When, in 1080, the conflict between church and state over the right to make ecclesiastical investitures had become more intense, Robert chose to reconcile himself with Gregory VII, entering into the Concordat of Ceprano, which confirmed the commitments of the earlier Council of Melfi. Even the Byzantine court drew closer to him and went as far as trying to establish a familial relationship with Robert. The Byzantine emperor Michael VII, in need of Robert's help to uphold his unstable throne, married his son, Constantine, to one of Robert's daughters,
Helen. The opposition party, however, deposed Michael and confined Helen in a monastery. To guarantee Apulia against attack from the new rulers of Byzantium, Robert wanted the territories on the Adriatic coast of the Balkan Peninsula, and he began to build a large navy. Michael's expulsion and Helen's confinement reawakened his unappeased spirit of adventure and hastened his long-considered expedition. Now his goal was even more ambitious: to march to Byzantium and crown himself emperor in place of the deposed Michael.

In 1083 Robert landed in Epirus with a well-trained army and immediately succeeded in defeating the Byzantines and their Venetian allies. The pope, however, suddenly recalled him to Italy to help him expel the German king Henry IV, who was marching on Rome en route to claiming southern Italy for the Holy Roman Empire. Having returned home and suppressed the revolts of the lords hostile to himself and to Pope Gregory VII, Robert moved toward Rome, defeated the pope's enemies, and escorted him to Salerno in the summer of 1084. Following this success, he returned to his campaign on the Adriatic coast. He died during the siege of Cephalonia on July 17, 1085.

Achievements

Physically attractive, endowed with an acute and unscrupulous intelligence, a brilliant strategist and competent statesman, Robert had begun to organize a state composed of diverse ethnic and civil groups: Latin and Germanic in Lombard territories and Greek in Byzantine domains. The new political structure was built on a monarchial-feudal framework characteristic of the time, but it was controlled by the energetic and uncompromising Robert, who tried to use his ducal power to create a powerful and prosperous state. The other base on which he built was Roman Catholicism, the religion of the conquerors and most of the conquered, which he used to reconcile the subjected peoples. An

extremely religious man, Robert was distrustful of the Greek clergy because of their
ties with Byzantium. On the other hand, his generosity toward the Latin church was bountiful. He endowed it with territories and clerical immunities in order to tie it firmly to the feudal system. Splendid cathedrals and Benedictine abbeys were built in the hope that they would consolidate and diffuse Latin language and culture among the heterogeneous people and tie them into a new, unified state. Robert was kept from realizing this political vision only by his death.

Notes for Yaroslav I El Sabio (Duque de Kiev):
Yaroslav I, byname YAROSLAV THE WISE, Russian YAROSLAV MUDRY (b. 980  d. Feb. 2, 1054), grand prince of Kiev from 1019 to 1054.

A son of the grand prince Vladimir, he was vice-regent of Novgorod at the time of his father's death in 1015. Then his eldest surviving brother, Svyatopolk the Accursed, killed three of his other brothers and seized power in Kiev. Yaroslav, with the active support of the Novgorodians and the help of Varangian (Viking) mercenaries, defeated Svyatopolk and became the grand prince of Kiev in 1019.

Yaroslav began consolidating the Kievan state through both cultural and administrative improvements and through military campaigns. He promoted the spread of Christianity in the Kievan state, gathered a large collection of books, and employed many scribes to translate Greek religious texts into the Slavic language. He founded churches and monasteries and issued statutes regulating the legal position of the Christian Church and the rights of the clergy. With the help of Byzantine architects and craftsmen, Yaroslav fortified and beautified Kiev along Byzantine lines. He built the majestic Cathedral of St. Sophia and the famous Golden Gate of the Kievan fortress. Under Yaroslav the codification of legal customs and princely enactments was begun, and this work served as the basis for a law code called the Russkaya Pravda ("Russian Justice").

Yaroslav pursued an active foreign policy, and his forces won several notable military victories. He regained Galicia from the Poles, decisively defeated the nomadic Pechenegs on the Kievan state's southern frontier, and expanded Kievan possessions in the Baltic region, suppressing the Lithuanians, Estonians, and Finnish tribes. His military campaign against Constantinople in 1043 was a failure, however.

Trade with the East and West played an important role in Kievan Rus in the 11th century, and Yaroslav maintained diplomatic relations with the European states. His daughters Elizabeth, Anna, and Anastasia were married respectively to Harald III of Norway, Henry I of France, and Andrew I of Hungary.

In his testament, Yaroslav sought to prevent a power struggle among his five sons by dividing his empire among them and enjoining the younger four sons to obey the eldest, Izyaslav, who was to succeed his father as grand prince of Kiev. This advice had no lasting effect, and civil war ensued after Yaroslav's death.

Yaroslav the Wise
Upon the death of Vladimir in 1015, his dominions were divided among his sons, and strife immediately developed. Vladimir's eldest son, Svyatopolk, called The Accursed (reigned 1015, 1018-1019), held the supreme power and, to secure his position, murdered his brothers Boris and Gleb. Svyatopolk was, in turn, defeated and deposed by his brother Yaroslav the Wise, prince of Novgorod. Yaroslav attempted to recreate the empire of his grandfather, Svyatoslav, and by 1036 had succeeded in making himself ruler of all Russia. With him, the state of Kyyiv reached its greatest power. Yaroslav made Kyyiv an imperial capital with magnificent buildings, including the notable Hagia Sophia of Kyyiv (Cathedral of the Holy Wisdom). Schools were opened, and the grand duke revised the first Russian law code, the Russkaya Pravda (Russian Truth). To consolidate the position of his heirs, Yaroslav devised a system of precedence, grading the various principalities from the smallest to Kyyiv, the most powerful, so that, as a grand duke of Kyyiv died, each vassal below him was moved to a larger principality, ending with the throne of Kyyiv.
The Decline of Kyyiv
Although this unique pattern of precedence was nominally practiced, Yaroslav's death in 1054 signaled the decline of Kyyiv. His sons shared the empire, and each prince tended to divide his lands among his own sons. Russia became a group of petty states almost continuously at war with one another. One final attempt was made to unite the country by Yaroslav's grandson, Vladimir II Monomachus, but his death in 1125 ended efforts to form an alliance, and the fragmentation continued. Other states challenged Kyyiv's supremacy, particularly Galicia and Volhynia in the west; Suzdal', in the upper and central parts of the Volga basin; Chernigov and Novgorod-Severskiy, in the Desna basin; Polatsk, which included the basins of the Daugava (also known as Western Dvina) and the Beresina; Smolensk, occupying the upper parts of the basin of the Daugava and the Dnepr; and Novgorod, by far the largest, occupying the land bounded by the Gulf of Finland, Lake Peipus, the upper reaches of the Volga, the White Sea, and the Northern Dvina River.
The decline of Kyyiv was due in part to loss of trade following the sack of Constantinople by the Crusaders in 1204 and the consequent migration of the people of Kyyiv to the north. Novgorod became a flourishing commercial state, which rose to a dominant position and in the 13th century was made the site of a major factory of the Hanseatic League. Kyyiv also lost its importance as the great national and cultural center, its place taken by the cities of Suzdal',

Vladimir, and, ultimately, Moscow (founded about 1147). Russia became a loose federation of city-states, held together by a common language, religion, traditions, and customs and ruled by members of the multitudinous house of Rurik, usually at war with one another. Difficulties resulted also from depredations on the frontiers. In the west the Poles, Lithuanians, and the Teutonic Knights encroached on Russian territory. In the south it was constantly raided by the Polovtzy nomads; one of these raids was the subject of the Russian epic The Lay of Igor's Host.

HUNGARY

The Arpads
---
In 892 the Carolingian emperor Arnulf, attempting to assert his authority over the Moravian duke Sviatopluk, called in the help of the Magyars, a Finno-Ugric people, whose early homes had been on the upper waters of the Volga and Kama rivers; unrecorded causes had driven them, at an uncertain date, southward into the steppes, where they had adopted the life, appropriate to their environment, of peripatetic herdsmen. In the 9th century they were based on the lower Don, ranging over the steppes to the west of that river. They then comprised a federation of hordes, or tribes, each under a hereditary chieftain

and each composed of a varying number of clans, the members of which owned a real or imagined blood kinship. The clansmen were all free, but the community included slaves taken in battle or in raids. There were seven Magyar hordes, but other elements were included in the federation, including three hordes of Turkic Khazars (the Kavars). Either from this fact or perhaps from a memory of earlier conditions, this federation was known to its neighbours as the On-Ogur (literally, "Ten Arrows"), from the Slavic pronunciation of which the name "Hungarian" is derived.

In 889, attacks by the newly arrived Pechenegs had driven the Magyars and their confederates to the western extremities of the steppes, where they were living when Arnulf's invitation arrived. The band sent to Arnulf reported back that the plains across the Carpathians would form a suitable new homeland that could be easily conquered and defended from the rear. Having elected as their chief Irpid, the leader of their most powerful tribe, the Magyars crossed the Carpathians en masse, probably in 896, and easily subjugated the peoples of the sparsely inhabited central plain, their first place of settlement. They destroyed the Moravian empire in 906 and in the next year occupied Pannonia, having defeated a German force sent against them. They were then firmly established in the whole centre of the basin, over which their tribes and their associates distributed themselves, Irpid taking the central area west of the Danube for his own tribe. The periphery was guarded by outposts, which were gradually pushed forward, chiefly to the north.

The Christian kingdom.
---
During the next half century the Magyars were chiefly known to Europe for the forays they made across it, either as mercenaries in the service of warring princes or in search of booty for themselves--treasure or slaves for domestic use or sale. But terrifying to others, their mode of life was not always profitable to themselves. Their raiding forces suffered several severe reverses, culminating in a disastrous defeat at the hands of the emperor Otto I in 955 on the Lechfeld,
outside Augsburg. By this time the wild blood of the first invaders was thinning out and new influences, in particular that of Christianity, were beginning to operate. Both the Eastern and Western churches strove to draw them, with the other peoples of east central Europe, into their orbits. They had established pacific, almost friendly relations with Bavaria. The decisive step was taken by Irpid's great-grandson, Géza, who succeeded to the hereditary chief leadership in 972 and reestablished its authority over the tribal chiefs. In 973 he sent an embassy to Otto II at Quedlinburg, and in 975 he and his family were received into the Western church. In 996 his son, Stephen (Istvin), married Gisella, a Bavarian princess.

Stephen I (997-1038) carried on his father's work. With the help of heavily armed Bavarian knights, he crushed his rivals for the headship. Applying to the Holy See, he received the insignia of royalty from it and, according to tradition, was crowned king on Christmas Day, 1000. The event was of immeasurable importance, for not only did Hungary now enter the spiritual community of

the Western world but Pope Sylvester's personal relationship with his former pupil, Otto III, enabled it to do so without admitting the political suzerainty of the empire. Stephen then carried through the conversion of his people to Christianity, establishing a network of archiepiscopal and episcopal sees, which he reinforced with lavishly endowed monastic foundations. Later he crushed the surviving disputants of his authority--notably the Kavars--and, carrying on his father's work, organized his state on a system that was to remain for many centuries the essentially unaltered basis of Hungary's political and social structure. The tribes, as units, disappeared, but the fundamental social stratification was not altered. The descendants in the male line of the old conquerors, and elements later equated with them, remained a privileged class, personally free, answerable in judgment only to the king or his representative, and entitled to appear in general assemblage. Their lands--which at this time, since the economy was mainly pastoral, were held by clans or subclans in semicommunal ownership--were inalienable, except for proved delinquency, and free of any
obligation. The only duty required by the state of members of this class was that of military service on call. They were allowed to retain their slaves, although Stephen freed his own. All land outside that held by this class--then more than half the whole--belonged to the crown, which could, indeed, donate it at will. The nonservile inhabitants of these lands--descendants of the pre-Magyar population, manumitted slaves, invited colonists, etc.--were subjects of the crown or of the local landholder.

The whole of this land was divided into counties (megyék), each under a royal official, an ispin (later fo [head] ispin) who represented the king's authority in it, administered its unfree population, and collected the taxes that formed the national revenue, central and local. Each ispin maintained at his headquarters, or vir (fortress), an armed force composed of freemen who took service under him or of persons freed by the king. In Stephen's day there were about 45 such counties.

The early kings.
---
Once St. Stephen (he was canonized in 1083) established his rule, his authority was rarely questioned. He fought few foreign wars and made his long reign a period of peaceful consolidation. But his death in 1038 was followed by many years of discord, for his only son, Imre (Emeric), had predeceased him, and the nation rebelled against his designated successor, Peter, who was expelled in 1041. Peter returned in 1044, with the help of Emperor Henry III. The "national" king, Samuel Aba, who had taken his place, was murdered, but Peter himself was killed in another rebellion in 1046. Andrew (Endre) I, of a collateral branch of the house of Irpid, was killed in 1060 fleeing from his brother, BELA I, and after Béla's death there was a further conflict between his sons, Géza and Ladislas (Liszló), and Andrew's son, Salamon. Peace returned only when, after Géza's short rule (1074-77), the throne passed to Ladislas I, who occupied it until 1095; and even then, the curse of dynastic jealousy proved to have been exorcised only temporarily. Ladislas' successor, Coloman (Kilmin; 1095-1116), who was Géza I's elder son, had his own brother, Ilmos, and Ilmos' infant son, Béla, blinded to secure the throne for his own son Stephen II (1116-31),

perhaps Hungary's worst king. Béla II (1131-41; the blinded boy, whom his father's friends had brought up in secrecy) and Béla's eldest son, Géza II (1141-61),
ruled thereafter unchallenged, but the succession of Géza's son, Stephen III (1161-73), was disputed by two of his uncles, Ladislas II (1162-63) and Stephen IV (1163-65). Happily, the death of Stephen IV exhausted the supply of uncles, and Stephen III's brother, Béla III (1173-96), had no domestic rivals to the throne, but the short reign of Béla's elder son, Emeric (Imre; 1196-1204), was spent largely in disputes with his younger brother, Andrew II, who on Emeric's death expelled his infant son, Ladislas III (who died the next year), before beginning his own long reign (1205-35).

Consolidation and expansion.
---
These royal disputes caused Hungary much harm. Claimants to the throne often invoked foreign help, for which they paid in political degradation or temporary or permanent loss of territory: both Peter and Salamon did homage to the Holy Roman emperor for their thrones; and Aba's war against Peter's protectors cost Hungary its previous territories west of the Leitha, while the wars of the 12th century cost it areas in the south. The uncertainty delayed political consolidation, and even Christianity did not take root easily: there was a widespread pagan revolt in 1047 and another in 1063.

Yet the political unity of the country and the new faith somehow survived the earlier troubles, and both were firmly established by Ladislas I, one of Hungary's greatest kings, and by Coloman, who, in spite of his atrocious crime, was a competent and enlightened ruler.

Meanwhile, many factors worked for Hungary. After Austria had grown big at the expense of the imperial authority, most of Hungary's neighbours were states of approximately the same size and strength as itself, and the Hungarians lived with them on terms of mutual tolerance and even friendship. The steppes were quiet: the Cumans (Hungarian: Kun), after destroying the Pechenegs there, did not try to go farther, and, after two big raids had been successfully repelled by Ladislas, they left Hungary in peace. This allowed Hungary to extend its effective frontiers to the Carpathian crest in the north and over Transylvania. Magyar advance guards pushed up the valleys of both areas, and these were reinforced in the Szepes area and central Transylvania by imported colonies of Germans (usually called "Saxons"), while colonies of Szeklers (Székely), a people akin to the Magyars who had preceded the latter into the central plains, were settled behind its eastern passes. The county system was extended to both areas, although with modifications in Transylvania, where the Saxons and Szeklers constituted free communities and the whole was placed under a vaivode, or governor. In the south Ladislas occupied (or reoccupied after an interval) the area between the Sava and Drava rivers; Coloman assumed the crown of Croatia, which then included Bosnia and Northern Dalmatia, although this remained a separate "Land of the Hungarian Crown," over which a governor (ban) acted as deputy for the king.

In the interior, too, natural growth and continued immigration swelled the population, which by 1200 had risen to the large figure, for the age, of some two million. The rulers of this big and populous state were now important men. After Ladislas' day, nothing more was heard of German claims to suzerainty over it. In the 12th century Hungary was intervening in its neighbours' affairs as often as they in Hungary's. Béla III, who married a French princess, had the largest revenues of any European monarch, after the two emperors.

**20971553. Jimena de Navarra Reina de Asturias,** born Abt. 840. She was the daughter of **41943106. Fortsn, Infante de Navarra**.

Notes for Alfonso III El Magno (Rey de Asturias):
The most important Christian state of the northern peninsula, the small kingdom of Asturias, was founded about 718 by DON PELAYO, a Visigothic chieftain. Pelayo's son-in-law, Alfonso, conquered nearly all the region known as Galicia, recaptured most of León, and was then crowned Alfonso I, king of León and Asturias.

Alfonso III, byname ALFONSO THE GREAT, Spanish ALFONSO EL MAGNO (b. c. 838--d. Dec. 20, 910?, Zamora, Leon), king of Asturias from 866 to 910, son of Ordono I.

Winning a contested succession, he moved his capital forward from Oviedo to the recently restored Roman city of León. Under him, Porto (Oporto) was occupied in 868, and Castile took shape around Burgos, drawing on his Basque allies. He claimed to be reviving the Visigothic monarchy, while making the church of St. James at Santiago de Compostela the shrine of the Christian kingdom. Alfonso's territorial advances were made possible by the convulsion of the Muslim emirate of Córdoba, in which Arab dominion was challenged by the Berber dissidents. For a time Córdoba itself was endangered, and the triumph of Alfonso was thought imminent. This did not occur, but by the end of the reign Alfonso III had occupied Coimbra, Zamora, and Burgos, settling refugees from the south.

BRITANICA

ALFONSO III greatly extended these territories during his reign, which ended in 910. During the 10th century the region of Navarre became an independent

kingdom under Sancho I. As the kings of León expanded their domains to the east in the early 10th century, they reached Burgos. Because of the castles built to guard the frontiers of newly acquired territory, this region became popularly known as Castilla, or Castile. Under Count Fernin Gonzilez the region became independent of León, and in 932 the count declared himself the first king of Castile. In the 11th century a considerable part of Aragón was captured from the Muslims by Sancho III, king of Navarre, who also conquered León and Castile, and in 1033 he made his son, Ferdinand I, king of Castile. This temporary unity came to an end at Sancho's death, when his domains were divided among his sons. The most prominent of Sancho's sons was Ferdinand, who acquired León in 1037, took the Moorish section of Galicia, and set up a vassal county in what is now northern Portugal. With northern Spain consolidated, Ferdinand, in 1056, proclaimed himself emperor of Spain (from the Latin Hispania), and he initiated the period of reconquest from the Muslims.

Notes for Aznar Galkndez II, Conde de Aragón:
Aragón, Condado y reino de, el condado de Aragón surgió en la zona central del noreste de la penknsula Ibérica en relación con el interés manifestado por la dinastka franca de los Carolingios en proteger su frontera meridional de los posibles ataques de los musulmanes, firmemente establecidos en el valle medio del Ebro.
Orkgenes del condado de Aragón
Las noticias sobre los orkgenes de dicho condado son muy oscuras. Se sabe, no obstante, que a comienzos del siglo IX un nativo, de nombre Aureolo u Oriol, gobernaba aquella zona, bajo el protectorado de los reyes francos. Se trataba

de una franja montanosa, en el Pirineo central, que comprendka los valles de Ansó, Echo y Canfranc. Posteriormente se hizo con el control del condado Aznar Galkndez I, cabeza de una familia que se mantuvo al frente de dicho puesto hasta mediados del siglo X. En esa época el condado de Aragón se extendió por la cuenca alta del rko Gillego. Al tiempo que se iba desprendiendo de la tutela Carolingia, el condado de Aragón se aproximaba al nscleo navarro, que se habka constituido mis al oeste. Esa orientación se consumó cuando Andregoto Galkndez, hija de Galindo II Aznirez y heredera del condado de Aragón, contrajo matrimonio, a mediados del siglo X, con el rey de Pamplona (o de Navarra) Garcka Sinchez I. El hijo de ambos, Sancho Garcés II, fue desde el ano 970 rey de Pamplona y conde de Aragón.
La vinculación de ambos nscleos se mantuvo hasta el ano 1035, es decir hasta la muerte de Sancho III el Mayor de Pamplona. En el transcurso del siglo X y los primeros anos del XI fueron llegando a las tierras aragonesas mozirabes procedentes de al-Andalus, que se sumaban a la población nativa. Desde el punto de vista económico predominaban la actividad pastoril y una agricultura tkpica de montana. La sociedad conservaba ciertos rasgos de caricter gentilicio, pero progresivamente se iban imponiendo unas cuantas familias nobiliarias. El principal foco de cultura en esos siglos fue el monasterio de San Pedro de Siresa.

Notes for Rollon I, 1st Duke Of Normandy:
Rollo, also called ROLF, or ROU, French ROLLON (b. c. 860--d. c. 932), Scandinavian rover who founded the duchy of Normandy.

Making himself independent of King Harald I of Norway, Rollo sailed off to raid Scotland, England, Flanders, and France on pirating expeditions and, about 911, established himself in an area along the Seine River. Charles III the Simple of France held off his siege of Paris, battled him near Chartres, and negotiated the treaty of Saint-Clair-sur-Epte, giving him the part of Neustria that came to be called Normandy; Rollo in return agreed to end his brigandage. He gave his son,
William I Longsword, governance of the dukedom (927) before his death. Rollo was baptized in 912 but is said to have died a pagan.

   Notes for I Arnulf, Of Holland:
   Arnulf I, byname ARNULF THE GREAT, or THE ELDER, French ARNOUL LE GRAND, or LE VIEUX, Dutch ARNULF DE GROTE, or DE OUDE (b. c. 900--d. March 27, 965), count of Flanders (918-958, 962-965) and son of Baldwin II.

   On his father's death in 918, the inherited lands were divided between Arnulf and his brother Adolf, but the latter survived only

a short time, and Arnulf succeeded to the whole inheritance. His reign was filled with warfare against the Norsemen, and he took an active part in the struggles in Lorraine between the emperor Otto I and Hugh Capet.

In 958 Arnulf placed the government in the hands of his son Baldwin ( Baldwin III), and the young man, though his reign was a very short one, did a great deal for the commercial and industrial progress of the country, establishing the first weavers and fullers at Ghent and instituting yearly fairs at Ypres, Bruges, and other places. On Baldwin III's death in 962 the old count, Arnulf I, resumed control and spent the few remaining years of his life in securing the succession of his grandson Arnulf II the Younger (reigned 965-988).

Notes for II Berenger, King Of Italy (950-952):
Berengar II,

also called BERENGARIO, MARCHESE D'IVREA E DI GISLA (b. c. 900--d. 966),
grandson of Berengar I and king of Italy from 950 to 952.

Berengar was important in the career of the German king and Holy Roman emperor Otto I the Great. For several months in 951 he held captive Adelaide, the daughter and widow of kings of Italy; she escaped and married Otto, who assumed the title of king of the Lombards and made Berengar his vassal. Later (from 960) Berengar and his son Adalbert attacked Pope John XII, on whose appeal Otto marched into Rome and was crowned emperor (962). John's subsequent negotiations with Berengar caused Otto to depose the pope and imprison Berengar in Germany (963).

Notes for Charles III "The Simple" King Of France:
Charles III, byname CHARLES THE SIMPLE, French CHARLES LE SIMPLE (b. Sept. 17, 879--d. Oct. 7, 929, Péronne, Fr.), king of France (893-922), whose authority came to be accepted by Lorraine and who settled the

Northmen in Normandy but who became the first Carolingian ruler of the western kingdom to lose his crown.

The posthumous son of Louis II the Stammerer, Charles was too young to assume the throne on the death of his half-brother, Carloman, in 884 or that of his cousin, Charles the Fat, in 888. On Jan. 28, 893, however, he was crowned king by Fulk, archbishop of Reims; and, although he renounced his rights after civil war in 897, the death of King Eudes in the following year brought him general recognition as king.

Notes for Henry I the Fowler, Of Germany:
Henry I, also called HENRY THE FOWLER, German HEINRICH DER VOGLER (b. c. 876--d. July 2, 936, Memleben, Saxony [now in Germany]), German king and founder of the Saxon dynasty (918-1024) who strengthened the East Frankish, or German, army, encouraged the growth of towns, brought Lotharingia (Lorraine) back under German control (925), and secured German borders against pagan incursions.

The son of Otto the Illustrious, the Liudolfing duke of Saxony, Henry became duke at his father's death (912). His first marriage, to Hatheburg, daughter of Erwin, count of Merseburg, was declared invalid because she had become a nun after her first husband's death. He married Matilda, daughter of Dietrich, count of Westphalia, in 909; their eldest son would rule as the Holy Roman emperor
Otto I the Great (936-973).

Although at war (912-915) with Conrad I of Franconia (German king, 903-918) over title to lands in Thuringia, Henry received Conrad's deathbed designation

as heir to the throne. He was elected king of Germany (May 919) by nobles of Saxony and Franconia, two of the four most influential duchies; the other two important duchies, Swabia and Bavaria, did not recognize him as king.

Henry considered Germany a confederation of duchies rather than a nation. Having complete authority in Saxony and nominal sovereignty in Franconia, he sought to bring the duchies of Swabia and Bavaria into the confederation. After forcing the submission of Burchard, duke of Swabia (919), he allowed the duke to retain control over the civil administration of the duchy. On the basis of an election by Bavarian and East Frankish nobles (919), Arnulf, duke of Bavaria, also claimed the German throne. In 921, after two military campaigns, the king forced Arnulf to submit and relinquish his claim to the throne, though the duke retained complete internal control of Bavaria.

Henry defeated Giselbert, king of Lotharingia, in 925, and that region, which had become independent of Germany in 910, was brought back under German control. Giselbert, who was recognized as duke of Lotharingia, married the king's daughter Gerberga in 928.

When the Magyars, barbarian warriors from Hungary, invaded Germany in 924, Henry agreed to pay tribute to them and return a captured Magyar chief in exchange for a nine-year (924-933) cession of raids on German territory. During these years the king built fortified towns and trained the cavalry force he used to defeat various Slavic tribes; he conquered the Havelli at Brandenburg and the Daleminzi at Meissen in 928 and suppressed a rebellion in Bohemia in 929. The king refused to pay more tribute when the nine-year truce ended in 933. He used his seasoned cavalry to destroy the Magyars, who had resumed their raids, at Riade on March 15, 933, and ended their threat to the German countryside. The king's last campaign, an invasion of Denmark (934), added the territory of Schleswig to the German state.

The story that Henry received the surname Fowler because he was laying bird snares when informed of his election as king is probably a myth.

Enrique I (876 - 936) emperador de Alamania, hijo de Otón de Sajonia. Al morir su padre se convirtió en duque de Sajonia en 912. Primer Rey de Alemania de la lknea sajona de 919 a 936. De hecho fue emperador del Sacro Imperio Romano Germinico, pero nunca pudo ser coronado. Gran soldado que derrotó a los daneses, los hsngaros y otros enemigos. Se distinguió en la fortificación de castillos, ciudades y pueblos. Le sucedió su hijo Otón I El Grande.

Henry I (of Germany), called Henry The Fowler (El Pajarero) (876?-936), king of Germany (919-36), the first of the Saxon line of German kings. In 912 Henry succeeded his father as duke of Saxony. Following the death of Conrad I, king of Germany, in 918, Henry was chosen king by the Franconian and Saxon nobles. Bavaria, Swabia, and Lotharingia refused to acknowledge him at first, and it was not until 925 that he managed to win recognition from all the German

states. In 926 Henry secured a nine-year truce from warfare with the Magyars. During that period he transformed many of the small towns of Germany into fortified cities with trained troops of mounted warriors. His military preparations were successfully tested in a war against the Wends in 929. When the Magyars invaded Thuringia in 933, Henry repulsed them decisively. He defeated the Danes in the following year and seized territory from them. Henry was the first to create a united Germany, and, although he never received the imperial crown, he is generally recognized as one of the Holy Roman emperors. He was succeeded by his son, Otto I "The Great".

SAXONY (German Sachsen).
Historic region in northwestern Europe, which in ancient times was inhabited by the Germanic Saxons. The Saxons first appear in history in the 2nd century AD. In 772 Charlemagne invaded their land, imposing Christianity on them. His descendants created the powerful duchy of Saxony in Saxon territory during the 9th century.

EARLY HISTORY
German king Henry I (the Fowler) added extensive areas to the duchy in 919. In 962 Henry's son Otto I was crowned Holy Roman emperor. In 1180 Holy Roman Emperor Frederick I dissolved the duchy of Saxony in retaliation against its defiant duke, Henry the Lion. At its height, the duchy had extended westward almost to the Rhine River and as far east as the Odra (Oder) River. The ducal possessions were distributed among various princes and bishops; the part later known as Saxe-Wittenberg was granted the electoral privilege in 1356 and became known as Electoral Saxony. In 1423 Electoral Saxony, with the electoral privilege, was conferred on Frederick I, margrave of Meissen. Frederick established his family as the ruling house of Saxony and brought to his new realm vast holdings in central Germany. In 1485 the family possessions were divided, the part known as Saxe-Wittenberg retaining the electoral privileges. This changed in 1547, when Maurice, duke of Saxony, supported Holy Roman Emperor Charles V against the confederation of Protestant German princes known as the Schmalkaldic League. The emperor then transferred to Maurice the electoral privilege and most of the electoral domains. In 1552, however, Maurice broke with Charles V, forcing him to withdraw from Germany. The expanded electorate of Saxony, with Dresden as its capital, subsequently became a Protestant stronghold.
In the 17th and 18th centuries Saxony was directly involved in the religious and territorial struggles ravaging Europe. During the Thirty Years' War (1618-1648) its allegiance wavered. In the next century Saxony became party to the War of Austrian Succession (1740-1748) when Elector Frederick Augustus II, who was also king of Poland as Augustus III, laid claim to the throne of Austria. At the start of the Seven Years' War in 1756, Saxony was invaded by the Prussians.

19th CENTURY
In 1806, Napoleon I, emperor of France, following his victory at Jena in Saxon territory, forced Saxony to join the Confederation of the Rhine. Elector Frederick Augustus III then joined Napoleon as an ally and was permitted by the French emperor to proclaim himself, as Frederick Augustus I, the first king of Saxony. After the downfall of Napoleon, however, the kingdom was partitioned at the

Congress of Vienna in 1815. Prussia acquired more than half of the territory. The now attenuated kingdom was allied with Austria against Prussia in the Seven Weeks' War of 1866. The victorious Prussians levied a heavy cash indemnity and forced Saxony to join the North German Confederation. In 1871 it became one of the constituent kingdoms of the German Empire.

20th CENTURY
In 1918, two days before the German surrender in World War I (1914-1918), an uprising forced the abdication of the Saxon king, and a republic was proclaimed; it subsequently became one of the founding states of the German Republic. After Germany's defeat in World War II (1939-1945), the state of Saxony became part of the German Democratic Republic (East Germany).
After German unification in 1990, the states of Saxony and Saxony-Anhalt were created. Saxony, in east central Germany, occupies basically the same area as the former kingdom. It is bordered by Bavaria, Thuringia, Saxony-Anhalt, Brandenburg, Poland, and the Czech Republic. Saxony-Anhalt, in central Germany, is bordered by Saxony, Thuringia, Lower Saxony, and Brandenburg.

Notes for Edward The Elder, King Of England:
Edward, byname EDWARD THE ELDER (d. July 17, 924, Farndon on Dee, Eng.), Anglo-Saxon king in England, the son of Alfred the Great. As ruler of the West Saxons, or Wessex, from 899 to 924, Edward extended his authority over almost all of England by conquering areas that previously had been held by Danish invaders.

Edward ascended the throne upon his father's death in October 899, and in a battle in 902 his forces killed a rival claimant, Aethelwald, who had allied with the Danes. After defeating the Northumbrian Danes at Tettenhall, he set out in August 912 to subdue the Danes of the eastern Midlands and East Anglia. From 910 to 916 he constructed a series of fortified enclosures around his Kingdom of Wessex.

At the same time, his sister, the Mercian ruler Aethelflaed, constructed a complementary series of fortresses in the northwest Midlands. In 917 Edward and Aethelflaed launched a massive offensive, quickly overwhelming the entire Danish army of East Anglia. Upon Aethelflaed's death in June 918, Edward assumed control of Mercia, and by the end of the year the last Danish armies in the Midlands had submitted. By that time Edward's kingdom included all the land south of the Humber estuary; in 920 he pacified Northumbria. Complete political unification of England was achieved during the reign of his son and successor, Athelstan (reigned 924-939).

Notes for Edmund I, King Of England(940-946):
Edmund I, byname EDMUND THE DEED-DOER, Latin EDMUNDUS MAGNIFICUS (b. 921--d. May 26, 946, Pucklechurch, Eng.), king of the English (939-946), who recaptured areas of northern England that had been occupied by the Vikings.

He was the son of the West Saxon king Edward the Elder (reigned 899-924) and the half brother of King Athelstan (reigned 924-939), under whom the political unification of England had been accomplished. On Athelstan's death (939), Olaf Guthfrithson, the Norse king of Dublin, occupied Northumbria and raided the Midlands.

Edmund recovered the Midlands after Olaf died in 942, and in 944 he regained Northumbria, driving out the Norse kings Olaf Sihtricson and Raegnald. He captured Strathclyde in 945 and entrusted it to Malcolm I, king of Scots, in return for a promise of military support. Thus, Edmund inaugurated a policy of establishing a secure frontier and peaceful relations with Scotland. In addition, his reign marks the beginning of the 10th-century monastic revival in England. The king was killed in his palace by an exiled robber and was succeeded by his brother, Eadred (reigned 946-955); Edmund's sons eventually acceded to power as kings Eadwig (reigned 957-959) and Edgar (reigned 959-975).

Notes for Charles III "The Simple" King Of France:
Charles III, byname CHARLES THE SIMPLE, French CHARLES LE SIMPLE (b. Sept. 17, 879--d. Oct. 7, 929, Péronne, Fr.), king of France (893-922), whose authority came to be accepted by

Lorraine and who settled the Northmen in Normandy but who became the first Carolingian ruler of the western kingdom to lose his crown.

The posthumous son of Louis II the Stammerer, Charles was too young to assume the throne on the death of his half-brother, Carloman, in 884 or that of his cousin, Charles the Fat, in 888. On Jan. 28, 893, however, he was crowned king by Fulk, archbishop of Reims; and, although he renounced his rights after civil war in 897, the death of King Eudes in the following year brought him general recognition as king.

Garcka I (or II) Sanchez (b. 919/921--d. 970), king of Pamplona (Navarre) from 925 to 970, son of Sancho I Garcés and Queen Toda Aznar. He owed his throne to the support of his cousin 'Abd ar-Rahman III, the Umayyad caliph of Cordoba.(1) The end of his reign was taken up with wars against the count of Castile, Fernin Gonzilez. Sancho I of Leon, deposed by the Castilian, took refuge in Navarre;
Garcka took to the field and in 960 managed to capture the famous Castilian, holding him prisoner for many years. Garcka was succeeded by his son, Sancho II Garcés.

Notes for Robert I, King Of France (922-923):
Robert I (b. c. 865--d. June 15, 923, Soissons, Fr.), younger son of Robert the Strong of Neustria, and briefly king of France (922-923), or West Francia. His decisive victory over the Northmen at Chartres (911) led to a treaty settling one group of these fierce warriors in Normandy.

Robert faithfully served his older brother, King Eudes, during Eudes's reign (888-898). Though on Eudes's death he became one of the most powerful Frankish lords, inheriting all the family lands between the Seine and the Loire rivers, he swore fealty with other magnates to the new king, the Carolingian Charles III the Simple. Nevertheless, he was already served in his domains by viscounts, officials usually regarded as instruments of regal power. From 911 onward, his role became more decisive: his defeat of the Northmen at Chartres paved the way for the Treaty of Saint-Clair-sur-Epte, by which Charles assigned them territory in Normandy.

Robert's military success greatly enhanced his prestige, and dissension between him and the King became undisguised. When Charles III imprudently offered preferment exclusively to lords from Lorraine, the Neustrian lords, led by Robert, broke into open revolt. They elected Robert king at Reims in June 922. In a battle near Soissons a year later, Charles's army was routed, but Robert was killed. His grandson was Hugh Capet, founder of the Capetian dynasty.

Berengar II,

also called BERENGARIO, MARCHESE D'IVREA E DI GISLA (b. c. 900--d. 966),
grandson of Berengar I and king of Italy from 950 to 952.

Berengar was important in the career of the German king and Holy Roman emperor Otto I the Great. For several months in 951 he held captive Adelaide, the daughter and widow of kings of Italy; she escaped and married Otto, who assumed the title of king of the Lombards and made Berengar his vassal. Later (from 960) Berengar and his son Adalbert attacked Pope John XII, on whose appeal Otto marched into Rome and was crowned emperor (962). John's
subsequent negotiations with Berengar caused Otto to depose the pope and imprison Berengar in Germany (963).

