alejandro nació en Pela, la antigua capital de Macedonia; era hijo de Filipo II, rey de Macedonia, y de Olimpia, princesa de Epiro. Aristóteles fue su tutor, enseñándole retórica y literatura, y estimuló su interés por la ciencia, la medicina y la filosofía. En el verano del año 336a.C. Filipo fue asesinado y Alejandro ascendió al trono de Macedonia. Se encontró rodeado de enemigos y se vio amenazado por una rebelión en el extranjero. Alejandro ordenó la ejecución de todos los conspiradores y enemigos nacionales. Marchó sobre Tesalia, donde los partidarios de la independencia habían obtenido el control, y restauró el dominio macedónico. Hacia finales del verano del 336a.C. había restablecido su posición en Grecia y un congreso de estados en Corinto lo eligió comandante del Ejército griego para la guerra contra Persia. En el 335a.C. dirigió una campaña brillante contra los rebeldes tracios cerca del río Danubio. A su regreso a Macedonia, reprimió en una sola semana a los hostiles ilirios y dardanelos cerca del lago Pequeño Prespa y después se dirigió hacia Tebas, que se había sublevado. Tomó la ciudad por asalto y arrasó sus edificios, respetando sólo los templos y la casa del poeta lírico Píndaro, esclavizando a unos treinta mil habitantes capturados. La rapidez de Alejandro en reprimir la sublevación de Tebas facilitó la inmediata sumisión de los otros estados griegos.
La creación de un imperio
Alejandro comenzó su guerra contra Persia la primavera del 334a.C. al cruzar el Helesponto (actualmente Dardanelos) con un ejército de unos 365.000 hombres de Macedonia y de toda Grecia; sus oficiales jefes eran todos macedonios, incluidos Antígono (más tarde Antígono Monoftalmos), Tolomeo (más tarde Tolomeo I) y Seleuco (más tarde Seleuco I). En el río Gránico, cerca de la antigua ciudad de Troya (en la actual Turquía), atacó a un ejército de 40.000 persas y griegos hoplitas (mercenarios). Sus fuerzas derrotaron al enemigo y, según la tradición, sólo perdió 110 hombres; después de esta batalla, toda Asia se rindió. Al parecer, en su camino a través de Frigia cortó con su espada el nudo gordiano. Continuó avanzando hacia el sur y se encontró con el ejército principal persa, bajo el mando de Darío III, en Isos, en el noroeste de Siria. Según la tradición, el ejército de Darío se estimaba en 500.000 soldados, cifra que hoy es considerada exagerada. La batalla de Isos, en el año 333a.C., terminó con una gran victoria de Alejandro. Aunque cortó la retirada, Darío

huyó, abandonando a su madre, esposa e hijos a Alejandro, quien les trató con respeto debido a su condición de familia real. Tiro, un puerto marítimo muy fortificado, ofreció una resistencia obstinada, pero Alejandro lo tomó por asalto en el 332a.C. después de un asedio de siete meses. Seguidamente, Alejandro capturó Gaza y después pasó a Egipto, donde fue recibido como libertador. Estos acontecimientos facilitaron el control de toda la línea costera del Mediterráneo. Más tarde, en el 332a.C., fundó en la desembocadura del río Nilo la ciudad de Alejandría, que se convirtió en el centro literario, científico y comercial del mundo griego. Cirene, la capital del antiguo reino de Cirenaica, en el norte de África, se rindió a Alejandro en el 331a.C., extendiendo sus dominios a todo el territorio de Cartago.

En la primavera del 331a.C. Alejandro hizo una peregrinación al gran templo y oráculo de Amón-Ra, el dios egipcio del Sol a quien los griegos identificaron con Zeus. Se creía que los primeros faraones egipcios eran hijos de Amón-Ra, y Alejandro, el nuevo dirigente de Egipto, quería que el dios le reconociera como su hijo. La peregrinación tuvo éxito, y quizá confirmara la creencia de Alejandro en su propio origen divino. Dirigiéndose de nuevo hacia el norte, reorganizó sus fuerzas en Tiro y salió hacia Babilonia con un ejército de 40.000 infantes y 7.000 jinetes. Cruzó los ríos Éufrates y Tigris y se encontró con Darío al frente del ejército persa, el cual, según informes exagerados, llevaba un millón de hombres, cantidad que no impidió que sufriera una derrota devastadora en la batalla de Arbela (Gaugamela) el 1 de octubre del 331a.C. Darío huyó al igual que hizo en Isos y un año más tarde fue asesinado por uno de sus propios colaboradores. Babilonia se rindió después de Gaugamela, y la ciudad de Susa, con sus enormes tesoros, fue igualmente conquistada. Más tarde, hacia mitad del invierno, se dirigió a Persépolis, la capital de Persia. Después de robar los tesoros reales y apropiarse de un rico botín, quemó la ciudad, lo cual completó la destrucción del antiguo Imperio persa. El dominio de Alejandro se extendía a lo largo y ancho de la orilla sur del mar Caspio, incluyendo las actuales Afganistán y Beluchistán, y hacia el norte a Bactriana y Sogdiana, el actual Turkestán ruso, también conocido como Asia central. Sólo le llevó tres años, desde la primavera del 330a.C. hasta la primavera del 327a.C., dominar esta vasta zona.

Para completar la conquista del resto del Imperio persa, que en tiempos había incluido parte de la India occidental, Alejandro cruzó el río Indo en el 326a.C. e invadió el Punjab, alcanzando el río Hifasis (actual Bias); en este punto los macedonios se rebelaron, negándose a continuar. Entonces Alejandro construyó una flota y bajó navegando el Hidaspo (llamado Hydaspes por los griegos, donde derrotó al dirigente indio Poros en el 326a.C.) hacia el Indo, alcanzando su delta en septiembre del 325a.C. La flota continuó hacia el golfo Pérsico. Con su ejército, Alejandro cruzó el desierto de Susa en el 324a.C. La escasez de comida y agua durante la marcha había causado varias pérdidas y

desacuerdos entre sus tropas. Alejandro pasó aproximadamente un año organizando sus dominios e inspeccionando territorios del golfo Pérsico donde conseguir nuevas conquistas. Llegó a Babilonia en la primavera del 323a.C., pero en junio contrajo fiebres y murió. Dejó su Imperio, según sus propias palabras, "a los más fuertes" este ambiguo testamento provocó terribles luchas internas durante medio siglo.

El legado de Alejandro

Alejandro fue uno de los mayores conquistadores de la historia, destacó por su brillantez táctica y por la velocidad con la que cruzó grandes extensiones de terreno. Aunque fue valiente y generoso, supo ser cruel y despiadado cuando la situación política lo requería, aunque cometió algunos actos de los que luego se arrepintió, caso del asesinato de su amigo Clito en un momento de embriaguez. Como político y dirigente tuvo planes grandiosos; según muchos historiadores abrigó el proyecto de unificar Oriente y Occidente en un imperio mundial, una nueva e ilustrada hermandad mundial de todos los hombres. Hizo que unos 30.000 jóvenes persas fueran educados en el habla griega y en tácticas militares macedónicas y les alistó en su Ejército. Él mismo adoptó costumbres persas y se casó con mujeres orientales: con Estatira (o Stateira; que murió hacia el 323a.C.), la hija mayor de Darío III, y con Roxana (que murió hacia el 311a.C.), hija del sátrapa de Bactriana Oxiartes; además animó y sobornó a sus oficiales para que tomaran esposas persas. Poco después murió. Alejandro ordenó que las ciudades griegas le adoraran como a un dios. Aunque probablemente dio la orden por razones políticas, según su propia opinión y la de sus contemporáneos, se le consideraba de origen divino. Tras su muerte, la orden fue en gran parte anulada.

Para unificar sus conquistas, Alejandro fundó varias ciudades a lo largo de su marcha, muchas se llamaron Alejandría en honor a su persona; estas ciudades estaban bien situadas, bien pavimentadas y contaban con buenos suministros de agua. Eran autónomas pero sujetas a los edictos del rey. Los veteranos griegos de su Ejército al igual que soldados jóvenes, negociantes, comerciantes y eruditos se instalaron en ellas y se introdujo la cultura y la lengua griega. Así, Alejandro extendió ampliamente la influencia de la civilización griega y preparó el camino para los reinos del periodo helenístico y la posterior expansión de Roma.

iii. Amestris, Princess Of Persia, born in c 355 a.c; married Lysimachus, king of Thrace; born in c. 360 BC; died in 281 BC Ciropedion (Frigia).

Notes for Lysimachus, king of Thrace:
Lisimaco. Uno de los treinta y cuatro generales que fueron admitidos en el
reparto de la herencia de Alejandro, siéndole adjudicadas la Tracia y las naciones costeras del Ponto Euxino. Era hombre de nacimiento obscuro, a quien su valor y talentos militares habían destacado en el brillante plantel de caudillos, nacido de las s campañas de Alejandro. Pronto se hizo dueño de la mayor parte de Tracia, creando para sí un reino en el que levantó la ciudad a la que dió su nombre (309 a. de J. C.). Al estallar en 3I5 la guerra entre los generales, en que los reinantes en Asia tuvieron como objetivo, que no llegaron a realizar, la conquista de Grecia, Lisimaco se alió con Ptolomeo, Casandro y Seleuco, contra Antígono y Demetrio, por lo cual el primero de éstos trató de crearle dificultades en la retaguardia, ayudando con tropas y recursos a Seuthes, rey de Tracia, que se había levantado contra él. El primer año de guerra fué desgraciado para Antígono, que sufrió una derrota naval, perdió Chipre, que le quitó Ptolomeo, y vió invadido el Peloponeso por Casandro,
sufriendo también desastres en Argos y Orcomeno; se unió a éstos la defección de Alejandro, hijo de Polisperco, que se vendió a Casandro y combatió contra su propio padre En el año siguiente, Demetrio, hijo de Antígono, fué batido por Ptolomeo y Seleuco cerca de Gaza, pero Antígono acudió con grandes fuerzas en auxilio de su hijo, y Ptolomeo tuvo que retirarse a Egipto, que la inundación del Nilo hacía entonces inabordable. La guerra se mantuvo durante cuatro años sin éxitos definitivos, agobiando y esquilmando a los pueblos, pero a la larga favoreció a Antígono, que, por la paz obtuvo Siria, Judea, Fenicia y hasta aspiró a Babilonia, quedando Casandro como rey de Macedonia. Esta paz no podía ser definitiva, y la Asamblea de Corinto demostró a Casandro que por sí solo no podía luchar contra Antígono y su hijo, por lo cual se puso de acuerdo con Lsimaco e invitaron a una nueva liga a Seleuco y Ptolomeo. Se concertó esta alianza en 302 a de Jesucristo. Lisimaco pasó a Asia, sometiendo Frigia, Iliria y Licaonia, mientras los demás aliados atacaban por otros frentes. No acertaron sin embargo, a impedir la unión de Antígono y su hijo Demetrio, y habiéndose encontrado los dos ejércitos rivales en Ipso (Alta Frigia) (30I antes de J. C.), se entabló la batalla, en la que al principio Antígono, ya de ochenta años, no mostró su audacia acostumbrada, y la temeraria impetuosidad de su hijo Demetrio le llevó muy lejos en la persecución de la caballería enemiga, encontrándose al volver con la barrera infranqueable de los elefantes de Seleuco. Parte de la infantería de Antigono se pasó a éste, y trajo como consecuencia el que Antígono se hiciera matar luchando heroicamente y Demetrio lograra retirarse con cinco mil infantes y cuatro mil caballos. En la paz, Seleuco, principal autor del triunfo, y Lisimaco fueron los más beneficiados, tocándole al último toda el Asia Menor hasta el

Tauro. De las múltiples partes hechas del Imperio de Alejandro ya no quedaban más que cuatro, que luego se redujeron a tres. Demetrio se vió abandonado hasta de Atenas, por él tan amada, la cual le envió un diputado a notificarle que no recibiría más reyes entre sus muros; le sirvió de consuelo el ver pronto surgir la discordia entre sus expoliadores, y Seleuco, que necesitaba de la flota y las costas de Fenicia, en poder de Demetrio, hizo a éste proposiciones que le aproximaron al más poderoso de los sucesore de Alejandro. Se formó una nueva coalición contra él, y Lisimaco atacó Macedonia por el este, Pirro por el oeste y Ptolomeo desembarcó en Grecia, llamando a sus pueblos a la libertad (288 a. de J. C.). Antípatro, yerno de Lisimaco, rompió con él por haberle reclamado la Macedonia oriental, y el suegro dio muerte al yerno y hasta puso en prisión perpetua a su propia hija. Lisimaco repudió a su esposa, la princesa persa Amastris, para casarse con Arsinoe, hija de Ptolomeo. Poseído de una verdadera pasión homicida no respetó ni a su propia familia haciendo matar a los dos hijos anteriores de Amastris y su propio hijo Agatocles, víctima de una acusación de su madrastra. Ofreció tambien mil talentos a Seleuco para que se desembarazase de su rival Demetrio, a quien quél había cogido prisionero, pero no pudo lograr su intento ya que Seleuco trató con generosidad al vencido. En 287 Pirro y Lisímaco se repartieron Macedonia, pero poco después éste expulso a aquél, aumento de su poder le trajo la desgracia. La viuda de Agatocles buscó refugio al lado de Seleuco soliviantándole contra Lisimaco; la guerra estalló, y éste, que ya tenía setenta y cuatro años, fué vencido y muerto en Ciropedion (Frigia), en 28I a. de J. C, concluyendo con él un Imperio y quedando ya sólo dos con la herencia de Alejandro.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 2, Pg 1002

---

Lysimachus (b. c. 360 BC--d. 281), Macedonian general, satrap (provincial governor), and king who, as one of the diadochoi ("successors") to Alexander the Great, came to rule strategic parts of the divided Macedonian Empire.

Lysimachus was one of Alexander's bodyguards during the conquest of Asia, and, in the distribution of satrapies that followed Alexander's death (323), he was assigned to govern Thrace. Occupied there for many years in wars against the local peoples, Lysimachus took little part in the struggles among Alexander's other successors in Greece and Asia. Not until 302, when he bore the brunt of the campaign that ended in the overthrow of the successor Antigonus Monophthalmus, king of Asia, at the Battle of Ipsus (301), did Lysimachus emerge as a power of the first

rank. Through this victory he added the greater part of Asia Minor to his European possessions and began to consolidate his power in both areas against the threat posed by Antigonus' son, Demetrius I Poliorcetes. In 285 Lysimachus drove Demetrius from Macedonia, which had been taken by Demetrius in 294.

The last period of Lysimachus' life was darkened by the intrigues of his third wife, Arsinoe II, daughter of Ptolemy I Soter, king of Egypt. In order to gain the succession for her own sons, she had her husband execute his eldest son, Agathocles, on a charge of conspiring with Seleucus I, the Syrian king, to commit treason. During the disorders that followed Agathocles' death, Seleucus seized the opportunity to invade Asia Minor, where he killed Lysimachus in the decisive battle of Corupedium in Lydia, in 281.

Notes for Seleucus I, General of Alexander III, The Great:
[MARINOS HASTA PERSIA.FTW]

Seleucus I NICATOR (b. 358/354 BC, Europus, Macedonia--d. August/September 281, near Lysimachia, Thrace), Macedonian army officer, founder of the Seleucid kingdom. In the struggles following the death of Alexander the Great, he rose from governor of Babylon to king of an empire centring on Syria and Iran.

Early life and ascent to power

Seleucus was the son of Antiochus, a general of Philip II of Macedonia, the father of Alexander the Great. Seleucus participated in the conquest of the Persian empire as one of Alexander's officers, and in 326 he commanded the Macedonian infantry against King Porus of India in battle on the Hydaspes River. In 324 Alexander ordered a mass wedding ceremony at Susa (in Persia)

to put into practice his ideal of uniting the peoples of Macedonia and Persia. On this occasion Seleucus married Apama, the daughter of Spitamenes, the ruler of Bactria. Of all the Macedonian nobles, he was the only one who did not repudiate his wife after Alexander's death.

After Alexander died (323), Seleucus was given the command of the hetairoi (companions) cavalry and took part in the regent Perdiccas' campaign to oust Ptolemy, the governor (satrap) of Egypt. In Egypt, however, he joined with others in the assassination of Perdiccas. When the empire was divided in 321, he was given the governorship (satrapy) of Babylon. At the same time Antigonus Monophthalmus (the One-Eyed) had been placed in command of a campaign against Eumenes of Cardia, a supporter of Perdiccas. In 317 Seleucus aided Antigonus but, after Eumenes' execution in 316, Antigonus demanded that Seleucus give an accounting of the income from his satrapy. Seleucus refused to give the accounting and escaped capture by fleeing to Ptolemy in Egypt.

From 316 to 312 Seleucus remained in Ptolemy's service. He took the initiative in forging a coalition among Ptolemy, Lysimachus (the ruler of Thrace), and Cassander (who laid claim to Macedonia) against Antigonus, whose desire to become the ruler of the whole of Alexander's empire was a threat to them all. In the resulting coalition war (315-311), Seleucus was made one of Ptolemy's generals and jointly with him commanded the Ptolemaic troops that defeated the force of Demetrius, the son of Antigonus, at the Battle of Gaza in southern Syria
(312).

Seleucus once again turned his attention to returning to Babylonia, and in August 312 he was able to reconquer Babylon with only a small army. This conquest marked the beginning of the Seleucid era, which is dated Dios 1 (Oct. 7), 312, in the Macedonian calendar and Nisan 1 (April 3), 311, in the Babylonian calendar. Antigonus ordered Nicanor, one of his generals, to invade Babylonia from the east and his son Demetrius to attack it from the west, but they failed to oust Seleucus. When Antigonus made peace with his enemies in 311, Seleucus was not included.

Consolidation of gains.

Little is known about the next few years of Seleucus' reign; he presumably used them to consolidate his gains. In the year 305 he followed the example of the other successors and assumed the title of king (basileus). He embarked on an expansion of his kingdom throughout the Iranian east (the upper satrapies) as far as India, but his advance was eventually halted by Candragupta, the founder of the Maurya dynasty of India. In a pact concluded by the two potentates, Seleucus agreed to territorial concessions in exchange for 500 elephants.

Developments in the west also caused Seleucus to end his campaign in India (303). He had joined a coalition that Ptolemy, Cassander, and Lysimachus had once again formed against Antigonus and Demetrius. In the winter of 302 Seleucus was back in Asia Minor and, together with Cassander and

Lysimachus, defeated Antigonus in the Battle of Ipsus (301). The victors divided the lands of their enemy among them, with Seleucus being given Syria. The southern part
of Syria, Coele Syria, had in the meantime been occupied by Ptolemy, who had not taken part in the war. This gave rise to the long series of Syrian wars between the Seleucids and Ptolemies. For the time being, however, Seleucus declined to enforce his claim; he merely transferred his capital from Seleucia on the Tigris to the newly founded city of Antioch on the Orontes (301-300).

Ptolemy, anxious to improve relations with Lysimachus, had given him his daughter Arsinoe in marriage. To provide a counterbalance, Seleucus asked for the hand of Stratonice, the daughter of Demetrius, and in 298 the wedding was held with much pomp at Rhosus in Syria. Soon, however, Seleucus' territorial demands (e.g., the surrender of Cilicia and the cities of Tyre and Sidon) ruptured the previously harmonious relationship with Demetrius.

In 294 a sensational scandal occurred at the court of Seleucus. Antiochus, his son by Apama, fell in love with his beautiful stepmother, Stratonice, and his unrequited passion affected his health. Seleucus gave him Stratonice, assigned him as commander in chief to the upper satrapies, and appointed him co-regent.

In 285 Seleucus took Demetrius prisoner, thus foiling his attempt to conquer Asia, and interned him in Apamea, where he died in 283. Subsequently, Seleucus intervened in dissensions in the house of Lysimachus, who had had his son Agathocles assassinated. In February 281 Lysimachus fell in a battle against Seleucus at Corupedium, and Seleucus gained control of Lysimachus' kingdom. He was now near his goal of reestablishing Alexander's empire. He crossed over to Europe to enter Macedonia, but at the end of August or beginning of September 281, he was murdered by Ptolemy Ceraunus, who had been passed over by his father, Ptolemy, as successor to the Egyptian throne. Seleucus' son and successor, Antiochus I, entombed his father's ashes in Seleucia, initiated (probably) the posthumous cult of his father, and ordered his veneration as Zeus Nicator.