Notes for Edgar I "The Peaceful", King Of England:
Edgar (b. 943/944--d. July 8, 975), king of the Mercians and Northumbrians from 957 who became king of the West Saxons, or Wessex, in 959 and is reckoned as king of all England from that year. He was efficient and tolerant of local customs, and his reign was peaceful. He was most important as a patron of the English monastic revival.

The younger son of Edmund I, king of the English, Edgar was made king of the Mercians and Northumbrians in place of Eadwig, his brother, who was deposed. On Eadwig's death (Oct. 1, 959), Edgar succeeded to the West Saxon throne. His ecclesiastical policy was also that of the archbishop of Canterbury, St. Dunstan, who insisted on strict observance of the Benedictine Rule. The king supported Archbishop Oswald of York and Bishop Aethelwold of Winchester in founding
abbeys. Edgar's laws were the first in England to prescribe penalties for nonpayment of tithes and Peter's pence, the annual contribution made by Roman Catholics for support of the Holy See.

Notes for II Kenneth, King Of Scotland:

Kenneth II (died 995), king of Scotland (971-95), the son of Malcolm I MacDonald. From the beginning of his reign, Kenneth waged war against the Saxons, particularly the earls of Northumbria, who occupied southern Scotland, and the Scandinavian Vikings, who controlled Scotland north of the Spey River. Although his wars were not successful, Kenneth consolidated central Scotland into a strong kingdom.

Notes for Kasimir I, King Of Poland:
Casimir I, byname CASIMIR THE RESTORER, or THE MONK, Polish KAZIMIERZ ODNOWICIEL, or MNICH (b. July 25, 1016--d. at latest Nov. 28, 1058), duke of Poland who reannexed the formerly Polish provinces of Silesia, Mazovia, and Pomerania (all now in Poland), which had been lost during his father's reign, and restored the Polish central government.

Only surviving son of Duke Mieszko II and Richeza (Ryksa) of Palatine Lorraine, Casimir I, who had taken monastic orders, received papal dispensation and ascended the throne after his father's death (1034). In 1037 he was deposed; maneuvers of the magnates against his supremacy coincided with a popular revolt against the landowners and with an anti-Christian uprising

by pagan tribes. Exiled to Germany, he won military aid from the German kings Conrad II and Henry III and by 1040 had
regained his throne. He married the Russian princess Dobronega and, supported by her brother, the grand prince Yaroslav the Great of Kiev, regained the provinces of Mazovia and Pomerania in 1047. He took Silesia (1050) from the Bohemians, though he had to pay annual tribute to the Bohemian princes as compensation.

Casimir reestablished the Polish central government, revived the Roman Catholic church, and suppressed the pagan tribes that had helped to depose him. As ruler of Poland, however, he was never crowned king, and German suzerainty over Poland was, in fact, reestablished during his reign.

Notes for Yaroslav I El Sabio (Duque de Kiev):
Yaroslav I, byname YAROSLAV THE WISE, Russian YAROSLAV MUDRY (b. 980 d. Feb. 2, 1054), grand prince of Kiev from 1019 to 1054.

A son of the grand prince Vladimir, he was vice-regent of Novgorod at the time of his father's death in 1015. Then his eldest surviving brother, Svyatopolk the Accursed, killed three of his other brothers and seized power in Kiev. Yaroslav, with the active support of the Novgorodians and the help of Varangian (Viking) mercenaries, defeated Svyatopolk and became the grand prince of Kiev in 1019.

Yaroslav began consolidating the Kievan state through both cultural and administrative improvements and through military campaigns. He promoted the spread of Christianity in the Kievan state, gathered a large collection of books, and employed many scribes to translate Greek religious texts into the Slavic language. He founded churches and monasteries and issued statutes regulating the legal position of the Christian Church and the rights of the clergy. With the help of Byzantine architects and craftsmen, Yaroslav fortified and beautified Kiev along Byzantine lines. He built the majestic Cathedral of St. Sophia and the famous Golden Gate of the Kievan fortress. Under Yaroslav the codification of legal customs and princely enactments was begun, and this work served as the basis for a law code called the Russkaya Pravda ("Russian Justice").

Yaroslav pursued an active foreign policy, and his forces won several notable military victories. He regained Galicia from the Poles, decisively defeated the nomadic Pechenegs on the Kievan state's southern frontier, and expanded Kievan possessions in the Baltic region, suppressing the Lithuanians, Estonians, and Finnish tribes. His military campaign against Constantinople in 1043 was a failure, however.

Trade with the East and West played an important role in Kievan Rus in the 11th century, and Yaroslav maintained diplomatic relations with the European states. His daughters Elizabeth, Anna, and Anastasia were married respectively to Harald III of Norway, Henry I of France, and Andrew I of Hungary.

In his testament, Yaroslav sought to prevent a power struggle among his five sons by dividing his empire among them and enjoining the younger four sons to obey the eldest, Izyaslav, who was to succeed his father as grand prince of Kiev. This advice had no lasting effect, and civil war ensued after Yaroslav's death.

BRITANICA

Con la muerte del gran duque de Kiev, Yaroslav el Sabio, sus posesiones comienzan a desintegrarse. Yaroslav habka emparentado a la familia de los Rurik con las mis importantes casas reinantes de Europa, gracias a su politica de enlaces matrimoniales. Bajo su reinado se redactó la Ruskaia Pravda, antiguo código legal ruso, en el que se recogen, refundidos, la legislación bizantina y el de recho consuetudinario de los eslavos.
Bajo Yaroslav se menciona por primera vez, en 1037, que la ciudad de Kkev es sede de un metropolitano (arzobispo).
Por estas mismas fechas se inicia en Kiev la construcción de la catedral de Santa Sofka, que contiene los mosaicos y frescos mas antiguos del arte ruso. En 1051, Yaroslav nombró metropolitano de Kiev al monje ruso Ilarión, sin haber solicitado la aprobación del patriarca de Constantinopla.
De 1051 data también la fundación del monasterio de Cuevas en Kiev, el mis antiguo monasterio ruso.

Yaroslav the Wise
Upon the death of Vladimir in 1015, his dominions were divided among his sons, and strife immediately developed. Vladimir's eldest son, Svyatopolk, called The Accursed (reigned 1015, 1018-1019), held the supreme power and, to secure his position, murdered his brothers Boris and Gleb. Svyatopolk was, in turn, defeated and deposed by his brother Yaroslav the Wise, prince of Novgorod. Yaroslav attempted to recreate the empire of his grandfather, Svyatoslav, and by 1036 had succeeded in making himself ruler of all Russia. With him, the state of Kyyiv reached its greatest power. Yaroslav made Kyyiv an imperial capital with magnificent buildings, including the notable Hagia Sophia of Kyyiv (Cathedral of the Holy Wisdom). Schools were opened, and the grand duke revised the first Russian law code, the Russkaya Pravda (Russian Truth). To consolidate the position of his heirs, Yaroslav devised a system of precedence, grading the various principalities from the smallest to Kyyiv, the most powerful, so that, as a grand duke of Kyyiv died, each vassal below him was moved to a larger principality, ending with the throne of Kyyiv.
The Decline of Kyyiv

Although this unique pattern of precedence was nominally practiced, Yaroslav's death in 1054 signaled the decline of Kyyiv. His sons shared the empire, and each prince tended to divide his lands among his own sons. Russia became a group of petty states almost continuously at war with one another. One final attempt was made to unite the country by Yaroslav's grandson, Vladimir II Monomachus, but his death in 1125 ended efforts to form an alliance, and the fragmentation continued. Other states challenged Kyyiv's supremacy, particularly Galicia and Volhynia in the west; Suzdal', in the upper and central parts of the Volga basin; Chernigov and Novgorod-Severskiy, in the Desna basin; Polatsk, which included the basins of the Daugava (also known as Western Dvina) and the Beresina; Smolensk, occupying the upper parts of the basin of the Daugava and the Dnepr; and Novgorod, by far the largest, occupying the land bounded by the Gulf of Finland, Lake Peipus, the upper reaches of the Volga, the White Sea, and the Northern Dvina River.
The decline of Kyyiv was due in part to loss of trade following the sack of Constantinople by the Crusaders in 1204 and the consequent migration of the people of Kyyiv to the north. Novgorod became a flourishing commercial state, which rose to a dominant position and in the 13th century was made the site of a major factory of the Hanseatic League. Kyyiv also lost its importance as the great national and cultural center, its place taken by the cities of Suzdal', Vladimir, and, ultimately, Moscow (founded about 1147). Russia became a loose federation of city-states, held together by a common language, religion, traditions, and customs and ruled by members of the multitudinous house of Rurik, usually at war with one another. Difficulties resulted also from depredations on the frontiers. In the west the Poles, Lithuanians, and the Teutonic Knights encroached on Russian territory. In the south it was constantly raided by the Polovtzy nomads; one of these raids was the subject of the Russian epic The Lay of Igor's Host.

Notes for Mieszko I Prince Of Poland:
Mieszko I, the first of the Piast dukes

Piast DYNASTY, first ruling family of Poland. According to a 12th-century legend, when Prince Popiel of Gnesen (now Gniezno) died, in the second half of the 9th century, he was succeeded by Siemowit, the son of the prince's plowman, Piast, thus founding a dynasty that ruled the Polish lands until 1370. (The name Piast was not applied to the dynasty until the 17th century.) By 963 MIESZKO I (reigned c. 963-992), probably the fourth prince of the Piast line, was ruling a highly developed, if somewhat isolated, political community in the territories later known as Great Poland and possibly also in Mazovia. Mieszko brought his state into closer association with western Europe, converted it to

Christianity (966), and expanded it to include Pomerania (Polish Pomorze) on the Baltic Sea (967-990) as well as Silesia and Little Poland (989-992). His son Boleslaw I the
Brave (reigned 992-1025) continued the country's expansion, strengthened its internal administration and church organization, and was crowned its king shortly before his death.

A period of decline then set in during the reigns of Boleslaw's successors: Mieszko II Lambert (1025-34), Bezprym (1031-32), Casimir I the Restorer (1034-37, 1038/39-58), Boleslaw II the Bold (1058-79), and Wladyslaw I Herman (1079-1102).

The Piast princes lost their title of king (although Boleslaw II held it briefly, from 1076 to 1079); they allowed the authority of the central government to diminish in favour of the power of the regional nobility, and they engaged the state in numerous struggles that resulted in a territorial loss. Only after Boleslaw III the Wry-Mouthed (reigned 1102-38) succeeded to the throne and exiled his brother and coruler Zbigniew (1107) did Poland's boundaries reach those of Mieszko I's domain (by 1125). But Boleslaw failed to regain the title of king as well as to reverse the decentralizing tendencies that were undermining the unity of his state. Therefore, in order to avoid future internal conflict based on regional rivalry and to retain unity among the Piast lands, Boleslaw divided Poland among his sons. Each of the territorial subdivisions--defined by 1166 as Silesia, Great Poland, Mazovia, and Sandomir--was to be held as the hereditary domain of one of Boleslaw's sons. The senior member of the entire dynasty was also to acquire temporary possession of Kraków and Pomerania and rule as grand prince over the entire loosely federated state of Poland.

The new arrangement, however, stimulated more divisiveness; the power of the grand prince of Kraków declined after the reign of Casimir II the Just (1177-94). For the next 150 years Poland suffered from increasing disunity and disintegration, aggravated by dynastic struggles and civil wars, foreign intervention and invasion, and the secession and conquest of its border regions.

Nevertheless, throughout this period of political division, the Piast lands retained their common church structure, language, and economy, all of which provided a basis for various princes to try to reunify the Polish kingdom. The first attempts failed; they were made by the Silesian princes Henry I and Henry II in the 1230s and by the prince of Great Poland Przemysl II (reigned at Kraków 1279-95 and as king of Poland 1295-96). But after Wenceslas II (Polish Waclaw) of Bohemia gained control of two-thirds of the Polish lands and became king of Poland (1300-05), Wladyslaw I the Short (Lokietek), a grandson of Conrad I of Mazovia, gained support from the gentry, the leading clergy, and some members of the upper nobility and won control of Sandomir and Kraków (by 1306); with the aid of Hungary and the pope, he became the ruler of Great Poland and also king of Poland (1320). Wladyslaw I strengthened Poland substantially by forming close alliances, through the marriages of his children, with both Hungary and Lithuania.

His son Casimir III the Great assumed the throne of the restored Polish kingdom (1333) and further improved its position by coming to terms with his two major enemies, Bohemia and the Teutonic Knights. He accepted Poland's loss of Silesia and Pomerania, annexed Galicia, and regained Mazovia (1349). Casimir also consolidated his rule over the state by improving its economy and military and civil administrations, codifying the laws of Great and Little Poland, and
founding a university at Kraków (1364).

Casimir's death, however, brought an end to his line of the Piast dynasty. Having developed the newly reunified Piast lands into a stable, prosperous, and powerful nation, he left his kingdom to his sister's son, Louis I of Hungary. After ruling from 1370 to 1382, Louis was succeeded by his daughter Jadwiga and her husband Jogaila (Wladyslaw II Jagiello), the grand duke of Lithuania. This succession marked the founding of the Jagiellon dynasty in Poland.

Notes for Mieszko II, Prince Of Poland:
Mieszko II Lambert (b. 990--d. May 10, 1034), king of Poland from 1025 to 1034, grandson of Mieszko I. Somewhat deranged (he died mad), he was dominated by his wife, the German Ryxa, and let the achievements of his father, Boleslaw I, crumble. Much territory was lost to Bohemia and to the Holy Roman Empire. At his death, Poland fell into anarchy.

Mieszko II Lambert, 1025-34, one of the younger sons of Boleslaw I, Mieszko II Lambert was well educated but did not possess the strategic and statesmanlike talents of his father. After victorious campaigns against the barbarian Polabs in 1030, he attacked the German king Conrad II, who, in alliance with the grand duke Yaroslav of Kiev, attacked Poland (1031), further supported by rebellions within the country. Eventually, about 1033, Mieszko was forced to recognize German supremacy. His death in 1034 thus came at the height of a crisis. The boom in foreign trade that had been a factor in the establishment of the Piast empire had come to a close; the regional overlords were in a state of rebellion, and the barbarian insurrections deeply affected the barely established organization of the church. Chaos followed for the next few years (1034-39), the Bohemian duke Bretislav I occupying Silesia, totally devastating Great Poland, and resettling many of its inhabitants in Bohemia. The coastal

regions from Szczecin to Gdansk seceded from the Polish crown for about a century. The bishopric of Kolobrzeg--and with it the entire Christian movement in Western Pomerania--foundered again.

Notes for Harold II, King Of England:
Harold II, also called HAROLD GODWINESON, or GODWINSON (b. c. 1020--d. Oct. 14, 1066, near Hastings, Sussex, Eng.), last Anglo-Saxon king of England. A strong ruler and a skilled general, he held the crown for nine months in 1066 before he was killed at the Battle of Hastings by Norman invaders under William the Conqueror.

Harold's father, Godwine, Earl of Wessex and Kent, was the most powerful man in the kingdom early in the reign of Edward the Confessor (1042-66). About 1044 Godwine obtained for Harold the earldom of East Anglia. In 1051 Edward banished Godwine and his sons for defying royal authority, but Harold led the forces that in 1052 invaded England and forced the king to restore the family.

Upon Godwine's death in 1053, Harold succeeded to his father's earldoms and became the chief power in the land. By 1057 he had obtained earldoms for his three brothers, Tostig, Gyrth, and Leofwine. His only rival was the house of Leofric of Mercia. Leofric's outlawed son, Aelfgar, raided Mercia with help from the Welsh, and in retaliation Harold and Tostig subjugated Wales in 1063. In 1065 the Northumbrians revolted against Tostig, their earl. Bowing to rebel demands, Harold gave Tostig's earldom to Morcar of the house of Mercia, but by doing so he made Tostig his bitterest enemy. Nevertheless, Harold's position remained unshaken.

On his deathbed Edward the Confessor had supposedly designated Harold the royal heir. Earlier, Edward had, however, promised the crown to William, Duke of Normandy. Moreover, Harold himself, when shipwrecked on the coast of Normandy, had been forced to promise to support William's claim. Hence, when Harold assumed power on the death of Edward (Jan. 5, 1066), he was

immediately threatened with the rivalry of William and another royal claimant, Harald III Hardraade, king of Norway, as well as with the enmity of Tostig. In May, Harold mobilized his fleet and army against an expected invasion by William. Instead, he had to use his forces to repel Tostig's raids on the south and east coasts of England. He dismissed his men in early September because he had run short of supplies. Thus, William was free to cross the English Channel unopposed. Tostig and Harald III Hardraade joined forces and invaded England in that month, but they were defeated and killed by Harold at Stamford Bridge, near York, on September 25. Three days later William landed in England. Harold attacked him near Hastings on October 14, and in an all-day battle the king, Gyrth, and Leofwine were killed. The accession of William to the English throne as King William I ended the Anglo-Saxon phase of English history.

Notes for Vladimiro el Santo (Duque de Kiev):
Vladimir I, in full VLADIMIR SVYATOSLAVICH, byname SAINT VLADIMIR, or VLADIMIR THE GREAT, Russian SVYATOY VLADIMIR, or VLADIMIR VELIKY (b. c. 956, Kiev, Kievan Rus [now in Ukraine]--d. July 15, 1015, Berestova, near Kiev; feast day July 15), grand prince of Kiev and first Christian ruler in Kievan Rus, whose military conquests consolidated the provinces of Kiev and

Novgorod into a single state, and whose Byzantine baptism determined the course of Christianity in the region.

Vladimir was the son of the Norman-Rus prince Svyatoslav of Kiev by one of his courtesans and was a member of the Rurik lineage dominant from the 10th to the 13th century. He was made prince of Novgorod in 970. On the death of his father in 972, he was forced to flee to Scandinavia, where he enlisted help from an uncle and overcame Yaropolk, another son of Svyatoslav, who attempted to seize the duchy of Novgorod as well as Kiev. By 980 Vladimir had consolidated the Kievan realm from Ukraine to the Baltic Sea and had solidified the frontiers against incursions of Bulgarian, Baltic, and Eastern nomads.

Although Christianity in Kiev existed before Vladimir's time, he had remained a pagan, accumulated about seven wives, established temples, and, it is said, taken part in idolatrous rites involving human sacrifice. With insurrections troubling Byzantium, the emperor Basil II (976-1025) sought military aid from Vladimir, who agreed, in exchange for Basil's sister Anne in marriage. A pact was
reached about 987, when Vladimir also consented to the condition that he become a Christian. Having undergone baptism, assuming the Christian patronal name Basil, he stormed the Byzantine area of Chersonesus (Korsun, now part of Sevastopol) to eliminate Constantinople's final reluctance. Vladimir then ordered the Christian conversion of Kiev and Novgorod, where idols were cast into
the Dnieper River after local resistance had been suppressed. The new Rus Christian worship adopted the Byzantine rite in the Old Church Slavonic language. The story (deriving from the 11th-century monk Jacob) that Vladimir chose the Byzantine rite over the liturgies of German Christendom, Judaism, and Islam because of its transcendent beauty is apparently mythically symbolic of his determination to remain independent of external political control, particularly of the Germans. The Byzantines, however, maintained ecclesiastical control over the new Rus church, appointing a Greek metropolitan, or archbishop, for Kiev, who functioned both as legate of the patriarch of Constantinople and of the emperor. The Rus-Byzantine religio-political integration checked the influence of the Roman Latin church in the Slavic East and determined the course of
Russian Christianity, although Kiev exchanged legates with the papacy. Among the churches erected by Vladimir was the Desyatinnaya in Kiev (designed by Byzantine architects and dedicated about 996) that became the symbol of the Rus conversion. The Christian Vladimir also expanded education, judicial institutions, and aid to the poor.

Another marriage, following the death of Anne (1011), affiliated Vladimir with the Holy Roman emperors of the German Ottonian dynasty and produced a daughter, who became the consort of Casimir I the Restorer of Poland (1016-58). Vladimir's memory was kept alive by innumerable folk ballads and legends.

Vladimiro I el Santo (* 956 - 1015), principe de Novgorod desde 978 y gran duque de Kiev desde 988.

El prkncipe Vladimiro el I Santo, de Kiev, es bautizado en 988 segsn el rito ortodoxo y obtiene el tktulo de gran duque. Su conversión al cristianismo trae consigo, al parecer, el bautismo multitudinario del pueblo en el Dniéper.

En Kiev se procede a la destrucción de centros de culto e kdolos paganos, y arquitectos bizantinos construyen una iglesia dedicada a la Madre de Dios, a la que Vladimiro asigna la décima parte de los ingresos totales del principado.

Kiev conserva su autonomka frente a Bizancio, y se convierte en el centro evangelizador de Rusia, aunque siga dependiendo canónicamente de Bizancio Su bautismo en 988 significó el comienzo de la cristianización de Rusia.

La muerte de Vladimiro desencadena sangrientas luchas entre sus cinco hijos con derecho a la sucesión.

Vladimir, Saint (circa 956-1015), grand prince of Kyyiv, whose baptism made Orthodox Christianity the official religion of Russia. Born in Kyyiv, Vladimir was a pagan at the beginning of his reign, which was at first devoted to consolidating his territories into a unified Russian state. In exchange for helping the Byzantine emperor Basil II suppress a rebellion, Vladimir was allowed to marry the emperor's sister, Anne, at which time (988) he accepted Christianity. Allied to Byzantium by religious and family ties, Vladimir introduced Byzantine civilization into Russia by building churches, suppressing paganism, and making social reforms. Nonetheless, he remained open to Western influences, which are reflected in his legislation.

Vladimir the Great

The empire was divided among the prince's three sons, causing dynastic conflicts that were ended in 980, when the youngest son, Vladimir I (see Vladimir, Saint), later known as Vladimir the Great, became sole ruler. The most significant event of his reign was his conversion to Byzantine Christianity in 988 and the institution of that religion as the official religion of the Russian people. After casting off his several pagan wives, he married Anne, sister of the Byzantine emperor Basil II. From its inception, the Russian Orthodox church differed from its Byzantine parent. Services were offered in liturgical Slavonic, and the church enjoyed a large measure of autonomy, even though it remained under the canonical authority of the patriarch of Constantinople and the Russian ruler was in fact its supreme head. Monasteries and churches were built in Byzantine style, however, and Byzantine culture ultimately became the predominant influence in such fields as architecture, art, and music.

Notes for III Olaf, "Skotkonung", King Of Sweden:
Olaf, byname OLAF THE TAX KING, Old Swedish OLOF SKÖTKONUNG (d. 1022,
Sweden), king of Sweden (990-1022) whose efforts to impose Christianity were frustrated by the leading non-Christian Swedish chieftains.

The son of King Erik the Victorious, Olaf opposed the development of a strong Norwegian state and joined Sweyn I Forkbeard, king of Denmark, and his allies in a victorious war against Norway in 1000. Olaf subsequently married his illegitimate daughter Holmfrith to the earl Sweyn, one of the Danish viceroys in Norway. Initially opposed to Olaf II Haraldsson, king of Norway, he later made peace with him and married his other illegitimate daughter, Astrid, to the Norwegian ruler. His legitimate daughter, Ingigerth, married Yaroslav I the Wise, grand prince of Kiev.

A committed Christian, Olaf was prevented by advocates of the native Norse religion, based at the temple at Uppsala, from personally enforcing conversion. Missionaries from many European countries, however, carried out the work of conversion. Olaf's life is described extensively in Icelandic sagas of the 13th century.

BRITANICA

Olaf Skötkonung was the first Swedish king to become a Christian. From about AD 800, Swedish Vikings established colonies in other countries, especially Russia and Eastern Europe, and established trade routes. During the reign of Eric IX, from 1150 to 1160, Swedish power was strengthened. Eric invaded Finland and forced Christianity on those he conquered; during the subsequent two centuries Finland was completely subjugated by the Swedes. Eric was allegedly slain by a Danish claimant to his throne while he was attending mass, and he later became the patron saint of Sweden.

Notes for I Arnulf, Of Holland:
Arnulf I, byname ARNULF THE GREAT, or THE ELDER, French ARNOUL LE GRAND, or LE VIEUX, Dutch ARNULF DE GROTE, or DE OUDE (b. c. 900--d. March 27, 965), count of Flanders (918-958, 962-965) and son of Baldwin II.

On his father's death in 918, the inherited lands were divided between Arnulf and his brother Adolf, but the latter survived only a short time, and Arnulf succeeded to the whole inheritance. His reign was filled with warfare against the Norsemen, and he took an active part in the struggles in Lorraine between the emperor Otto I and Hugh Capet.

In 958 Arnulf placed the government in the hands of his son Baldwin ( Baldwin III), and the young man, though his reign was a very short one, did a great deal for the commercial and industrial progress of the country, establishing the first weavers and fullers at Ghent and instituting yearly fairs at Ypres, Bruges, and other places. On Baldwin III's death in 962 the old count, Arnulf I, resumed control and spent the few remaining years of his life in securing the succession of his grandson Arnulf II the Younger (reigned 965-988).

Notes for Vladimiro el Santo (Duque de Kiev):
Vladimir I, in full VLADIMIR SVYATOSLAVICH, byname SAINT VLADIMIR, or VLADIMIR THE GREAT, Russian SVYATOY VLADIMIR, or VLADIMIR VELIKY (b. c. 956, Kiev, Kievan Rus [now in Ukraine]--d. July 15, 1015, Berestova, near Kiev; feast day July 15), grand prince of Kiev and first Christian ruler in Kievan Rus, whose military conquests consolidated the provinces of Kiev and Novgorod into a single state, and whose Byzantine baptism determined the course of Christianity in the region.

Vladimir was the son of the Norman-Rus prince Svyatoslav of Kiev by one of his courtesans and was a member of the Rurik lineage dominant from the 10th to the 13th century. He was made prince of Novgorod in 970. On the death of his father in 972, he was forced to flee to Scandinavia, where he enlisted help from an uncle and overcame Yaropolk, another son of Svyatoslav, who attempted to seize the duchy of Novgorod as well as Kiev. By 980 Vladimir had consolidated the Kievan realm from Ukraine to the Baltic Sea and had solidified the frontiers against incursions of Bulgarian, Baltic, and Eastern nomads.

Although Christianity in Kiev existed before Vladimir's time, he had remained a pagan, accumulated about seven wives, established temples, and, it is said, taken part in idolatrous rites involving human sacrifice. With insurrections troubling Byzantium, the emperor Basil II (976-1025) sought military aid from Vladimir, who agreed, in exchange for Basil's sister Anne in marriage. A pact was
reached about 987, when Vladimir also consented to the condition that he become a Christian. Having undergone baptism, assuming the Christian patronal name Basil, he stormed the Byzantine area of Chersonesus (Korsun,

now part of Sevastopol) to eliminate Constantinople's final reluctance. Vladimir then ordered the Christian conversion of Kiev and Novgorod, where idols were cast into
the Dnieper River after local resistance had been suppressed. The new Rus Christian worship adopted the Byzantine rite in the Old Church Slavonic language. The story (deriving from the 11th-century monk Jacob) that Vladimir chose the Byzantine rite over the liturgies of German Christendom, Judaism, and Islam because of its transcendent beauty is apparently mythically symbolic of his determination to remain independent of external political control, particularly of the Germans. The Byzantines, however, maintained ecclesiastical control over the new Rus church, appointing a Greek metropolitan, or archbishop, for Kiev, who functioned both as legate of the patriarch of Constantinople and of the emperor. The Rus-Byzantine religio-political integration checked the influence of the Roman Latin church in the Slavic East and determined the course of
Russian Christianity, although Kiev exchanged legates with the papacy. Among the churches erected by Vladimir was the Desyatinnaya in Kiev (designed by Byzantine architects and dedicated about 996) that became the symbol of the Rus conversion. The Christian Vladimir also expanded education, judicial institutions, and aid to the poor.

Another marriage, following the death of Anne (1011), affiliated Vladimir with the Holy Roman emperors of the German Ottonian dynasty and produced a daughter, who became the consort of Casimir I the Restorer of Poland (1016-58). Vladimir's memory was kept alive by innumerable folk ballads and legends.

Vladimiro I el Santo (* 956 - 1015), principe de Novgorod desde 978 y gran duque de Kiev desde 988.

El prkncipe Vladimiro el I Santo, de Kiev, es bautizado en 988 segsn el rito ortodoxo y obtiene el tktulo de gran duque. Su conversión al cristianismo trae consigo, al parecer, el bautismo multitudinario del pueblo en el Dniéper.

En Kiev se procede a la destrucción de centros de culto e kdolos paganos, y arquitectos bizantinos construyen una iglesia dedicada a la Madre de Dios, a la que Vladimiro asigna la décima parte de los ingresos totales del principado.

Kiev conserva su autonomka frente a Bizancio, y se convierte en el centro evangelizador de Rusia, aunque siga dependiendo canónicamente de Bizancio Su bautismo en 988 significó el comienzo de la cristianización de Rusia.

La muerte de Vladimiro desencadena sangrientas luchas entre sus cinco hijos con derecho a la sucesión.

Vladimir, Saint (circa 956-1015), grand prince of Kyyiv, whose baptism made Orthodox Christianity the official religion of Russia. Born in Kyyiv, Vladimir was a pagan at the beginning of his reign, which was at first devoted to consolidating his territories into a unified Russian state. In exchange for helping the Byzantine emperor Basil II suppress a rebellion, Vladimir was allowed to marry the emperor's sister, Anne, at which time (988) he accepted Christianity. Allied to Byzantium by religious and family ties, Vladimir introduced Byzantine civilization into Russia by building churches, suppressing paganism, and making social reforms. Nonetheless, he remained open to Western influences, which are reflected in his legislation.

Vladimir the Great

The empire was divided among the prince's three sons, causing dynastic conflicts that were ended in 980, when the youngest son, Vladimir I (see Vladimir, Saint), later known as Vladimir the Great, became sole ruler. The most significant event of his reign was his conversion to Byzantine Christianity in 988 and the institution of that religion as the official religion of the Russian people. After casting off his several pagan wives, he married Anne, sister of the Byzantine emperor Basil II. From its inception, the Russian Orthodox church differed from its Byzantine parent. Services were offered in liturgical Slavonic, and the church enjoyed a large measure of autonomy, even though it remained under the canonical authority of the patriarch of Constantinople and the Russian ruler was in fact its supreme head. Monasteries and churches were built in Byzantine style, however, and Byzantine culture ultimately became the predominant influence in such fields as architecture, art, and music.

Notes for Garcka Iniguez, I de Vizcaya y Rey de Navarra:
Garcka Inkguez (reinó de 852 a 882) rey de Navarra; hijo y sucesor de Inigo Arista. Fue educado en Córdoba. En su tiempo, llegaron los vikingos por el Ebro hasta Pamplona y, haciéndole prisionero, pidieron un gran precio por su rescate. El rey se vio obligado a pedir el dinero necesario al rey Ordono de Asturias. Se cree que Garcka Iniguez murió luchando contra los irabes en los campos de Aibar.

Historia
Las primeras noticias históricas sobre el Paks Vasco aparecen en los textos de Plinio y de Tolomeo. La influencia romana, aunque existió, no parece que fuera importante al norte de Pamplona, ciudad construida por Pompeyo Magno (74 a.C.) sobre el poblado vasco de Iruna (en vasco, la ciudad). Durante la mis alta edad media los vascos se distinguieron por su oposición a las influencias suevas y visigodas. Parece ser que Vitoria tuvo su origen en la fortaleza de

Vitoriaco (581), construida por los visigodos con el fin de contener y vigilar a los vascones. A principios del siglo VII se empezó a constituir una unidad polktica, el ducado de Vasconia, que comprendka tierras a ambos lados de los Pirineos que hoy se hallan repartidas entre los estados francés (Benabarre, Lapurdi y Zuberoa) y espanol (Ilava, Guipuzcoa, Vizcaya y Navarra). A principios del siglo VIII, aprovechando la invasión musulmana, los vascos vencieron a sus enemigos visigodos. Este primigenio ducado de Vasconia, a principios del siglo IX, dio origen al reino de Pamplona, luego llamado de Navarra, como territorio independiente bajo la dinastka de los Arista (Aritza). No obstante, durante el resto de la edad media, el territorio que constituye la actual comunidad autónoma del Paks Vasco estuvo mis vinculado a los avatares polkticos, económicos y territoriales -expansiones, crisis y contiendas civiles- del reino de Castilla (y la posterior Corona de Castilla), en calidad de senorkos, que a los del reino de Navarra.

Notes for Charles II, King Of France:
Charles II, byname CHARLES THE BALD, French CHARLES LE CHAUVE, German KARL DER KAHLE (b. June 13, 823--d. Oct. 6, 877, Brides-les-Bain, Fr.), king of France (i.e., Francis Occidentalis, the West Frankish kingdom) from 843 to 877 and Western emperor from 875 to 877. (He is reckoned as Charles II both of the Holy Roman Empire and of France.)

Son of the emperor Louis I the Pious and his second wife, Judith, Charles was the unwitting cause of violent discord when, in 829, he was granted lands by his father; Louis's action precipitated a series of civil wars, lasting until 838, in which the three sons of his first marriage, Lothair I, Louis (the German), and Pepin, strove to maintain or to increase the rights that they had been guaranteed by the succession settlement of 817, the Ordinatio imperii. Pepin died in 838, but after the death of Louis I in 840 the civil war resumed and continued until Louis the German joined with Charles to force Lothair to accept the Treaty of Verdun in 843, by which Charles received all the lands west of a line roughly following the Scheldt, the Meuse, the Saone, the eastern mountains of the Massif Central, and the lower reaches of the Rhone, and Louis the German and Lothair received respectively the lands of the East Franks (Germany) and the middle kingdom, lying between the other two.

Until 864 Charles's political situation was precarious because few vassals were loyal to him. His lands suffered from raids by Northmen, who left only after receiving bribes; he was defeated by the Bretons and, in 858, faced an invasion by Louis the German. Yet he succeeded in gaining control of Aquitaine after the capture of Pepin's son in 864; and, by the Treaty of Meersen (870) with Louis the German, he received western Lorraine.

When Lothair's son, the emperor Louis II, died in 875, Charles went to Italy and was crowned emperor on December 25 by Pope John VIII. In 876, after the death of Louis the German, Charles invaded Louis's possessions but was defeated at Andernach by Louis's son, Louis the Younger. Charles's death in the next year occurred when another son of Louis the German, Carloman, was marching against him and when his own major vassals were in revolt.

During Charles's reign some of the splendours of the Carolingian renaissance were revived, and his close collaboration with the church enhanced his prestige and authority.

Notes for I Baldwin, Count Of Flanders:
Baldwin I, byname BALDWIN IRON-ARM, French BAUDOUIN BRAS-DE-FER, Dutch BOUDEWIJN DE IJZERE ARM (d. 879), the first ruler of Flanders. A daring warrior under Charles II the Bald of France, he fell in love with the King's daughter Judith, the youthful widow of two English kings, married her (862), and fled with his bride to Lorraine. Charles, though at first angry, was at last conciliated, and made his son-in-law margrave (Marchio Flandriae) of Flanders
(864), which he held as a hereditary fief. The Norsemen were at this time continually devastating the coastlands, and Baldwin was entrusted with this outlying borderland in order to defend it. He was the first of a line of strong rulers, who early in the 10th century exchanged the title of margrave for that of count.

ii. Louis II "The Stammerer", King Of West Franks, born Abt. 846; died 10 Abril 879 in Compiegne, Francia; married Adelaide Of Paris; born 850 in Paris; died Abt. 10 Noviembre 901.

Notes for Louis II "The Stammerer", King Of West Franks:
Louis II, byname LOUIS THE STAMMERER, French LOUIS LE BÈGUE (b. 846--d. April 10, 879, Compiègne, Fr.), king of Francia Occidentalis (the West Frankish kingdom) from 877 until his death.

Louis, the son of King Charles II the Bald, was made king of Aquitaine under his father's tutelage in 867. Charles became emperor in 875 and two years later left Louis as regent while he defended Italy for Pope John VIII. Louis was elected king of the West Franks in December 877. At a council at Troyes in 878, the

Pope attempted to force Louis to take up the role of defender of the papacy, but Louis refused. Louis and his cousin Louis the Younger, ruler of the East Frankish kingdom, agreed to maintain the division of Lotharingia that their respective fathers had negotiated in the Treaty of Mersen in 870. Louis had hoped to redistribute offices of state but was frustrated by the Frankish magnates, who had accepted him as king on the condition that he respect their possessions and rights.

Notes for Robert I, King Of France (922-923):
Robert I (b. c. 865--d. June 15, 923, Soissons, Fr.), younger son of Robert the Strong of Neustria, and briefly king of France (922-923), or West Francia. His decisive victory over the Northmen at Chartres (911) led to a treaty settling one group of these fierce warriors in Normandy.

Robert faithfully served his older brother, King Eudes, during Eudes's reign (888-898). Though on Eudes's death he became one of the most powerful Frankish lords, inheriting all the family lands between the Seine and the Loire

rivers, he swore fealty with other magnates to the new king, the Carolingian Charles III the Simple. Nevertheless, he was already served in his domains by viscounts, officials usually regarded as instruments of regal power. From 911 onward, his role became more decisive: his defeat of the Northmen at Chartres paved the way for the Treaty of Saint-Clair-sur-Epte, by which Charles assigned them territory in Normandy.