Seleucus was an energetic ruler, creating the Seleucid Empire, which gained its greatest expansion under his rule. He took great interest in the administration of his territories and founded many new cities. He also encouraged scientific research: Patrocles explored the Caspian Sea and Megasthenes the Ganges River. A bronze bust--a very impressive likeness of him, conveying his imposing personality--was found in Herculaneum (in Italy) and is now in Naples.

Notes for Demetrius I Poliorcetes, King Of Macedonia:
Demetrius I POLIORCETES (b. 336 BC, Macedonia--d. 283, Cilicia [now in Turkey]), king of Macedonia from 294 to 288 BC.

Demetrius was the son of Alexander the Great's general Antigonus I Monophthalmus, in whose campaigns he commanded with distinction and whose empire, based in Asia, he attempted to rebuild. Unsuccessful against Ptolemy I Soter, satrap of Egypt, and against the Nabataeans, he liberated Athens from the Macedonian Cassander in 307 BC and in 306 decisively defeated Ptolemy at Salamis (Cyprus). From his unsuccessful siege of Rhodes (305) he won the title
Poliorcetes ("the Besieger"). Recalled by his father from Greece, he fought in the Battle of Ipsus, in which his father was killed and lost much of his empire (301). Demetrius kept a foothold in Greece and in 294 reoccupied Athens and established himself as king of Macedonia, but in 288 he was driven out by his rivals Lysimachus and Pyrrhus. He finally surrendered to Seleucus I Nicator in Cilicia (285) and died there (283). He is the subject of one of Plutarch's Lives.

Capadocia. Una de las mis extensas regiones del Asia Menor, comprendida entre los rkos Halys y Eufrates, sus lkmites variaron mucho en las diversas épocas. Estaba fksicamente, separada en dos regiones por una lknea, trazada por el monte Tauro, desde Derbe e Iconium hasta el Ponto Euxino, quedando a un lado la Armenia Menor y al otro la Capapadocia propiamente dicha. Sus habitantes sufrieron, sucesivamentee el yugo de Teglaffalasar (II20 anos a. de J. C.), de los Medos y de Ciro; después fueron gobernados por sitrapas que, con frecuencia, se independizaban. Dividida, posteriormente, en Capadocia del Ponto y del Tauro, la primera conservó la independencia, pero la segunda perteneció sucesivamente a Eumenes, Antkgono y, después de Ipso, a los Seleucidas. Ariarates I de Armenia la unió a su reino y asi permaneció bajo todos sus sucesores que llevaban su mismo nombre hasta que al VII le destronó Mitridates, que puso en su lugar a Ariobatzanes, despojado a su vez por Tigranes. El ano 17 de nuestra era Tiberio hizo de Capaddocia una provincia romana bajo la ptotección del legado propetor de Siria.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 1, pg, 147 y 316

Cappadocia, ancient district in east-central Anatolia in the rugged plateau north of the Taurus Mountains, important as a Roman ally, client, and, later, province. The earliest records of Cappadocia date from the 6th century BC, when its feudal nobility was dominated by a Persian satrapy and Zoroastrian temple cults were widespread. The area retained its Persian character until the time of the Roman occupation. Alexander the Great bypassed Cappadocia but sent troops under his
general Perdiccas (322 BC). Cappadocia fell into the dynastic orbit of the Seleucids until the Roman victory at Magnesia (190 BC). Afterward, it maintained a faithful allegiance to Rome despite the Pontic and Armenian attacks of the 1st century BC. Retained as a client state by Rome until annexed by Tiberius in AD 17, Cappadocia, with command over strategic passes in the Taurus, remained a bulwark of the Byzantine Empire until the 11th century.

Notes for Antiochus II Theos, King Of Syria:
[MARINOS HASTA PERSIA.FTW]

Antiochus II THEOS (b. c. 287 BC--d. 246), king of the Seleucid dominions in the Middle East, who succeeded his father, Antiochus I, in 261 BC and spent much of his reign at war with Egypt, recovering much territory in Anatolia.

Finding a willing ally in Antigonus, ruler of Macedonia, who had suffered at the hands of Ptolemy II of Egypt, Antiochus waged the Second Syrian War (259-255) against Ptolemy to avenge his father's losses. While Antigonus defeated the Egyptian fleet at sea, Antiochus reconquered much of Anatolia, including the cities of Miletus and Ephesus, and also the Phoenician coast.

In Miletus, Antiochus overthrew a tyrant after he recaptured the city, and the citizens worshiped him as a god in thanksgiving. He later organized an empire-wide cult, as suggested by his epithet, Theos (God). He also established the freedom of the other Ionian cities. Further, he continued his predecessors' policies of encouraging the foundation of cities in his realm.

For unknown reasons, around 253, Antiochus dismissed his first queen, Laodice, and married Ptolemy's daughter Berenice. At his death in 246, a civil war erupted between the two queens. He was succeeded by his son Seleucus II, while another son, Antiochus Hierax, established himself in western Anatolia.

The primary source in English of knowledge about the members of the Seleucid dynast is Edwin Robert Bevan's The House of Seleucus, 2 vol. (1902; reprinted 1966).

Notes for Publius Cornelius Scipio (Consul 218):
Scipio, Publius Cornelius (d. 211 BC), Roman general, consul in 218 BC and later proconsul, during the Second Punic War between Rome and Carthage.

In 218 he sailed with an army to southern Gaul to prevent Hannibal the Carthaginian from advancing on Italy. Having arrived too late, he himself returned to Italy but boldly sent his army on to Spain under his elder brother Gnaeus Cornelius Scipio Calvus to check the Carthaginian forces still there. In northern Italy he hoped to fight delaying actions against Hannibal along the tributaries of the Po River. Being repulsed and wounded at the Ticinus, he retired to the Trebia, where he was joined by his colleague Tiberius Sempronius Longus, who insisted on fighting and was defeated (December 218).

In 217 Scipio was sent as proconsul to Spain; in a battle near the Ebro River he and his brother smashed Hasdrubal's attempt to break through to Italy (215), and by 212 they had captured Saguntum (modern Sagunto). From his base they could move farther south; advancing separately, however, they both met disaster and death--Publius on the upper Baetis (Guadalquivir), Gnaeus in the hinterland of Carthago Nova (Cartagena), in 211. In spite of this final defeat, they had for
seven years denied Hannibal the resources of Spain.

Publius was the father of Scipio Africanus the Elder.

Notes for Spitamenes, Satrap Of Bactria (329-328):
SATRAP = the governor of a province in ancient Persia.

Bessus was in Bactria raising a national revolt in the eastern satrapies with the usurped title of Great King. Crossing the Hindu Kush northward over the Khawak Pass (11,650 feet), Alexander brought his army, despite food shortages, to Drapsaca (sometimes identified with modern Banu [Andarab], probably farther north at Qunduz); outflanked, Bessus fled beyond the Oxus (modern Amu Darya), and Alexander, marching west to Bactra-Zariaspa (modern Balkh [Wazirabad] in Afghanistan), appointed loyal satraps in Bactria and Aria. Crossing the Oxus, he sent his general Ptolemy in pursuit of Bessus, who had meanwhile been overthrown by the Sogdian SPITAMENES. Bessus was captured, flogged, and
sent to Bactra, where he was later mutilated after the Persian manner (losing his nose and ears); in due course he was publicly executed at Ecbatana.

From Maracanda (modern Samarkand) Alexander advanced by way of Cyropolis to the Jaxartes (modern Syrdarya), the boundary of the Persian Empire. There he broke the opposition of the Scythian nomads by his use of catapults and, after defeating them in a battle on the north bank of the river, pursued them into the interior. On the site of modern Leninabad (Khojent) on the Jaxartes, he founded a city, Alexandria Eschate, "the farthest." Meanwhile, SPITAMENES had raised all Sogdiana in revolt behind him, bringing in the Massagetai, a people of the Shaka confederacy. It took Alexander until the autumn of 328 to crush the most determined opponent he encountered in his campaigns. Later in the same year he attacked Oxyartes and the remaining barons who held out in the hills of Paraetacene (modern Tadzhikistan); volunteers seized the crag on which Oxyartes had his stronghold, and among the captives was his daughter, Roxana. In reconciliation Alexander married her, and the rest of his opponents were either won over or crushed.

Bactria,

also called BACTRIANA, or ZARIASPA, ancient country lying between the mountains of the Hindu Kush
(Paropamisus) and the Amu Darya (ancient Oxus River) in what is now part of Afghanistan, Uzbekistan, and Tajikistan. Bactria was especially important between about 600 BC and about AD 600, serving for much of that time as a meeting place not only for overland trade between East and West but also for the crosscurrents of religious and artistic ideas. Bactria's capital was Bactra, also called Bactra-Zariaspa (probably modern Balkh, ancient Vahlika). Bactria was a fertile country, and a profusion of mounds and abandoned water channels testifies to its ancient prosperity.

The first written records of Bactria are Achaemenian. The region was probably subdued by Cyrus II the Great in the 6th century BC and remained an Achaemenian province for the next 200 years. When Alexander the Great defeated Darius III, the Bactrian satrap, Bessus, tried unsuccessfully to

organize resistance in the East. Upon the death of Alexander (323 BC) Bactria passed under the rule of Seleucus I Nicator.

About 250 BC either Diodotus, the Seleucid satrap of Bactria, or his son of the same name founded an independent kingdom. The Seleucid king Antiochus III the Great defeated their successor, the usurper Euthydemus, but continued to recognize his independence. Euthydemus' successors advanced into the Hindu Kush and northwestern India, where they established the Indo-Greek branch of the kingdom. At the height of their power they ruled almost all of what is now Afghanistan, parts of Soviet Central Asia, and a large area in Pakistan. Consequently, Hellenistic influence on the culture of Central Asia and northwestern India has been considerable. Hellenistic traditions are especially evident in art, architecture, coinage, and script.

Sometime before 128 BC Greek rule north of the Hindu Kush was challenged by a people known to the Chinese as Yüeh-chih. By 128 BC the Greeks had become Yüeh-chih tributaries, and soon afterward the Yüeh-chih occupied Bactria. They probably were an Iranian people and included the Tochari, whose name was subsequently applied to the whole area (Tocharian kingdom). In the 1st century AD the new rulers of Bactria extended their rule into northwestern India; that movement is associated with a group known as the Kushans, under whom the country became a centre of Buddhism. In the latter half of the 4th century the Hephthalites (originally a tribe of the Yüeh-chih) settled in Bactria, and for almost two
centuries they engaged in wars with the Sasanians. In AD 565 the western Turks overthrew the Hephthalites and ruled the area until the Muslim conquest in the middle of the 7th century.

Notes for Antigonus I Monophtalmus:
Antigonus I MONOPHTHALMUS ("One-Eyed"), also called ANTIGONUS I CYCLOPS (b. 382 BC--d. 301, Ipsus, Phrygia, Asia Minor [now in Turkey]), Macedonian general under Alexander the Great who founded the Macedonian dynasty of the Antigonids (306-168 BC), becoming king in 306. An exceptional strategist and combat leader, he was also an astute ruler who cultivated the

friendship of Athens and other Greek city-states.

Military campaigns.

In 333 Alexander had appointed Antigonus satrap of Phrygia, and upon Alexander's death he also received the governorship of Pamphylia and Lycia from the regent of the Macedonian empire, Perdiccas. He then formed an alliance against Perdiccas with Antipater, the governor of Macedonia, and with Ptolemy of Egypt, Lysimachus of Thrace, and Craterus (all of whom had served under Alexander). Perdiccas was murdered, and Antipater became regent of the empire. In 321 Antipater appointed Antigonus commander in chief of his army in Asia and sent him against Eumenes, the satrap of Cappadocia and an adherent of Perdiccas. Antigonus defeated Eumenes and then besieged him unsuccessfully in the mountain fortress Nora. Polyperchon succeeded Antipater as regent, and Antigonus joined forces against him with Cassander (Antipater's son), Ptolemy, Lysimachus, and Eumenes in 319. When Eumenes, his rival in Asia Minor (Anatolia), went over to Polyperchon, Antigonus defeated him with the aid of Seleucus and Peithon (the satraps of Babylonia and Media, respectively)
at Gabiene. Then, wishing to eliminate all possible rivals, Antigonus had both Eumenes and Peithon executed; Seleucus escaped to Egypt.

Antigonus was now in complete control of Asia Minor, but Ptolemy, Lysimachus, Cassander, and Seleucus allied themselves against him in the first coalition war (315-311) in an attempt to thwart his plan of reuniting Alexander's empire. Antigonus occupied Syria and proclaimed himself regent. In order to win the support of the Greek city-states, whose resistance to subjugation presented the chief stumbling block to the formation of a Hellenistic monarchy, he announced to his assembled army that all the Greeks should be free, autonomous, and ungarrisoned. This political slogan was to be sounded again and again--almost immediately by Ptolemy and for a final time by the Romans in 196. With the aid of his officers in Greece, Antigonus drove out Cassander's Macedonian forces of occupation there and formed the island cities in the Aegean into the League of the Islanders, preparatory to his invasion of Greece. His ally, the city of Rhodes, furnished him with the necessary fleet.

While he was engaged in conquering Caria, his son, Demetrius Poliorcetes, was defeated at Gaza by Ptolemy and Seleucus (312). Seleucus returned to his former province, Babylonia. In view of this new threat from the East, Antigonus decided to make peace with all of his adversaries except Seleucus. All of the diadochoi (Alexander's successors) confirmed the existing boundaries and the freedom of the Greek cities. Antigonus, no longer regent but merely strategos (officer in charge) of the whole of Asia, was to rule in Syria and from the Hellespont to the Euphrates.

Activities in Greece.

Then Ptolemy attacked Cilicia, and the second coalition war (310-301) against Antigonus broke out. In Greece in 307, Antigonus' son Demetrius ousted Demetrius of Phaleron, Cassander's governor of Athens, and reestablished the

old Athenian constitution. The grateful Athenians honoured Antigonus and Demetrius as divine saviours (theoi soteres). Cassander's influence in Greece was now broken, and in 306 Demetrius defeated Ptolemy's fleet near Salamis on the island of Cyprus and conquered the island. This victory gave Antigonus control of the Aegean, of the eastern Mediterranean, and of all of the Near East except Babylonia. The assembled army proclaimed him king, and his friends adorned him with the diadem. For his part, he appointed Demetrius king and co-regent and sent him the diadem. This was to become a traditional ceremony in the Hellenistic monarchy.

In 305, after Antigonus had vainly attacked Egypt, Ptolemy also assumed the title of king, and Cassander, Lysimachus, and Seleucus followed suit. The partition of Alexander's empire into five states had now been formally established. In 305 Antigonus sent Demetrius to conquer Rhodes, which had refused him armed support against Ptolemy. After a year's unsuccessful siege he concluded a peace treaty and an alliance with the island state, guaranteeing it autonomy and
neutrality in his conflicts with Ptolemy. This concession was necessary because in the meantime Cassander had invaded Attica and was besieging Athens. Demetrius drove him out of central Greece, and the Athenians bestowed on him a new religious honour, synnaos ("having the same temple") of the temple of the goddess Athena.

In 303 he occupied Corinth, Sicyon, and Argos in the Peloponnese, and Achaea, Elis, and almost all of Arcadia joined his side. In 302 Antigonus and Demetrius crowned their success by renewing the pan-Hellenic league, which Philip II of Macedonia had formed in 337. Ambassadors from all the Hellenic states--with the exception of Sparta, Messenia, and Thessaly--elected Antigonus and Demetrius protectors of the new league at Corinth. It was to be an "eternal" treaty, extending to the descendants of the kings. Each member state furnished a contingent of troops for a league army that was commanded by the kings or their deputies. The
league was to ensure a general peace in Hellas, but first and foremost it was to aid Antigonus against Cassander.

Final campaigns.

Now at the zenith of his power, Antigonus demanded Cassander's unconditional submission. He wanted possession of Macedonia, the native land of his dynasty, and to establish his dominion over Alexander's former empire. The other diadochoi, however, warned by Cassander's fate, now joined forces to attack the omnivorous old man. From Babylonia, Seleucus invaded Asia Minor, Ptolemy attacked Syria, and Lysimachus moved into the western part of Asia Minor. Docimus, the regent of Phrygia, and Phoenix, the strategos of Lycia, deserted Antigonus. He, in turn, recalled Demetrius, left his capital city, Antigoneia (which he had founded on the Orontes in 306), and crossed the Taurus Mountains. Lysimachus, who was waiting for Seleucus, avoided an engagement. In vain Antigonus sent a corps of raiders into Babylonia in order to divide his

enemies' forces. In 301 the united armies of Lysimachus and Seleucus engaged the forces of Antigonus and Demetrius at Ipsus in Phrygia. Demetrius made the error of pursuing the enemy's cavalry too far, and as a result Antigonus, age 80, lost the battle and his life.

Antigonus had been an excellent strategist who, until then, had never lost a battle. He had a genuine admiration for Greek civilization. He founded several cities, especially in Asia Minor, and united several small communities into unitary, large centres: Lebedus (Lebedos) and Teos, for example. Several Greek artists graced his court; Apelles painted his portrait in profile because of his missing eye (the cause of which is unknown).

Notes for Antipater, Regent of Macedonia (334-23):
Antkpatro (c.398-319a.C.), general macedonio, lugarteniente de Alejandro Magno. Cuando Alejandro comenzó su victorioso avance a través de Asia Menor contra los persas en el 334a.C., dejó a Antkpatro como snico encargado de los asuntos de Macedonia. Antkpatro cumplió con los deberes de su cargo con gran habilidad, al reprimir insurrecciones en Tracia y Esparta y apoyar a Alejandro con nuevos escuadrones desde su territorio. En el reparto del Imperio de Alejandro tras su muerte en el 323a.C., el gobierno de Macedonia fue otra vez asignado a Antkpatro. Pronto fue llamado para defender Macedonia en la guerra de Lamka contra la alianza de los estados griegos que intentaban recuperar su independencia. En un principio cosechó derrotas pero en el 322a.C., con la ayuda de su yerno Cratero, sofocó a los rebeldes griegos.
A la guerra de Lamka le siguió otra contra el general macedonio Perdicas, a quien Antkpatro también venció. Después de la muerte de Perdicas en el 321a.C., Antkpatro fue nombrado para ejercer la regencia suprema de Macedonia y para proteger a los hijos de Alejandro. Realizó una nueva división del reino pero cuando murió, poco tiempo después, dejó la regencia a su companero Poliperconte y dio un cargo subordinado a su hijo Casandro, quien se convirtió en el 310a.C. en rey de Macedonia.

Antipater (b. c. 397 BC--d. 319), Macedonian general, regent of Macedonia (334-23) and of the Macedonian Empire (321-319) whose death signalled the end of centralized authority in the empire. One of the leading men in Macedonia

at the death of Philip II in 336, he helped to secure the succession to the Macedonian throne for Philip's son, Alexander the Great, who upon departure for the conquest of Asia (334) appointed Antipater regent in Macedonia with the title of general in Europe. Antipater's main task was to hold the northern frontiers against hostile tribes and to keep order among the Greek states. He ruled Greece by cooperating with the League of Corinth but was unpopular because he supported oligarchic governments. The settlement of the satrapies (provinces) of the Macedonian Empire by the new regent, Perdiccas, at Babylon in 323, immediately after Alexander's death, left Antipater in control of Macedonia and Greece, though as former regent his status in relation to Perdiccas was not clearly defined. Antipater then took the side of the Macedonian generals Antigonus, Seleucus, and Ptolemy, who were opposed to the claims of Perdiccas. By the settlement at Triparadisus, Syria (321), after Perdiccas'
death, Antipater became regent of the Macedonian Empire for the two kings: the intellectually retarded Philip III Arrhidaeus and the infant Alexander IV.

POLITICAL DEVELOPMENTS

Alexander's successors.