Robert's military success greatly enhanced his prestige, and dissension between him and the King became undisguised. When Charles III imprudently offered preferment exclusively to lords from Lorraine, the Neustrian lords, led by Robert, broke into open revolt. They elected Robert king at Reims in June 922. In a battle near Soissons a year later, Charles's army was routed, but Robert was killed. His grandson was Hugh Capet, founder of the Capetian dynasty.

Notes for Louis II "The Stammerer", King Of West Franks:
Louis II, byname LOUIS THE STAMMERER, French LOUIS LE BCGUE (b. 846--d. April 10, 879, Compicgne, Fr.), king of Francia Occidentalis (the West Frankish kingdom) from 877 until his death.

Louis, the son of King Charles II the Bald, was made king of Aquitaine under his father's tutelage in 867. Charles became emperor in 875 and two years later left Louis as regent while he defended Italy for Pope John VIII. Louis was elected king of the West Franks in December 877. At a council at Troyes in 878, the Pope attempted to force Louis to take up the role of defender of the papacy, but Louis refused. Louis and his cousin Louis the Younger, ruler of the East Frankish kingdom, agreed to maintain the division of Lotharingia that their respective fathers had negotiated in the Treaty of Mersen in 870. Louis had hoped to redistribute offices of state but was frustrated by the Frankish magnates, who had accepted him as king on the condition that he respect their possessions and rights.

Alfred, also spelled AELFRED, byname ALFRED THE GREAT (b. 849--d. 899), king of Wessex (871-899), a Saxon kingdom in southwestern England. He prevented England from falling to the Danes and promoted learning and literacy. Compilation of the Anglo-Saxon Chronicle began during his reign, c. 890.

When he was born, it must have seemed unlikely that Alfred would become king, since he had four older brothers; he said that he never desired royal power. Perhaps a scholar's life would have contented him. His mother early aroused his interest in English poetry, and from his boyhood he also hankered after Latin learning, possibly stimulated by visits to Rome in 853 and 855. It is possible
also that he was aware of and admired the great Frankish king Charlemagne, who had at the beginning of the century revived learning in his realm. Alfred had no opportunity to acquire the education he sought, however, until much later in life.

He probably received the education in military arts normal for a young man of rank. He first appeared on active service in 868, when he and his brother, King Aethelred (Ethelred) I, went to help Burgred of Mercia (the kingdom between the Thames and the Humber) against a great Danish army that had landed in East Anglia in 865 and taken possession of Northumbria in 867. The Danes refused to give battle, and peace was made. In this year Alfred married Ealhswith, descended through her mother from Mercian kings. Late in 871, the Danes invaded Wessex, and Aethelred and Alfred fought several battles with them. Aethelred died in 871 and Alfred succeeded him. After an unsuccessful battle at Wilton he made peace. It was probably the quality of the West Saxon resistance that discouraged Danish attacks for five years.

In 876 the Danes again advanced on Wessex: they retired in 877 having accomplished little, but a surprise attack in January 878 came near to success. The Danes established themselves at Chippenham, and the West Saxons submitted "except King Alfred." He harassed the Danes from a fort in the Somerset marshes, and until seven weeks after Easter he secretly assembled an army, which defeated them at the Battle of Edington. They surrendered, and their king, Guthrum, was baptized, Alfred standing as sponsor; the following year they settled in East Anglia.

Wessex was never again in such danger. Alfred had a respite from fighting until 885, when he repelled an invasion of Kent by a Danish army, supported by the East Anglian Danes. In 886 he took the offensive and captured London, a success that brought all the English not under Danish rule to accept him as king. The possession of London also made possible the reconquest of the Danish
territories in his son's reign, and Alfred may have been preparing for this, though he could make no further advance himself. He had to meet a serious attack by a large Danish force from the European continent in 892, and it was not until 896 that it gave up the struggle.

The failure of the Danes to make any more advances against Alfred was largely a result of the defensive measures he undertook during the war. Old forts were strengthened and new ones built at strategic sites, and arrangements were made for their continual manning. Alfred reorganized his army and used ships against the invaders as early as 875. Later he had larger ships built to his own design
for use against the coastal raids that continued even after 896. Wise diplomacy also helped Alfred's defense. He maintained friendly relations with Mercia and Wales; Welsh rulers sought his support and supplied some troops for his army in 893.

Alfred succeeded in government as well as at war. He was a wise administrator, organizing his finances and the service due from his thanes (noble followers). He scrutinized the administration of justice and took steps to ensure the protection of the weak from oppression by ignorant or corrupt judges. He promulgated an important code of laws, after studying the principles of lawgiving in the
Book of Exodus and the codes of Aethelbert of Kent, Ine of Wessex (688-694), and Offa of Mercia (757-796), again with special attention to the protection of the weak and dependent. While avoiding unnecessary changes in custom, he limited the practice of the blood feud and imposed heavy penalties for breach of oath or pledge.

Alfred is most exceptional, however, not for his generalship or his administration but for his attitude toward learning. He shared the contemporary view that Viking raids were a divine punishment for the people's sins, and he attributed these to the decline of learning, for only through learning could men acquire wisdom and live in accordance with God's will. Hence, in the lull from attack between 878 and 885, he invited scholars to his court from Mercia, Wales, and the European continent. He learned Latin himself and began to translate Latin books into English in 887. He directed that all young freemen of adequate means must learn to read English, and, by his own translations and those of his helpers, he made available English versions of "those books most necessary for all men to
know," books that would lead them to wisdom and virtue. The Ecclesiastical History of the English People, by the English historian Bede, and the Seven Books of Histories Against the Pagans, by Paulus Orosius, a 5th-century theologian--neither of which was translated by Alfred himself, though they have been credited to him--revealed the divine purpose in history. Alfred's translation of the Pastoral Care of St. Gregory I, the great 6th-century pope, provided a manual for priests in the instruction of their flocks, and a translation by Bishop Werferth of Gregory's Dialogues supplied edifying reading on holy men. Alfred's rendering of the Soliloquies of the 5th-century theologian St. Augustine of Hippo, to which he added material from other works of the Fathers of the Church, discussed problems concerning faith and reason and the nature of
eternal life. This translation deserves to be studied in its own right, as does his rendering of Boethius' Consolation of Philosophy. In considering what is true happiness and the relation of providence to faith and of predestination to free will, Alfred does not fully accept Boethius' position but depends more on the

early Fathers. In both works, additions include parallels from contemporary conditions, sometimes revealing his views on the social order and the duties of kingship. Alfred wrote for the benefit of his people, but he was also deeply interested in theological problems for their own sake and commissioned the first of the translations, Gregory's Dialogues, "that in the midst of earthly troubles he might sometimes think of heavenly things." He may also have done a translation of the first 50 psalms. Though not Alfred's work, the Anglo-Saxon Chronicle, one of the greatest sources of information about Saxon England, which began to be
circulated about 890, may have its origin in the intellectual interests awakened by the revival of learning under him. His reign also saw activity in building and in art, and foreign craftsmen were attracted to his court.

In one of his endeavours, however, Alfred had little success; he tried to revive monasticism, founding a monastery and a nunnery, but there was little enthusiasm in England for the monastic life until after the revivals on the European continent in the next century.

Alfred, alone of Anglo-Saxon kings, inspired a full-length biography, written in 893, by the Welsh scholar Asser. This work contains much valuable information, and it reveals that Alfred laboured throughout under the burden of recurrent, painful illness; and beneath Asser's rhetoric can be seen a man of attractive character, full of compassion, able to inspire affection, and intensely conscious of the responsibilities of kingly office. This picture is confirmed by Alfred's laws and writings.

Alfred was never forgotten: his memory lived on through the Middle Ages and in legend as that of a king who won victory in apparently hopeless circumstances and as a wise lawgiver. Some of his works were copied as late as the 12th century. Modern studies have increased knowledge of him but have not altered in its essentials the medieval conception of a great king.

Notes for Robert IV The Strong (Count of Anjou and Blois):
Robert THE STRONG, French ROBERT LE FORT (d. Sept. 15, 866, Brissarthe, Fr.), ancestor of the Capetian kings of France.

Count of various regions between the Seine and Loire rivers, Robert served the Carolingian king of France Charles II the Bald and, by his bold and inspiring military leadership, succeeded in checking the depredations of the Northmen who were laying waste the settlements near the Loire. A great victory over the Northmen in 865 was followed by the King's grant to Robert of full control over Neustria early the next year; but he was killed in a skirmish against the Northmen in September. The memory of Robert's exploits brought great

prestige to his family. His sons, Eudes and Robert I, both became kings of West Francia (or France); and the Capetian kings (from 987) were his direct descendants.

Notes for Count Of Anjou Ingeler:
Under one of the sons of Robert the Strong, Anjou was entrusted to a certain INGELER, who became the founder of the first Angevin dynasty. Ingelger's son Fulk I the Red rid the country of the Normans and enlarged his domains by taking part of Touraine. He died in 942, and under hissuccessor, Fulk II the Good, the destruction caused by the preceding wars was repaired. Geoffrey I

Grisegonelle, who succeeded Fulk II in about 960, began the policy of expansion that was to characterize this first feudal dynasty. He helped Hugh Capet to seize the French crown but died some months after the new king's accession (987).

Geoffrey's successor Fulk III Nerra, one of the most remarkable figures of his period and the most powerful member of the dynasty, ruled from 987 to 1040. He finally drove his encroaching neighbours back beyond the frontiers of Anjou and built strongly fortified castles along the border of his territory. Fulk's son Geoffrey II Martel (1040-60) pursued the policy of expansion begun by his father and annexed the Vendomois and a part of Maine to Anjou. Because he left no sons, his two nephews, Geoffrey III the Bearded and Fulk IV le Réchin, shared the succession. However, they soon came into armed conflict, and Fulk defeated Geoffrey in 1068. Nevertheless, he had to give up most of the lands that Fulk Nerra had acquired and to defend his fief against the claims of the Duke of Normandy. After the death of Fulk IV in 1109, his son Fulk V the Young endeavoured to make good the losses caused by the various wars. He married his son Geoffrey Plantagenet to Matilda, the daughter of Henry I of England and widow of the emperor Henry V.

By his marriage to Matilda, Geoffrey IV Plantagenet acquired a claim to Normandy and England. Forced to spend his whole life fighting his rivals and the Angevin castellans, he nevertheless succeeded in pacifying Anjou, which in 1151 he left to his son Henry (later Henry II of England), Count of Anjou and Maine and Duke of Normandy, who married Eleanor of Aquitaine after the annulment of her marriage to Louis VII of France. Thus the Anglo-Angevin empire of the Plantagenet dynasty was founded, extending from England to the Pyrenees.

Philip II Augustus of France, however, conquered Anjou from John of England at the beginning of the 13th century. An attempt by the English to retake Anjou failed when they were defeated at La Roche-aux-Moines in 1214. Anjou was definitively ceded to France by the Treaty of Paris (1259).

Notes for Louis IV "Transmarinus" King Of France:
Louis IV, byname LOUIS D'OUTREMER (Louis from Overseas) (b. 921--d. Sept. 10, 954, Reims, Fr.), king of France from 936 to 954 who spent most of his reign struggling against his powerful vassal Hugh the Great.

When Louis's father, Charles III the Simple, was imprisoned in 923, his mother, Eadgifu, daughter of the Anglo-Saxon king Edward the Elder, took Louis to England. He was recalled to France in 936 and crowned on June 19 at Laon by Artand, archbishop of Reims, who became Louis's chief supporter against Hugh the Great. Louis proved not to be the puppet monarch that Hugh had anticipated; he even moved from Paris to Laon to avoid Hugh's influence. When Hugh and Herbert of Vermandois seized Reims and attacked Laon in 940, Louis valiantly defended his city; but because of Louis's earlier interference in Lorraine the German king, Otto I, sent aid to the rebels. Louis appeared to be totally defeated in 941, but he made peace with Otto in November 942 at Vise on the Meuse, and Hugh and he were reconciled after Herbert, Hugh's chief supporter, died in 943.

In 945, while intervening in Norman politics, Louis was captured and handed over to Hugh, who imprisoned him for a year. On his release, Louis closely allied himself with Otto to retake Reims in 946. In 949 Louis again received control of Laon, and Hugh, excommunicated by French and German synods and by the Pope, made a peace in 951 that lasted until Louis's death.

Notes for Edmund I, King Of England(940-946):
Edmund I, byname EDMUND THE DEED-DOER, Latin EDMUNDUS MAGNIFICUS (b. 921--d. May 26, 946, Pucklechurch, Eng.), king of the English (939-946), who recaptured areas of northern England that had been occupied by the Vikings.

He was the son of the West Saxon king Edward the Elder (reigned 899-924) and the half brother of King Athelstan (reigned 924-939), under whom the political unification of England had been accomplished. On Athelstan's death (939), Olaf Guthfrithson, the Norse king of Dublin, occupied Northumbria and raided the Midlands.

Edmund recovered the Midlands after Olaf died in 942, and in 944 he regained Northumbria, driving out the Norse kings Olaf Sihtricson and Raegnald. He captured Strathclyde in 945 and entrusted it to Malcolm I, king of Scots, in return for a promise of military support. Thus, Edmund inaugurated a policy of establishing a secure frontier and peaceful relations with Scotland. In addition, his reign marks the beginning of the 10th-century monastic revival in England. The king was killed in his palace by an exiled robber and was succeeded by his brother, Eadred (reigned 946-955); Edmund's sons eventually acceded to power as kings Eadwig (reigned 957-959) and Edgar (reigned 959-975).

Notes for I Arnulf, Of Holland:
Arnulf I, byname ARNULF THE GREAT, or THE ELDER, French ARNOUL LE GRAND, or LE VIEUX, Dutch ARNULF DE GROTE, or DE OUDE (b. c. 900--d. March 27, 965), count of Flanders (918-958, 962-965) and son of Baldwin II.

On his father's death in 918, the inherited lands were divided between Arnulf and his brother Adolf, but the latter survived only a short time, and Arnulf succeeded to the whole inheritance. His reign was filled with warfare against the Norsemen, and he took an active part in the struggles in Lorraine between the emperor Otto I and Hugh Capet.

In 958 Arnulf placed the government in the hands of his son Baldwin ( Baldwin III), and the young man, though his reign was a very short one, did a great deal for the commercial and industrial progress of the country, establishing the first weavers and fullers at Ghent and instituting yearly fairs at Ypres, Bruges, and other places. On Baldwin III's death in 962 the old count, Arnulf I, resumed control and spent the few remaining years of his life in securing the succession of his grandson Arnulf II the Younger (reigned 965-988).

Notes for Hermann Billung, Duke Of Saxony:
Billung DYNASTY, the primary ruling dynasty in Saxony in the 10th and 11th centuries. It was founded by Hermann Billung, who in 936 received from the German king (and future emperor) Otto I a march, or border territory, on the lower Elbe River to be held against the pagan Slavic Wends. In 961 Otto granted Hermann the Saxon ducal title, which on Hermann's death (973) passed to his son and thereafter to his descendants, who continued the struggle against the Slavs.

Although the family extended its conquests toward the Oder River, thus preparing these territories for Christianization, their lands consisted of only the northeastern part of the former stem duchy of Saxony. Hermann's son Bernard I (d. 1011) obtained guarantees of the special privileges and customs of the Saxons from the emperor Henry II; Bernard II (d. 1059) obtained similar guarantees from the emperor Conrad II. Both Bernard II and his son Ordulf (d. 1072) had to defend their territories against the encroachments of Adalbert, archbishop of Bremen. The family came to embody the Saxon national resentment toward the Salian kings and emperors Henry III and particularly Henry IV, who wanted to reestablish imperial authority in Saxony. In August 1106, with the death of Magnus Billung, the family died out.

Notes for Mieszko II, Prince Of Poland:
Mieszko II Lambert (b. 990--d. May 10, 1034), king of Poland from 1025 to 1034, grandson of Mieszko I. Somewhat deranged (he died mad), he was dominated by his wife, the German Ryxa, and let the achievements of his father, Boleslaw I, crumble. Much territory was lost to Bohemia and to the Holy Roman Empire. At his death, Poland fell into anarchy.

Mieszko II Lambert, 1025-34, one of the younger sons of Boleslaw I, Mieszko II Lambert was well educated but did not possess the strategic and statesmanlike talents of his father. After victorious campaigns against the barbarian Polabs in 1030, he attacked the German king Conrad II, who, in alliance with the grand duke Yaroslav of Kiev, attacked Poland (1031), further supported by rebellions within the country. Eventually, about 1033, Mieszko was forced to recognize German supremacy. His death in 1034 thus came at the height of a crisis. The boom in foreign trade that had been a factor in the establishment of the Piast empire had come to a close; the regional overlords were in a state of rebellion, and the barbarian insurrections deeply affected the barely established organization of the church. Chaos followed for the next few years (1034-39), the Bohemian duke Bretislav I occupying Silesia, totally devastating Great Poland, and resettling many of its inhabitants in Bohemia. The coastal regions from Szczecin to Gdansk seceded from the Polish crown for about a century. The bishopric of Kolobrzeg--and with it the entire Christian movement in Western Pomerania--foundered again.

Notes for Vladimiro el Santo (Duque de Kiev):
Vladimir I, in full VLADIMIR SVYATOSLAVICH, byname SAINT VLADIMIR, or VLADIMIR THE GREAT, Russian SVYATOY VLADIMIR, or VLADIMIR VELIKY (b. c. 956, Kiev, Kievan Rus [now in Ukraine]--d. July 15, 1015, Berestova, near Kiev; feast day July 15), grand prince of Kiev and first Christian ruler in Kievan Rus, whose military conquests consolidated the provinces of Kiev and Novgorod into a single state, and whose Byzantine baptism determined the course of Christianity in the region.

Vladimir was the son of the Norman-Rus prince Svyatoslav of Kiev by one of his courtesans and was a member of the Rurik lineage dominant from the 10th to the 13th century. He was made prince of Novgorod in 970. On the death of his father in 972, he was forced to flee to Scandinavia, where he enlisted help from an uncle and overcame Yaropolk, another son of Svyatoslav, who attempted

to seize the duchy of Novgorod as well as Kiev. By 980 Vladimir had consolidated the Kievan realm from Ukraine to the Baltic Sea and had solidified the frontiers against incursions of Bulgarian, Baltic, and Eastern nomads.

Although Christianity in Kiev existed before Vladimir's time, he had remained a pagan, accumulated about seven wives, established temples, and, it is said, taken part in idolatrous rites involving human sacrifice. With insurrections troubling Byzantium, the emperor Basil II (976-1025) sought military aid from Vladimir, who agreed, in exchange for Basil's sister Anne in marriage. A pact was
reached about 987, when Vladimir also consented to the condition that he become a Christian. Having undergone baptism, assuming the Christian patronal name Basil, he stormed the Byzantine area of Chersonesus (Korsun, now part of Sevastopol) to eliminate Constantinople's final reluctance. Vladimir then ordered the Christian conversion of Kiev and Novgorod, where idols were cast into
the Dnieper River after local resistance had been suppressed. The new Rus Christian worship adopted the Byzantine rite in the Old Church Slavonic language. The story (deriving from the 11th-century monk Jacob) that Vladimir chose the Byzantine rite over the liturgies of German Christendom, Judaism, and Islam because of its transcendent beauty is apparently mythically symbolic of his determination to remain independent of external political control, particularly of the Germans. The Byzantines, however, maintained ecclesiastical control over the new Rus church, appointing a Greek metropolitan, or archbishop, for Kiev, who functioned both as legate of the patriarch of Constantinople and of the emperor. The Rus-Byzantine religio-political integration checked the influence of the Roman Latin church in the Slavic East and determined the course of
Russian Christianity, although Kiev exchanged legates with the papacy. Among the churches erected by Vladimir was the Desyatinnaya in Kiev (designed by Byzantine architects and dedicated about 996) that became the symbol of the Rus conversion. The Christian Vladimir also expanded education, judicial institutions, and aid to the poor.

Another marriage, following the death of Anne (1011), affiliated Vladimir with the Holy Roman emperors of the German Ottonian dynasty and produced a daughter, who became the consort of Casimir I the Restorer of Poland (1016-58). Vladimir's memory was kept alive by innumerable folk ballads and legends.

Vladimiro I el Santo (* 956 - 1015), principe de Novgorod desde 978 y gran duque de Kiev desde 988.

El prkncipe Vladimiro el I Santo, de Kiev, es bautizado en 988 segsn el rito ortodoxo y obtiene el tktulo de gran duque. Su conversión al cristianismo trae consigo, al parecer, el bautismo multitudinario del pueblo en el Dniéper.

En Kiev se procede a la destrucción de centros de culto e kdolos paganos, y arquitectos bizantinos construyen una iglesia dedicada a la Madre de Dios, a la que Vladimiro asigna la décima parte de los ingresos totales del principado.

Kiev conserva su autonomka frente a Bizancio, y se convierte en el centro evangelizador de Rusia, aunque siga dependiendo canónicamente de Bizancio Su bautismo en 988 significó el comienzo de la cristianización de Rusia.

La muerte de Vladimiro desencadena sangrientas luchas entre sus cinco hijos con derecho a la sucesión.

Vladimir, Saint (circa 956-1015), grand prince of Kyyiv, whose baptism made Orthodox Christianity the official religion of Russia. Born in Kyyiv, Vladimir was a pagan at the beginning of his reign, which was at first devoted to consolidating his territories into a unified Russian state. In exchange for helping the Byzantine emperor Basil II suppress a rebellion, Vladimir was allowed to marry the emperor's sister, Anne, at which time (988) he accepted Christianity. Allied to Byzantium by religious and family ties, Vladimir introduced Byzantine civilization into Russia by building churches, suppressing paganism, and making social reforms. Nonetheless, he remained open to Western influences, which are reflected in his legislation.

Vladimir the Great

The empire was divided among the prince's three sons, causing dynastic conflicts that were ended in 980, when the youngest son, Vladimir I (see Vladimir, Saint), later known as Vladimir the Great, became sole ruler. The most significant event of his reign was his conversion to Byzantine Christianity in 988 and the institution of that religion as the official religion of the Russian people. After casting off his several pagan wives, he married Anne, sister of the Byzantine emperor Basil II. From its inception, the Russian Orthodox church differed from its Byzantine parent. Services were offered in liturgical Slavonic, and the church enjoyed a large measure of autonomy, even though it remained under the canonical authority of the patriarch of Constantinople and the Russian ruler was in fact its supreme head. Monasteries and churches were built in Byzantine style, however, and Byzantine culture ultimately became the predominant influence in such fields as architecture, art, and music.

Notes for Constantino IX (Emperador Bizantino):
Constantine IX MONOMACHUS (b. c. 980--d. Jan. 11, 1055), Byzantine emperor from 1042 to 1055.

Constantine owed his elevation to Zoe, the empress of the Macedonian dynasty, who took him as her third husband. Constantine belonged to the civil party, the opponents of the military magnates, and he neglected the defenses of the empire and reduced the army. He spent extravagant sums on luxuries and magnificent buildings and seriously debased the coinage. Rebellions broke out at home
and abroad; the Normans were overrunning the Byzantine possessions in south Italy; the Pechenegs (Patzinaks) crossed the Danube River and attacked Thrace and Macedonia; and the Seljuq Turks made their appearance on the Armenian frontier, which was directly exposed to attack, as the Armenian kingdom of Ani lapsed to Constantinople during this reign.

Constantine attempted to ally with the papacy against the Normans, but relations between the churches of Rome and Constantinople deteriorated. In 1054 the visit of the papal legates resulted in schism. Though he was not outstanding for his statesmanship, it was under his auspices that the University of Constantinople was reorganized, with an efflorescence of learning and letters.

Notes for Zoe (Emperatriz Bizantina):
Zoe, also spelled ZOE (b. c. 978, Constantinople [now Istanbul, Turkey]--d. 1050, Constantinople), Byzantine empress, by marriage from 1028 and in her own right from 1042.

The daughter of the emperor Constantine VIII, Zoe was married to the heir presumptive, Romanus III Argyrus, in 1028 and became empress consort upon his elevation to the throne the same year. She became self-assertive and jealous, exiling her sister Theodora to a monastery; and, neglected by her husband, became enamoured of Michael, her young Paphlagonian chamberlain. In 1034 the emperor became ill, allegedly poisoned by Zoe; and, upon his death on April 11, she at once took control and married Michael, who was proclaimed Emperor Michael IV. Michael IV died in 1041 and was succeeded by Michael V Calaphates.

When Michael V was deposed by a Byzantine mob, then blinded and exiled to a monastery (April 1042), Zoe and her sister Theodora were proclaimed coempresses on Easter Tuesday, 1042. Quarrels, however, broke out between the sisters; and, in order to secure her position, Zoe married Constantine IX Monomachus, a man of good family, with whom she shared the throne until her death.

Notes for Earl Of Wessex// Godwin:
Godwine, also spelled GODWIN (d. April 15, 1053), earl of Wessex, the most powerful man in England during the opening years of the reign of Edward the Confessor.

Godwine became a favourite of King Canute the Great, who made him earl of Wessex about 1018. In the disputes over the succession that followed the death of Canute, Godwine was held responsible for the murder (1036) of one of the claimants to the throne, Alfred the Aetheling. Godwine maintained his position, however, and went on to dominate Edward the Confessor.

In 1045 Godwine married his daughter Edith to Edward. Nevertheless, Edward wanted to throw off Godwine's influence so that he would be free to fill his court with Norman courtiers. In 1051 he outlawed Godwine for refusing to punish the men of Dover, who had defied a Norman lord.

Edward's pro-Norman policies, however, soon aroused widespread hostility. Seizing his opportunity, Godwine emerged from exile to join his son Harold and invade England in September 1052. The defenseless Edward was forced to restore all the possessions and offices of the Godwine family. Harold became earl of Wessex upon the death of Godwine, and in 1066 he succeeded to Edward's throne as Harold II

Notes for Sviatoslav I (Emperador Ruso):
Svyatoslav, the first prince of the house of Rurik to bear a Slav name. With his government centered in Kyyiv, which rose to a preeminent position among Russian cities, Svyatoslav, who was a great military leader, devoted himself to strengthening the Russian position in the south. He led his troops against the Khazars in the southeast; against the Pechenegs, a warlike, nomadic tribe of the Black Sea steppes; and against the Bulgars. Svyatoslav built a great empire, and commerce and crafts increased under his reign.

The empire was divided among the prince's three sons, causing dynastic conflicts that were ended in 980, when the youngest son, Vladimir I (see Vladimir, Saint), later known as Vladimir the Great, became sole ruler.

Svyatoslav I, also spelled SVIATOSLAV, Russian in full SVYATOSLAV IGOREVICH (d. 972), grand prince of Kiev from 945 and the greatest of the Varangian princes of early Russo-Ukrainian history.

He was the son of Grand Prince Igor, who was himself probably the grandson of Rurik, prince of Novgorod. Svyatoslav was the last non-Christian ruler of the Kievan state. After coming of age he began a series of bold military expeditions, leaving his mother, Olga, to manage the internal affairs of the Kievan state until her death in 969.

The Russian Primary Chronicle (Povest vremennykh let) says that Svyatoslav "sent messengers to the other lands announcing his intention to attack them." Between 963 and 965 he defeated the Khazars along the lower Don River and the Ossetes and Circassians in the northern Caucasus; he also attacked the Volga Bulgars. In 967 he defeated the Balkan Bulgars at the behest of the Byzantines, to whom he then refused to cede his conquest. He declared his intention of
establishing a Russo-Bulgarian empire with its capital at Pereyaslavets (now Pereyaslav-Khmelnytsky) on the Danube River. In 971, however, his comparatively small army was defeated by a Byzantine force under the emperor John I Tzimisces, and Svyatoslav was compelled to abandon his claim to Balkan territory.

In the spring of 972, while Svyatoslav was returning to Kievan Rus with a small retinue, he was ambushed and killed by the Pechenegs (a Turkic people) near the cataracts of the Dnieper River.

Notes for Constantino VIII (Emperador Bizantino):
Constantine VIII (b. c. 960--d. Nov. 11, 1028), Byzantine emperor, coemperor with his brother Basil II from 976 to 1025 and sole ruler from 1025 to 1028. He was a pleasure-loving man who allowed the administration to fall into the hands of others. He had no male heir, and on his deathbed he arranged that his second daughter, Zoe, should succeed him and marry the eparch of Constantinople,
Romanus III Argyrus.

BRITANICA

Basil II was the son of Romanus II and Theophano and was crowned co-emperor with his brother Constantine in 960, but as minors both he and his brother remained in the background. After their father's death in 963, the government was effectively undertaken by the senior military emperors, first by Nicephorus II Phocas, their stepfather, and then by John I Tzimisces. On the latter's death
(976) the powerful great-uncle of Basil II, the eunuch Basil the chamberlain, took control. His authority--and that of Basil II--was challenged by two generals who coveted the position of senior emperor. Both related to emperors, they belonged to powerful landed families and commanded outside support from Georgia and from the Caliph in Baghdad. After a prolonged struggle both were defeated by 989, though only with the help of Russians under Vladimir of Kiev, who was rewarded with the hand of Basil II's sister Anna on condition that the Kievan state
adopted Christianity. Certain Russian soldiers remained in Basil II's service, forming the famous imperial Varangian guard. Eventually, Basil II asserted his claim to sole authority by ruthlessly eliminating the dominating grand chamberlain, who was exiled in 985.

Teófano, hija del emperador de Bizancio Romano II, la cual influyó mucho sobre el estilo de la Corte.

Theophano, daughter of the Byzantine emperor Romanus II, brought Byzantine refinement and culture to the German court.

Notes for Otón II (Emperador Romano Germánico):
Otón II. 955-983. Emperador del Sacro Imperio Romano-Germanico.
Hijo de Otón I. Emperador de 973 a 983. Fue derrotado por los sarracenos, pero logró sacar a los franceses de la Lorena.
Esposo Teófano, hija del emperador de Bizancio Romano II, la cual influyó mucho sobre el estilo de la Corte.

Otto II (b. 955--d. Dec. 7, 983, Rome), German king from 961 and Holy Roman emperor from 967, sole ruler from 973, son of Otto I and his second wife, Adelaide.

Otto continued his father's policies of promoting a strong monarchy in Germany and of extending the influence of his house in Italy. In 961 he was crowned co-regent king of Italy and Germany with his father and was made co-regent emperor in 967. On April 14, 972, he married the Byzantine princess Theophano. At his father's death in 973 he was accepted without opposition as successor,
although revolts in the duchy of Bavaria and in Lorraine occupied the early years of his reign.
Bavaria, the most independent of the duchies, rebelled in 974, under the leadership of its duke, Henry II the Quarrelsome, Otto's cousin. It was not until 978 that Bavaria was pacified, the same year that Lothair, king of France, invaded Lorraine. In 979 Otto received the submission of Bohemia and Poland, and in 980 Lothair renounced his claim to Lorraine. Having thus secured his German dominions, Otto marched into Italy in 980, where German rule had been maintained by an imperial party headed by Hugh, marquis of Tuscany. Otto invaded southern Italy and was decisively defeated there by the Arabs in 982. In 983 he summoned a diet at Verona, where his young son, Otto III, was crowned German king. Otto II died in 983 while attempting to bring Venice under imperial
control. His absence from Germany had occasioned revolts along its borders, and after his defeat in Calabria in 982 the German position east of the Elbe collapsed because of a revolt by the Danes and an invasion by the Slavs. Nonetheless, Otto left a firmly established realm to his son and successor
Otto III.

BRITANICA

Otto II (955-83), Holy Roman emperor (967-83), king of Germany (961-83), the son of Otto I, with whom he ruled jointly from 967 to 973. In 976 he suppressed a rebellion that was led by his cousin Henry II, duke of Bavaria. Two years later, having been attacked by Lothair, king of France, Otto drove the French out of Lorraine but was unsuccessful in besieging Paris. Later Lothair renounced Lorraine, and peace was established. Otto next invaded southern Italy, gaining possession of Naples, Salerno, and Taranto, but he was overwhelmingly defeated by the Greeks and Saracens at Crotona in 982. He died in Rome while planning a second invasion. His wife, Theophano, brought Byzantine refinement and culture to the German court.

Notes for Erik VIII "Segersall" King Of Sweden:
Erich, Rey pagano de Suecia y Dinamarca entre los anos 985 y 1000.

During Roman times the eastern half of the Scandinavian Peninsula was inhabited by two tribes of the Germanic peoples: the Suiones, or Swedes, in northern Svealand; and the Gothones, or Goths, in southern Gothia. These tribes, although united in religious beliefs, were generally at war with each other. Before the 10th century, details of Swedish history are obscure. In the first half of the 9th century Frankish missionaries began teaching Christianity, which slowly became established in the country. Olaf Skötkonung was the first Swedish king to become a Christian. From about AD 800, Swedish Vikings established colonies in other countries, especially Russia and Eastern Europe, and established trade routes.
During the reign of Eric IX, from 1150 to 1160, Swedish power was strengthened. Eric invaded Finland and forced Christianity on those he conquered; during the subsequent two centuries Finland was completely subjugated by the Swedes. Eric was allegedly slain by a Danish claimant to his throne while he was attending mass, and he later became the patron saint of Sweden.

Lesser Armenia.
On the collapse of Greater Armenia many Armenians emigrated to Georgia, Poland, and Galicia, while others crossed into Cilicia, where some colonies had already settled at the end of the 10th century.
One of Gagik II's lieutenants, a certain Ruben, established himself about 1080 at Bardzrberd in the Taurus Mountains, and another noble named Oshin at Lambron: the former became the founder of the Rubenid dynasty of barons and kings who ruled Cilicia until 1226, and the latter was the ancestor of the Hetumid dynasty, which succeeded them and ruled until 1342.

Navarra, Reino de, nscleo polktico surgido a mediados del siglo VIII en los Pirineos occidentales (Espana). En este lugar, sometido a la presión

musulmana por el sur y a la de los francos por el norte, la aristocracia tribal de la zona consiguió establecer a principios del siglo IX una monarquka. La dinastka que inició esta fórmula polktica fue la de los Arista, que contó con el apoyo de la familia muladk de los Banu Qasi que pretendka desvincularse de Córdoba. Su fundador fue Knigo Arista (810-852), a quien sucedió Garcka Kniguez (852-870) y Fortsn Garcés (870-905).

Inigo Arista (reinó 800-852) es considerado, en general, como el primer rey y fundador de la primera dinastka navarra y del reino de Pamplona. Parece ser que al morir un ermitano en el monte Uruel (cerca de Jaca), se reunió mucha gente de aquella región para hacerle honras; en la reunión habka muchos que venkan huyendo de los irabes. Entonces nombraron un jefe o caudillo, que fue Inigo Arista, y juntos ganaron la primera batalla a los irabes cerca de la villa de Ainsa. Inigo Arista fue un infatigable guerrero; entre otras muchas conquistas hechas a los irabes, les tomó la ciudad de Pamplona, y los derrotó en Pueyo de Araguas (Huesca) .

The old kingdom of Navarre encompassed the modern autonomous community and extended north into the modern French département of Basses-Pyrénées. It was known as the kingdom of Pamplona until the last half of the 12th century. The city of Pamplona, the capital of present-day Navarre, was occupied by the Muslims after 711, but the Basque magnates of the region early achieved some autonomy, and about the year 798 one of them, INIGO ARISTA, established himself as an independent ruler there and for a time accepted Frankish suzerainty. By the time of Garcia Iniguez (c. 860-880), this dynasty was strong enough to assume regal titles and to establish diplomatic and dynastic ties with the neighbouring Christian kingdom of Asturias.

Historia
Las primeras noticias históricas sobre el Paks Vasco aparecen en los textos de Plinio y de Tolomeo. La influencia romana, aunque existió, no parece que fuera importante al norte de Pamplona, ciudad construida por Pompeyo Magno (74 a.C.) sobre el poblado vasco de Iruna (en vasco, la ciudad). Durante la mis alta edad media los vascos se distinguieron por su oposición a las influencias

suevas y visigodas. Parece ser que Vitoria tuvo su origen en la fortaleza de Vitoriaco (581), construida por los visigodos con el fin de contener y vigilar a los vascones. A principios del siglo VII se empezó a constituir una unidad polktica, el ducado de Vasconia, que comprendka tierras a ambos lados de los Pirineos que hoy se hallan repartidas entre los estados francés (Benabarre, Lapurdi y Zuberoa) y espanol (Ilava, Guipuzcoa, Vizcaya y Navarra). A principios del siglo VIII, aprovechando la invasión musulmana, los vascos vencieron a sus enemigos visigodos. Este primigenio ducado de Vasconia, a principios del siglo IX, dio origen al reino de Pamplona, luego llamado de Navarra, como territorio independiente bajo la dinastka de los Arista (Aritza). No obstante, durante el resto de la edad media, el territorio que constituye la actual comunidad autónoma del Paks Vasco estuvo mis vinculado a los avatares polkticos, económicos y territoriales -expansiones, crisis y contiendas civiles- del reino de Castilla (y la posterior Corona de Castilla), en calidad de senorkos, que a los del reino de Navarra.