Nothing shows the personality of Alexander the Great more clearly than the way in which people who had seemed pygmies at his side now became leaders of the world he had left behind. Blood still counted: the only male relative, a mentally impaired, illegitimate son of Philip, was proclaimed king as Philip III Arrhidaeus (c. 358-317), together with Rhoxane's son Alexander IV (323-310), born after his father's death in August; both were mere figureheads. For the moment Antipater was confirmed in authority in Macedon and Greece. At Babylon power was shared by two senior officers, Perdiccas (c.
365-321) and Craterus (c. 370-321). By common consent, Alexander's ongoing plans were abandoned. His generals had to be content with the office of governor. Antigonus Monophthalmos ("The One-eyed"; c. 382-301), like Antipater, was not in Babylon at the time of Alexander's death in 323. For almost 10 years he had been governing Phrygia and had shown himself a brave soldier and ompetent administrator. His firmness and tact were popular with the Greek cities. Of the generals in Babylon, it was Ptolemy (c. 367/366-283) who calculated from the first that the empire would not hold together. He secured for himself the governorship of Egypt, where he aspired to set up an independent kingdom. Lysimachus (c. 360-281) was given the less attractive assignment of governing Thrace. Two of the others, noted for their physical and military prowess, Leonnatus and Seleucus, waited on events. The soldiers discounted Eumenes of Cardia, who bore the main responsibility for civil administration, but he knew more about the empire than anyone else.

An uprising by Greek mercenaries who had settled in Bactria but wanted to return to Greece was crushed. Trouble in Greece, led by the Athenians and aimed at liberating the cities from Macedonian garrisons, was tougher to control. Sparta refused to participate, as did the islands, but a coalition of Athens with Argos, Sicyon, Elis, and Messenia, supported by Boeotians, Aetolians, and Thessalians, was a formidable challenge to Antipater's authority. For a time Antipater was hard-pressed in Lamia (the war of 323-322 is known as the Lamian War). Leonnatus intervened, nominally in support but in fact ambitious to usurp Antipater's power; he was killed in action, however. In the end Antipater won, Athens capitulated, and Demosthenes (the voice and symbol of anti-Macedonian feeling) committed suicide. Antipater reestablished Macedonian authority autocratically, with no nonsense about a "free" League of Corinth.

The story of the jockeying for power during the next two decades or so is inordinately complex. First Perdiccas, governing in the name of the two kings with the support of Eumenes, was charged with personal ambition and was assassinated. The armies made Antipater regent (Craterus had been killed in battle), and Antigonus, with Antipater's son Cassander (c. 358-297) as second-in-command, was placed in charge of the armies in Asia. Ptolemy was secure in Egypt; Seleucus (c. 358-281), governor of Babylon, and Lysimachus in Thrace continued to watch and wait; and Eumenes, a non-Macedonian with a fortune behind him, could claim to represent the kings against the ambitions of generals and governors.

Then, in 319, Antipater died and was succeeded by a senior commander but maladroit politician named Polyperchon, who tried to win the Greeks of the mainland by a new proclamation of their liberties. The result was that the Athenians used their freedom to execute the pro-Macedonians, including the worthy but compromising Phocion. War flared up. Eumenes, allied with Polyperchon, challenged Antigonus and secured Babylon, but he was betrayed and killed in 316. Seleucus escaped to Egypt. Polyperchon's position was weak, and he was soon ousted by the able, up-and-coming Cassander. In becoming master of Macedon and most of Greece, Cassander rebuilt Thebes and put the Aristotelian Demetrius of Phalerum in charge of Athens. Olympias, Alexander the Great's terrible mother, had eliminated Philip III. Cassander had her put to death, while keeping Rhoxane and Alexander IV under his protection--or guard.

Antigonus was now the dominant figure of the old brigade. Cassander, Ptolemy, and Lysimachus formed a coalition against him. For four years (315-311) they fought indecisively. Antigonus showed himself energetic, resourceful, and imaginative, but he could not strike a decisive blow. The only major change came in the brilliant coup by which Seleucus succeeded in recovering Babylon. In 311 the four leaders agreed to divide the world, leaving Ptolemy with Egypt and Cyprus, Antigonus with Asia, Lysimachus with Thrace, and Cassander with Macedonia and Greece, but only until Alexander IV came of age in 305. Seleucus was left out.

Royal blood, however, was quickly forgotten in the pursuit of power. Cassander murdered Rhoxane and young Alexander in 310, soon after Antigonus had vainly tried to crush Seleucus. Seleucus, however, held on to a damaged Babylon and the eastern provinces, except for India, which he had to yield to the Indian king Chandragupta. Antigonus now had the effective support of his brilliant son Demetrius (336-283), known as Poliorcetes, or Besieger, who ousted the other Demetrius and restored the democracy and eventually the League of Corinth; he was hymned with divine honours and given the Parthenon as his palace. Demetrius, also in 306, crushed Ptolemy in a naval battle and secured Cyprus and the Aegean, though he failed in a famous siege of Rhodes (305-304). Antigonus and Demetrius now proclaimed themselves joint kings in succession to Alexander. Antigonus, however, failed to conquer Egypt, and the other rulers also took the title of king. Cassander, Lysimachus, Seleucus, and Ptolemy formed an alliance against Antigonus and Demetrius, and at Ipsus in 301 the allies, with the help of a force of elephants brought from India by Seleucus, defeated and killed Antigonus. Demetrius escaped, retaining Tyre and Sidon and command of the sea. Lysimachus took large portions of Anatolia; Seleucus assumed control over Mesopotamia and Syria, except for a part in the south occupied de facto by Ptolemy; and Cassander was content with Macedonia and parts of Greece.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Ptolemy gained command of the sea by Demetrius' fall. He died in his bed, the only one of Alexander's successors to do so, and was succeeded peacefully by his son Ptolemy II Philadelphus (308-246). However, a son by his first wife, Ptolemy Ceraunus, the Thunderbolt (grandson of Antipater), was stirring the waters round Lysimachus, and the latter soon lost support. Seleucus defeated and killed Lysimachus, and Alexander's empire, except for Egypt, seemed to be his for the asking. Lysimachus' army, however, supported Ceraunus, who assassinated Seleucus in 281. Seleucus' son by a Sogdian noblewoman succeeded him as Antiochus I (324-261). In Greece proper the strongest powers were Antigonus Gonatas (c. 320-239), son of the brilliant Demetrius and himself a man of high character, ability, and culture, and Pyrrhus, king of Epirus. Pyrrhus was about to embark on his ill-starred expedition to Italy, where he soundly defeated the growing power of Rome but at an enormous cost to himself.

At this point, migrating Celts under the command of Bolgius and Brennus caused an added complication, not least by the defeat and death of Ceraunus. Brennus pushed down into Greece but was repulsed by the Aetolians. The dangers posed by the invading Celts led, in 279, to a treaty between Antigonus and Antiochus, who agreed not to interfere in one another's spheres of

influence. Each won a decisive victory over the Celtic invaders, who eventually settled in Serbia, Thrace, and Galatia in
central Anatolia. Antigonus was able to secure Macedonia. Lysimachus' kingdom was never revived. The three centres of power were Macedonia, Syria, and Egypt.

Notes for Cassander, King Of Macedonia (305-297):
Casandro. Hijo de Antípater, uno de los generales de Alejandro Magno que más intervinieron en los sucesos posteriores a la muerte de éste. Al morir Antípater dejó la regencia a Polispercon, hombre de grandes prendas. Casandro no respetó la voluntad paterna y se unió a Ptolomeo, celeuco y Antígono contra el regente, que a su vez se apovó en Eumenes, comenzando aquella serie de guerras que ensangrentaron la herencia del macedón. Antígono logró dar muerte a Eumenes, abandonado por sus soldados, lo que trajo como consecuencia que las satrapias asiaticas se independizasen y Antígono senta se las bases de su poder. Se aliaron contra él Ptolomeo, Lisímaco, Casandro y Seleuco, pero tras de algunos desastres iniciales, venció Antigono, imponiendo la paz de 3I8 a. de J C., que dejó casi las cosas como estaban, es decir, a Lisímaco dueño de Tracia, a Ptolomeo de Egipto y a Seleuco de Asia, otorgando el trono de Macedonia al niño Alejandro Egus, hijo de Alejandro Magno y Roxana, bajo la regencia de Casandro. Este se apoderó de Atenas, donde estableció un gobierno aristocrático, a la cabeza del cual puso a Demetrio Falereo. Disensiones entre la familia de Alejandro Magno indispusieron a Filipo Arrideo y su esposa Eurídice con Polispercón por sus respetos hacia Olimpia, madre del macedón, e hicieron que se aliase a Casandro. Triunfó de momento Olimpia, que mandó matar a Filipo e hizo suicidarse a su esposa, persiguió y casi exterminó a la familia y partidarios de Casandro, pero éste consiauió sitiarla en Pidna la rindió por hambre y la entregó a las familias de los asesinados que la lapidaron (3I5). Casandro, para adquirir derechos al trono, CASÓ CON TESALÓNICA e hizo que Glaucis, amigo suyo y gobernador del Antípolis, diese muerte a Alejandro Egus. Polispercón, entonces, proelamó rey al joven Hércules hijo natural del macedón, pero al ofrecerle Casandro la corona, Polispercón se dejó engañar e hizo matar a Hércules. Antígono, el más

ambicioso e independiente de Ios generales, depuso a Faléreo e impuso a un hijo suyo, también llamado Demetrio, lo que lanzó a la guerra a Casandro y Ptolomeo, y después de la segunda batalla de Salamina todos los contendientes tomaron decididamente el título de rey. El hijo de Antígono rechazó a Casandro en las Termópilas, pero éste, aliado de nuevo con Lisímaco, Seleuco y Ptolomeo, triunfó en Ipso (30I) y Grecia quedó entregada a Casandro, que reinó en ella hasta su muerte, en 298.

Cassander (b. c. 358 BC--d. 297 BC), son of the Macedonian regent Antipater and king of Macedonia from 305 to 297.

Cassander was one of the diadochoi ("successors"), the Macedonian generals who fought over the empire of Alexander the Great after his death in 323. After Antipater's death in 319, Cassander refused to acknowledge the new regent, Polyperchon. With the aid of Antigonus I Monophthalmus, ruler of Phrygia, Cassander seized Macedonia and most of Greece, including Athens (319-317). When Antigonus returned from the eastern provinces intending to reunite Alexander's empire under his own sovereignty, Cassander joined forces with Ptolemy I, Seleucus, and Lysimachus (rulers of Egypt, Babylon, and Thrace, respectively) to oppose him. Between 315 and 303 the two sides clashed frequently. Cassander lost Athens in 307 and his other possessions south of Thessaly in 303-302, but the defeat of Antigonus at the Battle of Ipsus in Phrygia (301) secured Cassander's control of Macedonia.

Even though he had already murdered Alexander IV and Roxana, the son and the widow of Alexander the Great, Cassander did not take the royal title until 305. His ruthlessness toward Alexander's family was partly dictated by political considerations, but his personal hatred for the dead king was evidenced by his rebuilding of Thebes, which had been leveled by Alexander as punishment for the Theban rebellion.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Notes for Publius Claudius Pulcher:
Claudius Pulcher, Publius (d. before 246 BC), son of Appius Claudius Caecus and commander of the fleet that suffered the only serious Roman naval defeat of the First Punic War (264-241 BC). The setback occurred in 249, when Claudius was consul. He attacked the Carthaginian fleet in the harbour of

Drepanum (modern Trapani, Sicily) and lost 93 of his 123 vessels. It was popularly believed that Claudius failed because he had committed a sacrilegious act before the battle: when the chickens, used in augury, refused to eat, he threw them into the sea with the words "Let them drink then." He was, accordingly, accused of treason and heavily fined.

Notes for Alexander III The Great:
Alejandro III el Magno (356-323a.C.), rey de Macedonia (336-323a.C.), conquistador del Imperio persa, y uno de los lkderes militares mis importantes del mundo antiguo.
Las primeras conquistas
Alejandro nació en Pela, la antigua capital de Macedonia; era hijo de Filipo II, rey de Macedonia, y de Olimpia, princesa de Epiro. Aristóteles fue su tutor, ensenindole retórica y literatura, y estimuló su interés por la ciencia, la medicina y la filosofka. En el verano del ano 336a.C. Filipo fue asesinado y Alejandro ascendió al trono de Macedonia. Se encontró rodeado de enemigos y se vio amenazado por una rebelión en el extranjero. Alejandro ordenó la ejecución de todos los conspiradores y enemigos nacionales. Marchó sobre Tesalia, donde los partidarios de la independencia habkan obtenido el control, y restauró el dominio macedónico. Hacia finales del verano del 336a.C. habka restablecido su posición en Grecia y un congreso de estados en Corinto lo eligió comandante del Ejército griego para la guerra contra Persia. En el 335a.C. dirigió una campana brillante contra los rebeldes tracios cerca del rko Danubio. A su regreso a Macedonia, reprimió en una sola semana a los hostiles ilirios y dardanelos cerca del lago Pequeno Prespa y después se dirigió hacia Tebas, que se habka sublevado. Tomó la ciudad por asalto y arrasó sus edificios,

respetando sólo los templos y la casa del poeta lkrico Pkndaro, esclavizando a unos treinta mil habitantes capturados. La rapidez de Alejandro en reprimir la sublevación de Tebas facilitó la inmediata sumisión de los otros estados griegos.

La creación de un imperio

Alejandro comenzó su guerra contra Persia la primavera del 334a.C. al cruzar el Helesponto (actualmente Dardanelos) con un ejército de unos 365.000 hombres de Macedonia y de toda Grecia; sus oficiales jefes eran todos macedonios, incluidos Antkgono (mis tarde Antkgono Monoftalmos), Tolomeo (mis tarde Tolomeo I) y Seleuco (mis tarde Seleuco I). En el rko Grinico, cerca de la antigua ciudad de Troya (en la actual Turquka), atacó a un ejército de 40.000 persas y griegos hoplitas (mercenarios). Sus fuerzas derrotaron al enemigo y, segsn la tradición, sólo perdió 110 hombres; después de esta batalla, toda Asia se rindió. Al parecer, en su camino a través de Frigia cortó con su espada el nudo gordiano. Continuó avanzando hacia el sur y se encontró con el ejército principal persa, bajo el mando de Darko III, en Isos, en el noroeste de Siria. Segsn la tradición, el ejército de Darko se estimaba en 500.000 soldados, cifra que hoy es considerada exagerada. La batalla de Isos, en el ano 333a.C., terminó con una gran victoria de Alejandro. Aunque cortó la retirada, Darko huyó, abandonando a su madre, esposa e hijos a Alejandro, quien les trató con respeto debido a su condición de familia real. Tiro, un puerto marktimo muy fortificado, ofreció una resistencia obstinada, pero Alejandro lo tomó por asalto en el 332a.C. después de un asedio de siete meses. Seguidamente, Alejandro capturó Gaza y después pasó a Egipto, donde fue recibido como libertador. Estos acontecimientos facilitaron el control de toda la lknea costera del Mediterrineo. Mis tarde, en el 332a.C., fundó en la desembocadura del rko Nilo la ciudad de Alejandrka, que se convirtió en el centro literario, cientkfico y comercial del mundo griego. Cirene, la capital del antiguo reino de Cirenaica, en el norte de Ifrica, se rindió a Alejandro en el 331a.C., extendiendo sus dominios a todo el territorio de Cartago.

En la primavera del 331a.C. Alejandro hizo una peregrinación al gran templo y oriculo de Amón-Ra, el dios egipcio del Sol a quien los griegos identificaron con Zeus. Se creka que los primeros faraones egipcios eran hijos de Amón-Ra, y Alejandro, el nuevo dirigente de Egipto, querka que el dios le reconociera como su hijo. La peregrinación tuvo éxito, y quizi confirmara la creencia de Alejandro en su propio origen divino. Dirigiéndose de nuevo hacia el norte, reorganizó sus fuerzas en Tiro y salió hacia Babilonia con un ejército de 40.000 infantes y 7.000 jinetes. Cruzó los rkos Éufrates y Tigris y se encontró con Darko al frente del ejército persa, el cual, segsn informes exagerados, llevaba un millón de hombres, cantidad que no impidió que sufriera una derrota devastadora en la batalla de Arbela (Gaugamela) el 1 de octubre del 331a.C. Darko huyó al igual que hizo en Isos y un ano mis tarde fue asesinado por uno de sus propios colaboradores. Babilonia se rindió después de Gaugamela, y la ciudad de Susa, con sus enormes tesoros, fue igualmente conquistada. Mis tarde, hacia mitad del invierno, se dirigió a Persépolis, la capital de Persia. Después de robar los tesoros reales y apropiarse de un rico botkn, quemó la ciudad, lo cual completó la destrucción del antiguo Imperio persa. El dominio de Alejandro se extendka a lo largo y ancho de la orilla sur del mar Caspio, incluyendo las actuales Afganistin y Beluchistin, y hacia el norte a Bactriana y Sogdiana, el actual Turkestin ruso, también conocido como Asia central. Sólo le llevó tres

anos, desde la primavera del 330a.C. hasta la primavera del 327a.C., dominar esta vasta zona.
Para completar la conquista del resto del Imperio persa, que en tiempos habka incluido parte de la India occidental, Alejandro cruzó el rko Indo en el 326a.C. e invadió el Punjab, alcanzando el rko Hifasis (actual Bias); en este punto los macedonios se rebelaron, negindose a continuar. Entonces Alejandro construyó una flota y bajó navegando el Hidaspo (llamado Hydaspes por los griegos, donde derrotó al dirigente indio Poros en el 326a.C.) hacia el Indo, alcanzando su delta en septiembre del 325a.C. La flota continuó hacia el golfo Pérsico. Con su ejército, Alejandro cruzó el desierto de Susa en el 324a.C. La escasez de comida y agua durante la marcha habka causado varias pérdidas y desacuerdos entre sus tropas. Alejandro pasó aproximadamente un ano organizando sus dominios e inspeccionando territorios del golfo Pérsico donde conseguir nuevas conquistas. Llegó a Babilonia en la primavera del 323a.C., pero en junio contrajo fiebres y murió. Dejó su Imperio, segsn sus propias palabras, "a los mis fuertes" este ambiguo testamento provocó terribles luchas internas durante medio siglo.
El legado de Alejandro
Alejandro fue uno de los mayores conquistadores de la historia, destacó por su brillantez tictica y por la velocidad con la que cruzó grandes extensiones de terreno. Aunque fue valiente y generoso, supo ser cruel y despiadado cuando la situación polktica lo requerka, aunque cometió algunos actos de los que luego se arrepintió, caso del asesinato de su amigo Clito en un momento de embriaguez. Como polktico y dirigente tuvo planes grandiosos; segsn muchos historiadores abrigó el proyecto de unificar Oriente y Occidente en un imperio mundial, una nueva e ilustrada hermandad mundial de todos los hombres. Hizo que unos 30.000 jóvenes persas fueran educados en el habla griega y en ticticas militares macedónicas y les alistó en su Ejército. Él mismo adoptó costumbres persas y se casó con mujeres orientales: con Estatira (o Stateira; que murió hacia el 323a.C.), la hija mayor de Darko III, y con Roxana (que murió hacia el 311a.C.), hija del sitrapa de Bactriana Oxiartes; ademis animó y sobornó a sus oficiales para que tomaran esposas persas. Poco después murió. Alejandro ordenó que las ciudades griegas le adoraran como a un dios. Aunque probablemente dio la orden por razones polkticas, segsn su propia opinión y la de sus contemporineos, se le consideraba de origen divino. Tras su muerte, la orden fue en gran parte anulada.
Para unificar sus conquistas, Alejandro fundó varias ciudades a lo largo de su marcha, muchas se llamaron Alejandrka en honor a su persona; estas ciudades estaban bien situadas, bien pavimentadas y contaban con buenos suministros de agua. Eran autónomas pero sujetas a los edictos del rey. Los veteranos griegos de su Ejército al igual que soldados jóvenes, negociantes, comerciantes y eruditos se instalaron en ellas y se introdujo la cultura y la lengua griega. Ask, Alejandro extendió ampliamente la influencia de la civilización griega y preparó el camino para los reinos del periodo helenkstico y la posterior expansión de Roma.

C.), se convenció el Senado de que sus triunfos por tierra quedaban esterilizados a causa del dominio del mar por los cartagineses y se decidió a combatirles en su propio elemento, al construir y fletar para ello I20 naves, encargó de su mando a los dos cónsules. Cornelio Escipión, con I7 de ellas, puso proa a las islas Eolias, y creyendo que podrka al paso tomar Lipara, se vió cercado por una división de la flota cartaginesa estacionada en Palermo y cayó prisionero con todas sus naves, permaneciendo en poder del enemigo hasta que Régulo le liberó. Por segunda vez fué cónsul en 254 con Atilio Calatino, y luchó ventajosamente en Sicilia. El sobrenombse le vino por haber llevado una vez al Foro, como prenda de una compra, un asno cargado de oro.

Notes for Appius Claudius Caecus:
Claudius Caecus, Appius (fl. late 4th-early 3rd century BC), outstanding statesman, legal expert, and author of early Rome who was one of the first notable personalities in Roman history.

A member of the patrician class, Appius embarked on a program of political reform during his censorship, beginning in 312 BC. Elements of this program included the distribution of the landless citizens of Rome among the tribes, which at that time constituted basic political units. Appius also admitted sons of freedmen into the Senate. One intent of these reforms may have been to give the
urban artisans and commercial interests full political rights and, consequently, a greater voice in government.

Speculation as to why this member of the nobility proposed reforms apparently offensive to his class range from the suggestion that he was attempting to break the power of a new patrician-plebeian nobility on behalf of the older nobility to the suggestion that he was a demagogue attempting to create a new base of power. However, Appius' reforms were partly undone in 304, while some freedmen had already been denied a place in the Senate during the consulship that followed his own of 307.

His building projects proved more lasting. He completed the construction of the Aqua Appia, Rome's first aqueduct, bringing in water from the Sabine Hills. He also initiated the Via Appia, the great military and commercial road between Rome and Capua. Both of these projects were named for him, the first time such an honour had been conferred. Appius was elected censor a second time in 296 and commanded Roman troops against Samnium.

Appius' legal contribution lies in his initiating publication of the legis actiones ("methods of legal practice") and of a list of court days, allowing people readier access to legal remedy. He was the author of a treatise, De Usurpationibus ("Concerning Usurpations"), which has been lost. He is also one of the earliest Roman prose and verse writers whose name is known, though only fragments of one poem have survived.

Appius Claudius suffered blindness in old age, hence his surname Caecus ("the blind"). Near the end of his life, during a war between Rome and the Epirite king Pyrrhus, the Senate was presented with peace proposals that, if accepted, could have resulted in the abandonment by Rome of southern Italy. The aged Appius gave an eloquent speech urging rejection of the proposals. The Senate was convinced, and further warfare between Rome and Pyrrhus compelled the

Epirite king to depart from Italy. This speech and others were still preserved and read in the time of Cicero.

Appian Way,

Latin VIA APPIA, the first and most famous of the ancient Roman roads, running from Rome to Campania and southern Italy. (See Roman road system.) The Appian Way was begun in 312 BC by the censor Appius Claudius Caecus. At first it ran only 132 miles (212 km) from Rome south-southeastward to ancient Capua, in Campania, but by about 244 BC it had been extended another 230 miles (370 km) southeastward to reach the port of Brundisium (Brindisi), situated in the "heel" of Italy and lying along the Adriatic Sea.

From Rome southward the Appian Way's course was almost straight until it reached Tarracina (Terracina) on the Tyrrhenian Sea. The road then turned inland to the southeast to reach Capua. From Capua it ran east to Beneventium (Benevento) and then southeastward again to reach the port of Tarentum (Taranto). It then ran east for a short distance to terminate at Brundisium.

The Appian Way was celebrated by Horace and Statius, who called it longarum regina viarum, or "queen of long-distance roads." As the main highway to the seaports of southeastern Italy, and thus to Greece and the eastern mediterranean, the Appian Way was so important that during the empire it was administered by a curator of praetorian rank. The road averaged 20 feet (6 m) in width and was slightly convex in surface in order to facilitate good drainage. The road's foundation was of heavy stone blocks cemented together with line mortar; over these were laid polygonal blocks of lava that were smoothly and expertly fitted together. The lava blocks formed a good traveling surface, and one that proved to have extraordinary durability over the centuries. The first few miles of the Appian Way outside Rome are flanked by a striking series of monuments, and there are also milestones and other inscriptions along the remains of the road.

Notes for Philip II, King Of Macedonia:
Philip II, byname PHILIP OF MACEDON (b. 382 BC--d. 336, Asia Minor), 18th king of Macedonia (359-336 BC), who restored internal peace to his country and then, by 339, had gained domination over all Greece by military and diplomatic means, thus laying the foundations for its expansion under his son Alexander III the Great.

Early life and accession.

Philip was a son of Amyntas III. In his boyhood he saw the Macedonian kingdom disintegrating while his elder brothers Alexander II and Perdiccas III, who each reigned for a few years, strove unsuccessfully against insubordination of their regional vassal princes, intervention of the strong Greek city Thebes, and invasion by the Illyrians of the northwest frontier.

Philip himself spent some time as a hostage at Thebes, the leading city (with Athens) of this decade (370-360 BC), where the great Epaminondas, the most inventive tactician of all Greek generals until then, was in charge of the best army in Greece. These were probably the most formative years of Philip's education. When he returned to Macedonia his brother Perdiccas soon found him ready for a command.

Philip came to the throne suddenly and unexpectedly in 359, when Perdiccas was killed meeting an Illyrian invasion. The Illyrians prepared to close in; the Paeonians were raiding from the north, and two claimants to the throne were supported by foreign powers. In this crisis Philip showed a good sense of priorities by buying off his dangerous neighbours and, with a treaty, ceding Amphipolis to Athens. He used the time gained in military preparations. The army that later conquered Persia was developed all through his reign, but the decisive innovations in arms--the sarissa, a pike nearly half as long again as the spear of the Greeks--tactics, and training belong probably to this first year.

Macedonian expansion.

In 358 he invaded Paeonia, and then he defeated the Illyrians decisively, in a battle that already suggests a master of war. The next year his marriage with Olympias, the Molossian princess of Epirus (the mother of Alexander the Great), helped to stabilize his western frontier. Now he ventured to antagonize Athens by recapturing Amphipolis, the strategic key securing the eastern frontier and giving access into Thrace; and in 356 he took the west Thracian Crenides (renamed by him Philippi), a place newly founded to exploit new finds of silver and gold in Mount Pangaeum. These successes frightened his neighbours into forming a coalition against him, which was joined by Athens; but it achieved nothing.

The 10-year "war for Amphipolis" with Athens showed that the Athenians, with all their naval power, were quite unable to damage the continental and military power of Macedonia or even to save their own allies from Philip's attacks. Meanwhile he twice penetrated deeply into Thrace. And in the south a Thessaly divided against itself gave him an entry into Greece. These same 10 years saw central Greece immersed in the Sacred War to liberate Delphi from its occupation by the Phocians, enabling Philip to intervene as the ally of Thebes and the Thessalian League of city states. His only great defeat in the field came in Thessaly in 353, owing (it seems) to overconfidence and failure of reconnaissance. The next year he retrieved it with a spectacular victory, which forced the Athenians to occupy Thermopylae and bar his path to the south.

Presidency of the Thessalian League.

Characteristically, Philip declined the trial of strength, prepared to wait for six years until he could gain Thermopylae by negotiation and without striking a blow. Meanwhile his Thessalian victory earned him election as president (archon) of the Thessalian League (probably 352), a position unique for a foreigner in a Greek confederation and one that was to bind Thessaly to the kings of Macedonia for 150 years and more.

Philip's capture of Olynthus and annexation of Chalcidice in 348, enslaving the Olynthians and other of the Chalcidians, was disquieting to many. The Greeks themselves occasionally were brutal to small cities, but Olynthus was a large city. Philip's enemies could affect a high moral tone and contempt for a barbarous Macedonian, but even his friends might have wondered whether he ought to be allowed into the heart of Greece with an army. Yet there were many ways in which he could serve them. Particularly, he could finish the Sacred War, which the Thessalians, Thebans, and others still could not finish for themselves. Athens could not prevent this now and had reason to fear that Philip's next campaign in Thrace (346) might challenge its own control of the sea route to southern Russia, its main source for imported corn. Significantly, however, it was Philip, and not Athens, who made the first overtures for peace, though all the military initiatives lay in his own hand. His plans for the future, in Greece and farther afield, included Athens as a willing ally, not as a defeated enemy.

Even before the peace with Athens was ratified (346), the Athenian publicist Isocrates was inviting Philip to reconcile the four leading cities of Greece and to lead a united Greek alliance in a war of expansion against Persia. A step in this direction was Philip's intervention now to end the Sacred War, in recognition of which he was admitted to membership of the Delphic Amphictyony--an association of neighbouring states. The votes of the Thessalians and their clients gave him a control of its council, which could be used on occasion for political and diplomatic ends.

He lost no opportunity in the next years (346-343) of penetrating Greece without war, by winning and buying friends among the politicians of the smaller cities and intervening occasionally with subsidies or a force of mercenaries in their local disturbances. This policy made him some enemies, too, and it played into the hands of the great orator Demosthenes and others at Athens. Demosthenes saw Philip now as a bar to Athenian greatness and a threat to its freedom and existence; he talked tirelessly to warn the Athenians of the danger and to convince the Greeks in general that it was their danger too. Philip in these years conciliated Athens in small ways even under provocation, but he came to see that Demosthenes and the anti-Macedonians were beyond conciliation (343-342). Meanwhile, he reasserted his suzerainty over the neighbouring Illyrians, tightened his grip on Thessaly, and in 342 began the series of campaigns in Thrace that enabled him in two years to annex great parts of it as a province, and finally to demonstrate his power against the Scythians settled on the southern banks of the Danube
Delta. The events in Thrace caused two of his Greek allies, the cities of Perinthus (later called Heraclea, present-day Marmaraereglisi) and Byzantium, to review their position, and his coercion of them led to the two great sieges that

showed the development of his artillery and allied arms, of which his son Alexander was to make greater use in Asia.

The declaration of war by Athens in 340 enabled him to raise the two sieges without undue loss of face, though he had failed to establish a threat to the Athenian corn route to southern Russia. Athens was to be intimidated now by invasion of its territory through central Greece, where the key position was held by Thebes, his ally hitherto, but of late a dissatisfied and recalcitrant one. His services to it in the Sacred War had been more than offset by his new position as its successful rival for leadership in
and through the Amphictyony, and his moves toward hegemony in Greece could be seen in Thebes as encroachments.

Victory of Chaeronea.

When Philip swept south with his army in November 339, he hoped to rush the Thebans into honouring their alliance and letting him through into Attica. The Thebans listened instead to Demosthenes and to their own instinct of self-preservation. The Greek alliance became something formidable with the accession of Thebes, and Philip was forced, as a contemporary orator put it with only a mild exaggeration, "to stake his all on the issue of one short day." Chaeronea was a famous victory,
gained by decisive blows of Philip's cavalry. His real skill as a general can be seen, though dimly, in a manoeuvre of controlled retreat aimed at dislocating the advancing Greeks and creating gaps for the cavalry to strike. By winning this battle he had won the war.

In the various peace treaties with the Greek states, Thebes had to admit a Macedonian garrison, and its democratic constitution was replaced by a pro-Macedonian government; but Athens suffered neither invasion of its territory nor interference with its democracy and was not disarmed by dismantling of the walls or surrender of the navy. For Philip, Athens was the one Greek state from which he needed not neutrality or unwilling alliance but active cooperation. All past experience had shown that wars
against Persia succeeded only when the Persians were denied the use of the Aegean, and for this the great Athenian navy was the first need.

In Greece (outside Thessaly), Philip could have had no illusions about his own unpopularity, except among those of the well-to-do who were attracted by his court and his patronage; some cities also (especially the neighbours of Sparta) were glad to lean on Macedonia for support against an ancient enemy. Philip intended to involve all the Greeks with the Persian war. So Isocrates had advised him eight years before; but on the details of the ways and means he had no advice to offer. Philip himself
organized the Greeks now to keep the peace with him and with each other and to support him in the Persian war overseas. In the constitutional details of his settlement of Greece he may well have had the help of Aristotle, free from his recent duties as tutor of the young Alexander.

The League of Corinth.

Philip's so-called League of Corinth, established in 337, was an organization designed to preserve and perpetuate a general peace (koine eirene), inaugurated when the delegates of all the states of Greece (except Sparta) and the islands swore to abide by it and to recognize Philip as president (hegemon) for this purpose. The general peace was a political innovation of the Greeks themselves, used several times in the past 50 years in attempts to stabilize affairs while promoting this or that hegemony. The peace had never lasted long because the leading Greek states had neither the power nor the mutual trust to create an effective organization for collective action against aggressors.

Philip designed a council of representatives from all the states (synedrion), which was empowered to deliberate and decide on action to be taken in the event of the peace being broken or threatened. After the decisions were made, their execution lay with Philip as hegemon. The states were under obligation to supply troops or ships to the hegemon on demand, by quotas corresponding to their voting power on the council. Though neither Philip nor Macedonia had representatives on the council, it was the knowledge that the hegemon had the power of Macedonia in his hand that made this organization effective. As it happened, Corinth, where the inaugural meeting was held, was one of only three Greek cities with a Macedonian garrison, a fact the significance of which can have been lost on nobody.

Last years.

Philip was wise, no doubt, to build on the foundation of the earlier practice of the Greeks themselves and also to refrain from organizing them in any permanent alliance that would have recalled too much the unpalatable experiences of the past. He was not, however, a Greek politician or even a Greek, but king of the Macedonians; and he cannot possibly have seen the settlement of Greece--as most modern historians have seen it--as the culmination of his life's work. For him it culminated nothing and was not even an end in itself but only a means. Chaeronea had brought the Greeks to order, and his plans required that they should stay in order now. The synedrion at Corinth heard his program for a Persian war and duly acclaimed it early in 337. Early the next year an advance force of the Macedonian army crossed to Asia Minor. Philip would lead the grand army into Asia presently, and the Greeks would be with him.

This meteor fizzled out. The subtle, pliant, patient, calculating diplomatist, master of timing in politics and war, ended his life in a tale of irresponsible incompetence. The historian Theopompus, who saw Philip at close quarters, made much of his vices, his love of drink and debauchery, and his wild extravagance with money. Allowance made for this notably faultfinding and puritanical writer, Philip's character did contain some real ambiguities, extending into his domestic life. His "political marriages"
were mostly opportune symbols of goodwill toward princes or groups worth conciliating, but his last marriage, in 338, to the Macedonian Cleopatra, led to a final break with Olympias, his queen, who left the country accompanied by the crown prince Alexander. Though Olympias was unpopular at court and though Cleopatra's connections were powerful and important, it was not "politic" to put

the succession in jeopardy. Philip showed that he had never intended this result, by taking trouble to be reconciled with Alexander. The tradition that makes him infatuated with Cleopatra is probably right. If so, he misjudged fatally the amount of harm that could be done by marrying her.

With the preparations far advanced for the crossing into Asia, at the grand celebration of his daughter Cleopatra's marriage to Alexander of Epirus (brother of Olympias), Philip was assassinated by Pausanias, a young Macedonian noble with a bitter grievance against the young queen's uncle Attalus and against Philip for denying him justice. This was the official explanation, and Pausanias himself could add nothing to it; he was killed on the spot. Suspicion fell on Olympias and Alexander, those with most to gain from Philip's death, and many modern interpreters have followed it. Aristotle, however, clearly did not believe it. In his Politics a few years later he used this incident as an example of a monarch murdered for private and personal motives--which would have been a puerile indiscretion if either he or the world in general had ever taken the canard seriously.

Assessment.

So ended, unworthily, the first of the great Macedonians. Everything known about him comes from Greek sources, which concentrate on his impact upon the Greeks and their history. Yet even more impressive, in view of Macedonia's troubled and undistinguished past, would be the full story of his unification and expansion of his own kingdom; his control of its regional princes, nobles, and gentry and their retainers, to form a great Macedonian people, symbolized by the finest army the world had seen; and his continuing attrition by warfare and diplomacy, which in some 20 years reduced much of the Balkan peninsula to subservience.

The apparently untidy record of his campaigns into Illyria or Thrace and of his interventions with diplomacy or arms (or both) in Thessaly, Euboea, and the Peloponnese, which might suggest that repetition is a sign of incompetence, seem better interpreted as the work of a strategist operating always on several fronts, often preferring diplomacy to war, limited objectives to the grandiose, the smaller risks to the greatest; especially never forgetting that there is always another day. His decisive day at Chaeronea came, in a sense, because his true policy in Greece had failed, thanks partly to Demosthenes. But probably to take control of Greece without a Chaeronea was a real impossibility at this date (or indeed later).

Though Philip certainly wanted to be acceptable in Greece and did attract many important Greeks to his court, his philhellenism has been overrated: Olynthus and other Greek cities knew better. Though he cultivated the Athenians for reasons of high policy, there is no evidence that he ever in his life set foot in Athens, a remarkable piece of insouciance at every level. Pella, his capital, had long been a resort or refuge of great men of letters, and under Philip the connection with Plato's Academy was preserved, Theopompus was entertained, and Isocrates was invited; the leading actors of the Athenian stage appeared in

Macedonia, too. Aristotle, whose father had been physician to Amyntas, Philip's father, spent three or four important years as Alexander's tutor.

Philip presumably was at home with these people, but tradition says nothing of him as a man of letters himself or as an intellectual, though as an orator he could impress a party of Athenians that included Demosthenes and Aeschines and other professionals. His charm was great; he was by nature convivial, hospitable, and a bon viveur. Undoubtedly he drank too much and too often, with the saving grace that he was known to listen to home truths even when drunk. As a commander in the field he was unwearying, and in action he fought like a lion; in the end he was really disfigured with old wounds. He was a general perhaps not of genius but of a very high order, with the tactical skill to coordinate the cavalry and infantry arms which were largely of his own creating. Making and training over the years a great army, he was paradoxically sparing and even cautious in using it.

If he had survived to invade Asia, it would not have been to overthrow the Persian Empire. He might have established a Macedonian empire in Asia, perhaps, but it would have been a Mediterranean empire in character. The Greeks would have benefitted by colonization, but the problem of Greek freedom would have remained, with the political domination of the higher culture by the lower. Philip was aware of the problem, and the League of Corinth, with its facade of freedom, was his answer. It did not deceive the Greeks or satisfy them; but no later Macedonian king could improve on it. Philip had made Macedonia,
and now Macedonia and its kings made world history.

Notes for Olympias, Queen Of Macedonia:
Olympias (b. c. 375 BC--d. 316 BC), wife of Philip II of Macedonia and mother of Alexander the Great. She had a passionate and imperious nature, and she played important roles in the power struggles that followed the deaths of both rulers.

The daughter of Neoptolemus, king of Epirus, Olympias apparently was originally named Myrtale. Later she may have been called Olympias as a recognition of Philip's victory in the Olympic Games of 356 BC. Philip's polygamy did not threaten her position until 337, when he married a high-born Macedonian, Cleopatra. Olympias withdrew to Epirus, returning after Philip's assassination (336). She then had Cleopatra and her infant daughter killed. Olympias quarreled repeatedly with Antipater, regent of Macedonia during the early years of Alexander's invasion of Asia, and eventually retired again, about 331, to Epirus. Upon the death of Antipater in 319 (Alexander had died in 323), his successor, Polyperchon, invited Olympias to act as regent for her young grandson, Alexander IV (Alexander the Great's son). She declined his request until 317, when Antipater's son Cassander established Philip II's half-witted son Philip III (Arrhidaeus) as king of Macedonia. The Macedonian soldiers supported her return. She put to death Philip Arrhidaeus and his wife, as well as

Cassander's brother and a hundred of his partisans. In response Cassander entered Macedonia and blockaded Olympias in Pydna, where she surrendered in the spring of 316. She was condemned to death, but Cassander's soldiers refused to carry out the sentence. She eventually was killed by relatives of those she had executed.