Notes for I Louis, Emperor Of The West:
Louis I,

byname LOUIS THE PIOUS, or THE DEBONAIR, French LOUIS LE PIEUX, or LE
DÉBONNAIRE, German LUDWIG DER FROMME (b. 778, Chasseneuil, near Poitiers, Aquitaine--d. June 20, 840, Petersaue, Ger.), son of the Frankish ruler Charlemagne; he was crowned as co-emperor in 813 and became emperor in 814 on his father's death. Twice deprived of his authority by his sons (Lothair, Pepin, Louis, and Charles), he recovered it each time (830 and 834), but at his death the Carolingian empire was in disarray.

Louis was the fifth child of Charlemagne's second wife, Hildegard the Swabian. From 781 until 814 Louis ruled Aquitaine with some success, though largely through counsellors. When Charlemagne died at Aachen in 814 and was succeeded by Louis, by then his only surviving legitimate son, Louis was well experienced in warfare; he was 36, married to Irmengard of Hesbaye, and was the father of three young sons, Lothair, Pepin, and Louis (Louis the German); he had inherited vast lands, which seemed to be under reasonable control; there was no other claimant to the throne; and on Sept. 11, 813, shortly before his father's death, Louis had been crowned in Aachen as heir and co-emperor.

Louis' first task was to carry out the terms of Charlemagne's will. According to the Frankish chronicler Einhard, Louis did this with great scrupulousness, although other contemporary sources tell a different story.

Louis next began to allocate parts of the empire to the various members of his family, and here began the difficulties and disasters that were to beset him for the remainder of his life. In August 814 he made Lothair and Pepin nominal kings of Bavaria and Aquitaine. He also confirmed Bernard, the son of his dead brother Pepin, as king of Italy, which position Charlemagne had allowed him to inherit in 813. But when Bernard revolted in 817, Louis had him blinded, and he died
as a result of it. Louis sent his sisters and half sisters to nunneries and later put his three illegitimate half brothers--Drogo, Hugo, and Theodoric--into monasteries.

At the assembly of Aachen in July 817, he confirmed Pepin in the possession of Aquitaine and gave Bavaria to Louis the German; Lothair he made his co-emperor and heir. Charlemagne had been in his 70s and within a few months of death before naming his heir, and for Louis to give such premature expectations to a youth of 22 was to ask for trouble. Moreover, Louis did not anticipate that he would become father of another child: the empress Irmengard died in 818; and four months later Louis married Judith of Bavaria, who, in June 823, bore him a son, Charles (Charles the Bald), to whom the Emperor gave Alemannia in 829.

Backed by his two brothers, Lothair rose in revolt and deposed his father. The assembly of Nijmegen in October 830, however, restored Louis to the throne; and, the following February, at the assembly of Aachen, in a second partition, Lothair was given Italy. In 832 Louis took Aquitaine away from Pepin and gave it

to Charles. The three brothers revolted a second time, with the support of Pope Gregory IV, and at a meeting near Sigolsheim, in Alsace, once more deposed their father. In March 834 Louis was again restored to the throne and made peace with Pepin and with Louis the German. Later in 834, Lothair rose again, but alone, and had to retreat into Italy. Encouraged by his success, Louis made over more territories to his son Charles at the assemblies of Aachen and Nijmegen (837-838)--a move the three brothers accepted but with bad grace. In 839
Louis the German revolted but was driven back into Bavaria.

Meanwhile, Pepin had died (December 838), and, at the assembly of Worms (May 30, 839), a fourth partition was made, the empire being divided between Lothair and Charles, with Bavaria left in the hands of Louis the German. Toward the end of 839 Louis the German marched his troops for the last time against his father, who once more drove him back. The Emperor called an assembly at Worms on July 1, 840. Before it could meet, however, Louis the Pious died at Petersaue, an island in the Rhine near Ingelheim. He was 62 and had ruled for nearly 27 years. He was buried in the Church of St. Arnulf in Metz by Bishop Drogo, his half brother.

The empire he had inherited in peace, Louis left in disarray. He had engaged in no serious external conflict, although the Danes and others had continued to make inroads into the empire. From 829 his four sons had been a constant source of disruption; the quarrels among Lothair, Louis the German, and Charles the Bald were to continue for decades after his death. In many ways Louis seems to have been an estimable person. He was presumably given the epithet the Pious because of his devoutness, his liberality to the church, his interest in ecclesiastical affairs, and the good education he had received. Contemporary historians vary little in their judgment: the Astronomer of Limousin stresses his continued courage in the face of adversity; Thegan, bishop of Trier, gives a long and admiring description of his person, his talents, his Christian charity, his devoutness, and his skill as a hunter; and the poem of Ermoldus Nigellus is full of adulation.

Like his father, Charlemagne, Louis the Pious is depicted in several of the chansons de geste of the 12th century, notably the Chanson de Guillaume, the Couronnement de Louis, and the Charroi de Nimes: he appears as a kindly ruler but a weak and vacillating one.

Children of I Louis and Ermengarde are:

i. Lotario I, Emperador de Occidente, born 795; died 29 Septiembre 855 in Abadía de Prüm, Alemania; married Ermenegarda de Tours; born Abt. 795.

Notes for Lotario I, Emperador de Occidente:
Lothair I (b. 795--d. Sept. 29, 855, Abbey of Prüm, Ger.), Frankish emperor whose attempt to gain sole rule over the Frankish territories was checked by his brothers.

The eldest son of the emperor Louis I the Pious and a grandson of Charlemagne, Lothair was made King in Bavaria after Louis succeeded Charlemagne in 814, and in 817 he was made joint emperor. Under the Ordinatio imperii, a decree issued by Louis in 817 to provide for the unity of the empire after his death, Lothair's younger brothers, Pepin and Louis (later called the German), were to receive their own kingdoms, Aquitaine and Bavaria, but were to remain
under the general suzerainty of Lothair.

Ruler in Italy from 822, Lothair was crowned emperor by Pope Paschal I in 823. He issued the Constitutio Romana (824), affirming imperial sovereignty over Rome and demanding an oath of fealty from the pope. When in 829 Louis I, under the influence of his second wife, Judith, revised the Ordinatio imperii to grant part of the empire previously granted to Lothair to his son by Judith, Charles (later called the Bald), Lothair broke with the imperial government. A palace revolution forced his reappointment as co-emperor in 830, but he was again deposed shortly afterward.

In 833 discontent with the rule of Louis the Pious ended in a revolt of the three elder sons, led by Lothair, and Lothair replaced the deposed Louis. Louis was restored to power the following year, however, and Lothair's rule was restricted to Italy.

When Pepin died in December 838, Louis I drew up a new partition scheme, dividing the empire, aside from Bavaria and neighbouring areas, which were left to Louis the German, between Lothair and Charles the Bald, with Lothair taking the eastern portion. Lothair was to have the title of emperor, but without the suzerainty over the other princes that had been granted by the Ordinatio imperii of 817.

On Louis I's death (840), Lothair again claimed his rights under the Ordinatio of 817, but his brothers, Louis the German and Charles the Bald, defeated him at the Battle of Fontenoy (841). The Treaty of Verdun (August 843) left Lothair the Middle Realm of the Frankish dominions, from the North Sea to Italy, while Louis received the eastern and Charles the western territory. The imperial title fell to Lothair.

After granting the government of Italy to his eldest son, Louis II, as early as 844, Lothair partitioned his realm between Louis (emperor from 850) and his two other sons, Lothair and Charles, in 855. Then he abdicated and became a monk.

Notes for Louis II, Of Germany:
Louis II, byname LOUIS THE GERMAN, German LUDWIG DER DEUTSCHE (b. c. 804, Aquitaine?, Fr.--d. Aug. 28, 876,

Frankfurt), king of the East Franks, who ruled lands from which the German state later evolved.

The third son of the Carolingian emperor Louis I the Pious, Louis the German was assigned Bavaria at the partition of the empire in 817. Entrusted with the government of Bavaria in 825, he began his rule the following year. Louis took part in the revolts against his father (830-833) and joined his half-brother, Charles the Bald, in opposing the claim of his brother, Lothair I, to imperial suzerainty over the whole empire after their father's death in 840. By the Treaty of Verdun (August 843), Charles, Lothair I, and Louis divided the western, middle, and eastern parts of the empire, respectively, between them. Louis received the territory of the Franconians, the Swabians, the Bavarians, and the Saxons, together with the Carolingian provinces to the east.

In 853 a group of nobles opposing Charles the Bald, then king of the West Franks, appealed to Louis for help; in 854 Louis sent his son Louis the Younger to Aquitaine, and in 858 went west himself to try to depose Charles; both expeditions failed. At the Peace of Coblenz (860) Louis renounced his claims to Charles's dominions.

When Lothair I died in 855, his lands were divided among his sons, one of whom, Lothair, received Lotharingia (Greater Lorraine). This Lothair had no legitimate children, and Louis the German and Charles the Bald agreed (865 and 867/868) on the partition of their nephew's dominions between themselves on his death. When Lothair died (869), however, Charles broke the agreements by annexing Lotharingia. Louis invaded Lotharingia (870), and the country was
divided between Louis and Charles by the Treaty of Mersen (Meerssen), under which Louis received Friesland and an extremely large expansion of this territory west of the Rhine.

Louis in 865 and 872 divided his territories between his sons Carloman, Louis the Younger, and Charles III the Fat. Quarrels and discontent at the partitions led to revolts by one or another of the sons between 861 and 873.

Although Louis the German supported Frankish Catholic missions in Moravia, he could not maintain control in that area and lost a war that led to the founding of Greater Moravia, independent after 874.

Louis the German unsuccessfully sought the imperial dignity and the succession in Italy for his line after the death of Lothair I's son, the emperor Louis II; but though Louis II declared (874) in favour of Carloman, eldest son of Louis the German, as the next emperor (August 875), Charles the Bald had himself crowned by

Pope John VIII after Louis II's death in August 875. Meanwhile, Louis the German unsuccessfully attempted to invade Charles's possessions in
Lotharingia. At the time of his death, Louis the German was again preparing for war against Charles.

Notes for Charles II, King Of France:
Charles II, byname CHARLES THE BALD, French CHARLES LE CHAUVE, German KARL DER KAHLE (b. June 13, 823--d. Oct. 6, 877, Brides-les-Bain, Fr.), king of France (i.e., Francis Occidentalis, the West Frankish kingdom) from 843 to 877 and Western emperor from 875 to 877. (He is reckoned as Charles II both of the Holy Roman Empire and of France.)

Son of the emperor Louis I the Pious and his second wife, Judith, Charles was the unwitting cause of violent discord when, in 829, he was granted lands by his father; Louis's action precipitated a series of civil wars, lasting until 838, in which the three sons of his first marriage, Lothair I, Louis (the German), and

Pepin, strove to maintain or to increase the rights that they had been guaranteed by the succession settlement of 817, the Ordinatio imperii. Pepin died in 838, but after the death of Louis I in 840 the civil war resumed and continued until Louis the German joined with Charles to force Lothair to accept the Treaty of Verdun in 843, by which Charles received all the lands west of a line roughly following the Scheldt, the Meuse, the Saone, the eastern mountains of the Massif Central, and the lower reaches of the Rhone, and Louis the German and Lothair received respectively the lands of the East Franks (Germany) and the middle kingdom, lying between the other two.

Until 864 Charles's political situation was precarious because few vassals were loyal to him. His lands suffered from raids by Northmen, who left only after receiving bribes; he was defeated by the Bretons and, in 858, faced an invasion by Louis the German. Yet he succeeded in gaining control of Aquitaine after the capture of Pepin's son in 864; and, by the Treaty of Meersen (870) with Louis the German, he received western Lorraine.

When Lothair's son, the emperor Louis II, died in 875, Charles went to Italy and was crowned emperor on December 25 by Pope John VIII. In 876, after the death of Louis the German, Charles invaded Louis's possessions but was defeated at Andernach by Louis's son, Louis the Younger. Charles's death in the next year occurred when another son of Louis the German, Carloman, was marching against him and when his own major vassals were in revolt.

During Charles's reign some of the splendours of the Carolingian renaissance were revived, and his close collaboration with the church enhanced his prestige and authority.

Baldwin I, byname BALDWIN IRON-ARM, French BAUDOUIN BRAS-DE-FER, Dutch BOUDEWIJN DE IJZERE ARM (d. 879), the first ruler of Flanders. A daring warrior under Charles II the Bald of France, he fell in love with the King's daughter Judith, the youthful widow of two English kings, married her (862), and fled

with his bride to Lorraine. Charles, though at first angry, was at last conciliated, and made his son-in-law margrave (Marchio Flandriae) of Flanders
(864), which he held as a hereditary fief. The Norsemen were at this time continually devastating the coastlands, and Baldwin was entrusted with this outlying borderland in order to defend it. He was the first of a line of strong rulers, who early in the 10th century exchanged the title of margrave for that of count.

Notes for Rollon I, 1st Duke Of Normandy:
Rollo, also called ROLF, or ROU, French ROLLON (b. c. 860--d. c. 932), Scandinavian rover who founded the duchy of Normandy.

Making himself independent of King Harald I of Norway, Rollo sailed off to raid Scotland, England, Flanders, and France on pirating expeditions and, about 911, established himself in an area along the Seine River. Charles III the Simple of France held off his siege of Paris, battled him near Chartres, and negotiated the treaty of Saint-Clair-sur-Epte, giving him the part of Neustria that came to be called Normandy; Rollo in return agreed to end his brigandage. He gave his son,
William I Longsword, governance of the dukedom (927) before his death. Rollo was baptized in 912 but is said to have died a pagan.

Notes for BerengerI, King Of Italy (888-923):
Berengar, also called BERENGARIO, DUKE AND MARCHESE (duca e marchese) DEL FRIULI (d. April 7, 924), king of Italy from 888 (as Berengar I) and Holy Roman emperor from 915. He was the founder of a line of princes of the 9th-11th century who in popular Italian histories are ranked incorrectly as

national kings. Through his mother he was a grandson of the Carolingian emperor Louis I the Pious.

After the fall of the emperor Charles III the Fat, Berengar was elected king of Italy in 888 at Pavia. He acknowledged the overlordship of the East Frankish king Arnulf, and from early 889 he was confined to northeastern Italy by Guy of Spoleto (d. 894), who at that time ruled the rest of Italy. After the death of Guy's son and successor, Lambert (898), Berengar finally was recognized throughout the kingdom.

In 899 Berengar was defeated on the Brenta River by the invading Magyars. In 900 King Louis of Provence (the future emperor Louis III the Blind) was invited to Italy by a group of nobles antagonistic to Berengar. Louis was crowned king of the Lombards and then, in 901, was made emperor by Pope Benedict IV. Within a year Berengar had expelled Louis from Italy. Louis returned, however, and was captured at Verona on July 21, 905, blinded, and sent back to Provence. Berengar himself was crowned emperor by Pope John X in 915. But once again he was challenged by some Italian noblemen, who in 922 called in King Rudolf II of Burgundy. Rudolf defeated Berengar the next year at Fiorenzuola, near Piacenza. The following spring Berengar was murdered by one of his own men.

Notes for Aethelwulf, King Of England:

Aethelwulf, also spelled ETHELWULF (d. 858), Anglo-Saxon king in England, the father of King Alfred the Great. As ruler of the West Saxons from 839 to 856, he allied his kingdom of Wessex with Mercia and thereby withstood invasions by Danish Vikings.

The son of the great West Saxon king Egbert (ruled 802-839), Aethelwulf ascended the throne four years after the Danes had begun large-scale raids on the English coast. In 851 he scored a major victory over a large Danish army at a place called Aclea in Surrey. Aethelwulf then married his daughter to the Mercian king Burgred (853), and in 856 he himself married the daughter of Charles II the Bald, king of the West Franks. Aethelwulf was deposed by a rival faction upon his return from a pilgrimage to Rome in 856, but he continued to rule Kent and several other eastern provinces until his death. In addition to Alfred the Great (ruled 871-899), three of Aethelwulf's four other sons became kings of Wessex.

Notes for Eadberg, Of Mercia:
Edburha (esposa de Ethelredo Mucel) era de la casa real de Mercia, que habka reinado sobre Angel, tierra de los Anglos en Schleswig antes de emigrar a su nueva patria. Chadwick, con patriótico entusiasmo, considera históricamente aceptable a Wermundo, rey de Angel, por 350, cuyo tataranieto Icel, fundó la dinastka de Mercia (citado por Wagner, 1415) Su linaje mktico también remonta a Odkn. Padres de Eduardo y Elfrida.

Mercia, reino anglosajón en Inglaterra, documentado por vez primera en el siglo VI y localizado en la zona de los Midlands. Su territorio abarcó las actuales regiones de Staffordshire, Derbyshire, Nottinghamshire, y el norte de Warwickshire. En sus inicios se extendka sólo por la cuenca inferior del rko Trent. Mercia se convirtió en uno de los primeros reinos ingleses. Fue ampliado por sucesivos monarcas, de forma que a fines del siglo VIII llegó a ocupar todo el territorio inglés al sur del estuario del rko Humber: el reino limitaba por el oeste con la frontera de Gales; por el este con la frontera de East Anglia y por el sur con el rko Timesis. Su nombre deriva del vocablo del inglés antiguo Merce, que significa 'pueblo de la frontera'.
Los habitantes del reino eran anglos. El primer rey de Mercia del que tenemos información es Penda (muerto en el 655), guerrero beligerante y defensor del paganismo, que buscó constantemente extender su poder. Obtuvo el trono de Mercia en el ano 632 a consecuencia de su victoriosa invasión, junto al rey de Gales, Cadwallae, del norte de Northumbria, a cuyo rey Edwin, recién convertido al cristianismo, derrotó y mató (633). Al ano siguiente, Penda se vio obligado a devolver Northumbria al sucesor de Edwin, Oswald. No la recuperó hasta el ano 641 (y sólo de forma parcial), cuando de nuevo invadió este reino y venció a su monarca. Entre tanto, nombró a su hijo Peada corregente de Middle Anglia y, aunque él mismo era asn pagano incondicional, permitió a Peada introducir el cristianismo en este reino. Con el paso del tiempo, todo el reino de East Anglia fue sometido y el rey Cenwalh de Wessex fue expulsado de su reino durante tres anos (645-648). Penda murió en el 655 durante el transcurso de una batalla entablada contra el rey Oswiu de Northumbria, cuyo territorio habka sido invadido. Mercia no restableció su preponderancia hasta el siglo siguiente.
Ethelbald, rey de Mercia desde el ano 716, obtuvo alrededor del 731 el control sobre todas las provincias de Inglaterra situadas al sur del rko Humber y se autotituló, en sus documentos, Rex Britanniae. Fue asesinado en el 757 por un

miembro de su familia, instigado probablemente por algsn enemigo. Mercia, bajo el gobierno de su siguiente rey, Offa, alcanzó el cenit de su poderko y los reyes vecinos aceptaron su supremacka. Offa casó a sus hijas con los reyes de Northumbria y Wessex. Desde la marcha de los romanos, Inglaterra no habka estado unificada polkticamente.

Tras la muerte de Offa, el poderko de Mercia inició su decadencia, debido al creciente poderko de Wessex por el sur y, en particular, a las invasiones danesas por el este. A inicios del siglo X Mercia aceptó la supremacka de Athelstan, rey de Wessex, con lo que se convirtió en parte de una Inglaterra unificada.

Fundador de la Dinastka Jimeno de Navarra, impuesta por la ausencia de Fortsn Garcés.

Navarre,

The old kingdom of Navarre encompassed the modern autonomous community and extended north into the modern French département of Basses-Pyrénées. It was known as the kingdom of Pamplona until the last half of the 12th century. The city of Pamplona, the capital of present-day Navarre, was occupied by the Muslims after 711, but the Basque magnates of the region early achieved some autonomy, and about the year 798 one of them, Inigo Arista, established himself as an independent ruler there and for a time accepted Frankish suzerainty.

By the time of GARCIA INIGUEZ (c. 860-880), this dynasty was strong enough to assume regal titles and to establish diplomatic and dynastic ties with the neighbouring Christian kingdom of Asturias.

Under Sancho I Garcés (905-925), the rulers of Pamplona expanded their dominions south of the Ebro River, capturing Najera and much of La Rioja.

Under Sancho III Garcés (1000-35), the Navarrese established a brief hegemony over all of Christian Spain. Sancho's empire proved short-lived, however, for at his death the kingdom was divided up into Navarre, Aragon, and Castile. In 1076 Sancho Ramkrez of Aragon occupied Pamplona. Navarre was then ruled by the Aragonese crown until 1134, when it recovered its independence under Garcia IV, who reigned until 1150. A succession of French dynasties ruled Navarre after 1234.

Though Navarre at an early date ceased to have a frontier with the Muslims, many Muslims continued to live there. They were allowed to serve in the army and also provided an important source of skilled artisans. Large Jewish congregations (aljamas) existed in the chief towns and were protected by the Navarrese kings when persecution became serious elsewhere. Despite its small size in the later Middle Ages, Navarre played an important part in international politics, partly because it controlled the main pass into Spain in the western Pyrenees and was a buffer state between Gascony, Castile, and Aragon. The chief pilgrim roads from the north to Santiago de Compostela also traversed the kingdom.

Notes for I Louis, Emperor Of The West:
Louis I,

byname LOUIS THE PIOUS, or THE DEBONAIR, French LOUIS LE PIEUX, or LE
DÉBONNAIRE, German LUDWIG DER FROMME (b. 778, Chasseneuil, near Poitiers, Aquitaine--d. June 20, 840, Petersaue, Ger.), son of the Frankish ruler Charlemagne; he was crowned as co-emperor in 813 and became emperor in 814 on his father's death. Twice deprived of his authority by his sons (Lothair, Pepin, Louis, and Charles), he recovered it each time (830 and 834), but at his death the Carolingian empire was in disarray.

Louis was the fifth child of Charlemagne's second wife, Hildegard the Swabian. From 781 until 814 Louis ruled Aquitaine with some success, though largely through counsellors. When Charlemagne died at Aachen in 814 and was succeeded by Louis, by then his only surviving legitimate son, Louis was well experienced in warfare; he was 36, married to Irmengard of Hesbaye, and was the father of three young sons, Lothair, Pepin, and Louis (Louis the German); he had inherited vast lands, which seemed to be under reasonable control; there was no other claimant to the throne; and on Sept. 11, 813, shortly before his father's death, Louis had been crowned in Aachen as heir and co-emperor.

Louis' first task was to carry out the terms of Charlemagne's will. According to the Frankish chronicler Einhard, Louis did this with great scrupulousness, although other contemporary sources tell a different story.

Louis next began to allocate parts of the empire to the various members of his family, and here began the difficulties and disasters that were to beset him for the remainder of his life. In August 814 he made Lothair and Pepin nominal kings of Bavaria and Aquitaine. He also confirmed Bernard, the son of his dead brother Pepin, as king of Italy, which position Charlemagne had allowed him to inherit in 813. But when Bernard revolted in 817, Louis had him blinded, and he died
as a result of it. Louis sent his sisters and half sisters to nunneries and later put his three illegitimate half brothers--Drogo, Hugo, and Theodoric--into monasteries.

At the assembly of Aachen in July 817, he confirmed Pepin in the possession of Aquitaine and gave Bavaria to Louis the German; Lothair he made his co-emperor and heir. Charlemagne had been in his 70s and within a few months of death before naming his heir, and for Louis to give such premature expectations to a youth of 22 was to ask for trouble. Moreover, Louis did not anticipate that he would become father of another child: the empress Irmengard died in 818; and four months later Louis married Judith of Bavaria, who, in June 823, bore him a son, Charles (Charles the Bald), to whom the Emperor gave Alemannia in 829.

Backed by his two brothers, Lothair rose in revolt and deposed his father. The assembly of Nijmegen in October 830, however, restored Louis to the throne;

and, the following February, at the assembly of Aachen, in a second partition, Lothair was given Italy. In 832 Louis took Aquitaine away from Pepin and gave it to Charles. The three brothers revolted a second time, with the support of Pope Gregory IV, and at a meeting near Sigolsheim, in Alsace, once more deposed their father. In March 834 Louis was again restored to the throne and made peace with Pepin and with Louis the German. Later in 834, Lothair rose again, but alone, and had to retreat into Italy. Encouraged by his success, Louis made over more territories to his son Charles at the assemblies of Aachen and Nijmegen (837-838)--a move the three brothers accepted but with bad grace. In 839
Louis the German revolted but was driven back into Bavaria.

Meanwhile, Pepin had died (December 838), and, at the assembly of Worms (May 30, 839), a fourth partition was made, the empire being divided between Lothair and Charles, with Bavaria left in the hands of Louis the German. Toward the end of 839 Louis the German marched his troops for the last time against his father, who once more drove him back. The Emperor called an assembly at Worms on July 1, 840. Before it could meet, however, Louis the Pious died at Petersaue, an island in the Rhine near Ingelheim. He was 62 and had ruled for nearly 27 years. He was buried in the Church of St. Arnulf in Metz by Bishop Drogo, his half brother.

The empire he had inherited in peace, Louis left in disarray. He had engaged in no serious external conflict, although the Danes and others had continued to make inroads into the empire. From 829 his four sons had been a constant source of disruption; the quarrels among Lothair, Louis the German, and Charles the Bald were to continue for decades after his death. In many ways Louis seems to have been an estimable person. He was presumably given the epithet the Pious because of his devoutness, his liberality to the church, his interest in ecclesiastical affairs, and the good education he had received. Contemporary historians vary little in their judgment: the Astronomer of Limousin stresses his continued courage in the face of adversity; Thegan, bishop of Trier, gives a long and admiring description of his person, his talents, his Christian charity, his devoutness, and his skill as a hunter; and the poem of Ermoldus Nigellus is full of adulation.

Like his father, Charlemagne, Louis the Pious is depicted in several of the chansons de geste of the 12th century, notably the Chanson de Guillaume, the Couronnement de Louis, and the Charroi de Nimes: he appears as a kindly ruler but a weak and vacillating one.

Children of I Louis and Ermengarde are:

i. Lotario I, Emperador de Occidente, born 795; died 29 Septiembre 855 in Abadía de Prüm, Alemania; married Ermenegarda de Tours; born Abt. 795.

Notes for Lotario I, Emperador de Occidente:
Lothair I (b. 795--d. Sept. 29, 855, Abbey of Prüm, Ger.), Frankish emperor whose attempt to gain sole rule over the Frankish territories was checked by his brothers.

The eldest son of the emperor Louis I the Pious and a grandson of Charlemagne, Lothair was made King in Bavaria after Louis succeeded Charlemagne in 814, and in 817 he was made joint emperor. Under the Ordinatio imperii, a decree issued by Louis in 817 to provide for the unity of the empire after his death, Lothair's younger brothers, Pepin and Louis (later called the German), were to receive their own kingdoms, Aquitaine and Bavaria, but were to remain
under the general suzerainty of Lothair.

Ruler in Italy from 822, Lothair was crowned emperor by Pope Paschal I in 823. He issued the Constitutio Romana (824), affirming imperial sovereignty over Rome and demanding an oath of fealty from the pope. When in 829 Louis I, under the influence of his second wife, Judith, revised the Ordinatio imperii to grant part of the empire previously granted to Lothair to his son by Judith, Charles (later called the Bald), Lothair broke with the imperial government. A palace revolution forced his reappointment as co-emperor in 830, but he was again deposed shortly afterward.

In 833 discontent with the rule of Louis the Pious ended in a revolt of the three elder sons, led by Lothair, and Lothair replaced the deposed Louis. Louis was restored to power the following year, however, and Lothair's rule was restricted to Italy.

When Pepin died in December 838, Louis I drew up a new partition scheme, dividing the empire, aside from Bavaria and neighbouring areas, which were left to Louis the German, between Lothair and Charles the Bald, with Lothair taking the eastern portion. Lothair was to have the title of emperor, but without the suzerainty over the other princes that had been granted by the Ordinatio imperii of 817.

On Louis I's death (840), Lothair again claimed his rights under the Ordinatio of 817, but his brothers, Louis the German and Charles the Bald, defeated him at the Battle of Fontenoy (841). The Treaty of Verdun (August 843) left Lothair the Middle Realm of the Frankish dominions, from the North Sea to Italy, while Louis received the eastern and Charles the western territory. The imperial title fell to Lothair.

After granting the government of Italy to his eldest son, Louis II, as early as 844, Lothair partitioned his realm between Louis (emperor from 850) and his two other sons, Lothair and Charles, in 855. Then he abdicated and became a monk.

Notes for Louis II, Of Germany:
Louis II, byname LOUIS THE GERMAN, German LUDWIG DER DEUTSCHE (b. c. 804, Aquitaine?, Fr.--d. Aug. 28, 876,

Frankfurt), king of the East Franks, who ruled lands from which the German state later evolved.

The third son of the Carolingian emperor Louis I the Pious, Louis the German was assigned Bavaria at the partition of the empire in 817. Entrusted with the government of Bavaria in 825, he began his rule the following year. Louis took part in the revolts against his father (830-833) and joined his half-brother, Charles the Bald, in opposing the claim of his brother, Lothair I, to imperial suzerainty over the whole empire after their father's death in 840. By the Treaty of Verdun (August 843), Charles, Lothair I, and Louis divided the western, middle, and eastern parts of the empire, respectively, between them. Louis received the territory of the Franconians, the Swabians, the Bavarians, and the Saxons, together with the Carolingian provinces to the east.

In 853 a group of nobles opposing Charles the Bald, then king of the West Franks, appealed to Louis for help; in 854 Louis sent his son Louis the Younger to Aquitaine, and in 858 went west himself to try to depose Charles; both expeditions failed. At the Peace of Coblenz (860) Louis renounced his claims to Charles's dominions.

When Lothair I died in 855, his lands were divided among his sons, one of whom, Lothair, received Lotharingia (Greater Lorraine). This Lothair had no legitimate children, and Louis the German and Charles the Bald agreed (865 and 867/868) on the partition of their nephew's dominions between themselves on his death. When Lothair died (869), however, Charles broke the agreements by annexing Lotharingia. Louis invaded Lotharingia (870), and the country was
divided between Louis and Charles by the Treaty of Mersen (Meerssen), under which Louis received Friesland and an extremely large expansion of this territory west of the Rhine.

Louis in 865 and 872 divided his territories between his sons Carloman, Louis the Younger, and Charles III the Fat. Quarrels and discontent at the partitions led to revolts by one or another of the sons between 861 and 873.

Although Louis the German supported Frankish Catholic missions in Moravia, he could not maintain control in that area and lost a war that led to the founding of Greater Moravia, independent after 874.

Louis the German unsuccessfully sought the imperial dignity and the succession in Italy for his line after the death of Lothair I's son, the emperor Louis II; but though Louis II declared (874) in favour of Carloman, eldest son of Louis the German, as the next emperor (August 875), Charles the Bald had himself crowned by

Pope John VIII after Louis II's death in August 875. Meanwhile, Louis the German unsuccessfully attempted to invade Charles's possessions in
Lotharingia. At the time of his death, Louis the German was again preparing for war against Charles.

Leo VI (886-912) was the complement of his father: learned, bookish, sedentary, mild; gossip concluded that he was Michael's, not Basil's son, and perhaps Eudocia was not shure.

THE STORY OF CIVILIZATION, Parte IV, Pg 429, Will Durant
---

Leo VI, byname LEO THE WISE, or THE PHILOSOPHER (b. Sept. 19, 866--d. May 11, 912, Constantinople), Byzantine coemperor from 870 and emperor from 886 to 912, whose imperial laws, written in Greek, became the legal code of the Byzantine Empire.

Made coemperor in 870, Leo succeeded to the throne on his father's death. His foreign policy was directed mainly against the Arabs and the Bulgars. The able commander Nicephorus Phocas the Elder was recalled from his successful campaigns against the Lombards in south Italy to assist in the Balkans. After this Byzantium met with reverses in the West: Sicily was lost to the Arabs in 902, Thessalonica was sacked by Leo of Tripoli, and the Aegean was open to constant attack from Arab pirates. Steps were taken to strengthen the Byzantine navy, which successfully attacked the Arab fleet in the Aegean in 908. But the naval expedition of 911-912 was defeated by Leo of Tripoli. Byzantium's enemy to the north was Simeon, the Bulgar ruler. Hostilities arose out of a trade dispute in 894, and the Byzantines, aided by the Magyars of the Danube-Dnieper region, forced Simeon to agree to a truce. With the help of the nomadic Pechenegs, however, Simeon in 896 took revenge on the Byzantines, forcing them to pay an annual tribute to the Bulgars.

During Leo's reign the Russian prince Oleg sailed to Constantinople and in 907 obtained a treaty regulating the position of Russian merchants in Byzantium, which was formally ratified in 911. Because of his anxiety for a male heir Leo married four times, thus incurring the censure of the church.

Educated by the patriarch Photius, Leo was more scholar than soldier. In addition to completing the canon of laws, he wrote several decrees (novels) on a wide range of ecclesiastical and secular problems. He also wrote a funeral panegyric on his father, liturgical poems, sermons and orations, secular poetry, and military treatises. Leo's image is in a mosaic over the central door of Hagia Sophia.

i. Constantino VII (Emperador Bizantino), born Septiembre 905; died 9 Noviembre 959 in Constantinopla; married Helena (Emperatriz Bizantina; born Abt. 910; died 961.

Notes for Constantino VII (Emperador Bizantino):

Constantine VII Porphyrogenitus, also called CONSTANTINE VII FLAVIUS PORPHYROGENITUS (b. September 905, Constantinople [now Istanbul, Tur.]--d. Nov. 9, 959), Byzantine emperor from 913 to 959. His writings are one of the best sources of information on the Byzantine Empire and neighbouring areas. His De administrando imperio treated the Slavic and Turkic peoples, and the De ceremoniis aulae Byzantinae, his longest book, described the elaborate ceremonies that made the Byzantine emperors priestly symbols of the state.

Constantine's surname, Porphyrogenitus (that is, born in the Purple Chamber of the Imperial Palace in Constantinople, as befitted legitimate children of reigning emperors), pointedly answers the doubts expressed about the legitimacy of his birth in 905, which slowed down his career and contributed to his shyness. His mother was Zoë Carbonopsina, the mistress of his father, Leo VI, who married her shortly after Constantine was born, against the bitter opposition of the patriarch Nicholas Mysticus. It was Leo's fourth marriage, and the Greek church normally forbade a widower to remarry more than once. As the infant was Leo's only male offspring, he had to be accepted and, in 911, was proclaimed coemperor. But, on the death of his father in 912, the succession fell to his uncle Alexander, whose death the next year cleared the way for seven-year-old Constantine. The patriarch Nicholas, who became regent, found it expedient to appease the powerful tsar Simeon I of Bulgaria--who had severely defeated the Byzantine armies and coveted the Byzantine imperial crown--by promising that the child emperor would marry Simeon's daughter. A palace revolt foiled the scheme, which looked like a betrayal of Byzantium to the Bulgarians. It was only after several years that a combination of diplomacy and successful defense of Constantinople succeeded in inducing Simeon to settle for recognition as emperor of the Bulgarians only. The strategist of this success, Admiral Romanus Lecapenus, rewarded himself by having Constantine marry his daughter (919) and crown him coemperor (920). Gradually Constantine lost most of his power to Lecapenus and to his sons.

It is not surprising that the young emperor slipped into a pattern of noninvolvement in government. His mother had been relegated to a convent. His father-in-law relieved him of the burdensome tasks of politics and war and shouldered them masterfully but treated him with deference and left him a full share of the prestige and income belonging to the crown. From his father, Constantine had apparently inherited a passion for learning and writing; he worked full-time at it until he was almost 40, when he became sole emperor. Nor did he change tastes thereafter. De thematibus, probably his earliest book, is mainly a compilation of older sources on the origins and development
of the provinces of the empire. An apologetic biography of his grandfather Basil I, which he appended to an anonymous chronicle known as Theophanes Continuatus, stressed the glory of the founder of his dynasty. De administrando imperio, a handbook of foreign politics, is perhaps his most valuable work, a storehouse of information on Slavic and Turkic peoples about whom little else is known except through archaeology.

Yet, the longest book and the one that tells the most about the Byzantine mentality (and most particularly the mind of the writer) is De ceremoniis aulae Byzantinae, basically a minute description of the elaborate ceremonial and processions that made the emperor a hieratic symbol of the state and strove to impress foreigners with his grandeur. There is no doubt that it helped Byzantium in its relations with the northern "barbarians" and even with western Europe. A monument to Byzantine patriotism, the book bears traces of the spoken vernacular that crept into the stilted Greek of more academic writers. The more voluminous, encyclopaedic works compiled under Constantine's directions are not worth describing, but he exhibited notable zeal in recruiting teachers and students for the "university" of Constantinople, inviting them to court and preferring them for public offices. He signed legislation and is said to have dabbled in various fine and mechanical arts.

Late in 944 the sons of Romanus Lecapenus, impatient to succeed to power, had their father deported; but the populace of the capital, fearing only that the Porphyrogenitus emperor might be included in the purge accompanying the seizure of power, rioted until Constantine appeared at a window of the palace. This show of loyalty emboldened him to banish Romanus' sons in January
945; he then ruled alone until his death in 959. He appointed to the highest army commands four members of the Phocas family, which had been in disgrace under Romanus Lecapenus, but took no further reprisals, except for an incidental remark, in De ceremoniis, that Romanus Lecapenus was neither an aristocrat nor a cultured man. That he did not depart from the admiral's basic policy--at home, maintaining a delicate balance among civil

and military officers, landed aristocrats, and peasant soldiers; abroad, friendship with the Rus, peace with the Bulgarians, a limited commitment in Italy, and a resolute offensive against the Muslims--may be ascribed to statesmanship as well as to timidity. The policy continued to be effective.

BRITANICA

(El Porfiriogeneta) (905-59), Byzantine emperor (913-59). Constantine was dominated by his father-in-law and co-emperor, Romanus I, and he continued Romanus's policies-protection of the small landholders of Anatolia and aggression against the Muslim states of Mesopotamia and Syria-even after Romanus was banished from Constantinople (present-day Istanbul) in 944. He also maintained contact with the Russians and encouraged their conversion to Christianity. Constantine is mainly remembered as a scholar and patron of scholarship. His own works include De Thematibus (On the Provinces), a history of the various territories of the Byzantine Empire; De Administrando Imperio (On Imperial Administration), a treatise on foreign policy containing valuable information on the peoples of eastern Europe in the 10th century; and De Ceremoniis Aulae Byzantinae (Byzantine Court Ceremonies).

Constantino Vll. 905-959. Emperador del Imperio del Este, conocido como "el Porfirogeneta". Llegó al trono en 912 bajo la regencia de su tio Alejandro. Su padrastro Romano I cogobernó con él hasta 945, cuando se convirtió, con el nombre de Constantino Vll, en emperador único. Derrotó a los árabes en Siria y fue envenenado por su hijo. Escribió una vida de Basilio I y sobre temas políticos; promovió la cultura y las bellas artes en el Imperio.

Constantino VII (Porfirogenetos), emperador bizantino (913/46 a 969), hijo y
sucesor de León VI y de Zoe; primero, bajo tutela; de 920 a 946, bajo la corregencia de Romanos Lakapenos

Notes for Lotario II, rey de Lorena:
Lothair (II) (b. c. 835--d. Aug. 8, 869, Piacenza, Italy), Frankish king of the area known as Lotharingia whose attempts to have his marriage dissolved so that he could marry his mistress caused much controversy and led to a bitter struggle between himself and Pope Nicholas I.

Lothair was the second son of the Frankish emperor Lothair I, ruler of the middle portion of the former empire of Charlemagne. Upon the death of Lothair I in 855, his realm was divided among his three sons, young Lothair receiving the area west of the Rhine from the North Sea to the Alps, which became known as Lotharingia (Lotharii regnum, or Lothair's kingdom, the modern Lorraine). When his younger brother, Charles of Provence, died in 863, Charles's kingdom was divided between the two surviving brothers: Louis II took Provence proper, and Lothair received the area around Vienne and Lyon.

In 855 Lothair had been forced by his father to marry Theutberga, a sister of Hicbert, the lay abbot of St. Maurice. Theutberga, however, remained childless,

and from 857 the King tried to have the marriage dissolved and to take his mistress Waldrada, by whom he had had children, as his legitimate wife and queen. He accused his wife of incest with her brother, but her champion prevailed in the ordeal by boiling water, and Lothair was forced to take her back.

Lothair then induced two subservient archbishops, Günther of Cologne and Theutgaud of Trier, to start ecclesiastical proceedings against his wife. Two synods at Aachen dissolved the marriage and in 862 gave Lothair permission to marry Waldrada. He obtained the papal legate's confirmation of this decision, probably through bribery, at a synod at Metz (June 863). Pope Nicholas I, however, reversed these decisions and took the unprecedented step of deposing archbishops Günther and Theutgaud (October 863). In August 865 another papal legate forced Lothair to take Theutberga back again.

In 867 Pope Nicholas I was succeeded by the more pliable Adrian II, and Lothair forced Theutberga to ask the new pope for a divorce herself. Lothair was received by the Pope in 869 and was promised that the question would be considered at a council. He died shortly thereafter, while on his way home.

Notes for Lambert Of Spoleto:
Lambert OF SPOLETO, Italian LAMBERTO DI SPOLETO (d. Oct. 15, 898, Marengo, Lombardy [Italy]), duke of Spoleto, king of Italy, and Holy Roman emperor (892-898) during the turbulent late Carolingian Age. He was one of many claimants to the imperial title.

Crowned coemperor with his father, Guy of Spoleto, at a ceremony in Ravenna in 892, Lambert ruled alone after his father's death in 894. The following year Arnulf of Carinthia, king of Germany, invaded Italy and besieged Rome, taking the city in February 896. He was crowned emperor by Pope Formosus, who declared Lambert deposed. Marching on Spoleto, Arnulf was suddenly taken ill and had to return to Germany, leaving Lambert once more in possession of the empire.

Almost a year after Formosus' death in 896, Lambert avenged the pope's crowning of Arnulf by having Formosus' body exhumed by the new pope, Stephen VI (VII), dressed in his pontifical robes, and tried and convicted in St. Peter's for a variety of crimes. Then, naked and mutilated, the body was flung into a potter's field and eventually thrown into the Tiber. Lambert died the following year in a hunting accident.

In 898 Berengar, marquis of Friuli, Guy of Spoleto's former rival, marched on Pavia. Lambert, who had been hunting near Marengo, south of Milan, counterattacked and defeated Berengar. On his return to Marengo, he was killed, either by assassination or by a fall from his horse.

Notes for Charles III "The Simple" King Of France:
Charles III, byname CHARLES THE SIMPLE, French CHARLES LE SIMPLE (b. Sept. 17, 879--d. Oct. 7, 929, Péronne, Fr.), king of France (893-922), whose authority came to be accepted by Lorraine and who settled the Northmen in Normandy but who became the first Carolingian ruler of the western kingdom to lose his crown.

The posthumous son of Louis II the Stammerer, Charles was too young to assume the throne on the death of his half-brother, Carloman, in 884 or that of his cousin, Charles the Fat, in 888. On Jan. 28, 893, however, he was crowned king by Fulk, archbishop of Reims; and, although he renounced his rights after civil war in 897, the death of King Eudes in the following year brought him general recognition as king.

Notes for II Donald, King Of Scotland:
Donald II (d. 900), king of the Scots (from 889), son of Constantine I and successor to Eochaid and Giric (reigned 878-889). His reign coincided with renewed invasions by the Danes, who came less to plunder and more to occupy the lands bordering Scotland and the Anglo-Saxon kingdoms. He was also embroiled in efforts to reduce the highland robber tribes. By one account he was slain at Dunnottar, meeting a Danish invasion; by another he died of infirmity brought on by his campaigns against the highlanders. He was succeeded by his cousin Constantine II.

Notes for Constantino VIII (Emperador Bizantino):
Constantine VIII (b. c. 960--d. Nov. 11, 1028), Byzantine emperor, coemperor with his brother Basil II from 976 to 1025 and sole ruler from 1025 to 1028. He was a pleasure-loving man who allowed the administration to fall into the hands of others. He had no male heir, and on his deathbed he arranged that his second daughter, Zoe, should succeed him and marry the eparch of Constantinople,
Romanus III Argyrus.

BRITANICA

Basil II was the son of Romanus II and Theophano and was crowned co-emperor with his brother Constantine in 960, but as minors both he and his brother remained in the background. After their father's death in 963, the government was effectively undertaken by the senior military emperors, first by Nicephorus II Phocas, their stepfather, and then by John I Tzimisces. On the latter's death
(976) the powerful great-uncle of Basil II, the eunuch Basil the chamberlain, took control. His authority--and that of Basil II--was challenged by two generals who coveted the position of senior emperor. Both related to emperors, they belonged to powerful landed families and commanded outside support from Georgia and from the Caliph in Baghdad. After a prolonged struggle both were defeated by 989, though only with the help of Russians under Vladimir of Kiev, who was rewarded with the hand of Basil II's sister Anna on condition that the Kievan state
adopted Christianity. Certain Russian soldiers remained in Basil II's service, forming the famous imperial Varangian guard. Eventually, Basil II asserted his claim to sole authority by ruthlessly eliminating the dominating grand chamberlain, who was exiled in 985.

Notes for Igor (Emperador Ruso):
Igor, also called INGVAR (b. c. 877--d. 945, Dereva region [Russia]), grand prince of Kiev and presumably the son of Rurik, prince of Novgorod, who is considered the founder of the dynasty that ruled Kievan Rus and, later, Muscovy until 1598. Igor, successor to the great warrior and diplomat Oleg (reigned c. 879-912), assumed the throne of Kiev in 912.

Depicted as a greedy, rapacious, and unsuccessful prince by the 12th-century Russian Primary Chronicle, Igor in 913-914 led an expedition into Transcaucasia that ended in total disaster for his forces. He also conducted two expeditions against Byzantium (941 and 944), but many of his ships were

destroyed by the "Greek fire," and the treaty that he finally concluded in 944 was less
advantageous to Kiev than the one obtained by Oleg in 911. Igor did manage to extend the authority of Kiev over the Pechenegs, a Turkic people inhabiting the steppes north of the Black Sea, as well as over the East Slavic tribe of Drevlyane. When he went to Dereva (the land of the Drevlyane located in the region of the Pripet River) to collect tribute (945), however, his attempt to extort more than the customary amount provoked the Drevlyane into rebelling and killing him.

Rurik was succeeded in 879 by his son Igor, a child for whom Oleg, Rurik's kinsman, ruled as regent. Prince Oleg, realizing the value of the Kyyiv region, had the Varangian rulers of that city killed in 882 and then united the two centers, establishing his capital at Kyyiv. He extended Russian rule considerably, subduing neighboring tribes, and he led his raiders as far south as Constantinople (present-day Istanbul), where he concluded a commercial treaty with Byzantium in 911, the first authentically dated event in Russian history. From that time Russian cultural and trade relations with the Byzantine Empire became continually closer. Igor assumed power in 912, and in 945 he was succeeded by his widow, Olga, who became a Christian in 955.

Notes for Santa Olga (Emperatriz Rusa):
Olga, SAINT, also called HELGA (b. c. 890--d. 969, Kiev; feast day July 11), princess who was the first recorded female ruler in Russia and the first member of the ruling family of Kiev to adopt Christianity. She was canonized as the first Russian saint of the Orthodox Church.

Olga was the widow of Igor I, prince of Kiev, who was assassinated (945) by his subjects while attempting to extort excessive tribute. Because Igor's son Svyatoslav was still a minor, Olga became regent of the grand principality of Kiev from 945 to 964. She soon had Igor's murderers scalded to death and hundreds of their followers killed. Olga became the first of the princely Kievans to adopt Orthodox Christianity. She was probably baptized (c. 957), at Constantinople (now Istanbul), then the most powerful patriarchate. Her efforts to bring Christianity to Russia were resisted by her son but continued by her grandson, the grand prince St. Vladimir (died 1015); together they mark the transition between pagan and Christian Russia.

Notes for Mal, Prince Of The Drevlyanes:
The Belorussian region has a long history of human settlement. Archaeology has provided evidence of Upper Paleolithic cultures, and Neolithic (New Stone Age) remains are widespread. The area was one of the earliest to be inhabited by Slavs, who settled there between the 6th and the 8th centuries AD. The early Slavic tribes, the Dregovichi, Radimichi, Krivichi, and DREVLYANE, had formed local principalities, such as those of Pinsk, Turov, Polotsk, Slutsk, and Minsk, by the 8th-9th centuries. These all came under the general suzerainty of Kievan Rus, the first East Slavic state, beginning in the mid-9th century. The regional economy was based on primitive, shifting agriculture on burned-over forest land, as well as on honey collecting and fur hunting. Along the rivers trade developed, particularly on the Dnieper, which from about 930 was part of the "water road" from Constantinople and the Byzantine Empire, via Kiev and Novgorod, to the Baltic Sea. Trading settlements multiplied, and many of the towns of present-day Belarus were founded by the end of the 12th century. Two of the earliest-mentioned towns of Slavic foundation, Polotsk and Turov, first appear in historical documents in the years 862 and 980, respectively.

Notes for Constantino VII (Emperador Bizantino):

Constantine VII Porphyrogenitus, also called CONSTANTINE VII FLAVIUS PORPHYROGENITUS (b. September 905, Constantinople [now Istanbul, Tur.]--d. Nov. 9, 959), Byzantine emperor from 913 to 959. His writings are one of the best sources of information on the Byzantine Empire and neighbouring areas. His De administrando imperio treated the Slavic and Turkic peoples, and the De

ceremoniis aulae Byzantinae, his longest book, described the elaborate ceremonies that made the Byzantine emperors priestly symbols of the state.

Constantine's surname, Porphyrogenitus (that is, born in the Purple Chamber of the Imperial Palace in Constantinople, as befitted legitimate children of reigning emperors), pointedly answers the doubts expressed about the legitimacy of his birth in 905, which slowed down his career and contributed to his shyness. His mother was Zoe Carbonopsina, the mistress of his father, Leo VI, who married her shortly after Constantine was born, against the bitter opposition of the patriarch Nicholas Mysticus. It was Leo's fourth marriage, and the Greek church normally forbade a widower to remarry more than once. As the infant was Leo's only male offspring, he had to be accepted and, in 911, was proclaimed coemperor. But, on the death of his father in 912, the succession fell to his uncle Alexander, whose death the next year cleared the way for seven-year-old Constantine. The patriarch Nicholas, who became regent, found it expedient to appease the powerful tsar Simeon I of Bulgaria--who had severely defeated the Byzantine armies and coveted the Byzantine imperial crown--by promising that the child emperor would marry Simeon's daughter. A palace revolt foiled the scheme, which looked like a betrayal of Byzantium to the Bulgarians. It was only after several years that a combination of diplomacy and successful defense of Constantinople succeeded in inducing Simeon to settle for recognition as emperor of the Bulgarians only. The strategist of this success, Admiral Romanus Lecapenus, rewarded himself by having Constantine marry his daughter (919) and crown him coemperor (920). Gradually Constantine lost most of his power to Lecapenus and to his sons.

It is not surprising that the young emperor slipped into a pattern of noninvolvement in government. His mother had been relegated to a convent. His father-in-law relieved him of the burdensome tasks of politics and war and shouldered them masterfully but treated him with deference and left him a full share of the prestige and income belonging to the crown. From his father, Constantine had apparently inherited a passion for learning and writing; he worked full-time at it until he was almost 40, when he became sole emperor. Nor did he change tastes thereafter. De thematibus, probably his earliest book, is mainly a compilation of older sources on the origins and development of the provinces of the empire. An apologetic biography of his grandfather Basil I, which he appended to an anonymous chronicle known as Theophanes Continuatus, stressed the glory of the founder of his dynasty. De administrando imperio, a handbook of foreign politics, is perhaps his most valuable work, a storehouse of information on Slavic and Turkic peoples about whom little else is known except through archaeology.

Yet, the longest book and the one that tells the most about the Byzantine mentality (and most particularly the mind of the writer) is De ceremoniis aulae Byzantinae, basically a minute description of the elaborate ceremonial and processions that made the emperor a hieratic symbol of the state and strove to impress foreigners with his grandeur. There is no doubt that it helped Byzantium in its relations with the northern "barbarians" and even with western Europe. A monument to Byzantine patriotism, the book bears traces of the spoken vernacular that crept into the stilted Greek of more academic writers.

The more voluminous, encyclopaedic works compiled under Constantine's directions are not worth describing, but he exhibited notable zeal in recruiting teachers and students for the "university" of Constantinople, inviting them to court and preferring them for public offices. He signed legislation and is said to have dabbled in various fine and mechanical arts.

Late in 944 the sons of Romanus Lecapenus, impatient to succeed to power, had their father deported; but the populace of the capital, fearing only that the Porphyrogenitus emperor might be included in the purge accompanying the seizure of power, rioted until Constantine appeared at a window of the palace. This show of loyalty emboldened him to banish Romanus' sons in January 945; he then ruled alone until his death in 959. He appointed to the highest army commands four members of the Phocas family, which had been in disgrace under Romanus Lecapenus, but took no further reprisals, except for an incidental remark, in De ceremoniis, that Romanus Lecapenus was neither an aristocrat nor a cultured man. That he did not depart from the admiral's basic policy--at home, maintaining a delicate balance among civil and military officers, landed aristocrats, and peasant soldiers; abroad, friendship with the Rus, peace with the Bulgarians, a limited commitment in Italy, and a resolute offensive against the Muslims--may be ascribed to statesmanship as well as to timidity. The policy continued to be effective.

(El Porfiriogeneta) (905-59), Byzantine emperor (913-59). Constantine was dominated by his father-in-law and co-emperor, Romanus I, and he continued Romanus's policies-protection of the small landholders of Anatolia and aggression against the Muslim states of Mesopotamia and Syria-even after Romanus was banished from Constantinople (present-day Istanbul) in 944. He also maintained contact with the Russians and encouraged their conversion to Christianity. Constantine is mainly remembered as a scholar and patron of scholarship. His own works include De Thematibus (On the Provinces), a history of the various territories of the Byzantine Empire; De Administrando Imperio (On Imperial Administration), a treatise on foreign policy containing valuable information on the peoples of eastern Europe in the 10th century; and De Ceremoniis Aulae Byzantinae (Byzantine Court Ceremonies).

Baldwin I, byname BALDWIN IRON-ARM, French BAUDOUIN BRAS-DE-FER, Dutch BOUDEWIJN DE IJZERE ARM (d. 879), the first ruler of Flanders. A daring warrior under Charles II the Bald of France, he fell in love with the King's daughter Judith, the youthful widow of two English kings, married her (862), and fled with his bride to Lorraine. Charles, though at first angry, was at last conciliated, and made his son-in-law margrave (Marchio Flandriae) of Flanders (864), which he held as a hereditary fief. The Norsemen were at this time continually devastating the coastlands, and Baldwin was entrusted with this outlying borderland in order to defend it. He was the first of a line of strong rulers, who early in the 10th century exchanged the title of margrave for that of count.

Notes for Charlemagne, Emp. Of The West:
CARLOMAGNO

Introduction

Charlemagne (Carolus Magnus, Charles the Great) as king of the Franks (768-814) conquered the Lombard kingdom in Italy, subdued the Saxons, annexed Bavaria to his kingdom, fought campaigns in Spain and Hungary, and, with the exception of the Kingdom of Asturias in Spain, southern Italy, and the British Isles, united in one superstate practically all the Christian lands of western Europe. In 800 he assumed the title of emperor. (He is reckoned as Charles I of the Holy Roman Empire, as well as Charles I of France.) Besides expanding its political power, he also brought about a cultural renaissance in his empire. Although this imperium survived its founder by only one generation, the medieval kingdoms of France and Germany derived all their constitutional traditions from Charles's monarchy. Throughout medieval Europe, the person of Charles was considered the prototype of a Christian king and emperor.

Early years.

Charles was born probably in 742 (on April 2), the elder son of Pepin III, also called Pepin the Short. Pepin and his older brother, Carloman, had just jointly assumed the government of the Frankish kingdom as maior domus, or "mayor of the palace." The dynasty, later called Carolingian after Charlemagne, had originated in the Meuse-Moselle region on the borders of modern France, Germany, Belgium, and The Netherlands. In the course of a few generations, it had, as mayors of the palace to the Merovingians, gained control of the entire Frankish kingdom. Charlemagne's grandfather, Charles Martel, reconstituted a realm that had been on the point of breaking up, and, without infringing on the royal prerogatives of the otherwise powerless Merovingians, he had in effect

bequeathed the empire to his sons, Pepin and Carloman, like a family inheritance.

Charles grew to manhood while his father was engaged in acquiring sole sovereignty and the kingship. On Carloman's retirement to a monastery, Pepin eliminated the latter's sons from the government. Having thus prepared the way, he had himself proclaimed king in 751, after dethroning the Merovingians. An oracular response by Pope Zacharias furnished the ecclesiastical approbation for thus shunting aside the former reigning house, which had been held sacred. Zacharias' successor, Stephen II, arrived in the Frankish kingdom during the winter of 753-754, in order to seek help against the Lombards who were attacking Rome. As the reigning monarch's oldest son, Charles, then about 12 years of age, travelled ahead to welcome the Pope, who anointed him king, along with his father and his brother Carloman, thus sanctioning the new dynasty. The political alliance between the Franks and the Pope against the Lombards was affirmed on the same occasion. When his father subdued Aquitaine (France south of the Loire) in a series of yearly campaigns beginning in 760, reasserting the integrity of the Frankish kingdom all the way to the Pyrenees, Charles repeatedly accompanied the army.

These youthful experiences probably contributed to the formation of Charles's character and to the formulation of his aims. He shared with his father an unbending will to power, a readiness to fight resolutely against external enemies and to increase his domains, and the determination to rule by himself even if it meant usurping the rights of close relatives. Charles early acknowledged the close connection between temporal power and the church; he had a high regard for the church and the king's duty to spread the Christian faith and, while asserting royal suzerainty over the church, considered himself accountable to God for the Christians entrusted to him.

King of the Franks.

In accordance with old Frankish custom, the kingdom was divided on Pepin's death in 768 between his two sons. It was not long, however, before a strong rivalry sprang up between the brothers: with his mother's support, Charles concluded, with the Lombard king Desiderius, whose daughter he married, and with his cousin Duke Tassilo of Bavaria, alliances directed against Carloman.

On Carloman's sudden death in 771, Charles was able to make himself sole ruler of the kingdom, unopposed by his young nephews, whose rights he ignored. When Carloman's widow with her children and a few remaining supporters had fled to the Lombard court, and King Desiderius, breaking his alliance with Charles, put pressure on the Pope to anoint Carloman's sons as Frankish kings, Charles was forced to come to the aid of Pope Adrian I. He marched on the
Lombard capital, Pavia, and after its fall made himself king of the Lombards. His brother's sons, who had fallen into his hands, disappeared. While the siege of Pavia was still in progress, Charles journeyed to Rome, where he celebrated Easter 774 with the Pope and reiterated, in St. Peter's Basilica, his father's promise to transfer to papal rule large sections of Italy. But he actually enlarged

the Pope's lands only slightly, assuming for himself the sovereignty over the entire Lombard kingdom.

Charles had fought the pagan Saxons, in what is now Lower Saxony and Westphalia, in retribution for their attacks on the lower Rhine region, as early as 772, before the first Italian campaign. From 775 on, however, it was his goal to subdue the whole Saxon tribe, converting it to Christianity and integrating it into his kingdom. This aim appeared to have been realized after several campaigns culminating in declarations of allegiance by the Saxon nobility and mass baptisms performed in 775-777. A diet held in 777 in Paderborn sealed the submission of the Saxons. Among those attending the diet had been some Arab emissaries from northern Spain who sought Charles's aid in their uprising against the Umayyad amir of Córdoba. In the summer of 778 Charles advanced into Spain and laid siege to Saragossa, without, however, being able to take the city. Retreating across the Pyrenees, the Frankish army was badly mauled by the Basques. Roland, warden of the Breton march, who died on this occasion, was later immortalized in legend and poetry.

This defeat marks the end of the first period of Charles's rule, the period of vigorous expansion. Within a decade he had become the sole ruler of the Franks, conquered the Lombard kingdom, visited Rome, subdued the Saxons, invaded Spain. Henceforth he was concerned with defending and safeguarding his quickly won gains (which were to be extended only on the right bank of the Rhine), while consolidating the state internally and protecting cultural life and the rule of law.

Not long after Charles's defeat in Spain, the Saxons rose up once more. The war against them became the longest and most cruel war fought by the Franks. In Charles's eyes, the resistance of this people that had undergone baptism and signed a treaty of allegiance amounted to political high treason and religious apostasy. These offenses called for severe punishment, and 4,500 Saxons were reported to have been executed en masse in 782. New outbreaks occurred after 792, and the last Saxons were not vanquished until 804. Between 772 and 804, Charles took the field against the Saxons no fewer than 18 times. In the end he carried out his aim of not only subjecting them to his rule but also incorporating them fully into his empire. Given the indissoluble tie between
temporal power and the Christian faith, this meant they had to be converted. But the violent methods by which this missionary task was carried out had been unknown to the earlier Middle Ages, and the sanguinary punishment meted out to those who broke canon law or continued to engage in pagan practices called forth criticism in Charles's own circle, for example by Alcuin, his adviser and head of his palace school.

When, in 788, Charles deposed his cousin Duke Tassilo III of Bavaria, who had acknowledged the Frankish kings as feudal lords, he in effect deprived of its independence the last of the German tribes beyond the Rhine. The Bavarians, who had long been Christians, were now directly integrated into the empire. The West Germanic tribes of the Alemanni, Bavarians, Saxons, and Thuringians thus found themselves for the first time gathered into one political unit. Charles's

conquests on the right bank of the Rhine were, however, not limited to the Germanic tribes. Making Ratisbon (Regensburg), the residence of the Bavarian dukes, his base, he conducted several campaigns, partly under his own command, against the Avar kingdom (in modern Hungary and Upper Austria). The remaining Avar principalities and the newly founded Slav states of the Danubian region drifted into a loose dependence on the Franks, whose sovereignty they more or less acknowledged.

The gigantic expansion of the Frankish state, raising it far above the tribal states of the early Middle Ages, entailed qualitative as well as quantitative changes. Yet the idea of bestowing on Charles the Roman title of emperor arose only at a very late stage and out of a specific political constellation. While the Eastern, or Byzantine, Empire laid claim to universal recognition, the popes, constitutionally still subjects of Byzantium, were opposed to the iconoclastic religious policies of the Eastern emperors. Moreover, under the protection of Charles, Pope Adrian sought to erect an autonomous domain over central Italy, the more so as the Byzantines, abandoning for all practical purposes Rome and Ravenna, were asserting their rule only in Sicily and the southernmost edge of Italy. The papacy's desire for independence found a significant expression in the Donation of Constantine, a forgery dating probably from the first few years of Adrian's reign and purporting to legitimize these papal aims in the name of the first Christian emperor, Constantine I the Great. Charles paid a second visit to Rome in 781, when he had the Pope crown his young sons Pepin and Louis as kings of the Lombards and Aquitanians and gained de facto recognition of his Italian
position from the Byzantine empress Irene, the mother of Constantine VI. The entente that existed between Charles and Byzantium came to an end after a Frankish attack on southern Italy in 787.

Emperor of the West.

In the end, local Roman conflicts brought about the clarification of the city's constitutional position. In May 799, Pope Leo III was waylaid in Rome by personal enemies. He took refuge at the court of Charles, who had him conducted back to the city and who in November 800 came to Rome himself, where he was received with imperial honours. Before Charles and a synod, Pope Leo cleared himself under oath of the charges made by his enemies. During Christmas mass in St.Peter's, the Romans acclaimed Charles emperor, whereupon the Pope crowned and perhaps anointed him.

The imperial title was by nature a Roman dignity. While the acclamation represented the juridically conclusive act, it was the coronation at the hands of the Pope that, though of no constitutional importance, was to acquire for the Franks great significance. The Pope had been determined to make Charles emperor, deciding to a large extent the outward form; yet Charles was surely not
surprised by these events. His famous statement quoted by one of his favourites, the Frankish historian Einhard, that he would not have set foot in church that Christmas if he had known the Pope's intention, implies a criticism of the ceremony initiated by the Pope, as well as a formal expression of

humility. The crowning had been preceded by negotiations. While Charles's imperial
rank was legally substantiated by the fact of his dominion over the western part of the old Roman Empire, the desire to counteract the petticoat rule of the empress Irene (who had dethroned and blinded her son in 797) also played a role. Residing in Rome four months and pronouncing sentence on the Pope's enemies as rebels guilty of lese majesty, Charles grasped the imperial reins with a firm hand. Likewise, after his return to Aachen (Aix-la-Chapelle), he promulgated laws in full consciousness of his rank as emperor.

Byzantium braced itself for the usurper's attack, but Charles merely wished to see his new rank and his dominion over Rome recognized in negotiations; he gained his point in 812 when the emperor Michael I acknowledged him as emperor, though not as emperor of the Romans. While the imperial title did not bring Charles any additional powers, his control of Rome was now legitimized, and the estrangement of the papacy from Byzantium and its rapprochement with the Franks, a major historical event that had been initiated in 754, was rendered incontrovertible. A significant result of this development was the tradition to which Charles's assumption of the imperial title and function gave rise: all medieval concepts of empire and all the bonds between the constitutional traditions of the Franks and the later Holy Roman Empire with the Roman Empire
founded by Augustus were based on the precedent of Charles's imperial title and position.

Court and administration.

The creation of the empire was chiefly legitimized by Charles's efforts to raise its cultural level internally. When Charles came to power, the Frankish kingdom's cultural, administrative, and legal institutions were still relatively undeveloped. The Frankish king, for example, possessed no permanent residence. In the summer months he travelled about, deciding political issues and dispensing justice in assemblies of spiritual and temporal lords; above all, summer was the season for military campaigns. During the winter, from Christmas to Easter and sometimes longer, the king lived and held court at one of the imperial palaces. Charles especially favoured those situated in the Frankish heartland: only rarely did he spend the winter in one of the newly won territories, in encampment in Saxony, in Ratisbon, or in Rome. Not until 794 did Aachen, which the aging
monarch liked because of its warm springs, become the court's abode, indeed almost a residence, during every winter and often even in summer. Here Charles built, partially with materials imported from Rome and Ravenna, the court church that is still standing, as well as the palace whose walls were incorporated into the 14th-century city hall.

Charles's court consisted of his family, of the clergy in his personal service, who were called the king's capella, and of temporal officials, among them the count palatine, the seneschal, and the master of the royal household. These men were occasionally joined, on an informal basis, by other spiritual or temporal men of rank who spent some time in the ruler's presence. For Charles had the

ambition to make his court the intellectual, as well as the political and administrative, centre of the realm and accordingly summoned prominent scholars from all parts of the empire and even from abroad. Among these the most important were Einhard and Alcuin.

With the help of these and other literary men, Charles established a court library containing the works of the Church Fathers and those of ancient authors, and he founded a court academy for the education of young Frankish knights. Last but not least, he himself took part with his family and the learned and lay members of his entourage in a cultivated social life that afforded him entertainment no less than instruction. His mother tongue was an Old High German idiom, besides
which he presumably understood the Old French dialect spoken by many Franks; as a grown man, he also learned Latin and some Greek, had historical and theological writings, including St. Augustine's City of God, read aloud to him, and acquired a rudimentary knowledge of mathematics and astronomy.

The court's cultural interests, however, extended beyond the intellectual gratification of a small circle, such as the exchange of verses and letters. Efforts were also made to raise the level of religious observance, morality, and the process of justice throughout the empire. The clearest and most famous instance of this was the Epistula de litteris colendis, dating presumably from 784 to
785 and compiled in Charles's name by Alcuin. Its main argument lies in the assertion that the right faith--indeed, every right thought--must be clothed in the appropriate form and language, lest it be falsified; hence, the prescription of intensive study of Latin language and literature for all monastic and cathedral schools. The spiritual and literary movement called the " Carolingian renaissance" had many centres, especially in the empire's monasteries; but it cannot be evaluated without reference to Charles's court and to his endeavour to call on the best minds of the whole world, setting them to work in the education of the clergy and, in the final instance, of the whole people. The court's theological knowledge and intellectual self-confidence are reflected in the Libri Carolini, a comprehensive treatise written about 791 in Charles's name and directed against
the Council of Nicaea (787), at which Greeks and papal plenipotentiaries had countenanced the practice of iconolatry; at the same time, the Libri Carolini did not spare the iconoclasts.

Through this court, Charles ruled and administered his empire and dispensed justice. Once or twice a year at least, the court and the chief magistrates and nobles from all parts of the empire joined in a general assembly held either in the Frankish heartland or in one of the conquered territories. It is indicative of the unique structure of the Carolingian Empire that one cannot draw clear distinctions between an assembly of the armed forces, a constitutional assembly of the
nobility, and a church synod: juridical, military, and ecclesiastical affairs were invariably discussed at one and the same time by the representatives of the nobility and the clergy. Above them all towered the figure of Charlemagne.

On the local level the ruler was represented in every region by counts and bishops. Liaison between these personages and the court was maintained through royal messengers who travelled about at Charles's command, usually in pairs made up of a civil servant and a clerical dignitary. Royal commands did not have to be written out, although Charles's decrees (capitularies) increasingly came to be recorded in writing, at first rather imprecisely, in the last two decades of his reign; the forms coined by the "renaissance" gained ground only with time. Charles respected the traditional rights of the various peoples and tribes under his dominion as a matter of principle, and, after he became emperor, he had many of them recorded. The capitularies served partly as complements to tribal laws, partly as regulations applying to the most disparate aspects of public and private life, and in part also as specific instructions issued to royal messengers, counts, bishops, and others. Punitive decrees against highwaymen, dispositions concerning military levies, orders for the people to take an oath of allegiance to the emperor or to teach all Christians to recite the Lord's Prayer, are found intermingled in the capitularies with jurisdictional dispositions and regulations about the internal organization of monasteries; temporal and spiritual problems are rarely treated separately. Taken as a whole, the legal documents of Charles's reign bear witness to a great concern, born of profound moral and religious convictions, with the administration of justice and with public enlightenment, but they also show discrepancies between the ideal and reality.

Limitations of his rule.

Charles's organization of the empire was, however, not without its defects and limitations. The sovereign's power was restricted only by theoretical principles of law and custom, not by institutions or countervailing forces. Significantly, the records report little about opposition movements and conspiracies, which, in fact, did exist. A rebellion that Thuringian counts launched against Charles in 786 can perhaps be explained as ethnic opposition to the centralism of the Franks. More ominous was an aristocratic conspiracy that in 792 attempted to place on the throne the hunchback Pepin, Charles's only son from his first marriage, which was later declared invalid; yet here, too, the political concepts and motives remain unknown. These events and, more clearly still, the history of the empire under Charles's successor, Louis, show the extent to which the political system had been designed for one person on whose outstanding abilities everything depended and with whose disappearance it threatened to collapse. Their self-confidence enhanced by Charles's educational policy, the clergy could not accept for all time his theocracy without opposing it with their own political and religious principles. The temporal nobility that had built the empire with the Carolingians could be firmly tied to the dynasty only as long as new conquests held out the prospect of new spoils and fiefs; if these failed to materialize, there remained only the care of one's properties in the different regions and the hope of gaining advantages from party strife. External expansion, however, could not advance substantially beyond the borders reached by 800; in fact, economic and technical resources were insufficient to hold together and administer what

had already been won and to defend it against foreign enemies. Charles's empire lacked the means by which the Romans had preserved theirs: a money economy, a paid civil service, a standing army, a properly maintained network of roads and communications, a navy for coastal defense. Already in Charles's lifetime, the coasts were being threatened by the Normans. In 806 Charles planned a division of the empire between his sons, but after the death of the elder two he crowned Louis of Aquitaine his coemperor and sole successor at Aachen in 813. It was only a few months later that Charles himself died there on January 28, 814.

Personality and influence.

Charlemagne's posthumous fame shone the more brightly as the following generations were unable to preserve the empire's internal peace, its unity, and its international position. Even after the Carolingian dynasty had become extinct, political tradition in the East Frankish (German) kingdom and empire, as well as in the West Frankish (French) kingdom, drew sustenance from the example
set by Charlemagne. Under Otto I, Aachen became the city in which the rulers of Germany were crowned, and, at Frederick I Barbarossa's request, the antipope Paschal III canonized Charlemagne in 1165. In France the Capetians, beginning with Philip II Augustus, revived the traditions that had grown up around Charlemagne. The controversial question whether the Germans or the French were the true successors of Charlemagne was kept alive through the Middle Ages and into modern times. Napoleon called himself Charlemagne's successor; after the end of World War II, discussions of a united, Christian, "occidental" Europe invoked his model. Hand in hand with these political traditions went those in popular legend and poetry, culminating in the Roland epics. Nor did Charlemagne's fame stop at the boundaries of what was once his empire; some Slavic languages derived their term for "king" from his name (Czech kril, Polish król, etc.).

Charles left no biographical document; his personality can be constructed only from his deeds and the reports left by contemporaries. This is how Einhard, who lived at the court from about 795 on, described Charlemagne's character and appearance in his famous Vita Karoli Magni: "He had a broad and strong body of unusual height, but well-proportioned; for his height measured seven times his feet. His skull was round, the eyes were lively and rather large, the nose of more than average length, the hair gray but full, the face friendly and cheerful. Seated or standing, he thus made a dignified and stately impression even though he had a thick, short neck and a belly that protruded somewhat; but this was hidden by the good proportions of the rest of his figure. He strode with firm step and held himself like a man; he spoke with a higher voice than one would have expected of someone of his build. He enjoyed good health except for being repeatedly
plagued by fevers four years before his death. Toward the end he dragged one foot."

The strength of Charlemagne's personality was evidently rooted in the unbroken conviction of being at one with the divine will. Without inward contradiction, he

was able to combine personal piety with enjoyment of life, a religious sense of mission with a strong will to power, rough manners with a striving for intellectual growth, and intransigence against his enemies with rectitude. In his politically conditioned religiosity, the empire and the church grew into an institutional and spiritual unit. Although his empire survived him by only one generation, it contributed decisively to the eventual reconstitution, in the mind of a western Europe fragmented since the end of the Roman Empire, of a common intellectual, religious, and political inheritance on which later centuries could draw. Charlemagne did not create this inheritance single-handedly, but one would be hard put to imagine it without him. One of the poets at his court called him rex pater Europae--"King father of Europe." In truth, there is no other man who similarly left his mark on European history during the centuries of the Middle Ages.