Notes for Cassander, King Of Macedonia (305-297):
Casandro. Hijo de Antípater, uno de los generales de Alejandro Magno que más intervinieron en los sucesos posteriores a la muerte de éste. Al morir Antípater dejó la regencia a Polispercon, hombre de grandes prendas. Casandro no respetó la voluntad paterna y se unió a Ptolomeo, celeuco y Antígono contra el regente, que a su vez se apovó en Eumenes, comenzando aquella serie de guerras que ensangrentaron la herencia del macedón. Antígono logró dar muerte a Eumenes, abandonado por sus soldados, lo que trajo como consecuencia que las

satrapias asiaticas se independizasen y Antígono senta se las bases de su poder. Se aliaron contra él Ptolomeo, Lisímaco, Casandro y Seleuco, pero tras de algunos desastres iniciales, venció Antigono, imponiendo la paz de 3I8 a. de J C., que dejó casi las cosas como estaban, es decir, a Lisímaco dueño de Tracia, a Ptolomeo de Egipto y a Seleuco de Asia, otorgando el trono de Macedonia al niño Alejandro Egus, hijo de Alejandro Magno y Roxana, bajo la regencia de Casandro. Este se apoderó de Atenas, donde estableció un gobierno aristocrático, a la cabeza del cual puso a Demetrio Falereo. Disensiones entre la familia de Alejandro Magno indispusieron a Filipo Arrideo y su esposa Eurídice con Polispercón por sus respetos hacia Olimpia, madre del macedón, e hicieron que se aliase a Casandro. Triunfó de momento Olimpia, que mandó matar a Filipo e hizo suicidarse a su esposa, persiguió y casi exterminó a la familia y partidarios de Casandro, pero éste consiauió sitiarla en Pidna la rindió por hambre y la entregó a las familias de los asesinados que la lapidaron (3I5). Casandro, para adquirir derechos al trono, CASÓ CON TESALÓNICA e hizo que Glaucis, amigo suyo y gobernador del Antípolis, diese muerte a Alejandro Egus. Polispercón, entonces, proelamó rey al joven Hércules hijo natural del macedón, pero al ofrecerle Casandro la corona, Polispercón se dejó engañar e hizo matar a Hércules. Antígono, el más ambicioso e independiente de Ios generales, depuso a Faléreo e impuso a un hijo suyo, también llamado Demetrio, lo que lanzó a la guerra a Casandro y Ptolomeo, y después de la segunda batalla de Salamina todos los contendientes tomaron decididamente el título de rey. El hijo de Antígono rechazó a Casandro en las Termópilas, pero éste, aliado de nuevo con Lisímaco, Seleuco y Ptolomeo, triunfó en Ipso (30I) y Grecia quedó entregada a Casandro, que reinó en ella hasta su muerte, en 298.

Cassander (b. c. 358 BC--d. 297 BC), son of the Macedonian regent Antipater and king of Macedonia from 305 to 297.

Cassander was one of the diadochoi ("successors"), the Macedonian generals who fought over the empire of Alexander the Great after his death in 323. After Antipater's death in 319, Cassander refused to acknowledge the new regent, Polyperchon. With the aid of Antigonus I Monophthalmus, ruler of Phrygia, Cassander seized Macedonia and most of Greece, including Athens (319-317). When Antigonus returned from the eastern provinces intending to reunite Alexander's empire under his own sovereignty, Cassander joined forces with Ptolemy I, Seleucus, and Lysimachus (rulers of Egypt, Babylon, and Thrace, respectively) to oppose him. Between 315 and 303 the two sides

clashed frequently. Cassander lost Athens in 307 and his other possessions south of Thessaly in 303-302, but the defeat of Antigonus at the Battle of Ipsus in Phrygia (301) secured Cassander's control of Macedonia.

Even though he had already murdered Alexander IV and Roxana, the son and the widow of Alexander the Great, Cassander did not take the royal title until 305. His ruthlessness toward Alexander's family was partly dictated by political considerations, but his personal hatred for the dead king was evidenced by his rebuilding of Thebes, which had been leveled by Alexander as punishment for the Theban rebellion.

Cassander, who was a statesman, had founded two great cities, Cassandreia and Thessalonica, as well as rebuilding Thebes. His death in 297 was a prelude to more disturbances. Demetrius conquered most of Greece and secured Macedonia in 294, but he was ousted in 288 by Lysimachus in alliance with King Pyrrhus of Epirus (319-272). Demetrius now concentrated all his forces on winning Asia and all but succeeded. He fell ill, however, and surrendered to Seleucus, who gave him every opportunity to drink himself to death. The stage was set for a confrontation between Lysimachus and Seleucus.

Notes for Artaxerxes II Abialaka, King Of Persia:
Artaxerxes II (fl. late 5th and early 4th centuries BC), Achaemenid king of Persia (reigned 404-359/358).

He was the son and successor of Darius II and was surnamed (in Greek) Mnemon, meaning "the mindful." When Artaxerxes took the Persian throne, the power of Athens had been broken in the Peloponnesian War (431-404), and the Greek towns across the Aegean Sea in Ionia were again subjects of the Achaemenid Empire. In 404, however, Artaxerxes lost Egypt, and in the following year his brother Cyrus the Younger began preparations for his rebellion. Although Cyrus was defeated and killed at Cunaxa (401), the rebellion had dangerous repercussions, for it not only demonstrated the superiority of the Greek hoplites used by Cyrus but also led the Greeks to believe that Persia was vulnerable.

In 400 Sparta broke openly with the Achaemenids, and during the next five years its armies achieved considerable military success in Anatolia. The Spartan navy, however, was destroyed at Cnidus (394), thereby giving the Achaemenids mastery of the Aegean. The Greek allies of Persia (Thebes, Athens, Argos, and Corinth) continued the war against Sparta, but, when it became evident that the only ones to gain from the war were the Athenians, Artaxerxes decided

to conclude peace with Sparta. In 386 Athens was compelled to accept the settlement known as the King's Peace, or the Peace of Antalcidas, by which Artaxerxes decreed that all the Asiatic mainland and Cyprus were his, that Lemnos, Imbros, and Scyros were to remain Athenian dependencies, and that all the other Greek states were to receive autonomy.

Elsewhere Artaxerxes met with less success. Two expeditions against Egypt (385-383 and 374) ended in complete failure, and during the same period there were continuous rebellions in Anatolia. There were also wars against the mountain tribes of Armenia and Iran.

By the King's Peace the Achaemenids had become the arbiters of Greece, and in the following wars all parties applied to them for a decision in their favour. After the Theban victory of Leuctra (371), an old alliance between the Achaemenids and the Thebans was restored. Achaemenid supremacy, however, was based on Greek internal discord rather than Achaemenid strength, and, when this weakness became apparent, all the satraps (governors) of Anatolia rose in revolt
(c. 366), in alliance with Athens, Sparta, and Egypt, and Artaxerxes could do little against them. The satraps, however, were divided by mutual distrust, and the rebellion was finally put down by Persia through a series of treacheries. When the reign of Artaxerxes ended, Achaemenid authority had been restored over most of the empire--more from internal rivalries and discord than from his efforts.

Under Artaxerxes an important change occurred in the Persian religion. The Persians apparently did not worship images of the gods until Artaxerxes set up statues of the goddess Anahita in various large cities. Inscriptions by all former kings named only Ahura Mazda, but those of Artaxerxes also invoked Anahita and Mithra, two deities of the old popular Iranian religion that had been neglected.

ii. Artaxerxes III Ochus, King Of Persia, born in c 426 a.c.; died in 338 a.c; married Atossa; born in c 420 a.c..

Notes for Artaxerxes III Ochus, King Of Persia:
Artaxerxes III (d. 338 BC), Achaemenid king of Persia (reigned 359/358-338 BC).

He was the son and successor of Artaxerxes II and was called Ochus before he took the throne. Artaxerxes III was a cruel but energetic ruler. To secure his throne he put to death most of his relatives. In 356 he ordered all the satraps (governors) of the Achaemenid empire to dismiss their mercenaries. He also forced Athens to conclude peace and to acknowledge the independence of its rebellious allies (355).

Artaxerxes then attempted to subjugate Egypt, which had been independent since 404. Failure of the first attempt (351) encouraged the Phoenician towns and the princes of Cyprus to revolt. Early in 345, Artaxerxes collected a great army and marched against the Phoenician city of Sidon. Mentor of Rhodes, who had helped betray Sidon, rose high in the king's favour and entered into a close understanding with the eunuch Bagoas, the king's favourite. Artaxerxes then advanced on Egypt with a great land and naval force and, at Pelusium in the Nile River delta, defeated the pharaoh Nectanebo II (343). A Persian satrap was placed over Egypt, the walls of its cities were destroyed, its temples were plundered, and Artaxerxes was said to have killed the Apis bull with his own hand.

After the king's return to Susa, Bagoas ruled the court and the upper satrapies, while Mentor restored the authority of the empire throughout the west. When Philip of Macedon attacked Perinthus and Byzantium (340), Artaxerxes sent support to those cities. In 338 Artaxerxes and his elder sons were killed by Bagoas, who then raised the king's youngest son, Arses, to the throne.

Notes for Amyntas II, King Of Macedonia:
AmyntasIII (or II) (d. 370/369 BC), king of Macedonia from about 393 to 370/369. His skillful diplomacy created a minor role for Macedonia in Greek

affairs and prepared the way for its emergence as a great power under his son Philip II (ruled 359-336).

Amyntas came to the throne during the disorders that plagued Macedonia after the death of the powerful king Archelaus (ruled c. 413-399). Amyntas soon had to fight off attacks by the Illyrians (of present-day Albania) and by the Chalcidian League, a confederation of cities of the Chalcidice peninsula, east of Macedonia. The threat from the latter was removed when intervention by Sparta led to the dissolution of the league in 379. Amyntas continued to maintain his independence by siding with the powers ascendant in Greece, including first Athens and then Thessaly, under its tyrant Jason of Pherae (ruled c. 385-370).

Notes for Neoptolemus, king of Epirus:
In the 5th century Epirus was still on the periphery of the Greek world. To the 5th-century historian Thucydides, the Epirotes were "barbarians." The only Epirotes regarded as Greek were the Aeacidae, who were members of the Molossian royal house and claimed descent from Achilles. From about 370 BC on, the Aeacidae were able to expand the Molossian state by incorporating tribes from the rival groups in Epirus. The Aeacidae's efforts gained impetus from the marriage of Philip II of Macedon to their princess, Olympias. In 334, while Alexander the Great, son of Philip and Olympias, crossed into Asia, his uncle, the Molossian ruler Alexander, attacked southern Italy, where he was eventually checked by Rome and killed in battle in about 331. Upon Alexander the Molossian's death, the Epirote tribes formed a coalition on an equal basis but with the Molossian king in command of their military forces. The greatest Molossian king of this coalition was Pyrrhus (319-272); he and his son Alexander II ruled as far south as Acarnania and to central Albania in the north. Pyrrhus' military adventures overstrained his state's military resources, but they also brought great prosperity to Epirus. He built a magnificent stone theatre at Dodona and a new suburb at Ambracia (now Irta), which he made his capital.

By Andromache, Priam's daughter-in-law, Neoptolemus (possible far ancestor of Olympia) was the father of Molossus, ancestor of the Molossian kings.

Notes for Darius II, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Darius II Ochus (d. 404 BC, Babylon [now in Iraq]), Achaemenid king (reigned 423-404 BC) of Persia.

The son of Artaxerxes I by a Babylonian concubine, he seized the throne from his half brother Secydianus (or Sogdianus), whom he then executed. Ochus, who had previously been satrap of Hyrcania, adopted the name of Darius on his accession; he was also known as Nothus (Bastard). Darius was dominated by eunuchs and by his half sister and wife, the cruel and ambitious Parysatis. Intrigue and corruption were rife at the Achaemenid court, and revolts in Hyrcania and Media, although quickly suppressed, were symptomatic of the discontent caused by his rule.

After the Athenian defeat at Syracuse in 413 BC, Darius decided to recover the Greek coastal cities of Asia Minor, which had been under Athenian control since 448. The satraps of Asia Minor, Tissaphernes and Pharnabazus, were ordered to collect overdue tribute, and an alliance against Athens was formed with Sparta. In the ensuing war the greater part of Ionia was recovered, but elsewhere the allies had less success, partly because of the policy of Tissaphernes, who gave Spartan forces only limited support. In 407, however, Darius decided to put all his resources behind Sparta. He appointed his son Cyrus the Younger in place of Tissaphernes as commander in chief of Asia Minor and gave him funds to re-create the Spartan fleet. As a result Athenian power was broken in 405 at Aegospotami. Not long after, Darius died of an illness.

i. Cyrus The Younger, Prince Of Persia, born in c 456 BC; died in 401 a.c.

   Notes for Cyrus The Younger, Prince Of Persia:
   Ciro de Persia el Joven (424-401a.C.), príncipe persa, hijo de Darío II, rey de Persia, y hermano menor de Artajerjes II (que reinó en 404-c.358a.C.). En el 408a.C. fue nombrado sátrapa (gobernador) de las provincias persas al oeste de Asia Menor.

También apoyó a los espartanos durante los últimos años de la guerra del Peloponeso permitiéndoles derrotar a los atenienses. Cuando Darío murió y Artajerjes le sucedió (404a.C.) en el trono, Ciro proyectó una revuelta, pero Tisafernes, sátrapa de Caria, reveló sus planes (413-395a.C.). Ciro fue perdonado gracias a la influencia de su madre, Parisatis, y enviado de nuevo a su satrapía. Allí reunió una fuerza de aproximadamente 100.000 individuos persas y 13.000 griegos, principalmente mercenarios espartanos. Bajo el pretexto de dirigir una expedición contra los bandidos de Pisidia, marchó desde Sardes hacia Babilonia, entonces bajo dominio persa, para deponer a su hermano. En el 401a.C. los ejércitos de Artajerjes se encontraron con los de Ciro en la batalla de Cunaxa, cerca del río Éufrates; Ciro murió durante la lucha. Una consecuencia importante de esta batalla fue el repliegue estratégico de los griegos desde el centro del territorio persa hasta el mar Negro, exponiendo al mundo griego la debilidad militar de los persas. La historia de la revuelta de Ciro y de la marcha de los conocidos como los 'diez mil griegos' fue narrada por el general e historiador ateniense Jenofonte en la Anábasis.

Cyrus THE YOUNGER (b. after 423 BC--d. 401, Cunaxa, Babylonia [now in Iraq]), younger son of the Achaemenian king Darius II and his wife, Parysatis.

Cyrus was the favourite of his mother, who hoped to secure the succession for him instead of her eldest son, Arsaces. When Darius decided to continue the war against Athens and give support to the Spartans, Parysatis persuaded him to appoint the young Cyrus as satrap (governor) of Lydia, Phrygia, and Cappadocia and commander in chief of the Achaemenian forces in Asia Minor (407). Cyrus' friendly alliance with Lysander, the commander of the Spartan fleet, assured Sparta of victory.

In 405 Cyrus was called to his father's deathbed, and in 404, when Arsaces became king as Artaxerxes II, Cyrus was accused by Tissaphernes, satrap of Caria, of plotting his brother's murder. On the intercession of Parysatis, however, Cyrus was pardoned and sent back to his satrapy. On his return, Cyrus began preparations to seize the throne. He used a quarrel with Tissaphernes over the Ionian cities as a pretext for gathering a large army and also pretended to
prepare an expedition to Pisidia, in the Taurus Mountains. In the spring of 401 Cyrus started out with about 20,000 men, many of whom were Greek mercenaries. When he reached the Euphrates River at Thapsacus, he announced that he was marching against Artaxerxes. He advanced unopposed into Babylonia; but Artaxerxes, warned at the last moment by Tissaphernes, was

hastily gathering an army. The two forces met at the Battle of Cunaxa, north of Babylon, where Cyrus was slain. The Greek troops of Cyrus, after their commanders had been treacherously seized by Tissaphernes, forced their way to the Black Sea.

The courage and ability of Cyrus were highly praised by the Greeks, especially by the historian Xenophon (one of the Greek mercenaries), who in his Anabasis wrote the history of the Greek retreat; but from the standpoint of the Achaemenians Cyrus was a traitor who, to gain his own ends, used hostile Greeks to attack the empire.

[MARINOS HASTA PERSIA.FTW]

Artaxerxes I (d. 425 BC, Susa, Elam [now in Iran]), Achaemenid king of Persia (reigned 465-425 BC).

He was surnamed in Greek Macrocheir ("Longhand") and in Latin Longimanus. A younger son of Xerxes I and Amestris, he was raised to the throne by the commander of the guard, Artabanus, who had murdered Xerxes. A few months later, Artaxerxes slew Artabanus in a hand-to-hand fight. His reign, though generally peaceful, was disturbed by several insurrections, the first of which was the revolt of his brother the satrap of Bactria. More dangerous was the rebellion of Egypt under Inaros, who received assistance from the Athenians. Achaemenid rule in Egypt was restored by Megabyzus, satrap of Syria, after a prolonged struggle (460-454). In 448 fighting between the Achaemenids and the Athenians ended, and in the Samian and Peloponnesian wars Artaxerxes remained neutral; toward the Jews he pursued a tolerant policy. His building inscriptions at Persepolis record the completion of the throne hall of his father. The tomb of Artaxerxes is at Naqsh-e Rustam.

Notes for Xerxes I The Great, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Xerxes I, Old Persian KHSHAYARSHA, byname XERXES THE GREAT (b. c. 519 BC--d. 465, Persepolis), Persian king (486-465 BC), the son and successor of Darius I. He is best known for his massive invasion of Greece from across the Hellespont (480 BC), a campaign marked by the battles of Thermopylae, Salamis, and Plataea. His ultimate defeat spelled the beginning of the decline of the Achaemenid Empire.

Accession to the throne.

Xerxes was the son of Darius I and Atossa, daughter of Cyrus; he was the first son born to Darius after his accession to the throne. Xerxes was designated heir apparent by his father in preference to his elder brother Artabazanes. A bas-relief on the southern portico of a courtyard in the treasury of Persepolis, as well as the bas-reliefs on the east door of the tripylon (an ornamental stairway) depict him as the heir apparent, standing behind his father, who is seated on the throne.
When his father died, in 486 BC, Xerxes was about 35 years old and had already governed Babylonia for a dozen years.

One of his first concerns upon his accession was to pacify Egypt, where a usurper had been governing for two years. But he was forced to use much stronger methods than had Darius: in 484 BC he ravaged the Delta and chastised the Egyptians. Xerxes then learned of the revolt of Babylon, where two nationalist pretenders had appeared in swift succession. The second, Shamash-eriba, was conquered by Xerxes' son-in-law, and violent repression ensued: Babylon's fortresses were torn down, its temples pillaged, and the statue of Marduk destroyed; this latter act had great political significance: Xerxes was no longer able to "take the hand of" (receive the patronage of) the Babylonian god. Whereas Darius had treated Egypt and Babylonia as kingdoms personally united to the Persian Empire (though administered as satrapies), Xerxes acted with a new intransigence. Having rejected the fiction of personal union, he then abandoned the titles of king of Babylonia and king of Egypt, making himself simply "king of the Persians and the Medes."

It was probably the revolt of Babylon, although some authors say it was troubles in Bactria, to which Xerxes alluded in an inscription that proclaimed:

> And among these countries (in rebellion) there was one where, previously, daevas had been worshipped. Afterward, through Ahura Mazda's favour, I destroyed this sanctuary of daevas and proclaimed, "Let daevas not be worshipped!" There, where daevas had been worshipped before, I worshipped
> Ahura Mazda.

Xerxes thus declared himself the adversary of the daevas, the ancient pre-Zoroastrian gods, and doubtlessly identified the Babylonian gods with these fallen gods of the Aryan religion. The questions arise of whether the destruction of Marduk's statue should be linked with this text proclaiming the destruction of the daeva sanctuaries, of whether Xerxes was a more zealous supporter of Zoroastrianism than was his father, and, indeed, of whether he himself was a

Zoroastrian. The problem of the relationship between the Achaemenid religion and Zoroastrianism is a difficult one, and some scholars, such as M. Molé, have even thought that this is an improper posing of the question, that there were, rather, three different states of religion: a religion of strict observance, a royal religion as attested by the Achaemenid inscriptions, and the popular religion as described by the Greek historian Herodotus.

War against the Greeks.