Notes for Louis II, Of Germany:
Louis II, byname LOUIS THE GERMAN, German LUDWIG DER DEUTSCHE (b. c. 804, Aquitaine?, Fr.--d. Aug. 28, 876, Frankfurt), king of the East Franks, who ruled lands from which the German state later evolved.

The third son of the Carolingian emperor Louis I the Pious, Louis the German was assigned Bavaria at the partition of the empire in 817. Entrusted with the government of Bavaria in 825, he began his rule the following year. Louis took part in the revolts against his father (830-833) and joined his half-brother, Charles the Bald,

in opposing the claim of his brother, Lothair I, to imperial suzerainty over the whole empire after their father's death in 840. By the Treaty of Verdun (August 843), Charles, Lothair I, and Louis divided the western, middle, and eastern parts of the empire, respectively, between them. Louis received the territory of the Franconians, the Swabians, the Bavarians, and the Saxons, together with the Carolingian provinces to the east.

In 853 a group of nobles opposing Charles the Bald, then king of the West Franks, appealed to Louis for help; in 854 Louis sent his son Louis the Younger to Aquitaine, and in 858 went west himself to try to depose Charles; both expeditions failed. At the Peace of Coblenz (860) Louis renounced his claims to Charles's dominions.

When Lothair I died in 855, his lands were divided among his sons, one of whom, Lothair, received Lotharingia (Greater Lorraine). This Lothair had no legitimate children, and Louis the German and Charles the Bald agreed (865 and 867/868) on the partition of their nephew's dominions between themselves on his death. When Lothair died (869), however, Charles broke the agreements by annexing Lotharingia. Louis invaded Lotharingia (870), and the country was
divided between Louis and Charles by the Treaty of Mersen (Meerssen), under which Louis received Friesland and an extremely large expansion of this territory west of the Rhine.

Louis in 865 and 872 divided his territories between his sons Carloman, Louis the Younger, and Charles III the Fat. Quarrels and discontent at the partitions led to revolts by one or another of the sons between 861 and 873.

Although Louis the German supported Frankish Catholic missions in Moravia, he could not maintain control in that area and lost a war that led to the founding of Greater Moravia, independent after 874.

Louis the German unsuccessfully sought the imperial dignity and the succession in Italy for his line after the death of Lothair I's son, the emperor Louis II; but though Louis II declared (874) in favour of Carloman, eldest son of Louis the German, as the next emperor (August 875), Charles the Bald had himself crowned by Pope John VIII after Louis II's death in August 875. Meanwhile, Louis the German unsuccessfully attempted to invade Charles's possessions in
Lotharingia. At the time of his death, Louis the German was again preparing for war against Charles.

Notes for Lotario I, Emperador de Occidente:
Lothair I (b. 795--d. Sept. 29, 855, Abbey of Prüm, Ger.), Frankish emperor whose attempt to gain sole rule over the Frankish territories was checked by his brothers.

The eldest son of the emperor Louis I the Pious and a grandson of Charlemagne, Lothair was made King in Bavaria after Louis succeeded Charlemagne in 814, and in 817 he was made joint emperor. Under the Ordinatio imperii, a decree issued by Louis in 817 to provide for the unity of the empire after his death, Lothair's younger brothers, Pepin and Louis (later called the German), were to receive their own kingdoms, Aquitaine and Bavaria, but were to remain
under the general suzerainty of Lothair.

Ruler in Italy from 822, Lothair was crowned emperor by Pope Paschal I in 823. He issued the Constitutio Romana (824), affirming imperial sovereignty over Rome and demanding an oath of fealty from the pope. When in 829 Louis I, under the influence of his second wife, Judith, revised the Ordinatio imperii to grant part of the empire previously granted to Lothair to his son by Judith, Charles (later called the Bald), Lothair broke with the imperial government. A palace revolution forced his reappointment as co-emperor in 830, but he was again deposed shortly afterward.

In 833 discontent with the rule of Louis the Pious ended in a revolt of the three elder sons, led by Lothair, and Lothair replaced the deposed Louis. Louis was restored to power the following year, however, and Lothair's rule was restricted to Italy.

When Pepin died in December 838, Louis I drew up a new partition scheme, dividing the empire, aside from Bavaria and neighbouring areas, which were left to Louis the German, between Lothair and Charles the Bald, with Lothair taking the eastern portion. Lothair was to have the title of emperor, but without the suzerainty over the other princes that had been granted by the Ordinatio imperii of 817.

On Louis I's death (840), Lothair again claimed his rights under the Ordinatio of 817, but his brothers, Louis the German and Charles the Bald, defeated him at the Battle of Fontenoy (841). The Treaty of Verdun (August 843) left Lothair the Middle Realm of the Frankish dominions, from the North Sea to Italy, while Louis received the eastern and Charles the western territory. The imperial title fell to Lothair.

After granting the government of Italy to his eldest son, Louis II, as early as 844, Lothair partitioned his realm between Louis (emperor from 850) and his two other sons, Lothair and Charles, in 855. Then he abdicated and became a monk.

**167781205. Eudocia Ingerina,** born Abt. 842.

Notes for Miguel III el Amoriano (Emperador Bizantino):
Miguel lll. 842-867. Emperador bizantino. Su reinado se caracterizó por constantes guerras con los bslgaros y los rusos y por los enfrentamientos bélicos con los musulmanes.

Michael III, byname MICHAEL THE AMORIAN, or THE DRUNKARD (b. 838, Constantinople--d. Sept. 23, 867, Constantinople), Byzantine emperor--last of the Amorian, or Phrygian, dynasty--whose reign was marked by the restoration of the use of icons in the Byzantine Church, and by successful campaigns against the Arabs and Slavs.

Michael became a child emperor (Jan. 20, 842) upon the death of his father, Theophilus. A council of regency was set up, in which the dowager empress, Theodora, and her chief minister, Theoctistus, were the leading figures. The following year the use of icons was restored but with a conciliatory ecclesiastical policy toward the Iconoclasts. Also beginning in 843, campaigns undertaken against the Slavs in Greece and against the Arabs in Asia Minor, the Aegean, and the Nile Delta met with some success.

After a quarrel with his mother, Michael connived at the murder of Theoctistus by his maternal uncle Bardas (November 855) and in March 856, with the help of Bardas, took over direct control of the government. When Theodora attempted to resume power, she and her daughters were relegated to a convent.

Bardas became the moving spirit in the new regime. A university was organized in Constantinople. Patriarch Ignatius, who had supported Theodora, was pressured into resigning (858); his followers, however, appealed to the Pope, who ordered his reinstatement (863). Because Michael refused to depose the new patriarch, Photius, a schism with Rome resulted.

Byzantine forces continued to win victories over the Arabs, and in the campaign of 859, which reached at least as far as the Euphrates River, Michael himself led the troops. On another campaign in 860, Michael was forced to return to Constantinople, which had come under Russian siege. The invaders, however, probably withdrew before the Emperor returned with his army. About this time Michael fell increasingly under the influence of his chamberlain, Basil the Macedonian, who poisoned the Emperor's mind against Bardas. Thus, Michael acquiesced in the murder (April 865) of Bardas by Basil. In May 866 he made Basil co-emperor. In the following year Basil had Michael assassinated and became emperor.

Although Michael was unstable and extremely cruel, many modern historians believe he was not so incompetent or so dissolute as the epithet "the Drunkard" would imply. This more modern view is supported to some extent by his record of victories over the Arabs. His faults were probably exaggerated by Byzantine historians who sought to find extenuating circumstances for the murder of Michael by Basil and his supporters.

Notes for Charlemagne, Emp. Of The West:
CARLOMAGNO

Introduction

Charlemagne (Carolus Magnus, Charles the Great) as king of the Franks (768-814) conquered the Lombard kingdom in Italy, subdued the Saxons, annexed Bavaria to his kingdom, fought campaigns in Spain and Hungary, and, with the exception of the Kingdom of Asturias in Spain, southern Italy, and the British Isles, united in one superstate practically all the Christian lands of western Europe. In 800 he assumed the title of emperor. (He is reckoned as Charles I of the Holy Roman Empire, as well as Charles I of France.) Besides expanding its political power, he also brought about a cultural renaissance in his empire. Although this imperium survived its founder by only one generation, the medieval kingdoms of France and Germany derived all their constitutional traditions from Charles's monarchy. Throughout medieval Europe, the person of
Charles was considered the prototype of a Christian king and emperor.

Early years.

Charles was born probably in 742 (on April 2), the elder son of Pepin III, also called Pepin the Short. Pepin and his older brother, Carloman, had just jointly assumed the government of the Frankish kingdom as maior domus, or "mayor of the palace." The dynasty, later called Carolingian after Charlemagne, had originated in the Meuse-Moselle region on the borders of modern France, Germany, Belgium, and The Netherlands. In the course of a few generations, it
had, as mayors of the palace to the Merovingians, gained control of the entire Frankish kingdom. Charlemagne's grandfather, Charles Martel, reconstituted a realm that had been on the point of breaking up, and, without infringing on the royal prerogatives of the otherwise powerless Merovingians, he had in effect bequeathed the empire to his sons, Pepin and Carloman, like a family inheritance.

Charles grew to manhood while his father was engaged in acquiring sole sovereignty and the kingship. On Carloman's retirement to a monastery, Pepin eliminated the latter's sons from the government. Having thus prepared the way, he had himself proclaimed king in 751, after dethroning the Merovingians. An oracular response by Pope Zacharias furnished the ecclesiastical approbation for thus shunting aside the former reigning house, which had been held sacred.
Zacharias' successor, Stephen II, arrived in the Frankish kingdom during the winter of 753-754, in order to seek help

against the Lombards who were attacking Rome. As the reigning monarch's oldest son, Charles, then about 12 years of age, travelled ahead to welcome the Pope, who anointed him king, along with his father and his brother Carloman, thus sanctioning the new dynasty. The political alliance between the Franks and the Pope against the Lombards was affirmed on the same occasion. When his father subdued Aquitaine (France south of the Loire) in a series of yearly campaigns beginning in 760, reasserting the integrity of the Frankish kingdom all the way to the Pyrenees, Charles repeatedly accompanied the army.

These youthful experiences probably contributed to the formation of Charles's character and to the formulation of his aims. He shared with his father an unbending will to power, a readiness to fight resolutely against external enemies and to increase his domains, and the determination to rule by himself even if it meant usurping the rights of close relatives. Charles early acknowledged the close connection between temporal power and the church; he had a high regard for the church and the king's duty to spread the Christian faith and, while asserting royal suzerainty over the church, considered himself accountable to God for the Christians entrusted to him.

King of the Franks.

In accordance with old Frankish custom, the kingdom was divided on Pepin's death in 768 between his two sons. It was not long, however, before a strong rivalry sprang up between the brothers: with his mother's support, Charles concluded, with the Lombard king Desiderius, whose daughter he married, and with his cousin Duke Tassilo of Bavaria, alliances directed against Carloman.

On Carloman's sudden death in 771, Charles was able to make himself sole ruler of the kingdom, unopposed by his young nephews, whose rights he ignored. When Carloman's widow with her children and a few remaining supporters had fled to the Lombard court, and King Desiderius, breaking his alliance with Charles, put pressure on the Pope to anoint Carloman's sons as Frankish kings, Charles was forced to come to the aid of Pope Adrian I. He marched on the
Lombard capital, Pavia, and after its fall made himself king of the Lombards. His brother's sons, who had fallen into his hands, disappeared. While the siege of Pavia was still in progress, Charles journeyed to Rome, where he celebrated Easter 774 with the Pope and reiterated, in St. Peter's Basilica, his father's promise to transfer to papal rule large sections of Italy. But he actually enlarged the Pope's lands only slightly, assuming for himself the sovereignty over the entire Lombard kingdom.

Charles had fought the pagan Saxons, in what is now Lower Saxony and Westphalia, in retribution for their attacks on the lower Rhine region, as early as 772, before the first Italian campaign. From 775 on, however, it was his goal to subdue the whole Saxon tribe, converting it to Christianity and integrating it into his kingdom. This aim appeared to have been realized after several campaigns culminating in declarations of allegiance by the Saxon nobility and mass
baptisms performed in 775-777. A diet held in 777 in Paderborn sealed the submission of the Saxons. Among those attending the diet had been some Arab emissaries from northern Spain who sought Charles's aid in their uprising against the Umayyad amir of Córdoba. In the summer of 778 Charles advanced into Spain and laid siege to Saragossa, without, however, being able to take the city. Retreating across the Pyrenees, the Frankish army was badly mauled by the Basques. Roland, warden of the Breton march, who died on this occasion, was later immortalized in legend and poetry.

This defeat marks the end of the first period of Charles's rule, the period of vigorous expansion. Within a decade he had become the sole ruler of the Franks, conquered the Lombard kingdom, visited Rome, subdued the Saxons, invaded Spain. Henceforth he was concerned with defending and safeguarding his quickly won gains (which were to be extended only on the right bank of the
Rhine), while consolidating the state internally and protecting cultural life and the rule of law.

Not long after Charles's defeat in Spain, the Saxons rose up once more. The war against them became the longest and most cruel war fought by the Franks. In Charles's eyes, the resistance of this people that had undergone baptism and signed a treaty of allegiance amounted to political high treason and religious apostasy. These offenses called for severe punishment, and 4,500 Saxons
were reported to have been executed en masse in 782. New outbreaks occurred after 792, and the last Saxons were not vanquished until 804. Between 772 and 804, Charles took the field against the Saxons no fewer than 18 times. In the end he carried out his aim of not only subjecting them to his rule but also incorporating them fully into his empire. Given the indissoluble tie between
temporal power and the Christian faith, this meant they had to be converted. But the violent methods by which this missionary task was carried out had been unknown to the earlier Middle Ages, and the sanguinary punishment meted out to those who broke canon law or continued to engage in pagan practices called forth criticism in Charles's own circle, for example by Alcuin, his adviser and head of his palace school.

When, in 788, Charles deposed his cousin Duke Tassilo III of Bavaria, who had acknowledged the Frankish kings as feudal lords, he in effect deprived of its independence the last of the German tribes beyond the Rhine. The Bavarians, who had long been Christians, were now directly integrated into the empire. The West Germanic tribes of the Alemanni, Bavarians, Saxons, and Thuringians thus found themselves for the first time gathered into one political unit. Charles's conquests on the right bank of the Rhine were, however, not limited to the Germanic tribes. Making Ratisbon (Regensburg), the residence of the Bavarian dukes, his base, he conducted several campaigns, partly under his own command, against the Avar kingdom (in modern Hungary and Upper Austria). The remaining Avar principalities and the newly founded Slav states of the Danubian region drifted into a loose dependence on the Franks, whose sovereignty they more or less acknowledged.

The gigantic expansion of the Frankish state, raising it far above the tribal states of the early Middle Ages, entailed qualitative as well as quantitative changes. Yet the idea of bestowing on Charles the Roman title of emperor arose only at a very late stage and out of a specific political constellation. While the Eastern, or Byzantine, Empire laid claim to universal recognition, the popes, constitutionally still subjects of Byzantium, were opposed to the iconoclastic religious policies of the Eastern emperors. Moreover, under the protection of Charles, Pope Adrian sought to erect an autonomous domain over central Italy, the more so as the Byzantines, abandoning for all practical purposes Rome and Ravenna, were asserting their rule only in Sicily and the southernmost edge of Italy. The papacy's desire for independence found a significant expression in the Donation of Constantine, a forgery dating probably from the first few years of Adrian's reign and purporting to legitimize these papal aims in the name of the first Christian emperor, Constantine I the Great. Charles paid a second visit to Rome in 781, when he had the Pope crown his young sons Pepin and Louis as kings of the Lombards and Aquitanians and gained de facto recognition of his Italian position from the Byzantine empress Irene, the mother of Constantine VI. The entente that existed between Charles and Byzantium came to an end after a Frankish attack on southern Italy in 787.

Emperor of the West.

In the end, local Roman conflicts brought about the clarification of the city's constitutional position. In May 799, Pope Leo III was waylaid in Rome by personal enemies. He took refuge at the

court of Charles, who had him conducted back to the city and who in November 800 came to Rome himself, where he was received with imperial honours. Before Charles and a synod, Pope Leo cleared himself under oath of the charges made by his enemies. During Christmas mass in St.Peter's, the Romans acclaimed Charles emperor, whereupon the Pope crowned and perhaps anointed him.

The imperial title was by nature a Roman dignity. While the acclamation represented the juridically conclusive act, it was the coronation at the hands of the Pope that, though of no constitutional importance, was to acquire for the Franks great significance. The Pope had been determined to make Charles emperor, deciding to a large extent the outward form; yet Charles was surely not
surprised by these events. His famous statement quoted by one of his favourites, the Frankish historian Einhard, that he would not have set foot in church that Christmas if he had known the Pope's intention, implies a criticism of the ceremony initiated by the Pope, as well as a formal expression of humility. The crowning had been preceded by negotiations. While Charles's imperial rank was legally substantiated by the fact of his dominion over the western part of the old Roman Empire, the desire to counteract the petticoat rule of the empress Irene (who had dethroned and blinded her son in 797) also played a role. Residing in Rome four months and pronouncing sentence on the Pope's enemies as rebels guilty of lese majesty, Charles grasped the imperial reins with a firm hand. Likewise, after his return to Aachen (Aix-la-Chapelle), he promulgated laws in full consciousness of his rank as emperor.

Byzantium braced itself for the usurper's attack, but Charles merely wished to see his new rank and his dominion over Rome recognized in negotiations; he gained his point in 812 when the emperor Michael I acknowledged him as emperor, though not as emperor of the Romans. While the imperial title did not bring Charles any additional powers, his control of Rome was now legitimized, and the estrangement of the papacy from Byzantium and its rapprochement with the Franks, a major historical event that had been initiated in 754, was rendered incontrovertible. A significant result of this development was the tradition to which Charles's assumption of the imperial title and function gave rise: all medieval concepts of empire and all the bonds between the constitutional traditions of the Franks and the later Holy Roman Empire with the Roman Empire
founded by Augustus were based on the precedent of Charles's imperial title and position.

Court and administration.

The creation of the empire was chiefly legitimized by Charles's efforts to raise its cultural level internally. When Charles came to power, the Frankish kingdom's cultural, administrative, and legal institutions were still relatively undeveloped. The Frankish king, for example, possessed no permanent residence. In the summer months he travelled about, deciding political issues and dispensing justice in assemblies of spiritual and temporal lords; above all, summer was the season for military campaigns. During the winter, from Christmas to Easter and sometimes longer, the king lived and held court at one of the imperial palaces. Charles especially favoured those situated in the Frankish heartland: only rarely did he spend the winter in one of the newly won territories, in encampment in Saxony, in Ratisbon, or in Rome. Not until 794 did Aachen, which the aging monarch liked because of its warm springs, become the court's abode, indeed almost a residence, during every winter and often even in summer. Here Charles built, partially with materials imported from Rome and Ravenna, the court church that is still standing, as well as the palace whose walls were incorporated into the 14th-century city hall.

Charles's court consisted of his family, of the clergy in his personal service, who were called the king's capella, and of temporal officials, among them the count palatine, the seneschal, and the master of the royal household. These men were occasionally joined, on an informal basis, by other spiritual or temporal men of rank who spent some time in the ruler's presence. For Charles had the ambition to make his court the intellectual, as well as the political and administrative, centre of the realm and accordingly summoned prominent scholars from all parts of the empire and even from abroad. Among these the most important were Einhard and Alcuin.

With the help of these and other literary men, Charles established a court library containing the works of the Church Fathers and those of ancient authors, and he founded a court academy for the education of young Frankish knights. Last but not least, he himself took part with his family and the learned and lay members of his entourage in a cultivated social life that afforded him entertainment no less than instruction. His mother tongue was an Old High German idiom, besides which he presumably understood the Old French dialect spoken by many Franks; as a grown man, he also learned Latin and some Greek, had historical and theological writings, including St. Augustine's City of God, read aloud to him, and acquired a rudimentary knowledge of mathematics and astronomy.

The court's cultural interests, however, extended beyond the intellectual gratification of a small circle, such as the exchange of

verses and letters. Efforts were also made to raise the level of religious observance, morality, and the process of justice throughout the empire. The clearest and most famous instance of this was the Epistula de litteris colendis, dating presumably from 784 to
785 and compiled in Charles's name by Alcuin. Its main argument lies in the assertion that the right faith--indeed, every right thought--must be clothed in the appropriate form and language, lest it be falsified; hence, the prescription of intensive study of Latin language and literature for all monastic and cathedral schools. The spiritual and literary movement called the "Carolingian renaissance" had many centres, especially in the empire's monasteries; but it cannot be evaluated without reference to Charles's court and to his endeavour to call on the best minds of the whole world, setting them to work in the education of the clergy and, in the final instance, of the whole people. The court's theological knowledge and intellectual self-confidence are reflected in the Libri Carolini, a comprehensive treatise written about 791 in Charles's name and directed against the Council of Nicaea (787), at which Greeks and papal plenipotentiaries had countenanced the practice of iconolatry; at the same time, the Libri Carolini did not spare the iconoclasts.

Through this court, Charles ruled and administered his empire and dispensed justice. Once or twice a year at least, the court and the chief magistrates and nobles from all parts of the empire joined in a general assembly held either in the Frankish heartland or in one of the conquered territories. It is indicative of the unique structure of the Carolingian Empire that one cannot draw clear distinctions between an assembly of the armed forces, a constitutional assembly of the
nobility, and a church synod: juridical, military, and ecclesiastical affairs were invariably discussed at one and the same time by the representatives of the nobility and the clergy. Above them all towered the figure of Charlemagne.

On the local level the ruler was represented in every region by counts and bishops. Liaison between these personages and the court was maintained through royal messengers who travelled about at Charles's command, usually in pairs made up of a civil servant and a clerical dignitary. Royal commands did not have to be written out, although Charles's decrees (capitularies) increasingly came to be recorded in writing, at first rather imprecisely, in the last two decades of his reign; the forms coined by the "renaissance" gained ground only with time. Charles respected the traditional rights of the various peoples and tribes under his dominion as a matter of principle, and, after he became emperor, he had many of them recorded. The capitularies served partly as complements to tribal laws, partly as regulations applying to the most disparate aspects of public

and private life, and in part also as specific instructions issued to royal messengers, counts, bishops, and others. Punitive decrees against highwaymen, dispositions concerning military levies, orders for the people to take an oath of allegiance to the emperor or to teach all Christians to recite the Lord's Prayer, are found intermingled in the capitularies with jurisdictional dispositions and regulations about the internal organization of monasteries; temporal and spiritual problems are rarely treated separately. Taken as a whole, the legal documents of Charles's reign bear witness to a great concern, born of profound moral and religious convictions, with the administration of justice and with public enlightenment, but they also show discrepancies between the ideal and reality.

Limitations of his rule.

Charles's organization of the empire was, however, not without its defects and limitations. The sovereign's power was restricted only by theoretical principles of law and custom, not by institutions or countervailing forces. Significantly, the records report little about opposition movements and conspiracies, which, in fact, did exist. A rebellion that Thuringian counts launched against Charles in 786 can perhaps be explained as ethnic opposition to the centralism of the Franks. More ominous was an aristocratic conspiracy that in 792 attempted to place on the throne the hunchback Pepin, Charles's only son from his first marriage, which was later declared invalid; yet here, too, the political concepts and motives remain unknown. These events and, more clearly still, the history of the empire under Charles's successor, Louis, show the extent to which the political system had been designed for one person on whose outstanding abilities everything depended and with whose disappearance it threatened to collapse. Their self-confidence enhanced by Charles's educational policy, the clergy could not accept for all time his theocracy without opposing it with their own political and religious principles. The temporal nobility that had built the empire with the Carolingians could be firmly tied to the dynasty only as long as new conquests held out the prospect of new spoils and fiefs; if these failed to materialize, there remained only the care of one's properties in the different regions and the hope of gaining advantages from party strife. External expansion, however, could not advance substantially beyond the borders reached by 800; in fact, economic and technical resources were insufficient to hold together and administer what had already been won and to defend it against foreign enemies. Charles's empire lacked the means by which the Romans had preserved theirs: a money economy, a paid civil service, a standing army, a properly maintained network of roads and communications, a navy for coastal defense. Already in Charles's

lifetime, the coasts were being threatened by the Normans. In 806 Charles
planned a division of the empire between his sons, but after the death of the elder two he crowned Louis of Aquitaine his coemperor and sole successor at Aachen in 813. It was only a few months later that Charles himself died there on January 28, 814.

Personality and influence.

Charlemagne's posthumous fame shone the more brightly as the following generations were unable to preserve the empire's internal peace, its unity, and its international position. Even after the Carolingian dynasty had become extinct, political tradition in the East Frankish (German) kingdom and empire, as well as in the West Frankish (French) kingdom, drew sustenance from the example
set by Charlemagne. Under Otto I, Aachen became the city in which the rulers of Germany were crowned, and, at Frederick I Barbarossa's request, the antipope Paschal III canonized Charlemagne in 1165. In France the Capetians, beginning with Philip II Augustus, revived the traditions that had grown up around Charlemagne. The controversial question whether the Germans or the French were the true successors of Charlemagne was kept alive through the
Middle Ages and into modern times. Napoleon called himself Charlemagne's successor; after the end of World War II, discussions of a united, Christian, "occidental" Europe invoked his model. Hand in hand with these political traditions went those in popular legend and poetry, culminating in the Roland epics. Nor did Charlemagne's fame stop at the boundaries of what was once his
empire; some Slavic languages derived their term for "king" from his name (Czech král, Polish król, etc.).

Charles left no biographical document; his personality can be constructed only from his deeds and the reports left by contemporaries. This is how Einhard, who lived at the court from about 795 on, described Charlemagne's character and appearance in his famous Vita Karoli Magni: "He had a broad and strong body of unusual height, but well-proportioned; for his height measured seven times his feet. His skull was round, the eyes were lively and rather large, the nose of more than average length, the hair gray but full, the face friendly and cheerful. Seated or standing, he thus made a dignified and stately impression even though he had a thick, short neck and a belly that protruded somewhat; but this was hidden by the good proportions of the rest of his figure. He strode with firm step and held himself like a man; he spoke with a higher voice than one

would have expected of someone of his build. He enjoyed good health except for being repeatedly
plagued by fevers four years before his death. Toward the end he dragged one foot."

The strength of Charlemagne's personality was evidently rooted in the unbroken conviction of being at one with the divine will. Without inward contradiction, he was able to combine personal piety with enjoyment of life, a religious sense of mission with a strong will to power, rough manners with a striving for intellectual growth, and intransigence against his enemies with rectitude. In his politically conditioned religiosity, the empire and the church grew into an institutional and spiritual unit. Although his empire survived him by only one generation, it contributed decisively to the eventual reconstitution, in the mind of a western Europe fragmented since the end of the Roman Empire, of a common intellectual, religious, and political inheritance on which later centuries could draw. Charlemagne did not create this inheritance single-handedly, but one would be hard put to imagine it without him. One of the poets at his court called him rex pater Europae--"King father of Europe." In truth, there is no other man who similarly left his mark on European history during the centuries of the Middle Ages.

Notes for Gui II, Duke Of Spoleto, King Of Italy:
Guy II, byname GUY OF SPOLETO, Italian GUIDO DI SPOLETO, French GUI DE SPOLCTE (d. 894), duke of Spoleto, who was claimant to the throne of the Holy Roman Empire in the chaotic end of the Carolingian era.

The son of Guy I, duke of Spoleto, he failed in his bid for the throne of the West Franks in 888, despite the support of Archbishop Fulk of Reims. He was successful, however, in defeating Berengar, king of Italy (889), and in forcing the pope to crown him Holy Roman emperor in 891. He is usually not counted in the lists of emperors.

Notes for I Constantine, King Of Scotland:
Constantine I (d. 877, Inverdovat, Scot.), king of Scotland or Alba, the united kingdom of the Picts and Scots (862-877), who succeeded his uncle Donald I.

Constantine's reign was occupied with conflicts with the Norsemen. Olaf the White, the Danish king of Dublin, laid waste the country of the Picts and Britons year after year; in the south the Danish leader Halfdan devastated Northumberland and Galloway. Constantine was slain at a battle at Inverdovat in Fife, at the hands of another band of northern marauders. His heir was his brother Aed, who was killed by the Scots after a year and was succeeded by a nephew, Eochaid.

Notes for Otón II (Emperador Romano Germinico):
Otón II. 955-983. Emperador del Sacro Imperio Romano-Germanico.
Hijo de Otón I. Emperador de 973 a 983. Fue derrotado por los sarracenos, pero logró sacar a los franceses de la Lorena. Esposo Teófano, hija del emperador de Bizancio Romano II, la cual influyó mucho sobre el estilo de la Corte.

Otto II (b. 955--d. Dec. 7, 983, Rome), German king from 961 and Holy Roman emperor from 967, sole ruler from 973, son of Otto I and his second wife, Adelaide.

Otto continued his father's policies of promoting a strong monarchy in Germany and of extending the influence of his house in Italy. In 961 he was crowned co-regent king of Italy and Germany with his father and was made co-regent emperor in 967. On April 14, 972, he married the Byzantine princess Theophano. At his father's death in 973 he was accepted without opposition as successor,
although revolts in the duchy of Bavaria and in Lorraine occupied the early years of his reign.
Bavaria, the most independent of the duchies, rebelled in 974, under the leadership of its duke, Henry II the Quarrelsome, Otto's cousin. It was not until 978 that Bavaria was pacified, the same year that Lothair, king of France, invaded Lorraine. In 979 Otto received the submission of Bohemia and Poland, and in 980 Lothair renounced his claim to Lorraine. Having thus secured his German dominions, Otto marched into Italy in 980, where German rule had been maintained by an imperial party headed by Hugh, marquis of Tuscany. Otto invaded southern Italy and was decisively defeated there by the Arabs in 982. In 983 he summoned a diet at Verona, where his young son, Otto III, was crowned German king. Otto II died in 983 while attempting to bring Venice under imperial
control. His absence from Germany had occasioned revolts along its borders, and after his defeat in Calabria in 982 the German position east of the Elbe collapsed because of a revolt by the Danes and an invasion by the Slavs. Nonetheless, Otto left a firmly established realm to his son and successor Otto III.

BRITANICA

Otto II (955-83), Holy Roman emperor (967-83), king of Germany (961-83), the son of Otto I, with whom he ruled jointly from 967 to 973. In 976 he suppressed a rebellion that was led by his cousin Henry II, duke of Bavaria. Two years later, having been attacked by Lothair, king of France, Otto drove the French out of Lorraine but was unsuccessful in besieging Paris. Later Lothair renounced Lorraine, and peace was established. Otto next invaded southern Italy, gaining possession of Naples, Salerno, and Taranto, but he was overwhelmingly defeated by the Greeks and Saracens at Crotona in 982. He died in Rome while planning a second invasion. His wife, Theophano, brought Byzantine refinement and culture to the German court.

Notes for Teófano (Pincesa Bizantina):
Teófano, hija del emperador de Bizancio Romano II, la cual influyó mucho sobre el estilo de la Corte.

Theophano, daughter of the Byzantine emperor Romanus II, brought Byzantine refinement and culture to the German court.

Children of Otón (Emperador Romano Germinico) and Teófano (Pincesa Bizantina) are:

i. Otón III (Emperador Romano Germánico), born Julio 980 in Kessel, Alemania; died 1002.

Notes for Otón III (Emperador Romano Germánico):
Otto III (b. July 980--d. Jan. 23, 1002, near Viterbo, Italy), German king and Holy Roman emperor who planned to recreate the glory and power of the ancient Roman Empire in a universal Christian state governed from Rome, in which the pope would be subordinate to the emperor in religious as well as in secular affairs.

Son of the Holy Roman emperor Otto II and Empress Theophano, Otto III was elected German king in June 983 and crowned at Aachen in December, shortly after his father's death. But the child king was seized by Henry II the Quarrelsome, the deposed duke of Bavaria, in an attempt to secure the regency, if not the throne, for himself. In May 984, however, Henry was forced by the imperial diet to turn the child over to his mother, who served as regent until her death in 991; Otto's grandmother, the dowager empress Adelaide, assumed the regency until the King came of age in 994.

In 996, heeding an appeal by Pope John XV for help in putting down a rebellion led by the Roman noble Crescentius II, Otto crossed the Alps. Declared king of Lombardy at Pavia, he reached Rome after the Pope's death, whereupon he secured the election of his 23-year-old cousin, Bruno of Carinthia, as Gregory V, the first German pope. Gregory, who crowned Otto emperor on May 21, 996, was driven from Rome after the Emperor's return to Germany by Crescentius, who then installed John XVI as pope. The Emperor marched back into Italy in late 997; taking Rome in February 998, he executed Crescentius, deposed John, and reinstated Gregory.

Otto then proceeded to make Rome his official residence and the administrative centre of the empire. Instituting elaborate Byzantine court ceremonies and reviving ancient Roman customs, he assumed the titles "the servant of Jesus Christ," "the servant of the apostles," and "emperor of the world" and saw himself as the leader of world Christianity. When Gregory V died (999), Otto had
the Frenchman Gerbert of Aurillac, his former tutor who agreed with his concept of a theocratic emperor, installed as Pope Sylvester II.

In 1000 Otto made a pilgrimage to the tomb of the mystical archbishop Adelbert of Prague at Gniezno, which he established as the archbishopric of Poland. When in January 1001 Tibur, Italy, rebelled against Otto, he laid siege to the town, forced its surrender, and then pardoned its inhabitants. Angered by this action, the Romans, who wanted the rival town destroyed, rebelled against the Emperor (February 1001) and besieged his palace. After placating the rebels
momentarily, Otto withdrew to the monastery of St. Apollinaris, near Ravenna, to do penance. Unable to regain control of the imperial city, he requested military support from his cousin Henry of Bavaria, who was to succeed him as German king and later as emperor. Shortly before the Bavarian troops arrived at his headquarters, Otto died.

**167841312. Rurik (Emperador Ruso),** born Abt. 840; died Abt. 879. He was the son of **335682624. Halfdan Of Lethra**.

Notes for Rurik (Emperador Ruso):
Rurik, also spelled RORIK, or HROREKR, Russian RYURIK (d. c. AD 879), the semilegendary founder of the Rurik dynasty of Kievan Rus.

Rurik was a Viking, or Varangian, prince. His story is told in the Russian Primary Chronicle (compiled at the beginning of the 12th century) but is not accepted at face value by modern historians. According to the chronicle, the people of Novgorod, tired of political strife, invited the Varangians about AD 862 to establish an orderly and just government there. Hence, Rurik came with his two brothers and a large retinue (druzhina) and became ruler of the city and region of
Novgorod.

Some historians think that Rurik came from the Scandinavian peninsula or from Jutland (now in Denmark) and seized the town of Ladoga, on Lake Ladoga. After establishing a stronghold there (c. 855), he may have gone southward along the Volkhov and captured Novgorod. Another possibility is that Rurik and his army were mercenaries, hired to guard the Volkhov-Dnieper waterway, who turned against their employers.

Rurik's kinsman Oleg founded the grand principality of Kiev. Oleg's successor, Igor, believed to be Rurik's son, is considered the real founder of the Russian princely house.

Rurik DYNASTY

Princes of Kievan Rus and, later, Muscovy who, according to tradition, were descendants of the Varangian prince Rurik, who had been invited by the people of Novgorod to rule that city (c. 862); the Rurik princes maintained their control over Kievan Rus and, later, Muscovy until 1598.

Rurik's successor Oleg (d. 912) conquered Kiev (c. 882) and established control of the trade route extending from Novgorod, along the Dnieper River, to the Black Sea. Igor (allegedly Rurik's son; reigned 912-945) and his successors--his wife, St. Olga (regent 945-969), and their son Svyatoslav (reigned 945-972)--further extended their territories; Svyatoslav's son Vladimir I (St. Vladimir; reigned c. 980-1015) consolidated the dynasty's rule.

Vladimir compiled the first Kievan Rus law code and introduced Christianity into the country. He also organized the Kievan Rus lands into a cohesive confederation by distributing the major cities among his sons; the eldest was to be grand prince of Kiev, and the brothers were to succeed each other, moving up the hierarchy of cities toward Kiev, filling vacancies left by the advancement or
death of an elder brother. The youngest brother was to be succeeded as grand prince by his eldest nephew whose father had been a grand prince. This succession pattern was generally followed through the reigns of Svyatopolk (1015-19); Yaroslav the Wise (1019-54); his sons Izyaslav (1054-68; 1069-73; and 1077-78), Svyatoslav (1073-76), and Vsevolod (1078-93); and Svyatopolk II (son of Izyaslav; reigned 1093-1113).

The successions were accomplished, however, amid continual civil wars. In addition to the princes' unwillingness to adhere to the pattern and readiness to seize their positions by force instead, the system was upset whenever a city rejected the prince designated to rule it. It was also undermined by the tendency of the princes to settle in regions they ruled rather than move from city to city to become the prince of Kiev.