With the tranquillity of the empire reestablished, Xerxes would willingly have devoted himself to peaceful activities. But many of those around him were pressing for the renewal of hostilities. His cousin and brother-in-law Mardonius, supported by a strong party of exiled Greeks, incited him to take revenge for the affront that Darius had suffered at the hands of the Greeks at Marathon (490 BC). The impressionable Xerxes gave way to pressure from his entourage and threw himself into patient diplomatic and military preparations for war, which required three years to complete (484-481 BC). Herodotus notes that never before had such an effort been undertaken. Troops were levied in all the satrapies, and a navy, intended to be the army's supply line, was gathered. The care lavished on this enterprise shows that the King did not regard it as a minor operation.

There has been much later speculation on the real causes for the expedition. They could not have been economic, because Greece was not important then. Perhaps it was only the manifestation of a royal absolutism: Xerxes, whose character was later distorted in Greek legend, was neither foolish nor overly optimistic; although sensible and intelligent, he was nevertheless, according to G. Glotz,

> a sovereign by divine right, to whom opposition was as annoying as sacrilege . . .
> nervous in temperament, fallen from youthful fire into indolence, incited to make a
> war he didn't like. . . .

At the head of his armies, he left Sardis for the Hellespont and had two boat bridges placed across the strait. A storm destroyed them, and Xerxes had the sea whipped as punishment. With the bridges remade, for seven days he oversaw the crossing of the army--5,000,000 men according to Herodotus and 360,000 by modern estimate, supported by 700 to 800 ships. Their passage was facilitated by a massive engineering works: a channel was dug across the Isthmus of Actium so that the peaks of Mount Athos might be avoided. Nevertheless, the army's size was of no help, partly because of misinformation about the enemy terrain and partly because of the appearance of a national feeling in Greece. After a few successes (e.g., Thermopylae, mid-August 480 BC), Xerxes occupied Attica and pillaged Athens on September 21, but on September 29, at Salamis, a naval battle that he had initiated turned into a defeat. Without a fleet to bring supplies to the army, he had to retreat; he crossed over into Asia, leaving Mardonius in Thessaly. During an indecisive battle near Plataea, on Aug. 27, 479, Mardonius was killed, and his death

obliged the army of occupation to withdraw. Hostilities continued for 13 years, but thenceforth Xerxes involved himself only slightly.

Withdrawal to Persia.

Soured by this failure, which modern historians consider the beginning of Achaemenian decline, Xerxes retired to Susa and Persepolis. He then furthered the depletion of the once-enormous resources he had gathered, through multiple taxation, by launching a vast construction program. At the capital city of Persepolis, Darius' architects, working from a unified plan of great scope, had already begun construction on a gigantic terrace of the Apadana (an audience hall), the Tripylon, a palace, and a treasury. When Xerxes became king, he had laid the enameled-brick facing on the exterior of the Apadana and finished his father's palace. Then he erected other monuments: his own palace, southeast of Darius' and similar to it in plan, and a mysterious building called the Harem by archaeologists--a line of small, identical rooms that may have been Xerxes' treasury. He also undertook construction of the Hall of a Hundred Columns, or Throne Room, but he was able to finish only the paving and the base of the walls (the walls themselves and the decoration of this gigantic hypostyle hall were the work of Artaxerxes I). These buildings marked an evolution toward the colossal and toward a style that was perhaps more pretentious than that typical of Darius' reign.

Little is known about the last years of Xerxes' life. After his reversal in Greece, he withdrew into himself and allowed himself to be drawn into harem intrigues in which he was, in fact, only a pawn: thus, he disposed of his brother's entire family at the demand of the queen. But in 465 he himself fell, together with his eldest son, under the blows of murderous members of his court, among them his minister Artabanus. Another son, Artaxerxes I, succeeded in retaining power.

Notes for Alexander I, King Of Macedonia:
Alexander I, byname ALEXANDER PHILHELLENE, or ALEXANDER THE WEALTHY (d. c. 450 BC), 10th king of ancient Macedonia, who succeeded his father, Amyntas I, about 500 BC. More than a decade earlier, Macedonia had become a vassal state of Persia; and in 480 Alexander was obliged to accompany Xerxes I in a campaign through Greece, though he secretly aided the Greek allies. With Xerxes' apparent acquiescence, Alexander seized the Greek colony of Pydna and advanced his frontiers eastward to the Strymon, taking in Crestonia and Bisaltia, with the rich silver deposits of Mt. Dysorus.

It was probably Alexander who organized the mass of his people as a hoplite army called pezhetairoi ("foot companions"), with rudimentary political rights, to act as a counterweight to the nobility, the cavalry hetairoi ("companions"). His byname, the Philhellene, indicates his efforts to win Greek sympathies; and he obtained admission to the Olympic games. From Persian spoil he erected a golden statue at Delphi, and he entertained the poet Pindar at his court.

Notes for Darius I The Great, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Darius I, byname DARIUS THE GREAT (b. 550 BC--d. 486), king of Persia in 522-486 BC, one of the greatest rulers of the Achaemenid dynasty, who was noted for his administrative genius and for his great building projects. Darius attempted several times to conquer Greece; his fleet was destroyed by a storm in 492, and the Athenians defeated his army at Marathon in 490.

Ascension to monarchy.

Darius was the son of Hystaspes, the satrap (provincial governor) of Parthia. The principal contemporary sources for his history are his own inscriptions, especially the great trilingual inscription on the Bisitun (Behistun) rock at the

village of the same name, in which he tells how he gained the throne. The accounts of his accession given by the Greek historians Herodotus and Ctesias are in many points obviously derived from this official version but are interwoven with legends.

According to Herodotus, Darius, when a youth, was suspected by Cyrus II the Great (who ruled from 559 to 529 BC) of plotting against the throne. Later Darius was in Egypt with Cambyses II, the son of Cyrus and heir to his kingdom, as a member of the royal bodyguard. After the death of Cambyses in the summer of 522 BC, Darius hastened to Media, where, in September, with the help of six Persian nobles, he killed Bardiya (Smerdis), another son of Cyrus, who had usurped the throne the previous March. In the Bisitun inscription Darius
defended this deed and his own assumption of kingship on the grounds that the usurper was actually Gaumata, a Magian, who had impersonated Bardiya after Bardiya had been murdered secretly by Cambyses. Darius therefore claimed that he was restoring the kingship to the rightful Achaemenid house. He himself, however, belonged to a collateral branch of the royal family, and, as his father and grandfather were alive at his accession, it is unlikely that he was next in line to the throne. Some modern scholars consider that he invented the story of Gaumata in order to justify his actions and that the murdered king was indeed the son of Cyrus.

Darius did not at first gain general recognition but had to impose his rule by force. His assassination of Bardiya was followed, particularly in the eastern provinces, by widespread revolts, which threatened to disrupt the empire. In Susiana, Babylonia, Media, Sagartia, and Margiana, independent governments were set up, most of them by men who claimed to belong to the former ruling families. Babylonia rebelled twice and Susiana three times. In Persia itself a certain Vahyazdata, who pretended to be Bardiya, gained considerable support. These risings, however, were spontaneous and uncoordinated, and, otwithstanding the small size of his army, Darius and his generals were able to suppress them one by one. In the Bisitun inscription he records that in 19 battles he defeated nine rebel leaders, who appear as his captives on the accompanying relief. By 519 BC, when the third rising in Susiana was put down, he had established his authority in the east. In 518 Darius visited Egypt, which he lists as a rebel country, perhaps because of the insubordination of its satrap, Aryandes, whom he put to death.

Fortification of the empire.

Having restored internal order in the empire, Darius undertook a number of campaigns for the purpose of strengthening his frontiers and checking the incursions of nomadic tribes. In 519 BC he attacked the Scythians east of the Caspian Sea and a few years later conquered the Indus Valley. In 513, after subduing eastern Thrace and the Getae, he crossed the Danube River into European Scythia, but the Scythian nomads devastated the country as they retreated from him, and he was forced, for lack of supplies, to abandon the campaign. The satraps of Asia Minor completed the subjugation of Thrace, secured the submission of Macedonia, and captured the Aegean islands of

Lemnos and Imbros. Thus, the approaches to Greece were in Persian hands, as was control of the Black Sea grain trade through the straits, the latter being of major importance to the Greek economy. The conquest of Greece was a logical
step to protect Persian rule over the Greeks of Asia Minor from interference by their European kinsmen. According to Herodotus, Darius, before the Scythian campaign, had sent ships to explore the Greek coasts, but he took no military action until 499 BC, when Athens and Eretria supported an Ionian revolt against Persian rule. After the suppression of this rebellion, Mardonius, Darius' son-in-law, was given charge of an expedition against Athens and Eretria, but the loss of his fleet in a storm off Mount Athos (492 BC) forced him to abandon the operation. In 490 BC another force under Datis, a Mede, destroyed Eretria and enslaved its inhabitants but was defeated by the Athenians at Marathon. Preparations for a third expedition were delayed by an insurrection in Egypt, and Darius died in 486 BC before they were completed.

Darius as an administrator.

Although Darius consolidated and added to the conquests of his predecessors, it was as an administrator that he made his greatest contribution to Persian history. He completed the organization of the empire into satrapies, initiated by Cyrus the Great, and fixed the annual tribute due from each province. During his reign, ambitious and far-sighted projects were undertaken to promote imperial trade and commerce. Coinage, weights, and measures were standardized and land and sea routes developed. An expedition led by Scylax of Caryanda
sailed down the Indus River and explored the sea route from its mouth to Egypt, and a canal from the Nile River to the Red Sea, probably begun by the chief of the Egyptian delta lords, Necho I (7th century BC), was repaired and completed.

While measures were thus taken to unite the diverse peoples of the empire by a uniform administration, Darius followed the example of Cyrus in respecting native religious institutions. In Egypt he assumed an Egyptian titulary and gave active support to the cult. He built a temple to the god Amon in the Kharga oasis, endowed the temple at Edfu, and carried out restoration work in other anctuaries. He empowered the Egyptians to reestablish the medical school of the temple of Sais, and he ordered his satrap to codify the Egyptian laws in consultation
with the native priests. In the Egyptian traditions he was considered as one of the great lawgivers and benefactors of the country. In 519 BC he authorized the Jews to rebuild the Temple at Jerusalem, in accordance with the earlier decree of Cyrus. In the opinion of some authorities, the religious beliefs of Darius himself, as reflected in his inscriptions, show the influence of the teachings of Zoroaster, and the introduction of Zoroastrianism as the state religion of Persia is probably to be attributed to him.

Darius was the greatest royal architect of his dynasty, and during his reign Persian architecture assumed a style that remained unchanged until the end of the empire. In 521 BC he made Susa his administrative capital, where he restored the fortifications and built an audience hall (apadana) and a residential

palace. The foundation inscriptions of his palace describe how he brought materials and craftsmen for the work from all quarters of the empire. At Persepolis, in his native country of Fars (Persis), he founded a new royal residence to replace the earlier capital at Pasargadae. The fortifications, apadana, council hall, treasury, and a residential palace are to be attributed to him, although not completed in his lifetime. He also built at Ecbana and Babylon.

Astyages, Akkadian ISHTUMEGU (fl. 6th century BC), the last king of the Median empire (reigned 585-550 BC). According to Herodotus, the Achaemenian Cyrus the Great was Astyages' grandson through his daughter Mandane. According to Babylonian inscriptions, Cyrus, king of Anshan (in southwestern Iran), began war against Astyages in 553 BC; in 550 the Median troops rebelled, and Astyages was taken prisoner. Then Cyrus occupied and plundered Ecbatana, the Median capital. A somewhat different account of these events is given by the Greek writer Ctesias.

Notes for Hystaspes, Satrap Of Parthia:
Partia, antiguo paks de Asia, situado aproximadamente en lo que actualmente es Irin y el noroeste de Afganistin. Sus habitantes, los partos, descendkan probablemente de los escitas y adoptaron la indumentaria meda y la lengua aria. Eran excelentes jinetes y arqueros. En combate a caballo, los partos descargaban frecuentemente sus flechas hacia el enemigo mientras simulaban la huida; éste es el origen del dicho "disparar la flecha del parto" (anadir alguna palabra hiriente a un interlocutor en el momento de retirarse).
Partia estuvo sometida sucesivamente a Asiria, a Media, a Persia, a Macedonia bajo el reinado de Alejandro Magno, y al reino Seléucida. Hacia el 250a.C. los reyes partos de la dinastka de los Arsicidas fundaron un reino independiente que durante el siglo I a.C. se convirtió en un imperio que se extendka desde el

rko Éufrates hasta el Indo, y desde el rko Oxus (actual Ams Daryi) al océano Kndico. Las principales ciudades partas eran Seleucia del Tigris, Ctesifonte y Hecatómpilos. Después de mediados del siglo I a.C. Partia fue rival de Roma, y se produjeron varias guerras entre ambas potencias. En el 226d.C. Partia fue conquistada por Ardachir I, rey de Persia y fundador de la dinastka Sasinida.

Notes for Cyrus II, King Of Persia:
[MARINOS HASTA PERSIA.FTW]

Cyrus II, byname CYRUS THE GREAT (b. 590-580 BC, Media, or Persis--d. c. 529, Asia), conqueror who founded the Achaemenid empire, centred on Persia and comprising the Near East from the Aegean Sea to the Indus River. He is also remembered in the Cyrus legend--first recorded by Xenophon, Greek soldier and author, in his Cyropaedia--as a tolerant and ideal monarch who was called father of his people by the ancient Persians and in the Bible as the liberator of the Jews captive in Babylonia.

Life and legend

Cyrus was born between 590 and 580 BC, either in Media or, more probably, in Persis, the modern Fars province of Iran. The meaning of his name is in dispute, for it is not known whether it was a personal name or a throne name given to him when he became a ruler. It is noteworthy that after the Achaemenid empire the name does not appear again in sources relating to Iran, which may indicate some special sense of the name.

Most scholars agree, however, that Cyrus the Great was at least the second of the name to rule in Persia. One cuneiform text in Akkadian--the language of Mesopotamia (present-day Iraq) in the pre-Christian era--asserts he was the son of Cambyses, great king, king of Anshan, grandson of Cyrus, great king, king of Anshan, descendant of Teispes, great king, king of Anshan, of a family [which] always [exercised] kingship.

In any case, it is clear that Cyrus came from a long line of ruling chiefs.

The most important source for his life is the Greek historian Herodotus. The idealized biography by Xenophon is a work for the edification of the Greeks concerning the ideal ruler, rather than a historical treatise. It does, however, indicate the high esteem in which Cyrus was held, not only by his own people, the Persians, but by the Greeks and others. Herodotus says that the Persians called Cyrus their father, while later Achaemenid rulers were not so well regarded. The story of the childhood of Cyrus, as told by Herodotus with echoes in Xenophon and the Greek historian Ctesias, may be called a Cyrus legend since it obviously follows a pattern of folk beliefs about the almost superhuman qualities of the founder of a dynasty. Similar beliefs also exist about the founders of later dynasties throughout the history of Iran. According to the legend, Astyages, the king of the Medes and overlord of the Persians, gave his daughter in marriage to his vassal in Persis, a prince called Cambyses. From this marriage Cyrus was born. Astyages, having had a dream that the baby would grow up to overthrow him, ordered Cyrus slain. His chief adviser, however, instead gave the baby to a shepherd to raise. When he was 10 years old, Cyrus, because of his outstanding qualities, was discovered by Astyages, who, in spite of the dream, was persuaded to allow the boy to live. Cyrus, when he reached manhood in Persis, revolted against his maternal grandfather and overlord. Astyages marched against the rebel, but his army deserted him and surrendered to Cyrus in 550 BC.

Cyrus' conquests

After inheriting the empire of the Medes, Cyrus first had to consolidate his power over Iranian tribes on the Iranian plateau before expanding to the west. Croesus, king of Lydia in Asia Minor, had enlarged his domains at the expense of the Medes when he heard of the fall of Astyages, and Cyrus, as successor of the Median king, marched against Lydia. Sardis, the Lydian capital, was captured in 547 or 546, and Croesus was either killed or burned himself to death, though according to other sources he was taken prisoner by Cyrus and well
treated. The Ionian Greek cities on the Aegean Sea coast, as vassals of the Lydian king, now became subject to Cyrus, and most of them submitted peacefully. Several revolts of the Greek cities were later suppressed with severity. Next Cyrus turned to Babylonia, where dissatisfaction of the people with the ruler Nabonidus gave him a pretext for invading the lowlands. The conquest was quick, for even the priests of Marduk, the national deity of the great metropolis of Babylon, had become estranged from Nabonidus. In October 539 BC, the greatest city of the ancient world fell to the Persians.

In the Bible (e.g., Ezra 1:1-4), Cyrus is famous for freeing the Jewish captives in Babylonia and allowing them to return to their homeland. Cyrus was also tolerant toward the Babylonians and others. He honoured Marduk and conciliated the local population by supporting local customs and even sacrificing to local deities. The capture of Babylon delivered not only Mesopotamia into the hands of Cyrus but also Syria and Palestine, which had been conquered previously
by the Babylonians. The ruler of Cilicia in Asia Minor had become an ally of Cyrus when the latter marched against Croesus, and Cilicia retained a special status in Cyrus' empire. Thus it was by diplomacy as well as force of arms that he established the largest empire known until his time.

Cyrus seems to have had several capitals. One was the city of Ecbatana, modern Hamadan, former capital of the Medes, and another was a new capital of the empire, Pasargadae, in Persis, said to be on the site where Cyrus had won the battle against Astyages. The ruins today, though few, arouse admiration in the visitor. Cyrus also kept Babylon as a winter capital.

No Persian chauvinist, Cyrus was quick to learn from the conquered peoples. He not only conciliated the Medes but joined them with the Persians in a kind of dual monarchy of the Medes and Persians. Cyrus had to borrow the traditions of kingship from the Medes, who had ruled an empire when the Persians were merely their vassals. It is probable that a Mede was traditionally made an adviser to the Achaemenid king, as a sort of chief minister; on later reliefs at Persepolis, a capital of the Achaemenid kings from the time of Darius, a Mede is frequently depicted together with the great king. The Elamites, indigenous inhabitants of Persis, were also the teachers of the Persians in many ways, as can be seen, for example, in the Elamite dress worn by Persians and by Elamite objects carried by them on the stone reliefs at Persepolis. There also seems to have been little innovation in government and rule, but rather a willingness to borrow, combined with an ability to adapt what was borrowed to the new empire. Cyrus was undoubtedly the guiding genius in the creation not only of a great empire but in the formation of Achaemenid culture and civilization.

Little is known of the family life of Cyrus. He had two sons, one of whom, Cambyses, succeeded him; the other, Bardiya ( Smerdis of the Greeks), was probably secretly put to death by Cambyses after he became ruler. Cyrus had at least one daughter, Atossa (who married her brother Cambyses), and possibly two others, but they played no role in history.

When Cyrus defeated Astyages he also inherited Median possessions in eastern Iran, but he had to engage in much warfare to consolidate his rule in this region. After his conquest of Babylonia, he again turned to the east, and Herodotus tells of his campaign against nomads living east of the Caspian Sea. According to the Greek historian, Cyrus was at first successful in defeating the ruler of the nomads--called the Massagetai--who was a woman, and captured her son. On the son's committing suicide in captivity, his mother swore revenge and defeated and killed Cyrus. Herodotus' story may be apocryphal, but Cyrus' conquests in Central Asia were probably genuine, since a city in farthest

Sogdiana was called Cyreschata, or Cyropolis, by the Greeks, which seems to prove the extent of his Eastern conquests.

The legacy of Cyrus

It is a testimony to the capability of the founder of the Achaemenid empire that it continued to expand after his death and lasted for more than two centuries. But Cyrus was not only a great conqueror and administrator; he held a place in the minds of the Persian people similar to that of Romulus and Remus in Rome or Moses for the Israelites. His saga follows in many details the stories of hero and conquerors from elsewhere in the ancient world. The manner in which the baby Cyrus was given to a shepherd to raise is reminiscent of Moses in the bulrushes in Egypt, and the overthrow of his tyrannical grandfather has echoes in other myths and legends. There is no doubt that the Cyrus saga arose early among the Persians and was known to the Greeks. The sentiments of esteem or even awe in which Persians held him were transmitted to the Greeks, and it was no accident that Xenophon chose Cyrus to be the model of a ruler for the lessons he wished to impart to his fellow Greeks.