In 1097 all the princes of Kievan Rus met at Lyubech (northwest of Chernigov) and decided to divide their lands into patrimonial estates. The succession for grand prince, however, continued to be based on the generation pattern; thus, Vladimir Monomakh succeeded his cousin Svyatopolk II as grand prince of Kiev. During his reign (1113-25) Vladimir tried to restore unity to the lands of Kievan Rus; and his sons (Mstislav, reigned 1125-32; Yaropolk, 1132-39; Vyacheslav, 1139; and Yury Dolgoruky, 1149-57) succeeded him eventually, though not without some troubles in the 1140s.

Nevertheless, distinct branches of the dynasty established their own rule in the major centres of the country outside Kiev--Halicz, Novgorod, and Suzdal. The

princes of these regions vied with each other for control of Kiev; but when Andrew Bogolyubsky of Suzdal finally conquered and sacked the city (1169), he returned to Vladimir (a city in the Suzdal principality) and transferred the seat of the grand prince to Vladimir. Andrew Bogolyubsky's brother Vsevolod III succeeded him as grand prince of Vladimir (reigned 1176-1212); Vsevolod was followed by his sons Yury (1212-38), Yaroslav (1238-46), and Svyatoslav (1246-47) and his grandson Andrew (1247-52).

Alexander Nevsky (1252-63) succeeded his brother Andrew; and Alexander's brothers and sons succeeded him. Furthering the tendency toward fragmentation, however, none moved to Vladimir but remained in their regional seats and secured their local princely houses. Thus, Alexander's brother Yaroslav (grand prince of Vladimir, 1264-71) founded the house of Tver, and Alexander's son Daniel founded the house of Moscow.

After the Mongol invasion (1240) the Russian princes were obliged to seek a patent from the Mongol khan in order to rule as grand prince. Rivalry for the patent, as well as for leadership in the grand principality of Vladimir, developed among the princely houses, particularly those of Tver and Moscow. Gradually, the princes of Moscow became dominant, forming the grand principality of Moscow (Muscovy), which they ruled until their male line died out in 1598.

The House of Rurik

The political organization of the Eastern Slavs was still largely tribal; they had created no unified system through which their constant tribal conflicts could be resolved. According to Russian tradition recorded in the Primary Russian Chronicle, the chief source of much of early Russian history, internal dissension and feuds among the Eastern Slavs around Novgorod became so violent that they voluntarily chose to call upon a foreign prince who could unite them into one strong state. Their choice was Rurik, or Ryurik, a Scandinavian chief, who in 862 became ruler of Novgorod. Two other Scandinavians, Dir and Askold, possibly legendary figures, gained control of Kyyiv. Thus, 862 is considered the beginning of the Russian Empire. From the Scandinavians, called Varangians, or Rus, came the name Rossiya, or Russia, meaning "land of the Rus." (It is debated, however, whether Rus is derived from ruotsi, the Finnish name for the Swedes, or from Rukhs-As, from the name of an Alanic tribe of southern Russia.) The establishment of Rurik and the dynasty he founded initiated a period of internal consolidation, expansion of Slav territory, and the spread of the Slavic people, notably toward the northeast and northwest, where the native Finnic strains were largely absorbed or replaced by Slavs.

Notes for Oleg, Varangian Prince Of Kiev:
Oleg (d. c. 912), semilegendary Viking (Varangian) leader who became prince of Kiev and is considered to be the founder of the Kievan Rus state.

According to The Russian Primary Chronicle of the 12th century, Oleg, after succeeding his kinsman Rurik as ruler of Novgorod (c. 879), went down the Dnieper River with his Varangian retinue and seized control of Smolensk and Kiev (882), which he subsequently made his capital. Extending his authority east and west of the Volkhov-Dnieper waterway, he united the local Slavic and Finnish tribes under his rule and became the undisputed ruler of the Kievan-Novgorodian
state.

Described in the chronicle as a skilled warrior, Oleg defeated the Khazars, delivering several Slavic tribes from dependence upon them, and also undertook a successful expedition against Constantinople (907), forcing the Byzantine government to sue for peace and pay a large indemnity. In 911 Oleg also concluded an advantageous trade agreement with Constantinople, which regulated commercial relations between the two states and laid the basis for the development of permanent and lucrative trade activities between Constantinople and Kievan Rus.

Romanus I LECAPENUS (b. c. 872--d. 948), Byzantine emperor who shared the imperial throne with his son-in-law Constantine VII and exercised all real power from 920 to 944. Romanus was admiral of the Byzantine fleet on the Danube when, hearing of the defeat of the army at Achelous (917), he resolved to sail for Constantinople. Soon after the marriage of his daughter Helena to Constantine he
was crowned colleague of his son-in-law. His reign was terminated by his own sons, Stephen and Constantine, who in 944 compelled him to become a monk.

Notes for Kakig I Of Armenia:
Under his son GAGIK I (990-1020) prosperity reached its height: schools were numerous, towns were enriched by trade and adorned by art; and Kars rivaled Ani as a center of literature, theology, and philosophy. Ani had impressive palaces and a precious cathedral, subtly compounded of Persian and Byzantine styles; here were piers and column clusters pointed as well as round arches, anmd other features that later entered into Gothic art. When, in 989, the cupule of St, Sophia in Costantinople was destroyed by an earthquake, the Byzantine emperor assigned the hazardous task of restoring it to Trdat, the architect of the Ani cathedral.

Notes for AbderraminII, Emir de Córdoba:

'Abd ar-Rahman II, fourth Umayyad ruler of Muslim Spain who enjoyed a reign (822-852) of brilliance and prosperity, the importance of which has been underestimated by some historians.

'Abd ar-Rahman II was the grandson of his namesake, founder of the Umayyad dynasty in Spain. His reign was an administrative watershed. As the influence of the 'Abba sid Caliphate, then at the peak of its splendour, grew, Córdoba's administrative system increasingly came into accord with that of Baghdad, the 'Abbasid capital. 'Abd ar-Rahman carried out a vigorous policy of public works, made additions to the Great Mosque in Córdoba, and patronized poets, musicians, and men of religion. Although palace intrigues surrounded his death in 852, they did not diminish his accomplishments.

Notes for Pepin III, King Of Franks(751-768):
Pepin III, byname PEPIN THE SHORT, French PÉPIN LE BREF, German PIPPIN DER KURZE (b. c. 714--d. Sept. 24, 768, Saint-Denis, Neustria [now in France]), the first king of the Frankish Carolingian dynasty and the father of Charlemagne. A son of Charles Martel, Pepin became sole de facto ruler of the Franks in 747 and then, on the deposition of Childeric III in 751, king of the Franks. He was the first Frankish king to be anointed--first by St. Boniface and later (754) by Pope
Stephen II.

Background and kingship.

For years the Merovingian kings had been unable to prevent power from slipping from their hands into those of the counts and other magnates. The kings were gradually eclipsed by the mayors of the palace, whose status developed from that of officer of the household to regent or viceroy. Among the mayors, a rich family descended from Pepin of Landen (Pepin I) held a position of especial importance. When Charles Martel, the scion of that family, died in 741, he left two sons: the elder, Carloman, mayor of Austrasia, Alemannia, and Thuringia, and Pepin III, mayor of Neustria, Burgundy, and Provence. No king had ruled over all the Franks since 737, but to maintain the fiction of Merovingian sovereignty, the two mayors gave the crown to Childeric III in 743.

Charles had had a third son, however-- Grifo, who had been born to him by a Bavarian woman of high rank, probably his mistress. In 741, when his two brothers were declared mayors of the Franks, Grifo rebelled. He led a number of revolts in subsequent years and was several times imprisoned. In 753 he was killed amid the Alpine passes on his way to join the Lombards, at this time enemies of the Franks as well as of the papacy.

Numerous other rebellions broke out. In 742 men of the Aquitaine and Alemannia were in revolt; in 743 Odilo, duke of Bavaria, led his men into battle; in 744 the Saxons rebelled, in 745 Aquitaine, and in 746 Alemannia, both the latter for the second time.

In 747, when Carloman decided to enter monastic life at Rome, a step he had been considering for years, Pepin became sole ruler of the Franks. But Pepin was ambitious to govern his people as king, not merely as mayor. Like his father, he had courage and resolution; unlike his father, he had a strong desire to unite the papacy with the Frankish realm. In 750 he sent two envoys to Pope Zacharias with a letter asking: "Is it wise to have kings who hold no power of control?" The pope answered: "It is better to have a king able to govern. By apostolic authority I bid that you be crowned King of the Franks." Childeric III

was deposed and sent to a monastery, and Pepin was anointed as king at Soissons in November 751 by Archbishop Boniface and other prelates.

Pepin and Pope Stephen II.

The pope was in need of aid. Aistulf, king of the Lombards, had seized Ravenna with its lands, known as the exarchate. Soon, Lombard troops marched south, surrounded Rome, and prepared to lay siege to its walls. So matters stood when in 752 Zacharias died and Stephen II became pope. In November 753 Pope Stephen made his way over the stormy mountain passes to Frankish territory. He remained in France until the summer of 754, staying at the abbey of
Saint-Denis, Paris. There he himself anointed Pepin and his sons, Charles and Carloman, as king and heirs of the crown.

The pope returned to Italy accompanied by Pepin and his army. A fierce battle was fought in the Alps against Aistulf and the Lombards. The Lombard king fled back to his capital, Pavia; Pepin and his men plundered the land around Pavia until Aistulf promised to restore to papal possession Ravenna and all the Roman properties claimed by the pope.

Aistulf broke his word. Again and again Pope Stephen wrote to Pepin of his difficulties. In 756 the Frankish king once more entered Italy. Aistulf was once more constrained to make promises, but the same year he died--of a fall from his horse--and in April 757 a new king, Desiderius, became ruler of the Lombards. That year Stephen II also died, and Paul I was elected pope. He, too, constantly wrote to Pepin asking for help.

But the King of the Franks had other concerns. He had to put down revolts in Saxony in 748 and 753 and a rising in Bavaria in 749. He was continually marching against rebellious Aquitaine. In 768 Pepin died at Saint-Denis, on his way back from one of his Aquitainian expeditions.

Pepin is remembered not only as the first of the Carolingians but also as a strong supporter of the Roman Church. The papal claims to territory in Italy originated with Pepin's campaigns against Aistulf and the latter's pledge to return the Roman territories. His letters also show him calling for archbishoprics in Frankish territory, promoting synods of clergy and layfolk, and as deeply interested in theology.

Notes for Widukind I, "The Great," King Of The Saxons:
Mantuvo grandes guerras con Carlomagno. Es tronco por varonka de la Casa Schleswig y de la Wettin, entre otras.

Unlike the Bavarians, the Saxons were not politically united. Their independent edhelingi (nobles) lived on estates among forest clearings, dominating the frilingi (freemen), lazzi (half-free), and unfree members of Saxon society and leading raids into the rich Frankish world. Thus each of Charlemagne's punitive expeditions bit deeper into the heart of Saxony, leaving behind bitter memories of forced conversions, deportations, and massacres. These raids were inspired by religious as well as political zeal; Charlemagne tried to break Saxon resistance both to Christianity and to Frankish dominance with fire and sword. Still, the decentralized nature of Saxon society made ultimate conquest extremely difficult. Whenever the Frankish army was occupied elsewhere, the Saxons could be counted on to revolt, to slaughter Frankish officials and priests, and to raid as far westward as they could. Charlemagne in turn would punish the offending tribes and garrison the defense points abandoned by the Saxons. In time resistance to the Franks gave the Saxons a kind of unity under the leadership of WIDUKIND, who succeeded longer than any other leader in holding together a majority of chieftains in armed resistance to the Franks. Ultimately internal feuding led to the capitulation even of WIDUKIND. He surrendered, was baptized, and, like Tassilo, was imprisoned in a monastery for the remainder of his life. Saxony had been savagely repressed, as is reflected in the Capitulatio de partibus Saxoniae (c. 785; "Capitulary for the Saxon Regions")
and the Capitulare Saxonicum (797; "Capitulary of the Saxons"), both measures intended to force the submission of the Saxons to the Franks and to Christianity. Loyal Frankish churchmen and aristocrats were introduced to secure and pacify the region. Although northern regions that enjoyed Danish support remained outside of Frankish control, most of Saxony gradually moved into the united Frankish realm.

Notes for Pipino (Rey de Italia):
Pepin (d. July 8, 810, Milan), king of Italy (781-810) and second son of the Frankish emperor Charlemagne.

Given the title of king of Italy in 781, Pepin took part in campaigns against Duke Tassilo III of Bavaria from 787 and led an army against the Avars in 796. His Venetian campaign (809-810) enabled Charlemagne later to come to favourable terms with the Byzantine Empire. As early as 806 Charlemagne, in planning the division of his lands, had decided that on his death Pepin should inherit Italy, Bavaria, and the territory of the Alemanni, but Pepin predeceased his father by four years.

Notes for Charlemagne, Emp. Of The West:
CARLOMAGNO

Introduction

Charlemagne (Carolus Magnus, Charles the Great) as king of the Franks (768-814) conquered the Lombard kingdom in Italy, subdued the Saxons, annexed Bavaria to his kingdom, fought campaigns in Spain and Hungary, and, with the exception of the Kingdom of Asturias in Spain, southern Italy, and the British Isles, united in one superstate practically all the Christian lands of western Europe. In 800 he assumed the title of emperor. (He is reckoned as Charles I of the Holy Roman Empire, as well as Charles I of France.) Besides expanding its political power, he also brought about a cultural renaissance in his empire. Although this imperium survived its founder by only one generation, the medieval kingdoms of France and Germany derived all their constitutional traditions from Charles's monarchy. Throughout medieval Europe, the person of Charles was considered the prototype of a Christian king and emperor.

Early years.

Charles was born probably in 742 (on April 2), the elder son of Pepin III, also called Pepin the Short. Pepin and his older brother, Carloman, had just jointly assumed the government of the Frankish kingdom as maior domus, or "mayor of the palace." The dynasty, later called Carolingian after Charlemagne, had originated in the Meuse-Moselle region on the borders of modern France, Germany, Belgium, and The Netherlands. In the course of a few generations, it had, as mayors of the palace to the Merovingians, gained control of the entire Frankish kingdom. Charlemagne's grandfather, Charles Martel, reconstituted a realm that had been on the point of breaking up, and, without infringing on the royal prerogatives of the otherwise powerless Merovingians, he had in effect bequeathed the empire to his sons, Pepin and Carloman, like a family inheritance.

Charles grew to manhood while his father was engaged in acquiring sole sovereignty and the kingship. On Carloman's retirement to a monastery, Pepin eliminated the latter's sons from the government. Having thus prepared the way, he had himself proclaimed king in 751, after dethroning the Merovingians. An

oracular response by Pope Zacharias furnished the ecclesiastical approbation for thus shunting aside the former reigning house, which had been held sacred. Zacharias' successor, Stephen II, arrived in the Frankish kingdom during the winter of 753-754, in order to seek help against the Lombards who were attacking Rome. As the reigning monarch's oldest son, Charles, then about 12 years of age, travelled ahead to welcome the Pope, who anointed him king, along with his father and his brother Carloman, thus sanctioning the new dynasty. The political alliance between the Franks and the Pope against the Lombards was affirmed on the same occasion. When his father subdued Aquitaine (France south of the Loire) in a series of yearly campaigns beginning in 760, reasserting the integrity of the Frankish kingdom all the way to the Pyrenees, Charles repeatedly accompanied the army.

These youthful experiences probably contributed to the formation of Charles's character and to the formulation of his aims. He shared with his father an unbending will to power, a readiness to fight resolutely against external enemies and to increase his domains, and the determination to rule by himself even if it meant usurping the rights of close relatives. Charles early acknowledged the close connection between temporal power and the church; he had a high regard for the church and the king's duty to spread the Christian faith and, while asserting royal suzerainty over the church, considered himself accountable to God for the Christians entrusted to him.

King of the Franks.

In accordance with old Frankish custom, the kingdom was divided on Pepin's death in 768 between his two sons. It was not long, however, before a strong rivalry sprang up between the brothers: with his mother's support, Charles concluded, with the Lombard king Desiderius, whose daughter he married, and with his cousin Duke Tassilo of Bavaria, alliances directed against Carloman.

On Carloman's sudden death in 771, Charles was able to make himself sole ruler of the kingdom, unopposed by his young nephews, whose rights he ignored. When Carloman's widow with her children and a few remaining supporters had fled to the Lombard court, and King Desiderius, breaking his alliance with Charles, put pressure on the Pope to anoint Carloman's sons as Frankish kings, Charles was forced to come to the aid of Pope Adrian I. He marched on the
Lombard capital, Pavia, and after its fall made himself king of the Lombards. His brother's sons, who had fallen into his hands, disappeared. While the siege of Pavia was still in progress, Charles journeyed to Rome, where he celebrated Easter 774 with the Pope and reiterated, in St. Peter's Basilica, his father's promise to transfer to papal rule large sections of Italy. But he actually enlarged the Pope's lands only slightly, assuming for himself the sovereignty over the entire Lombard kingdom.

Charles had fought the pagan Saxons, in what is now Lower Saxony and Westphalia, in retribution for their attacks on the lower Rhine region, as early as 772, before the first Italian campaign. From 775 on, however, it was his goal to subdue the whole Saxon tribe, converting it to Christianity and integrating it into

his kingdom. This aim appeared to have been realized after several campaigns culminating in declarations of allegiance by the Saxon nobility and mass baptisms performed in 775-777. A diet held in 777 in Paderborn sealed the submission of the Saxons. Among those attending the diet had been some Arab emissaries from northern Spain who sought Charles's aid in their uprising against the Umayyad amir of Córdoba. In the summer of 778 Charles advanced into Spain and laid siege to Saragossa, without, however, being able to take the city. Retreating across the Pyrenees, the Frankish army was badly mauled by the Basques. Roland, warden of the Breton march, who died on this occasion, was later immortalized in legend and poetry.

This defeat marks the end of the first period of Charles's rule, the period of vigorous expansion. Within a decade he had become the sole ruler of the Franks, conquered the Lombard kingdom, visited Rome, subdued the Saxons, invaded Spain. Henceforth he was concerned with defending and safeguarding his quickly won gains (which were to be extended only on the right bank of the Rhine), while consolidating the state internally and protecting cultural life and the rule of law.

Not long after Charles's defeat in Spain, the Saxons rose up once more. The war against them became the longest and most cruel war fought by the Franks. In Charles's eyes, the resistance of this people that had undergone baptism and signed a treaty of allegiance amounted to political high treason and religious apostasy. These offenses called for severe punishment, and 4,500 Saxons were reported to have been executed en masse in 782. New outbreaks occurred after 792, and the last Saxons were not vanquished until 804. Between 772 and 804, Charles took the field against the Saxons no fewer than 18 times. In the end he carried out his aim of not only subjecting them to his rule but also incorporating them fully into his empire. Given the indissoluble tie between
temporal power and the Christian faith, this meant they had to be converted. But the violent methods by which this missionary task was carried out had been unknown to the earlier Middle Ages, and the sanguinary punishment meted out to those who broke canon law or continued to engage in pagan practices called forth criticism in Charles's own circle, for example by Alcuin, his adviser and head of his palace school.

When, in 788, Charles deposed his cousin Duke Tassilo III of Bavaria, who had acknowledged the Frankish kings as feudal lords, he in effect deprived of its independence the last of the German tribes beyond the Rhine. The Bavarians, who had long been Christians, were now directly integrated into the empire. The West Germanic tribes of the Alemanni, Bavarians, Saxons, and Thuringians thus found themselves for the first time gathered into one political unit. Charles's conquests on the right bank of the Rhine were, however, not limited to the Germanic tribes. Making Ratisbon (Regensburg), the residence of the Bavarian dukes, his base, he conducted several campaigns, partly under his own command, against the Avar kingdom (in modern Hungary and Upper Austria). The remaining Avar principalities and the newly founded Slav states of the Danubian region drifted into a loose dependence on the Franks, whose sovereignty they more or less acknowledged.

The gigantic expansion of the Frankish state, raising it far above the tribal states of the early Middle Ages, entailed qualitative as well as quantitative changes. Yet the idea of bestowing on Charles the Roman title of emperor arose only at a very late stage and out of a specific political constellation. While the Eastern, or Byzantine, Empire laid claim to universal recognition, the popes, constitutionally still subjects of Byzantium, were opposed to the iconoclastic religious policies of the Eastern emperors. Moreover, under the protection of Charles, Pope Adrian sought to erect an autonomous domain over central Italy, the more so as the Byzantines, abandoning for all practical purposes Rome and Ravenna, were asserting their rule only in Sicily and the southernmost edge of Italy. The papacy's desire for independence found a significant expression in the Donation of Constantine, a forgery dating probably from the first few years of Adrian's reign and purporting to legitimize these papal aims in the name of the first Christian emperor, Constantine I the Great. Charles paid a second visit to Rome in 781, when he had the Pope crown his young sons Pepin and Louis as kings of the Lombards and Aquitanians and gained de facto recognition of his Italian
position from the Byzantine empress Irene, the mother of Constantine VI. The entente that existed between Charles and Byzantium came to an end after a Frankish attack on southern Italy in 787.

Emperor of the West.

In the end, local Roman conflicts brought about the clarification of the city's constitutional position. In May 799, Pope Leo III was waylaid in Rome by personal enemies. He took refuge at the court of Charles, who had him conducted back to the city and who in November 800 came to Rome himself, where he was received with imperial honours. Before Charles and a synod, Pope Leo cleared himself under oath of the charges made by his enemies. During Christmas mass in St.Peter's, the Romans acclaimed Charles emperor, whereupon the Pope crowned and perhaps anointed him.

The imperial title was by nature a Roman dignity. While the acclamation represented the juridically conclusive act, it was the coronation at the hands of the Pope that, though of no constitutional importance, was to acquire for the Franks great significance. The Pope had been determined to make Charles emperor, deciding to a large extent the outward form; yet Charles was surely not
surprised by these events. His famous statement quoted by one of his favourites, the Frankish historian Einhard, that he would not have set foot in church that Christmas if he had known the Pope's intention, implies a criticism of the ceremony initiated by the Pope, as well as a formal expression of humility. The crowning had been preceded by negotiations. While Charles's imperial
rank was legally substantiated by the fact of his dominion over the western part of the old Roman Empire, the desire to counteract the petticoat rule of the empress Irene (who had dethroned and blinded her son in 797) also played a role. Residing in Rome four months and pronouncing sentence on the Pope's enemies as rebels guilty of lese majesty, Charles grasped the imperial reins

with a firm hand. Likewise, after his return to Aachen (Aix-la-Chapelle), he promulgated laws in full consciousness of his rank as emperor.

Byzantium braced itself for the usurper's attack, but Charles merely wished to see his new rank and his dominion over Rome recognized in negotiations; he gained his point in 812 when the emperor Michael I acknowledged him as emperor, though not as emperor of the Romans. While the imperial title did not bring Charles any additional powers, his control of Rome was now legitimized, and the estrangement of the papacy from Byzantium and its rapprochement with the Franks, a major historical event that had been initiated in 754, was rendered incontrovertible. A significant result of this development was the tradition to which Charles's assumption of the imperial title and function gave rise: all medieval concepts of empire and all the bonds between the constitutional traditions of the Franks and the later Holy Roman Empire with the Roman Empire
founded by Augustus were based on the precedent of Charles's imperial title and position.

Court and administration.

The creation of the empire was chiefly legitimized by Charles's efforts to raise its cultural level internally. When Charles came to power, the Frankish kingdom's cultural, administrative, and legal institutions were still relatively undeveloped. The Frankish king, for example, possessed no permanent residence. In the summer months he travelled about, deciding political issues and dispensing justice in assemblies of spiritual and temporal lords; above all, summer was the season for military campaigns. During the winter, from Christmas to Easter and sometimes longer, the king lived and held court at one of the imperial palaces. Charles especially favoured those situated in the Frankish heartland: only rarely did he spend the winter in one of the newly won territories, in encampment in Saxony, in Ratisbon, or in Rome. Not until 794 did Aachen, which the aging
monarch liked because of its warm springs, become the court's abode, indeed almost a residence, during every winter and often even in summer. Here Charles built, partially with materials imported from Rome and Ravenna, the court church that is still standing, as well as the palace whose walls were incorporated into the 14th-century city hall.

Charles's court consisted of his family, of the clergy in his personal service, who were called the king's capella, and of temporal officials, among them the count palatine, the seneschal, and the master of the royal household. These men were occasionally joined, on an informal basis, by other spiritual or temporal men of rank who spent some time in the ruler's presence. For Charles had the ambition to make his court the intellectual, as well as the political and administrative, centre of the realm and accordingly summoned prominent scholars from all parts of the empire and even from abroad. Among these the most important were Einhard and Alcuin.

With the help of these and other literary men, Charles established a court library containing the works of the Church Fathers and those of ancient authors, and

he founded a court academy for the education of young Frankish knights. Last but not least, he himself took part with his family and the learned and lay members of his entourage in a cultivated social life that afforded him entertainment no less than instruction. His mother tongue was an Old High German idiom, besides
which he presumably understood the Old French dialect spoken by many Franks; as a grown man, he also learned Latin and some Greek, had historical and theological writings, including St. Augustine's City of God, read aloud to him, and acquired a rudimentary knowledge of mathematics and astronomy.

The court's cultural interests, however, extended beyond the intellectual gratification of a small circle, such as the exchange of verses and letters. Efforts were also made to raise the level of religious observance, morality, and the process of justice throughout the empire. The clearest and most famous instance of this was the Epistula de litteris colendis, dating presumably from 784 to
785 and compiled in Charles's name by Alcuin. Its main argument lies in the assertion that the right faith--indeed, every right thought--must be clothed in the appropriate form and language, lest it be falsified; hence, the prescription of intensive study of Latin language and literature for all monastic and cathedral schools. The spiritual and literary movement called the " Carolingian renaissance" had many centres, especially in the empire's monasteries; but it cannot be evaluated without reference to Charles's court and to his endeavour to call on the best minds of the whole world, setting them to work in the education of the clergy and, in the final instance, of the whole people. The court's theological knowledge and intellectual self-confidence are reflected in the Libri Carolini, a comprehensive treatise written about 791 in Charles's name and directed against
the Council of Nicaea (787), at which Greeks and papal plenipotentiaries had countenanced the practice of iconolatry; at the same time, the Libri Carolini did not spare the iconoclasts.

Through this court, Charles ruled and administered his empire and dispensed justice. Once or twice a year at least, the court and the chief magistrates and nobles from all parts of the empire joined in a general assembly held either in the Frankish heartland or in one of the conquered territories. It is indicative of the unique structure of the Carolingian Empire that one cannot draw clear distinctions between an assembly of the armed forces, a constitutional assembly of the
nobility, and a church synod: juridical, military, and ecclesiastical affairs were invariably discussed at one and the same time by the representatives of the nobility and the clergy. Above them all towered the figure of Charlemagne.

On the local level the ruler was represented in every region by counts and bishops. Liaison between these personages and the court was maintained through royal messengers who travelled about at Charles's command, usually in pairs made up of a civil servant and a clerical dignitary. Royal commands did not have to be written out, although Charles's decrees (capitularies) increasingly came to be recorded in writing, at first rather imprecisely, in the last two decades of his reign; the forms coined by the "renaissance" gained ground only

with time. Charles respected the traditional rights of the various peoples and tribes under his dominion as a matter of principle, and, after he became emperor, he had many of them recorded. The capitularies served partly as complements to tribal laws, partly as regulations applying to the most disparate aspects of public
and private life, and in part also as specific instructions issued to royal messengers, counts, bishops, and others. Punitive decrees against highwaymen, dispositions concerning military levies, orders for the people to take an oath of allegiance to the emperor or to teach all Christians to recite the Lord's Prayer, are found intermingled in the capitularies with jurisdictional dispositions and regulations about the internal organization of monasteries; temporal and spiritual problems are rarely treated separately. Taken as a whole, the legal documents of Charles's reign bear witness to a great concern, born of profound moral and religious convictions, with the administration of justice and with public enlightenment, but they also show discrepancies between the ideal and reality.

Limitations of his rule.

Charles's organization of the empire was, however, not without its defects and limitations. The sovereign's power was restricted only by theoretical principles of law and custom, not by institutions or countervailing forces. Significantly, the records report little about opposition movements and conspiracies, which, in fact, did exist. A rebellion that Thuringian counts launched against Charles in 786 can perhaps be explained as ethnic opposition to the centralism of the Franks. More ominous was an aristocratic conspiracy that in 792 attempted to place on the
throne the hunchback Pepin, Charles's only son from his first marriage, which was later declared invalid; yet here, too, the political concepts and motives remain unknown. These events and, more clearly still, the history of the empire under Charles's successor, Louis, show the extent to which the political system had been designed for one person on whose outstanding abilities everything depended and with whose disappearance it threatened to collapse. Their self-confidence enhanced by Charles's educational policy, the clergy could not accept for all time his theocracy without opposing it with their own political and religious principles. The temporal nobility that had built the empire with the Carolingians could be firmly tied to the dynasty only as long as new conquests held out the prospect of new spoils and fiefs; if these failed to materialize, there remained only the care of one's properties in the different regions and the hope of gaining advantages from party strife. External expansion, however, could not advance substantially beyond the borders reached by 800; in fact, economic and technical resources were insufficient to hold together and administer what had already been won and to defend it against foreign enemies. Charles's empire lacked the means by which the Romans had preserved theirs: a money economy, a paid civil service, a standing army, a properly maintained network of roads and communications, a navy for coastal defense. Already in Charles's lifetime, the coasts were being threatened by the Normans. In 806 Charles planned a division of the empire between his sons, but after the death of the elder two he crowned Louis of Aquitaine his coemperor and sole successor at

Aachen in 813. It was only a few months later that Charles himself died there on January 28, 814.

Personality and influence.

Charlemagne's posthumous fame shone the more brightly as the following generations were unable to preserve the empire's internal peace, its unity, and its international position. Even after the Carolingian dynasty had become extinct, political tradition in the East Frankish (German) kingdom and empire, as well as in the West Frankish (French) kingdom, drew sustenance from the example
set by Charlemagne. Under Otto I, Aachen became the city in which the rulers of Germany were crowned, and, at Frederick I Barbarossa's request, the antipope Paschal III canonized Charlemagne in 1165. In France the Capetians, beginning with Philip II Augustus, revived the traditions that had grown up around Charlemagne. The controversial question whether the Germans or the French were the true successors of Charlemagne was kept alive through the Middle Ages and into modern times. Napoleon called himself Charlemagne's successor; after the end of World War II, discussions of a united, Christian, "occidental" Europe invoked his model. Hand in hand with these political traditions went those in popular legend and poetry, culminating in the Roland epics. Nor did Charlemagne's fame stop at the boundaries of what was once his empire; some Slavic languages derived their term for "king" from his name (Czech kril, Polish król, etc.).

Charles left no biographical document; his personality can be constructed only from his deeds and the reports left by contemporaries. This is how Einhard, who lived at the court from about 795 on, described Charlemagne's character and appearance in his famous Vita Karoli Magni: "He had a broad and strong body of unusual height, but well-proportioned; for his height measured seven times his feet. His skull was round, the eyes were lively and rather large, the nose of more than average length, the hair gray but full, the face friendly and cheerful. Seated or standing, he thus made a dignified and stately impression even though he had a thick, short neck and a belly that protruded somewhat; but this was hidden by the good proportions of the rest of his figure. He strode with firm step and held himself like a man; he spoke with a higher voice than one would have expected of someone of his build. He enjoyed good health except for being repeatedly
plagued by fevers four years before his death. Toward the end he dragged one foot."

The strength of Charlemagne's personality was evidently rooted in the unbroken conviction of being at one with the divine will. Without inward contradiction, he was able to combine personal piety with enjoyment of life, a religious sense of mission with a strong will to power, rough manners with a striving for intellectual growth, and intransigence against his enemies with rectitude. In his politically conditioned religiosity, the empire and the church grew into an institutional and spiritual unit. Although his empire survived him by only one generation, it contributed decisively to the eventual reconstitution, in the mind of a western Europe fragmented since the end of the Roman Empire, of a common

intellectual, religious, and political inheritance on which later centuries could draw. Charlemagne did not create this inheritance single-handedly, but one would be hard put to imagine it without him. One of the poets at his court called him rex pater Europae--"King father of Europe." In truth, there is no other man who similarly left his mark on European history during the centuries of the Middle Ages.

Children of Charlemagne and Himiltruda are:

i. Pipino (Rey de Italia), born Abril 773 in Aachen, Rhineland, Prusia; died 8 Julio 810; married Gondres Abt. 795; born Abt. 775.

Notes for Pipino (Rey de Italia):
Pepin (d. July 8, 810, Milan), king of Italy (781-810) and second son of the Frankish emperor Charlemagne.

Given the title of king of Italy in 781, Pepin took part in campaigns against Duke Tassilo III of Bavaria from 787 and led an army against the Avars in 796. His Venetian campaign (809-810) enabled Charlemagne later to come to favourable terms with the Byzantine Empire. As early as 806 Charlemagne, in planning the division of his lands, had decided that on his death Pepin should inherit Italy, Bavaria, and the territory of the Alemanni, but Pepin predeceased his father by four years.

Notes for Louis II, Of Germany:
Louis II, byname LOUIS THE GERMAN, German LUDWIG DER DEUTSCHE (b. c. 804, Aquitaine?, Fr.--d. Aug. 28, 876, Frankfurt), king of the East Franks, who ruled lands from which the German state later evolved.

The third son of the Carolingian emperor Louis I the Pious, Louis the German was assigned Bavaria at the partition of the empire in 817. Entrusted with the government of Bavaria in 825, he began his rule the following year. Louis took part in the revolts against his father (830-833) and joined his half-brother, Charles the Bald, in opposing the claim of his brother, Lothair I, to imperial suzerainty over the whole empire after their father's death in 840. By the Treaty of Verdun (August 843), Charles, Lothair I, and Louis divided the western, middle, and eastern parts of the empire, respectively, between them. Louis received the territory of the Franconians, the Swabians, the Bavarians, and the Saxons, together with the Carolingian provinces to the east.

In 853 a group of nobles opposing Charles the Bald, then king of the West Franks, appealed to Louis for help; in 854 Louis sent his son Louis the Younger to Aquitaine, and in 858 went west himself to try to depose Charles; both expeditions failed. At the Peace of Coblenz (860) Louis renounced his claims to Charles's dominions.

When Lothair I died in 855, his lands were divided among his sons, one of whom, Lothair, received Lotharingia (Greater Lorraine). This Lothair had no legitimate children, and Louis the German and Charles the Bald agreed (865 and 867/868) on the partition of their nephew's dominions between themselves on his death. When Lothair died (869), however, Charles broke the agreements by annexing Lotharingia. Louis invaded Lotharingia (870), and the country was divided between Louis and Charles by the Treaty of Mersen (Meerssen), under which Louis received Friesland and an extremely large expansion of this territory west of the Rhine.

Louis in 865 and 872 divided his territories between his sons Carloman, Louis the Younger, and Charles III the Fat. Quarrels and discontent at the partitions led to revolts by one or another of the sons between 861 and 873.

Although Louis the German supported Frankish Catholic missions in Moravia, he could not maintain control in that area and lost a war that led to the founding of Greater Moravia, independent after 874.

Louis the German unsuccessfully sought the imperial dignity and the succession in Italy for his line after the death of Lothair I's son, the emperor Louis II; but though Louis II declared (874) in favour of Carloman, eldest son of Louis the German, as the next emperor (August 875), Charles the Bald had

himself crowned by Pope John VIII after Louis II's death in August 875. Meanwhile, Louis the German unsuccessfully attempted to invade Charles's possessions in
Lotharingia. At the time of his death, Louis the German was again preparing for war against Charles.

**335562409. Teodora (Emperatriz Bizantina),** born Abt. 815. She was the daughter of **671124818. Marinos**.

Notes for Teófilo (Emperador Bizantino):
Theophilus (d. Jan. 20, 842, Constantinople), Eastern Roman emperor (829-842), principal promoter of the 9th-century Byzantine renascence of learning, and the last advocate of the Eastern heresy of Iconoclasm (the destruction of religious images) in a reign beset by Arab invasions.

The son of the emperor Michael II, of the Phrygian dynasty traditionally favourable to Iconoclasm, Theophilus was liberally educated by the Byzantine scholar and ardent Iconoclast John Philoponus. He was also much influenced by the learned court of the early 9th-century caliph of Baghdad Harun ar-Rashid.

Theophilus was crowned as co-emperor in 820 and shortly thereafter married a beauty, Theodora, chosen from a group of candidates. On becoming sole emperor in 829, he emulated Harun ar-Rashid by wandering about the capital informally, listening to his subjects' complaints. An intelligent financier and administrator, he dispatched architects and engineers to construct fortresses which would anchor Byzantium's northern defenses against the Vikings and the Magyars. He also bolstered his defenses, east and west, against the Muslims. For despite his interest in their culture, Theophilus was compelled to war with the Muslims throughout his reign.

Having repelled the caliph Ma`mun, Theophilus met with disastrous reversals at the hands of Ma`mun's brother, the caliph al-Mu'tasim, who struck at the most important centres of Asia Minor on the route to Constantinople. Theophilus was defeated in a bloody battle at Dazimon (now Dazmana, Tur.) in July 838. Ancyra fell, and a month later al-Mu'tasim took Amorium, one of the empire's chief fortresses and the home of Theophilus' dynasty. Exploiting dissension within the Arab camp, however, Theophilus in 841, with the help of Spanish Moors, captured Melitene on the Armenian border, forcing al-Mu'tasim to sign a truce.