In short, the figure of Cyrus has survived throughout history as more than a great man who founded an empire. He became the epitome of the great qualities expected of a ruler in antiquity, and he assumed heroic features as a conqueror who was tolerant and magnanimous as well as brave and daring. His personality as seen by the Greeks influenced them and Alexander the Great, and, as the tradition was transmitted by the Romans, may be considered to influence our thinking even now. In the year 1971, Iran celebrated the 2,500th anniversary of the founding of the monarchy by Cyrus.

Notes for Nabuchadrezzar II, Prince of Babylon:
Nebuchadrezzar II (b. c. 630--d. c. 561 BC), the second and greatest king of the Chaldean dynasty of Babylonia (reigned c. 605-c. 561 BC). He was known for his military might, the splendour of his capital, Babylon, and his important part in Jewish history.

Nebuchadrezzar II was the oldest son and successor of Nabopolassar, founder of the Chaldean empire. He is known from cuneiform inscriptions, the Bible and later Jewish sources, and classical authors. His name, from the Akkadian Nabu-kudurri-usur, means "O Nabu, watch over my heir."

While his father disclaimed royal descent, Nebuchadrezzar claimed the third-millennium Akkadian ruler Naram-Sin as ancestor. The year of his birth is uncertain, but it is not likely to have been before 630 BC, for according to tradition Nebuchadrezzar began his military career as a young man, appearing as a military administrator by 610. He is first mentioned by his father as working as a labourer in the restoration of the temple of Marduk, the chief god of the city of Babylon and the national god of Babylonia.

In 607/606, as crown prince, Nebuchadrezzar commanded an army with his father in the mountains north of Assyria, subsequently leading independent operations after Nabopolassar's return to Babylon. After a Babylonian reverse at the hands of Egypt in 606/605, he served as commander in chief in his father's place and by brilliant generalship shattered the Egyptian army at Carchemish and Hamath, thereby securing control of all Syria. After his father's death on Aug. 16, 605, Nebuchadrezzar returned to Babylon and ascended the throne within three weeks. This rapid consolidation of his accession
and the fact that he could return to Syria shortly afterward reflected his strong grip on the empire.

On expeditions in Syria and Palestine from June to December of 604, Nebuchadrezzar received the submission of local states, including Judah, and captured the city of Ashkelon. With Greek mercenaries in his armies, further campaigns to extend Babylonian control in Palestine followed in the three succeeding years. On the last occasion (601/600), Nebuchadrezzar clashed with an Egyptian army, with heavy losses; this reverse was followed by the defection of certain vassal states, Judah among them. This brought an intermission in the series of annual campaigns in 600/599, while Nebuchadrezzar
remained in Babylonia repairing his losses of chariots. Measures to regain control were resumed at the end of 599/598 (December to March). Nebuchadrezzar's strategic planning appeared in his attack on the Arab tribes of northwestern Arabia, in preparation for the occupation of Judah. He attacked Judah a year later and captured Jerusalem on March 16, 597, deporting King Jehoiachin to Babylon. After a further brief Syrian campaign in 596/595, Nebuchadrezzar had to act in eastern Babylonia to repel a threatened invasion, probably from Elam (modern southwestern Iran). Tensions in Babylonia were revealed by a rebellion late in 595/594 involving elements of the army, but he was able to put this down decisively enough to undertake two further campaigns in Syria during 594.

Nebuchadrezzar's further military activities are known not from extant chronicles but from other sources, particularly the Bible, which records another attack on Jerusalem and a siege of Tyre (lasting 13 years, according to the Jewish historian Flavius Josephus) and hints at an invasion of Egypt. The siege of Jerusalem ended in its capture in 587/586 and in the deportation of prominent citizens, with a further deportation in 582. In this respect he followed the methods of his Assyrian predecessors.

Much influenced by the Assyrian imperial tradition, Nebuchadrezzar consciously pursued a policy of expansion, claiming the grant of universal kingship by Marduk and praying to have "no opponent from horizon to sky." From cuneiform fragments he is known to have attempted the invasion of Egypt, the culmination of his expansionist policy, in 568/567.

In addition to being a brilliant tactician and strategist, Nebuchadrezzar was also prominent in international diplomacy, as shown in his sending an ambassador (probably Nabonidus, a successor) to mediate between the Medes and Lydians in Asia Minor. He died about 561 and was succeeded by his son Awil-Marduk (Evil-Merodach of 2 Kings).

Nebuchadrezzar's main activity, other than as military commander, was the rebuilding of Babylon. He completed and extended fortifications begun by his father, built a great moat and a new outer defense wall, paved the ceremonial Processional Way with limestone, rebuilt and embellished the principal temples, and cut canals. This he did not only for his own glorification but also in honour of the gods. He claimed to be "the one who set in the mouth of the people reverence for the great gods" and
disparaged predecessors who had built palaces elsewhere than at Babylon and had only journeyed there for the New Year Feast.

Little is known of his family life beyond the tradition that he married a Median princess, whose yearning for her native terrain he sought to ease by creating gardens simulating hills. A structure representing these hanging gardens cannot be positively identified in either the cuneiform texts or the archaeological remains.

Despite the fateful part he played in Judah's history, Nebuchadrezzar is seen in Jewish tradition in a predominantly favourable light. It was claimed that he gave orders for the protection of Jeremiah, who regarded him as God's appointed instrument whom it was impiety to disobey, and the prophet Ezekiel expressed a similar view at the attack on Tyre. A corresponding attitude to Nebuchadrezzar, as God's instrument against wrongdoers, occurs in the Apocrypha in 1 Esdras and, as protector to be prayed for, in Baruch. In Daniel (Old Testament) and in Bel and the Dragon (Apocrypha), Nebuchadrezzar appears as a man, initially deceived by bad advisers, who welcomes the situation in which truth is triumphant
and God is vindicated.

There is no independent support for the tradition in Daniel of Nebuchadrezzar's seven years' madness, and the story probably arose from a fanciful later interpretation of texts concerned with events under Nabonidus, who showed apparent eccentricity in deserting Babylon for a decade to live in Arabia.

In modern times Nebuchadrezzar has been treated as the type of godless conqueror; Napoleon was compared to him. The story of Nebuchadrezzar is the basis of Giuseppe Verdi's opera Nabucco, while his supposed madness is the theme of William Blake's picture "Nebuchadnezzar." (H.W.F.S.)

Notes for Cyaxares, King Of Media:
Cyaxares (d. 585 BC), king of Media (located in what is now northwestern Iran), who reigned from 625 to 585 BC. According to the 5th-century-BC Greek historian Herodotus, Cyaxares renewed the war with the Assyrians after his father, Phraortes, had been slain in battle. While besieging Nineveh, he was attacked and defeated by a great army of Scythians, who then ruled Media (653-625) until their chiefs were slain by Cyaxares at a banquet. It was probably Cyaxares, not his father, as is maintained by Herodotus, who united the tribes of ancient
Iran. He also reorganized the Median army, dividing it into spearmen, bowmen, and cavalry and instituting changes in clothing and weapons.

Cyaxares once more renewed the war with Assyria; in 614 the Medes took Ashur, and in 612 they occupied and sacked Nineveh. About the same time they seem to have conquered the kingdom of Mannai in modern Iranian Azerbaijan and in 609 invaded and afterward subjected Urartu in the Armenian highlands. The Median army took part in the final defeat of the Assyrians in northern Mesopotamia (612-609); and, when the territory of Assyria was divided between Media and Babylonia, Media took Assyria with Harran. Five years of war between Media and Lydia in Anatolia (590-585) ended when the two countries accepted the Halys River as their boundary. Cyaxares died shortly afterward.

Notes for Nabopolassar, King Of Babylon:
The History of Ancient Mesopotamia

THE NEO-BABYLONIAN EMPIRE

The Chaldeans, who inhabited the coastal area near the Persian Gulf, had never been entirely pacified by the Assyrians. About 630 Nabopolassar became king of the Chaldeans. In 626 he forced the Assyrians out of Uruk and crowned himself king of Babylonia. He took part in the wars aimed at the

destruction of Assyria. At the same time, he began to restore the dilapidated network of canals in the cities of Babylonia, particularly those in Babylon itself. He fought against the Assyrian
Ashur-uballit II and then against Egypt, his successes alternating with misfortunes. In 605 Nabopolassar died in Babylon.

Ancient Middle Eastern Arts and Architecture

NEO-BABYLONIAN PERIOD

During the half century following the fall of Nineveh, in 612 BC, there was a final flowering of Mesopotamian culture in southern Iraq under the last dynasty of Babylonian kings. During the reigns of Nabopolassar (625-605 BC) and his son Nebuchadrezzar II (604-562 BC), there was widespread building activity. Temples and ziggurats were repaired or rebuilt in almost all the old dynastic cities, while Babylon itself was enormously enlarged and surrounded by a double enceinte, or line of fortification, consisting of towered and moated fortress walls. Inside the city the most grandiose effect was obtained by the disposal of public buildings along a wide processional way, leading through the centre of the town to the temple and ziggurat of its patron god, Marduk. Where the street passed through the inner-city wall, the facades of the famous Ishtar Gate (Pergamon Museum, Berlin) and those facing the adjoining street were ornamented in brightly glazed brickwork, with huge figures of bulls, lions, and dragons modeled in relief. This form of decoration--a costly process, since each of the bricks composing the figures had to be separately cast--provided a solution for the problem of embellishing mud-brick facades. It appears again in the court of honour of Nebuchadrezzar's palace, using a more sophisticated design that suggests familiarity with Greek ornament. For the rest, there are few innovations in the planning of either palaces or temples during the Neo-Babylonian period. Also (strangely enough, in view of the prolonged excavations that took place at this site), examples of contemporary art are limited almost exclusively to cylinder seals and terra-cotta figurines of unpretentious design.

Notes for Phraortes, King Of Media:
Phraortes, Iranian FRAVARTISH, also called KHSHATHRITA, Assyrian KASHTARITI (d. 653 BC), king of Media from 675 to 653 BC. Phraortes, who was known by that name as a result of the writings of the 5th-century-BC Greek historian Herodotus, was originally a village chief of Kar Kashi, but he later subjugated the Persians and a number of other Asian peoples, eventually forming an anti-Assyrian coalition of Medes and Cimmerians. In his attack on Assyria, however, he was defeated and killed in battle.

Another Phraortes was a usurper who reigned for a short time in Media during a rebellion against the Achaemenian king Darius I in 522 BC. Darius' rock inscription at Bisitun relates that "a man of the name of Fravartish [i.e., Phraortes], a Mede, rebelled in Media and spoke to the people thus 'I am Khshathrita, of the family of Uvakhshtra [Cyaxares].' " After a short reign this king was defeated and executed at Ecbatana, the Median capital. The

deception of the usurper Phraortes may have led to Herodotus' mistake about the name of the earlier king.

Ariaramnes, also spelled ARIYARAMNA (fl. late 7th century BC), early Achaemenid king of Persia (reigned c. 640-c. 615).

The son of the previous king, Teispes, Ariaramnes ruled over Persis (modern Fars, in southwestern Iran); his brother Cyrus I was given control of Anshan in Elam, north of the Persian Gulf. A campaign by the Medes, however, broke the power of Ariaramnes, and he and his son Arsames, who succeeded him, became vassals of Media (in modern northwest Iran). Dating to the reign of Ariaramnes is an important gold tablet written in cuneiform--the first historical inscription in Old Persian from Achaemenid times. The tablet not only traces the royal line of Ariaramnes but also provides the first Persian mention of Ahura Mazda, the supreme god.

Partia, antiguo paks de Asia, situado aproximadamente en lo que actualmente es Irin y el noroeste de Afganistin. Sus habitantes, los partos, descendkan probablemente de los escitas y adoptaron la indumentaria meda y la lengua aria. Eran excelentes jinetes y arqueros. En combate a caballo, los partos descargaban frecuentemente sus flechas hacia el enemigo mientras simulaban la huida; éste es el origen del dicho "disparar la flecha del parto" (anadir alguna palabra hiriente a un interlocutor en el momento de retirarse).
Partia estuvo sometida sucesivamente a Asiria, a Media, a Persia, a Macedonia bajo el reinado de Alejandro Magno, y al reino Seléucida. Hacia el 250a.C. los reyes partos de la dinastka de los Arsicidas fundaron un reino independiente que durante el siglo I a.C. se convirtió en un imperio que se extendka desde el rko Éufrates hasta el Indo, y desde el rko Oxus (actual Ams Daryi) al océano Kndico. Las principales ciudades partas eran Seleucia del Tigris, Ctesifonte y Hecatómpilos. Después de mediados del siglo I a.C. Partia fue rival de Roma, y se produjeron varias guerras entre ambas potencias. En el 226d.C. Partia fue conquistada por Ardachir I, rey de Persia y fundador de la dinastka Sasinida.

Although he sent aid to Shamash-shum-ukin of Babylon (651), who was in revolt against Assyria, Cyrus was forced to accept Assyrian overlordship about 639, after the conquest of Elam by Ashurbanipal; and he sent his eldest son, Arukku, with tribute to Nineveh.

Notes for Deioces, First King Of Media:
Deyoeces, Primer Rey de Media

96. Reinando los asirios en el Asia oriental por espacio de quinientos veinte anos, los medos fueron los que empezaron a sublevarse contra ellos, y como peleaban por su libertad, se mostraron valerosos, rechazaron la servidumbre y se hicieron independientes. Después de ellos las demis naciones hicieron lo mismo.

Libres, pues, todas las naciones del continente, volvieron otra vez a caer en tiranka de este modo: hubo entre los medos un sabio varón llamado Deyoces, hijo de Fraortes. Este Deyoces, prendado de la tiranka, hizo lo siguiente: vivkan los medos en diversos pueblos; Deyoces, conocido ya en el suyo por persona respetable, puso el mayor esmero en practicar la justicia, y esto lo hacia en un tiempo en que la licencia dominaba en toda la Media, sabiendo que la injusticia es enemiga de la justicia. Los medos de su mismo pueblo, viendo su modo de proceder, le eligieron juez y él con la idea de apoderarse del mando se manifestó recto y justo. Granjeóse de esta manera no pequena fama entre sus conciudadanos, de tal modo que. oyendo los de los otros pueblos que solamente Deyoces administraba bien la justicia, acudkan a él gustosos de decidir sus pleitos todos los que habkan sufrido sentencias injustas, hasta que por fin a ningsn otro se confiaron ya los negocios.

97. Creciendo cada dka el nsmero de los concurrentes, porque todos okan decir que allk se juzgaba con rectitud, y viendo Deyoces que ya todo pendka de su arbitrio, no quiso sentarse mis en el lugar donde antes daba audiencia, y sel negó a continuar juzgando, porque, alegaba, no le convenka desatender a sus propios negocios por juzgar todo el dka los del prójimo. Como los hurtos y la injusticia eran por los pueblos todavka mis grandes que antes, se juntaron los medos en un mismo lugar para cambiar opiniones; hablaron de la situación presente (y segsn me parece hablaron sobre todo los amigos de Deyoces): "Ya que no es posible que vivamos en el paks en la condición actual, ea, alcemos por rey a uno de nosotros; ask, el paks estari bien regido, y nosotros nos dedicaremos a nuestros trabajos y no pereceremos por el desorden". Con estas palabras se persuadieron a someterse a un rey.

98. A1 punto propusieron a quién alzar por rey y todos proponkan y elogiaban a Deyoces, hasta que convinieron en que fuese rey. Entonces mandó se le edificase un palacio digno de su au toridad real y se con solidase su poder con una guardia. Ask lo hicieron los medos; le edificaron un palacio grande y fortificado en el sitio que él senaló, y le permitieron elegir guardias entre todos los medos. Deyoces ask que se apoderó del mando, obligó a los medos a

formar una sola ciudad y a guarnecerla, cuidando menos de las otras. Obedeciéndole también en esto los medos construyó una fortaleza grande y fuerte, esta que ahora se llama Ecbitana, formada de murallas concéntricas. La plaza esti ideada de suerte que un cerco sobrepasa al otro sólo en la altura de las almenas. Les favoreció hasta cierto punto el sitio mismo, que es una colina redonda, pero mis todavka el artificio, porque siendo en total siete cercos, en el sltimo se halla colocado el palacio y el tesoro. La muralla mis grana de tiene mis o menos el mismo circuito que los muros de Atenas. Las almenas del primer cerco son blancas, las dell segundo negras, las del tercero rojas, las del cuarto azules,y las del quinto anaranjadas, de suerte que todas ellas estin pintadas de colores; pero los dos sltimos cercos tienen el uno almenas plateadas y el otro doradas.

Deioces (fl. late 8th and early 7th centuries BC), petty Median chieftain subject to the kingdom of Mannai in modern Iranian Azerbaijan; later tradition made him the founder of the Median empire.

According to the 5th-century-BC Greek historian Herodotus, Deioces was the first king of the Medes. Herodotus claimed that the Median tribes at first lived in villages without any political organization; when they decided to elect a king, they chose Deioces, a village judge renowned for the justice of his decisions. Deioces united all the Median tribes, built Ecbatana (modern Hamadan, Iran) as their capital, and ruled for 53 years (728-675 BC). Modern scholarship has shown that Herodotus probably confused Deioces with Phraortes, who established a kingdom in Media and ruled from about 675 to about 653 BC.

---

Iran

The kingdom of the Medes.

Traditionally, the creator of the Median kingdom was one Deioces, who, according to Herodotus, reigned from 728 to 675 BC and founded the Median capital Ecbatana (modern Hamadan). Attempts have been made to associate Daiaukku, a local Zagros king mentioned in a cuneiform text as one of the captives deported to Assyria by Sargon II in 714 BC, with the Deioces of Herodotus, but such an association is highly unlikely. To judge from the Assyrian
sources, no Median kingdom such as Herodotus describes for the reign of Deioces existed in the early 7th century BC; at best, he is reporting a Median legend of the founding of their kingdom.

According to Herodotus, Deioces was succeeded by his son Phraortes (675-653 BC), who subjugated the Persians and lost his life in a premature attack

against the Assyrians. Some of this tale may be true. Assyrian texts speak of a Kashtariti as the leader of a conglomerate group of Medes, Scythians, Mannaeans, and miscellaneous other local Zagros peoples that seriously threatened the peace of Assyria's eastern borderlands during the reign of Esarhaddon (680-669
BC). It is possible that Phraortes is this Kashtariti, though the suggestion cannot be proved either historically or linguistically. That a Median king in this period exerted political and military control over the Persians is entirely reasonable, though it cannot be proved.

Beginning as early as the 9th century, and with increasing impact in the late 8th and early 7th centuries, groups of nomadic warriors entered western Iran, probably from across the Caucasus. Dominant among these groups were the Scythians, and their entrance into the affairs of the western plateau during the 7th century may perhaps mark one of the important turning points in Iron Age history. Herodotus speaks in some detail of a period of Scythian domination, the so-called Scythian interregnum in Median dynasty history. His dating of this event remains uncertain, but traditionally it is seen as falling between the reigns of Phraortes and Cyaxares and as covering the years 653 to 625 BC. Whether such an interregnum ever actually occurred and, if it did, whether it should not be dated later than this are open questions. What is clear is that, by the mid-7th century BC, there were a great many Scythians in western Iran, that they, along with the Medes and other groups, posed a serious threat to Assyria, and that their appearance threw previous power alignments quite out of balance.

Herodotus reports how, under Cyaxares of Media (625-585 BC), the Scythians were overthrown when their kings were induced at a supper party to get so drunk that they were then easily slain. It is more likely that about this time either the Scythians withdrew voluntarily from western Iran and went off to plunder elsewhere or they were simply absorbed into a rapidly developing confederation under Median hegemony. Cyaxares is a fully historical figure who appears in the cuneiform sources as Uvakhshatra. Herodotus speaks of how Cyaxares reorganized the Median army into units built around specialized armaments: spearmen, bowmen, and cavalry. The unified and reorganized Medes were a match for the Assyrians. They attacked one of the important Assyrian border cities, Arrapkha, in 615 BC, surrounded Nineveh in 614 BC but were unable to capture it, and instead successfully stormed the Assyrian religious capital, Ashur. An alliance between Babylon and the Medes was sealed by the betrothal of Cyaxares' granddaughter to Nabopolassar's son, Nebuchadrezzar II (605-562 BC). In 612 BC the attack on Nineveh was renewed, and the city fell in late August (the Babylonians arrived rather too late to participate fully in the battle). The Babylonians and the Medes together pursued the fleeing Assyrians westward into Syria. Assyrian appeals to Egypt for help came to nought, and the last Assyrian ruler, Ashur-uballit II, disappeared from history in 609 BC.

The problem, of course, was how to divide the spoils among the victors. The cuneiform sources are comparatively silent, but it would seem that the Babylonians fell heir to all of the Assyrian holdings within the fertile crescent, while their allies took over all of the highland areas. The Medes gained control

over the lands in eastern Anatolia that had once been part of Urartu and eventually became embroiled in war with the Lydians, the dominant political power in western Asia Minor. In 585 BC, probably through the mediation of the Babylonians, peace was established between Media and Lydia, and the Halys (Kizil) River was fixed as the boundary between the two kingdoms. Thus a new balance of power was established in the Middle East among Medes, Lydians, Babylonians, and, far to the south, Egyptians. At his death, Cyaxares controlled vast territories: all of Anatolia to the Halys, the whole of western Iran eastward, perhaps as far as the area of modern Tehran, and all of southwestern Iran, including Fars. Whether it is appropriate to call these holdings a kingdom is debatable; one suspects that authority over the various peoples, Iranian and non-Iranian, who occupied these territories was exerted in the form of a confederation such as is implied by the ancient Iranian royal title, king of kings.

Astyages followed his father, Cyaxares, on the Median throne (585-550 BC). Comparatively little is known of his reign. All was not well with the alliance with Babylon, and there is some evidence to suggest that Babylonia may have feared Median power. The latter, however, was soon in no position to threaten others, for Astyages was himself under attack. Indeed, Astyages and the Medians were soon overthrown by the rise to power in the Iranian world of Cyrus II the Great of Persia.

Media, ancient country of northwestern Iran, generally corresponding to the modern regions of Azerbaijan, Kurdistan, and parts of Kermanshah. Media first appears in the texts of the Assyrian king Shalmaneser III (858-824 BC), in which peoples of the land of "Mada" are recorded. The inhabitants came to be known as Medes.

Although Herodotus credits "Deioces son of Phraortes" (probably c. 715) with the creation of the Median kingdom and the founding of its capital city at Ecbatana (modern Hamadan), it was probably not before 625 BC that Cyaxares, grandson of Deioces, succeeded in uniting into a kingdom the many Iranian-speaking Median tribes. In 614 he captured Ashur, and in 612, in alliance with Nabopolassar of Babylon, his forces stormed Nineveh, putting an end to the
Assyrian empire. The victors divided the Assyrian provinces among themselves, with the Median king taking over a large part of Iran, northern Assyria, and parts of Armenia.

In many respects the internal organization of the Median empire probably resembled that of Assyria, but little is actually known. Few identifiable "Median" objects have been found, but the Medes apparently favoured rich ornamentation and also received a strong artistic influence from Assyria. Since no Median written documents of any kind have ever been uncovered, their spiritual
and economic life is also a matter of conjecture.

By the victory in 550 of the Persian chief Cyrus II the Great over his suzerain, Astyages of Media, the Medes were made subject to the Persians. In the new Achaemenian Empire they retained a prominent position; in honour and war they stood next to the Persians, and their court ceremonial was adopted by the new sovereigns, who in the summer months resided in Ecbatana.

Alexander the Great occupied Media in 330, and in the partition of his empire, southern Media was given to the Macedonian commander Peithon and eventually passed to the Seleucids, but the north was left to Atropates, a former general of Darius III, who succeeded in founding an independent kingdom, named Atropatene, with its capital at Gazaca. In later times Atropatene came under the control of Parthia, Armenia, and Rome.

Southern Media remained a province of the Seleucid empire for a century and a half, and Hellenism was introduced everywhere. About 152 BC, however, Media was taken by the Parthian king Mithradates I, and it remained subject to the Arsacids until about AD 226, when it passed, together with Atropatene, to the Sasanians. By that time the Medes had lost their distinctive character and had been amalgamated into the one nation of the Iranians.

Media (antigua región), antiguo paks de Asia, que corresponde a la zona noreste del actual Irin. Sus habitantes, conocidos como medos, y sus vecinos, los persas, hablaban lenguas indoiranias, muy relacionadas con el antiguo persa. Los historiadores saben muy poco sobre la cultura meda, excepto que practicaban una religión politeksta y que existka una casta sacerdotal a cuyos componentes denominaban magos.
Desde aproximadamente el 835 a.C. las tribus medas estuvieron sometidas intermitentemente a los reyes de Asiria. Hacia el 715 a.C. el jefe meda Dayaukku, denominado por el historiador griego Heródoto Deloces, condujo a los medos a una rebelión sin éxito contra el rey asirio Sargón II (que reinó en 722-705 a.C.). Los gobernantes posteriores de Media consideraron a Dayaukku fundador de la dinastka meda. Posteriormente, otro jefe llamado Khshathrita (que reinó hacia 675-653 a.C.), conocido por los griegos como Fraortes, unió las tribus medas y expulsó a los asirios. Khshathrita fue muerto por los escitas, que invadieron Media desde el noroeste.
El hijo de Khshathrita, Ciaxares (que reinó en 625-585 a.C.) eligió Ecbatana (actualmente Hamadan, Irin) como su capital. En el 625 a.C. expulsó a los escitas de Media e impuso su dominio sobre los persas. Posteriormente atacó a los asirios y capturó la destruyendo Assur en el 614 a.C. En alianza con el reino de Babilonia, que hacka poco tiempo se habka independizado, tomó la ciudad de Nknive y derrotó al Imperio asirio en el 612. Después Ciaxares aumentó el territorio de su reino incluyendo todo el este de Anatolia. Ciaxares fue sucedido por su hijo Astiages (que reinó hacia el 584-550 a.C.). Los persas, bajo el mando de Ciro el Grande, se rebelaron contra él hacia el 550 a.C. Reforzados por una parte del Ejército meda comandado por un jefe llamado Harpagus, tomaron Ecbatana y depusieron al rey meda. Desde este momento

en adelante, Media estuvo polkticamente sometida a Persia; sin embargo, los persas, trataron a los medos como sus iguales, y posteriormente ambos pueblos se consideraron como uno solo. Media se constituyó desde entonces en una satrapka del Imperio persa, hasta que la peculiaridad meda decayó con el reinado de la dinastka persa de los Sasinidas desde el siglo III d.C.

**151115727482823282043904. Achaemenes (Hakamanish), King Of Anshan,** born in c 740 a.c..

Notes for Achaemenes (Hakamanish), King Of Anshan:
Achaemenes, Old Persian HAKHAMANISH (fl. early 7th century BC), eponymous ancestor of the Persian Achaemenid dynasty; he was the father of Teispes (Chishpish) and an ancestor of Cyrus II the Great and Darius I the Great. Although Achaemenes probably ruled only Parsumash, a vassal state of the kingdom of Media, many scholars believe that he led armies from Parsumash and Anshan (Anzan, northwest of Susa in Elam) against the Assyrian king Sennacherib in 681.

The rise of the Persians under Cyrus II.

The ruling dynasty of the Persians settled in Fars in southwestern Iran (possibly the Parsumash of the later Assyrian records) traced its ancestry back to an eponymous ancestor, Haxamanish, or Achaemenes. Traditionally, three rulers fall between Achaemenes and Cyrus II: Teispes, Cyrus I, and Cambyses I. Teispes, freed of Median domination during the so-called Scythian interregnum, is thought to have expanded his kingdom and to have divided it on his death between his two sons, Cyrus I and Ariaramnes. Cyrus I may have been the king of Persia who appears in the records of Ashurbanipal swearing allegiance to Assyria after the devastation of Elam in the campaigns of 642-639 BC, though there are chronological problems involved with this equation. When Median control over the Persians was supposedly reasserted under Cyaxares, Cambyses I is thought to have been given a reunited Persia to administer as a Median vassal. His son, Cyrus II, married the daughter of Astyages and in 559 BC inherited his father's position within the Median confederation. Cyrus II certainly warranted his later title, Cyrus the Great. He must have been a remarkable personality, and certainly he was a remarkable king. He united under his authority several Persian and Iranian groups who apparently had not been under his father's control. He then initiated diplomatic exchanges with Nabonidus of Babylon (556-539 BC), which justifiably worried Astyages. Eventually, he openly rebelled against the Medes, who were beaten in battle when considerable numbers of Median troops deserted to the Persian standard. Thus, in 550 BC, the Median Empire became the first Persian Empire, and the Achaemenid kings appeared on the international scene with a suddenness that must have frightened many.

BRITANICA

Aqueménidas, dinastka que gobernó Persia aproximadamente desde el 550 hasta el 330a.C. Aunque iniciada durante el siglo VIIa.C. por Aquemenes (Hakhamanish), soberano menor del reino de Anzin, situado en el suroeste del actual Irin, el verdadero fundador de la dinastka fue su biz-biznieto Ciro II el Grande, creador del Imperio persa. En el apogeo de su poder, con Darko I el Grande, los Aqueménidas gobernaron en un imperio que se extendka desde el rko Indo, al este, hasta Libia y Tracia, al oeste, y desde el golfo Pérsico, al sur, hasta el Ciucaso y el rko Jaxartes (actual Syr Daryi), al norte. Proporcionaron a Persia una magnkfica administración basada en la división del Imperio en 20 provincias regidas por sitrapas, un extenso código legal, una moneda solvente y un servicio postal eficaz. Aunque eran seguidores de las doctrinas de Zoroastro, fueron tolerantes con otras religiones y durante su mandato se desarrollaron el arte y la arquitectura, como evidencian las magnkficas ruinas de Persépolis. La dinastka acabó con la muerte de Darko III, que fue asesinado por sus propios hombres tras su derrota frente Alejandro Magno en el 334a.C.

El primer lkder destacable de los persas fue el jefe guerrero Aquemenes, que vivió hacia el 681 a.C.

Argead DYNASTY
---

Ruling house of ancient Macedonia from about 700 to about 311 BC; under their leadership the Macedonian kingdom was created and gradually gained predominance throughout Greece.

From about 700 the founder of the dynasty, Perdiccas I, led the people who called themselves Macedonians eastward from their home on the Haliacmon (modern Aliikmon) River. Aegae (Edessa) became the capital, and by the reign of Amyntas I (6th century BC) Macedonian power extended eastward beyond the Axius (Axiós) River to dominate the neighbouring Thracian tribes.

Amyntas' successor, Alexander I (reigned before 492-c. 450), advanced his frontiers eastward to the Strymon (Struma) River. His byname, "the Philhellene," indicates his efforts to win Greek sympathies. He spread the legend deriving his Argead house from the Temenids of Argos and thus obtained admission to the Olympic Games.

Alexander's son Perdiccas II (reigned c. 450-c. 413) asserted his succession against various brothers and united the Greek cities of Chalcidice in a federation centring on the city of Olynthus. Perdiccas' son Archelaus (reigned c. 413-399) adopted a strongly philhellenic policy, introducing Greek artists to his new capital at Pella. He strengthened Macedonia by building roads and fortresses, improving army equipment, and encouraging city life, and his assassination in 399 was followed by seven years of murder and anarchy.

Finally, a great-grandson of Alexander I, Amyntas III, took the throne in 393/392. Although his reign was filled with anarchy and intrigue, he successfully brought unity to Macedonia. His death in 370/369 left three lawful sons, of whom the first two, Alexander II and Perdiccas III, ruled only briefly. In 359 Amyntas' third son, Philip II, assumed control in the name of Perdiccas' infant heir; having restored order he made himself king (reigned 359-336) and raised Macedonia to a predominant position throughout the whole of Greece. Philip's son Alexander III the Great (reigned 336-323) overthrew the Achaemenian Empire and carried Macedonian arms to the Nile and Indus rivers. On Alexander III's death at Babylon his generals divided up the satrapies of his empire. Although Alexander's two successors, his half-brother Philip III Arrhidaeus and his son Alexander IV, furnished a nominal focus for loyalty until about 311, the real power in the empire lay in other hands.

Macedonia
---

Ancient kingdom centred on the plain in the northeastern corner of the Greek peninsula, at the head of the Gulf of Thérmai. In the 4th century BC it achieved hegemony over Greece and conquered lands as far east as the Indus River, establishing a short-lived empire that introduced the Hellenistic Age of ancient Greek civilization.

The cultural links of prehistoric Macedonia were mainly with Greece and Anatolia. A people of unknown ethnic origins who called themselves Macedonians are known from about 700 BC, when they pushed eastward from

their home on the Haliacmon (Aliikmon) River under the leadership of King Perdiccas I and his successors. By the 5th century BC the Macedonians had adopted the Greek language and had forged a unified kingdom. Athenian control of the coastal regions forced Macedonian rulers to concentrate on bringing the uplands and plains of Macedonia under their sway--a task finally achieved by their king Amyntas III (reigned c. 393-370/369).

Two of Amyntas' sons, Alexander II and Perdiccas III, reigned only briefly. Amyntas' third son, Philip II, assumed control in the name of Perdiccas' infant heir; but having restored order he made himself king (reigned 359-336) and raised Macedonia to a predominant position in Greece.

Philip's son Alexander III (reigned 336-323; see Alexander the Great) overthrew the Achaemenian (Persian) Empire and expanded Macedonia's dominion to the Nile and Indus rivers. On Alexander's death at Babylon his generals divided up the satrapies (provinces) of his empire and used them as bases in a struggle to acquire the whole. From 321 to 301 warfare was almost continual. Macedonia itself remained the heart of the empire, and its possession (along with the control of Greece) was
keenly contested. Antipater (Alexander's regent in Europe) and his son Cassander managed to retain control of Macedonia and Greece until Cassander's death (297), which threw Macedonia into civil war. After a six-year rule (294-288) by Demetrius I Poliorcetes, Macedonia again fell into a state of internal confusion, intensified by Galatian marauders from the north. In 277 Antigonus II Gonatas, the capable son of Demetrius, repulsed the Galatians and was hailed as king by the Macedonian army. Under him the country achieved a stable monarchy--the Antigonid dynasty, which ruled Macedonia from 277 to 168.

Under Philip V (reigned 221-179) and his son Perseus (reigned 179-168), Macedonia clashed with Rome and lost. Under Roman control Macedonia at first (168-146) formed four independent republics without common bonds. In 146, however, it became a Roman province with the four sections as administrative units. Macedonia remained the bulwark of Greece, and the northern frontiers saw frequent campaigning against neighbouring tribes. Toward AD 400 it was divided into the provinces of Macedonia and Macedonia secunda, within the diocese of Moesia.

Notes for Neoptolemus:
[TESALONICA.FTW]

Neoptolemus, in Greek legend, the son of Achilles, the hero of the Greek army at Troy, and of Deldamia, daughter of King Lycomedes of Scyros; he was sometimes called Pyrrhus, meaning Fair. In the last year of the Trojan War the Greek hero Odysseus brought him to Troy after the Trojan seer Helenus had declared that the city could not be captured without the aid of a descendant of Aeacus, who had helped to build its walls; Neoptolemus was Aeacus' great-grandson. He fought bravely and took part in the capture of Troy but committed the sacrilege of slaying the aged king Priam at an altar. By Andromache, Priam's
daughter-in-law, he was the father of Molossus, ancestor of the Molossian kings. He later married Hermione but shortly thereafter was murdered at Delphi.

Notes for Andromache:
[TESALONICA.FTW]

Andromache, in Greek legend, the daughter of Eetion (prince of Thebe in Mysia) and wife of Hector (son of King Priam of Troy). All her relations perished in or shortly after the taking of Troy by the Greek warrior Neoptolemus

(Pyrrhus). When the captives were allotted, Andromache fell to Neoptolemus, the son of Achilles, whom she accompanied to Epirus and to whom she bore three sons. Neoptolemus was slain at Delphi, and he left Andromache and the kingdom as well to Helenus, the brother of Hector. After the death of Helenus, Andromache returned to Asia Minor with her youngest son, Pergamus, who there founded a town named after himself.

Notes for Achilles:
[TESALONICA.FTW]

Achilles, in Greek mythology, son of the mortal Peleus, king of the Myrmidons, and the Nereid, or sea nymph, Thetis. He was the bravest, handsomest, and greatest warrior of the army of Agamemnon in the Trojan War. According to Homer, Achilles was brought up by his mother at Phthia with his cousin and inseparable companion Patroclus. One of the non-Homeric tales of his childhood relates that Thetis dipped Achilles in the waters of the River Styx, by which he became invulnerable, except for the part of his heel by which she held him--the proverbial "Achilles' heel."

The later mythographers related that Peleus, having received an oracle that his son would die fighting at Troy, sent Achilles to the court of Lycomedes on Scyros, where he was dressed as a girl and kept among the king's daughters (one of whom, Deldamia, bore him Neoptolemus). Hearing from the soothsayer Calchas that Troy could not be taken without Achilles, the Greeks searched for and found him.

During the first nine years of the war, Achilles ravaged the country around Troy and took 12 cities. In the 10th year a quarrel with Agamemnon occurred when Achilles insisted that Agamemnon restore Chryseis, his prize of war, to her father, a priest of Apollo, so as to appease the wrath of Apollo, who had decimated the camp with a pestilence. An irate Agamemnon recouped his loss by depriving Achilles of his favourite slave, Briseis.

Achilles refused further service, and consequently the Greeks floundered so badly that at last Achilles allowed Patroclus to impersonate him, lending him his chariot and armour. Hector (the eldest son of King Priam of Troy) slew Patroclus, and Achilles, having finally reconciled with Agamemnon, obtained new armour from the god Hephaestus and slew Hector. After dragging Hector's body behind his chariot, Achilles gave it to Priam at his earnest entreaty. The Iliad concludes with the funeral rites of Hector. It makes no mention of the death of Achilles, though the Odyssey mentions his funeral. The poet Arctinus in his Aethiopis took up the story of the Iliad and related that Achilles, having slain the Ethiopian king Memnon and the Amazon Penthesilea, was himself slain in battle by Priam's son Paris, whose arrow was guided by Apollo.

Notes for Peleus, King of the Myrmidons:
[TESALONICA.FTW]

Peleus, in Greek mythology, king of the Myrmidons of Thessaly; he was most famous as the husband of Thetis (a sea nymph) and the father of the hero Achilles, whom he outlived. When Peleus and his brother Telamon were banished from their father Aeacus' kingdom of Aegina, Peleus went to Phthia to be purified by his uncle King Eurytion, whose daughter Antigone he married, receiving a third of Eurytion's kingdom. During the Calydonian boar hunt he accidentally killed Eurytion. He then went to Iolcos to be purified by King Acastus, whose wife Astydameia made advances to him. When he refused her, she told
Antigone that he wanted to marry her daughter, causing Antigone to hang herself. Peleus later won the sea nymph Thetis by capture, and all the gods except Eris (the goddess of discord) were invited to the wedding. The golden apple that Eris spitefully sent to the wedding guests led to the "judgment of Paris" and thence to the Trojan War. Peleus was too old to fight in that conflict and gave his armour to his son Achilles. Thetis, who had returned to the sea after bearing Achilles, eventually fetched Peleus to dwell with her.

Notes for Thetis:
[TESALONICA.FTW]

Thetis, in Greek mythology, a Nereid loved by Zeus and Poseidon. When Themis (goddess of Justice), however, revealed that Thetis was destined to bear a son who would be mightier than his father, the two gods gave her to Peleus, king of the Myrmidons of Thessaly. Thetis, unwilling to wed a mortal, resisted Peleus' advances by changing herself into various shapes. But, assisted by the wise centaur Chiron, Peleus finally captured her.

All the gods brought gifts to their wedding. The child of their union was the warrior Achilles, but, according to some authorities, Thetis bore seven children, all of whom perished either when she attempted to render them immortal by fire or when she destroyed them as the tokens of an unwilling alliance. She befriended Zeus when the other gods revolted, and she rescued both Hephaestus and Dionysus from the sea. She had a sanctuary at Sparta.