Under Theophilus, Iconoclasm was given full rein. To weaken the political influence of Greek Orthodox monasticism, the Emperor and John Philoponus (who had become patriarch of Constantinople) mounted a persecution against the users of icons in Orthodox liturgy and devotion. Support for Iconoclasm soon waned, however, and the vast majority of the Greek Orthodox rallied to the defense of their sacred art.

The Byzantine cultural revival stimulated by Theophilus included two significant advances in the area of classical studies: the gradual substitution of the minuscule, or smaller, cursive hand for the uncial, or larger, script, and the increase in the number of scriptoria, or copyists' workshops. Theophilus also restored the University of Constantinople after its 8th-century decline and appointed the brilliant Byzantine teacher Leo the Mathematician as its new rector.

Notes for Kenneth I, Mac Alpin King Of Scotland:

Kenneth I, called MacAlpin (flourished 832-60), traditionally, the founder and first king of Scotland. About 834 he succeeded his father, Alpin (reigned about 832-34), as king of the Gaelic Scots in Galloway. In a series of battles (841-46) he conquered the Pictish Kingdom and, uniting it with his own, called his expanded domains Scotland. The kingdom is sometimes called Scone, after Kenneth's capital. In later years, the king led six invasions of Lothian, southern Scotland, then part of Saxon Northumbria.

Notes for King Ashot III Of Armenia:
ASHOT III (952-77) was much loved by his people; he funded many churches, hospitals, convents, and alsmshouses, and (we are told) never sat down to meals without allowing poor men to join him. Under his son GAGIK I (990-1020) prosperity reached its height: schools were numerous, towns were enriched by trade and adorned by art; and Kars rivaled Ani as a center of literature, theology, and philosophy. Ani had impressive palaces and a precious cathedral, subtly compounded of Persian and Byzantine styles; he re were piers and column clusters pointed as well as round arches, anmd other features that later entered into Gothic art. When, in 989, the cupule of St, Sophia in Costantinople was destroyed by an earthquake, the Byzantine emperor assigned the hazardous task of restoring it to Trdat, the architect of the Ani cathedral.

Durant, Will. "The Age of Faith". pag 205.

---

From 642 to 1046 Armenia was nominally subject to the caliphs, but it remained virtualy sovereign and zelausly Christian. In the ninth century the Bagratuni family established a dynasty under the title of "Prince of Princes", built a capital at Ani, and gave the country several generations of progress and relative peace. Ashot III the Merciful (952-977) transferred his capital to Ani and began to make it into one of the architectural gems of the Middle Ages.

The Bagratids of Ani bore the title of "shahanshah" (king of kings), which was first conferred by the caliph in 922 upon Ashot II the Iron.

In 961 Mushegh, the brother of Ashot III, founded the Bagratid kingdom of Kars. By the 11th century, the combined invasions of the Seljuk Turks and Byzantine conquests in the west destroyed what remained of the Bagratids and the Armenian kingdom.

ii. Yovhannes-Senekerim, King Of Vaspurakan, born Abt. 975 in Vaspurakan, Armenia; died 1027 in Sebastia, Asia Menor.

Notes for Yovhannes-Senekerim, King Of Vaspurakan:
THE MAMIKONIANS AND BAGRATIDS

The first, unsuccessful, Arab raid into Armenia in 640 found the defense of the country in the hands of the Byzantine general Procopius and the nakharar Theodor Rshtuni. Unable to prevent the pillage of Dvin in 642, Theodor in 643 gained a victory over another Arab army and was named commander in chief of the Armenian army by Constans II. In 653, after the truce with Mu'awiyah, then governor of Syria, Constans voluntarily surrendered Armenia to the Arabs,
who granted it virtual autonomy and appointed Theodor as governor (ostikan).

Theodor's successor, Hamazasp Mamikonian, sided with Byzantium, but after 661 Arab suzerainty was reestablished, although Byzantine-Arab rivalry, Armenian resistance, and reluctance to pay the tribute made the region difficult to govern. An unsuccessful revolt led by Mushegh Mamikonian (771-772) resulted in the virtual extinction of the Mamikonians as a political force in Armenia and in the emergence of the Bagratunis and Artsrunis as the leading noble families. The
Arabs' choice in 806 of Ashot Bagratuni the Carnivorous to be prince of Armenia marked the establishment of his family as the chief power in the land. The governor Smbat Ablabas Bagratuni remained loyal to the caliph al-Mutawakkil when al-Mutawakkil sent his general Bugha al-Kabir to bring the rebellious nakharars to submission, although Smbat, too, was dispatched in 855 with the rest of the captive nobles to Samarra.

The election by the nobles of Smbat's son Ashot I the Great, who had been accepted as "prince of princes" by the Arabs in 862, to be king of Armenia in 885 was recognized by both caliph and emperor. Throughout the 10th century, art and literature flourished. Ashot III the Merciful (952-977) transferred his capital to Ani and began to make it into one of the architectural gems of the Middle Ages.

The Bagratids of Ani, who bore the title of shahanshah ("king of kings"), first conferred upon Ashot II the Iron by the caliph in 922, were not the sole rulers of Armenia. In 908 the Artsruni principate of Vaspurakan became a kingdom recognized by the caliph; in 961 Mushegh, the brother of Ashot III, founded the Bagratid kingdom of Kars; and in 970 the prince of Eastern Siuniq declared himself a king.

By the time of the Seljuq invasions in the 11th century, the Armenian kingdoms had already been destroyed from the west. The province of Taron had been annexed to the Byzantine Empire in 968, and the expansionist policy of Basil II finally extinguished Armenian independence. The possessions of David of Tayq were annexed in 1000, and the kingdom of Vaspurakan

in 1022, under the reign of YOVHANNES-SENEKERIM (b c. 980, d. 1027). In the latter year, the Bagratid king of Ani, Yovhannes-Smbat, was compelled to make the emperor heir to his estates, and in 1045, despite the resistance of Gagik II, Ani was seized by Constantine IX Monomachus.

The Byzantine conquest was short-lived: in 1048 Togrul led the first Seljuq raid into Armenia, in 1064 Ani and Kars fell to Alp-Arslan, and after the Battle of Manzikert (1071) most of the country was in Turkish hands. In 1072 the Kurdish Shaddadids received Ani as a fief. A few native Armenian rulers survived for a time in the Kiurikian kingdom of Lori, the Siuniqian kingdom of Baghq or Kapan, and the principates of Khachen (Artzakh) and Sasun. In the 12th century many former Armenian regions became parts of Georgia, and between 1236 and 1242 the whole of Armenia and Georgia fell into the hands of the Mongols. Armenian life and learning, centred around the church, continued in monasteries and village communities.

Notes for HakamI, Emir de Córdoba:
Al-Hakam I (770-822), emir independiente de al-Andalus (796-822). Hijo y sucesor de Hisam I. Durante su gobierno se manifestó el descontento de la población muladk por la polktica de signo filoirabe de los Omeyas. Las primeras sublevaciones se produjeron en las ciudades fronterizas de Zaragoza, Toledo y Mérida. La revuelta de Toledo, conocida como la 'jornada del foso' (797), se saldó con el asesinato de los notables de la ciudad. Estos problemas obligaron al emir a organizar un ejército de mercenarios bereberes y eslavos y a incrementar los impuestos. El aumento de la presión fiscal provocó el denominado 'motkn del arrabal' de Secunda en Córdoba (818), sofocado también de forma dristica. El arrabal fue convertido en campo de labranza y varios miles de personas tuvieron que exiliarse.

Notes for Charles Martel:
Charles MARTEL, Latin CAROLUS MARTELLUS, German KARL MARTELL (b. c. 688--d. Oct. 22, 741, Quierzy-sur-Oise, France), mayor of the palace of Austrasia (the eastern part of the Frankish kingdom) from 715 to 741, who reunited and ruled the entire Frankish realm and stemmed the Saracen invasion at Poitiers in 732. His byname, Martel, means "the hammer." A man of valiant determination, ambition, and ability, he strove incessantly to consolidate his power.

Background.

After the death of Dagobert I in 639, there had been no king of any worth in the Frankish kingdom. All of them were of the Merovingian line--idle, slothful, and bent on ease and luxury. The burden of rule lay upon the mayors of the palace, who in reality governed Austrasia, the eastern part of the Frankish kingdom, and Neustria, its western portion. These mayors not only controlled routine in the royal palace but also directed the political, social, and commercial life of the Franks. Neustria bitterly resented its conquest and annexation in 687 by Pepin of Herstal, mayor of Austrasia and father of Charles Martel, at the Battle of Tertry (Testry), near Péronne.

When in 714 Pepin of Herstal died, he left as heirs three grandsons, his legitimate children all being dead. Until his grandchildren came of age, Plectrude, Pepin's widow, was to hold power. As an illegitimate son, Charles Martel was entirely neglected in the will. But he was young, strong, and determined, and a struggle for control at once began between him and Plectrude.

Both Charles and Plectrude faced rebellion throughout the Frankish kingdom when Pepin's will was made known. The king, Chilperic II, was in the power of Ragenfrid, mayor of the palace of Neustria, who joined forces with an enemy of the Franks, Radbod, king of the Frisians in Holland, in order to eliminate Charles. Plectrude managed to imprison Charles, but he escaped, gathered an army, defeated King Chilperic and Mayor Ragenfrid, and conquered the hostile Neustrians. His success made resistance by Plectrude and the Austrasians useless; realizing the spirit and power of young Charles, they submitted, and by 719 Charles alone governed the Franks as mayor. Peace and order reigned in Austrasia and Neustria, so that by 724 Charles was free to deal with hostile elements elsewhere. This involved expeditions against the Saxons and the peoples of the lands near the Rhine and the Danube.

Battle of Poitiers.

Charles next crossed the Loire into Aquitaine, where one Eudes (Odo) was duke.
Eudes, once an ally of Charles, had become disloyal and promptly called to his aid the Saracens, Moors from Africa, who, entering Spain in 711, had soon conquered it and were now (732) threatening Gaul. Led by their king, 'Abd ar-Rahman, they marched for Bordeaux, there to burn churches and to plunder. From Bordeaux they went across Aquitaine to Poitiers. It was outside this city that Charles Martel came upon them and put them to flight.

In 733 Charles forced Burgundy to yield to his rule, and in 734 he subdued the Frisians. During 735 word arrived that Eudes was dead, and Charles marched rapidly across the Loire River in order to make his power felt around Bordeaux. In 736 he fought to secure his conquest of Burgundy, and there were further engagements against the Saracens during the 730s.

Charles Martel's health began to fail in the late 730s, and in 741 he retired to his palace at Quierzy-sur-Oise, where he died soon after. Before his death he divided the Merovingian kingdom between his two legitimate sons, Pepin and Carloman. He had maintained the fiction of Merovingian rule all of his life, refraining from transferring the royal title to his own dynasty.

Notes for Carloman:
Carloman (b. c. 715--d. Aug. 17, 754), Frankish prince, son of Charles Martel and brother of Pepin III the Short.

After inheriting Austrasia, Alemannia, Thuringia, and the suzerainty of Bavaria from his father, Carloman fought alone and with his brother to suppress external enemies and rebellious subjects. Concerned with reform of the church, he called on St. Boniface for help and in 742 summoned the first Frankish council in nearly 50 years; in 743 the Synod of Estinnes regulated the problem of church lands seized by Charles Martel and granted out to his vassals.

Carloman abandoned the secular life, becoming a monk first at Monte Soratte, later at Monte Cassino, in Italy.

Notes for Carloman:
Carloman (b. c. 715--d. Aug. 17, 754), Frankish prince, son of Charles Martel and brother of Pepin III the Short.

After inheriting Austrasia, Alemannia, Thuringia, and the suzerainty of Bavaria from his father, Carloman fought alone and with his brother to suppress external enemies and rebellious subjects. Concerned with reform of the church, he called on St. Boniface for help and in 742 summoned the first Frankish council in nearly 50 years; in 743 the Synod of Estinnes regulated the problem of church lands seized by Charles Martel and granted out to his vassals.

Carloman abandoned the secular life, becoming a monk first at Monte Soratte, later at Monte Cassino, in Italy.

**671124817. Eufrosina (Emperatriz Bizantina),** born Abt. 790. She was the daughter of **1342249634. Constantino VI (Emperador Bizantino)**.

Notes for Miguel II el Tartamudo (Emperador Bizantino):
Michael II (b. Amorium, Diocese of Asia--d. October 829), Byzantine emperor and founder of the Amorian, or Phrygian, dynasty who attempted to moderate the Iconoclastic controversy that divided 9th-century Byzantium.

Rising from humble origins, Michael became a military commander. He was a comrade-in-arms of Leo the Armenian, who later became Emperor Leo V (813). When, in 803, Bardanes Turcus and Nicephorus I were fighting over the imperial throne, Leo and Michael at first supported Bardanes but later deserted him and joined the cause of Nicephorus. Years later, after Leo had ascended the throne, Michael incurred the suspicion of his former friend and was imprisoned on a
charge of treason. On Dec. 24, 820, he was sentenced to death and ordered to be thrown into a furnace, but on the following day, his partisans assassinated Leo and proclaimed Michael emperor.

Shortly before Michael ascended the throne, however, a soldier named Thomas the Slavonian raised a rebellion, and it was not until the end of 823 that Michael succeeded in suppressing this revolt, which so weakened the resources of the empire that it was unable to resist later Arab onslaughts. The Arabs conquered Crete (826 or 827) and parts of Sicily (827-829).

Although Michael was an Iconoclast (a member of the party opposed to the use of religious images, or icons), in practice he followed a policy of toleration. He even freed prisoners who had been jailed for their devotion to icons and recalled former patriarch Nicephorus, Theodore Studites, and other theologians who had been exiled for that reason.

**1342195840. HishamI, Emir de Córdoba,** born 1 Marzo 757 in Córdoba; died 17 Abril 796. He was the son of **2684391680. Abderraman I, ben Moaviah ben Hixam** and **2684391681. Holal**.

Notes for HishamI, Emir de Córdoba:
Hisam I (757-796), emir de al-Andalus (788-796). Hijo y sucesor de Abd al-Rahman I, el fundador del emirato independiente. La energka mostrada por su predecesor frente a los irabes y los bereberes que se opusieron a la dinastka Omeya, permitió a Hisam I gobernar con cierta tranquilidad. Asimismo, Hisam I pudo frenar el avance de los cristianos del norte peninsular, contra los que dirigió sucesivas campanas de castigo. A Hisam I se debe también la introducción en al-Andalus de la doctrina malikk, una de las cuatro escuelas jurkdicas del islam. La extremada rigidez e intransigencia de esta doctrina fue un obsticulo para el desarrollo de la cultura y el pensamiento en al-Andalus. Antes de morir designó como sucesor a su hijo Al-Hakam I.

Notes for Pepin II, Of Heristal:
Pepin II,

byname PEPIN OF HERSTAL, French PÉPIN D'HÉRISTAL (d. Dec. 16, 714, Jupille, near Licge [now in Belgium]), ruler of the Franks (687-714), the first of the great Carolingian mayors of the palace.

The son of Begga and Ansegisel, who were, respectively, the daughter of Pepin I and the son of Bishop Arnulf of Metz, Pepin established himself as mayor of the palace in Austrasia after the death of Dagobert II in 679 and defended its autonomy against Theodoric III of Neustria and Ebroln, Theodoric's mayor of the palace. Defeated by Ebroln in 680 at Lucofao (near Laon), Pepin gained his revenge on the Neustrians in 687 at Tertry (near Péronne) and became sole effective ruler of the Franks. He nevertheless retained Theodoric III on the throne and after his death replaced him with three successive Merovingian kings. After several years of warfare Pepin defeated the Frisians on his northeastern border (689) and married his son Grimoald to Theodelind,

daughter of the Frisian chief Radbod. He also forced the Alemanni to recognize Frankish authority again and
encouraged Christian missionaries in Alemannia and Bavaria. Charles Martel was his son.

Notes for Charles Martel:
Charles MARTEL, Latin CAROLUS MARTELLUS, German KARL MARTELL (b. c. 688--d. Oct. 22, 741, Quierzy-sur-Oise, France), mayor of the palace of Austrasia (the eastern part of the Frankish kingdom) from 715 to 741, who reunited and ruled the entire Frankish realm and stemmed the Saracen invasion at Poitiers in 732. His byname, Martel, means "the hammer." A man of valiant determination, ambition, and ability, he strove incessantly to consolidate his power.

Background.

After the death of Dagobert I in 639, there had been no king of any worth in the Frankish kingdom. All of them were of the Merovingian line--idle, slothful, and bent on ease and luxury. The burden of rule lay upon the mayors of the palace, who in reality governed Austrasia, the eastern part of the Frankish kingdom, and Neustria, its western portion. These mayors not only controlled routine in the royal palace but also directed the political, social, and commercial life of the Franks. Neustria bitterly resented its conquest and annexation in 687 by Pepin of Herstal, mayor of Austrasia and father of Charles Martel, at the Battle of Tertry (Testry), near Péronne.

When in 714 Pepin of Herstal died, he left as heirs three grandsons, his legitimate children all being dead. Until his grandchildren came of age, Plectrude, Pepin's widow, was to hold power. As an illegitimate son, Charles Martel was entirely neglected in the will. But he was young, strong, and determined, and a struggle for control at once began between him and Plectrude.

Both Charles and Plectrude faced rebellion throughout the Frankish kingdom when Pepin's will was made known. The king, Chilperic II, was in the power of Ragenfrid, mayor of the palace of Neustria, who joined forces with an enemy of the Franks, Radbod, king of the Frisians in Holland, in order to eliminate Charles. Plectrude managed to imprison Charles, but he escaped, gathered an army, defeated King Chilperic and Mayor Ragenfrid, and conquered the hostile Neustrians. His success made resistance by Plectrude and the Austrasians useless; realizing the spirit and power of young Charles, they submitted, and by 719 Charles alone governed the Franks as mayor. Peace and order reigned in Austrasia and Neustria, so that by 724 Charles was free to deal with hostile elements elsewhere. This involved expeditions against the Saxons and the peoples of the lands near the Rhine and the Danube.

Battle of Poitiers.

Charles next crossed the Loire into Aquitaine, where one Eudes (Odo) was duke.
Eudes, once an ally of Charles, had become disloyal and promptly called to his aid the Saracens, Moors from Africa, who, entering Spain in 711, had soon conquered it and were now (732) threatening Gaul. Led by their king, 'Abd ar-Rahman, they marched for Bordeaux, there to burn churches and to plunder. From Bordeaux they went across Aquitaine to Poitiers. It was outside this city that Charles Martel came upon them and put them to flight.

In 733 Charles forced Burgundy to yield to his rule, and in 734 he subdued the Frisians. During 735 word arrived that Eudes was dead, and Charles marched rapidly across the Loire River in order to make his power felt around Bordeaux. In 736 he fought to secure his conquest of Burgundy, and there were further engagements against the Saracens during the 730s.

Charles Martel's health began to fail in the late 730s, and in 741 he retired to his palace at Quierzy-sur-Oise, where he died soon after. Before his death he divided the Merovingian kingdom between his two legitimate sons, Pepin and

Carloman. He had maintained the fiction of Merovingian rule all of his life, refraining from transferring the royal title to his own dynasty.

Notes for Pepin III, King Of Franks(751-768):
Pepin III, byname PEPIN THE SHORT, French PÉPIN LE BREF, German PIPPIN DER KURZE (b. c. 714--d. Sept. 24, 768, Saint-Denis, Neustria [now in France]), the first king of the Frankish Carolingian dynasty and the father of Charlemagne. A son of Charles Martel, Pepin became sole de facto ruler of the Franks in 747 and then, on the deposition of Childeric III in 751, king of the Franks. He was the first Frankish king to be anointed--first by St. Boniface and later (754) by Pope
Stephen II.

Background and kingship.

For years the Merovingian kings had been unable to prevent power from slipping from their hands into those of the counts and other magnates. The kings were gradually eclipsed by the mayors of the palace, whose status developed from that of officer of the household to regent or viceroy. Among the mayors, a rich family descended from Pepin of Landen (Pepin I) held a position of especial importance. When Charles Martel, the scion of that family, died in 741, he left two sons: the elder, Carloman, mayor of Austrasia, Alemannia, and Thuringia, and Pepin III, mayor of Neustria, Burgundy, and Provence. No king had ruled over all the Franks since 737, but to maintain the fiction of Merovingian sovereignty, the two mayors gave the crown to Childeric III in 743.

Charles had had a third son, however-- Grifo, who had been born to him by a Bavarian woman of high rank, probably his mistress. In 741, when his two brothers were declared mayors of the Franks, Grifo rebelled. He led a number of revolts in subsequent years and was several times imprisoned. In 753 he was killed

amid the Alpine passes on his way to join the Lombards, at this time enemies of the Franks as well as of the papacy.

Numerous other rebellions broke out. In 742 men of the Aquitaine and Alemannia were in revolt; in 743 Odilo, duke of Bavaria, led his men into battle; in 744 the Saxons rebelled, in 745 Aquitaine, and in 746 Alemannia, both the latter for the second time.

In 747, when Carloman decided to enter monastic life at Rome, a step he had been considering for years, Pepin became sole ruler of the Franks. But Pepin was ambitious to govern his people as king, not merely as mayor. Like his father, he had courage and resolution; unlike his father, he had a strong desire to unite the papacy with the Frankish realm. In 750 he sent two envoys to Pope
Zacharias with a letter asking: "Is it wise to have kings who hold no power of control?" The pope answered: "It is better to have a king able to govern. By apostolic authority I bid that you be crowned King of the Franks." Childeric III was deposed and sent to a monastery, and Pepin was anointed as king at Soissons in November 751 by Archbishop Boniface and other prelates.

Pepin and Pope Stephen II.

The pope was in need of aid. Aistulf, king of the Lombards, had seized Ravenna with its lands, known as the exarchate. Soon, Lombard troops marched south, surrounded Rome, and prepared to lay siege to its walls. So matters stood when in 752 Zacharias died and Stephen II became pope. In November 753 Pope Stephen made his way over the stormy mountain passes to Frankish territory. He remained in France until the summer of 754, staying at the abbey of
Saint-Denis, Paris. There he himself anointed Pepin and his sons, Charles and Carloman, as king and heirs of the crown.

The pope returned to Italy accompanied by Pepin and his army. A fierce battle was fought in the Alps against Aistulf and the Lombards. The Lombard king fled back to his capital, Pavia; Pepin and his men plundered the land around Pavia until Aistulf promised to restore to papal possession Ravenna and all the Roman properties claimed by the pope.

Aistulf broke his word. Again and again Pope Stephen wrote to Pepin of his difficulties. In 756 the Frankish king once more entered Italy. Aistulf was once more constrained to make promises, but the same year he died--of a fall from his horse--and in April 757 a new king, Desiderius, became ruler of the Lombards. That year Stephen II also died, and Paul I was elected pope. He, too, constantly wrote to Pepin asking for help.

But the King of the Franks had other concerns. He had to put down revolts in Saxony in 748 and 753 and a rising in Bavaria in 749. He was continually marching against rebellious Aquitaine. In 768 Pepin died at Saint-Denis, on his way back from one of his Aquitainian expeditions.

Pepin is remembered not only as the first of the Carolingians but also as a strong supporter of the Roman Church. The papal claims to territory in Italy originated with Pepin's campaigns against Aistulf and the latter's pledge to return the Roman territories. His letters also show him calling for archbishoprics in Frankish territory, promoting synods of clergy and layfolk, and as deeply interested in theology.

Notes for Constantino VI (Emperador Bizantino):
Constantino Vl. 770-797. Emperador del Imperio del Este. Gobernó desde 780, a los diez anos de edad, hasta que su madre Irene le hizo sacar los ojos y llegó a usurparle el trono. Murió en plena juventud. Fue el sltimo de los emperadores Isiuricos.

Constantine VI (b. 770--d. after Aug. 15, 797), Byzantine emperor from 780 to 797, grandson of Constantine V.

At 10 years of age Constantine succeeded his father, Leo IV, under the guardianship of his mother, Irene. It was during her regency that the seventh ecumenical Council of Nicaea (787) reestablished the veneration of icons. When Constantine came of age, Irene attempted to retain supreme power; but in 790 the army proclaimed Constantine VI as sole ruler, and she was arrested.

Constantine foolishly pardoned her in 792 and again accepted her as coruler. In 796
Constantine roused public opinion by divorcing his wife in order to marry his mistress, Theodote. Irene cleverly utilized this situation and in August 797 had Constantine deposed and blinded. He was the last of the Isaurian dynasty.

**2684391680. Abderraman I, ben Moaviah ben Hixam,** born 734 in Damasco; died 30 Septiembre 788 in Mérida, Espana. He was the son of **5368783360. Moaviah ben Hixam**. He married **2684391681. Holal**.

**2684391681. Holal,** born Abt. 740.

Notes for Abderraman I, ben Moaviah ben Hixam:
'Abd ar-Rahman I, also called AD-DAKHIL RAHMAN (fl. 750-788), member of the Umayyad ruling family of Syria who founded an Umayyad dynasty in Spain.

When the 'Abbasids overthrew the Umayyad caliphate in 750 and sought to kill as many members of the Umayyad family as possible, 'Abd ar-Rahman fled, eventually reaching Spain. The Iberian Peninsula had for some time been occupied by Muslim Arab forces, and he recognized political opportunity for himself in the rivalries of the Qais and Yaman, the dominant Arab factions there. By shifting alliances and using mercenary support, he placed himself in a position of power, attacking and defeating the Governor of al-Andalus in 755 and making Córdoba his capital. As news of his success spread eastward, men who had previously worked in the Umayyad administrative system came to Spain to work with 'Abd ar-Rahman, and his administrative system came to resemble that formerly operative in Damascus.

'Abd ar-Rahman secured his realm against external attack by defeating armies sent by Charlemagne and the 'Abbasid caliph. Although he faced a series of rebellions by Muslim Spaniards, Berbers from the mountainous areas, and various Arab clans, his authority and dynasty remained firmly in power.

'Abd ar-Rahman I's successors, Hisham I (788-796) and al-Hakam I (796-822), were confronted with severe internal dissidence among the Arab nobility. A rebellion in Toledo was put down savagely, and the internal warfare caused the emir to increase the numbers of Slav and Berber mercenaries and to impose new taxes to pay for them.

**2684499269. Irene (Emperatriz Bizantina),** born 752 in Atenas, Grecia; died 9 Agosto 803.

Notes for León IV El Jazaro (Emperador Bizantino):
León IV. 750-780). Emperador bizantino. Hijo de Constantino V. Su polktica contra irabes y bslgaros fue extraordinariamente fuerte. Como Leon III, defendió la idea de que no se debkan venerar imigenes en los templos. Espose de Irene, la emperatriz. Reinó de 775 a 780.

Leo IV, byname LEO THE KHAZAR (b. Jan. 25, 749--d. Sept. 8, 780), Byzantine emperor whose reign marked a transition between the period of Iconoclasm and the restoration of the icons.

Leo became Byzantine emperor in 775 at the death of his father, Constantine V. The following year, at the request of the army and with the support of the Senate and the citizens, Leo's young son Constantine was crowned coemperor,

passing over the caesar Nicephorus, a stepbrother of Leo. The resulting conspiracy in favour of the caesar Nicephorus was, however, suppressed, and the conspirators were exiled.

Leo profited from discord among the Bulgars by granting the Bulgar khan Telerig asylum in Constantinople (776-777) and marrying him to a cousin of his wife Irene. He also conducted three campaigns against the Arabs between 777 and 780.

At the beginning of his reign Leo made no attempt to continue his father's fierce Iconoclastic policy that forbade the use of icons (religious images). Instead he showed considerable moderation toward the proponents of icons, even appointing them to bishoprics. This action may have resulted from the influence of Irene, who was strongly orthodox. In 780, however, shortly before the close of his reign, he reversed his policy and initiated a persecution of those favouring the use of icons.

Notes for Irene (Emperatriz Bizantina):
Irene. 752-803. Emperatriz bizantina. Esposa de León IV. Regente durante la adolescencia de Constantino Vl. Favoreció el culto a las imigenes y convocó el Segundo Concilio Niceno de 787. Abdicó en 790. En 792 fue confirmada de nuevo como emperatriz. Se opuso a Constantino, a quien depuso, y se proclamó monarca snica y abso!uta. Fue destronada en 802.

Irene (b. c. 752, Athens--d. Aug. 9, 803, Lesbos), Byzantine ruler and saint of the Greek Orthodox Church who was instrumental in restoring the use of icons in the Eastern Roman Empire.

The wife of the Byzantine emperor Leo IV, Irene became, on her husband's death in September 780, guardian of their 10-year-old son, Constantine VI, and co-emperor with him. Later in that year she crushed what seems to have been a plot by the Iconoclasts (opposers of the use of icons) to put Leo's half brother, Nicephorus, on the throne.

Irene favoured the restoration of the use of icons, which had been prohibited in 730. She had Tarasius, one of her supporters, elected patriarch of Constantinople and then summoned a general church council on the subject. When it met in Constantinople in 786, it was broken up by Iconoclast soldiers stationed in that city. Another council, which is recognized by both the Roman Catholic and
Eastern Orthodox churches as the Seventh Ecumenical Council, met at Nicaea in 787 and restored the cult of images.

As Constantine approached maturity, he grew resentful of his mother's controlling influence in the empire. An attempt to seize power was crushed by the Empress, who demanded that the military oath of fidelity should recognize her as senior ruler. Anger at the demand prompted the themes (administrative

divisions) of Asia Minor to open resistance in 790. Constantine VI was proclaimed
sole ruler and his mother banished from court. In January 792, however, Irene was allowed to return to court and even to resume her position as co-ruler. By skillful intrigues with the bishops and courtiers she organized a conspiracy against Constantine, who was arrested and blinded at his mother's orders (797).

Irene then reigned alone as emperor (not empress) for five years. In 798 she opened diplomatic relations with the Western emperor Charlemagne, and in 802 a marriage between her and Charlemagne was reportedly contemplated. According to the contemporary Byzantine historian Theophanes, the scheme was frustrated by one of Irene's favourites. In 802 a conspiracy of officials and generals deposed her and placed on the throne Nicephorus, the minister of finance. She was exiled, first to the island of Prinkipo (now Büyükada) and then to Lesbos.

Irene's zeal in restoring icons and her patronage of monasteries ensured her a place among the saints of the Greek Orthodox Church. Her feast day is August 9.

Notes for Theodebert II, rey merovingio de Austrasia:
Theodebert II (b. c. 584--d. 612 or later), Merovingian king of Austrasia.

Theodebert succeeded his father, Childebert II, on the throne of Austrasia in 595 while his brother, Theodoric II, mounted that of Burgundy. After early cooperation against their cousin, Chlotar II of Neustria, whom they defeated at Dormelles (near Montereau) in 599 or 600, the brothers fell out. When Chlotar attacked Burgundy in 605, Austrasia stood aloof, and in 610 Theodebert seized Theodoric by duplicity and extorted the cession of Alsace. Theodoric responded by alliance with Chlotar and invasion; capturing Theodebert, who was childless, he delivered him to their grandmother, Brunhild, previously exiled from Theodebert's court, who forced him to become a cleric and perhaps had him murdered.

He was the son of **5372747776. Smbat Ablabas Bagratuni The Confessor**.

Notes for Ashot I The Great, King Of Armenia:
The election of Smbat's son Ashot I the Great, who had been accepted as "prince of princes" by the Arabs in 862, to be king of Armenia in 885 was recognized by both the caliph and the Byzantine emperor, and it was he who by his successful defense of his country against local Arab chieftains laid the foundations of a new golden age of Armenian history. Throughout the 10th century, Armenian art and literature flourished. Ashot III ("the Merciful," 952-977) transferred his capital to Ani (near modern Anipemza) and began to transform it into one of the architectural gems of the Middle Ages.

Notes for Bishop Of Metz Arnulf St.:
Arnulf OF METZ, SAINT, French SAINT ARNOUL DE METZ (b. c. 580, near Nancy [France]--d. July 18, 640?, Remiremont; feast day August 16 or 19), bishop of Metz and, with Pepin I, the earliest known ancestor of Charlemagne.

A Frankish noble, Arnulf gave distinguished service at the Austrasian court under Theudebert II (595-612). In 613, however, with Pepin, he led the aristocratic opposition to Brunhild that led to her downfall and to the reunification of Frankish lands under Chlotar II. About the same year, he became bishop.

From 623, again with Pepin, now mayor of the Austrasian palace, Arnulf was adviser to Dagobert I, before retiring (629?) to become a hermit. Arnulf's son

Ansegisel married Pepin's daughter Begga; the son of this marriage, Pepin II, was Charlemagne's great-grandfather.

Notes for Pepin I, Of Landen:
Pepin I, byname PEPIN OF LANDEN, or PEPIN THE ELDER, French PÉPIN DE LANDEN, or PÉPIN LE VIEUX (d. c. 640), councillor of the Merovingian king Chlotar II and mayor of the palace in Austrasia.

Through the marriage of his daughter Begga with Ansegisel, son of Arnulf (d. 641; bishop of Metz), Pepin was the founder of the Carolingian dynasty. Deprived of his mayoralty at the accession (629) of Dagobert I, he regained power in Austrasia after that king's death (January 639) but did not long survive to enjoy it.

Notes for Constantino V Coprónimo (Emperador Bizantino):

Constantino V. 719-775. Emperador del Imperio del Este, conocido como "el Coprónimo", hijo de León lll. Tuvo que enfrentarse a eslavos, irabes y bslgaros. Se opuso al culto de las imigenes las cuales hizo condenar por medio de un concilio de obispos. Logró derrotar a un usurpador, aumentó la población de la ciudad de Constantinopla y restauró los acueductos. Sus batallas militares y sus éxitos comerciales le dieron gran fama.

Constantine V COPRONYMUS (b. 718, Constantinople, Byzantine Empire [now Istanbul, Turkey]--d. Sept. 14, 775 [what is now Bulgaria]), Byzantine emperor from 741 to 775, son of Leo III the Isaurian.

Constantine was made coruler of the empire with his father in 720. Most of his life before and after his accession as sole ruler was spent in largely successful military campaigns against Arabs and Bulgars who threatened the empire. Because the empire's resources were thus engaged, the Lombards were able to take the exarchate of Ravenna in Italy (751), thus ending Byzantine influence in north and central Italy and indirectly fostering the historic alliance

between the papacy and the Franks. Constantine was a strong Iconoclast (one opposed to the veneration of religious images) and was remembered by contemporaries for his persecution of monks who opposed his iconoclastic position. His military achievements won him great popularity, nonetheless, and were appreciated by later historians. He died in the Balkans while on a campaign against the
Bulgarian kingdom.

Notes for Irene (Emperatriz Bizantina):
Irene, hija del kan de los Jazares.

KHAZAR, member of a confederation of Turkic-speaking tribes that in the late 6th century AD established a major commercial empire covering the southeastern section of modern European Russia. Although the origin of the term Khazar and the early history of the Khazar people are obscure, it is fairly certain that the Khazars were originally located in the northern Caucasus region and were part of the western Turkic empire (in Turkistan). The Khazars were in contact with the
Persians in the mid-6th century AD, and they aided the Byzantine emperor Heraclius (reigned 610-641) in his campaign against the Persians.

By the beginning of the 7th century, the Khazars had become independent of the Turkic empire to the east. But by the middle of that century, the expanding empire of the Arabs had penetrated as far northward as the northern Caucasus, and from then on until the mid-8th century the Khazars engaged in a series of wars with the Arab empire. The Arabs initially forced the Khazars to abandon Derbent (661), but around 685 the Khazars counterattacked, penetrating southward of the Caucasus into present-day Georgia, Armenia, and Azerbaijan. The Khazars and Arabs fought each other directly in Armenia in the 720s, and, though victory passed repeatedly from one side to the other, Arab counterattacks eventually compelled the Khazars to permanently withdraw north of the Caucasus. The Khazars' initial victories were important, though, since they had the effect of permanently blocking Arab expansion northward into eastern Europe. Having been compelled to shift the centre of their empire northward, the Khazars after 737 established their capital at Itil (located near the mouth of the Volga River) and accepted the Caucasus Mountains as their southern boundary.

During the same period, however, they expanded westward. By the second half of the 8th century, their empire had reached the peak of its power--it extended along the northern shore of the Black Sea from the lower Volga and the Caspian Sea in the east to the Dnieper River in the west. The Khazars controlled and exacted tribute from the Alani and other northern Caucasian peoples (dwelling between the mountains and the Kuban River); from the Magyars (Hungarians) inhabiting the area around the Donets River; from the

Goths; and from the Greek colonies in the Crimea. The Volga Bulgars and numerous Slavic tribes also recognized the Khazars as their overlords.

Although basically Turkic, the Khazar state bore little resemblance to the other Turkic empires of central Eurasia. It was headed by a secluded supreme ruler of semireligious character called a khagan--who wielded little real power--and by tribal chieftains, each known as a beg. The state's military organization also seems to have lacked the forcefulness of those of the greater Turkic-Mongol empires. The Khazars seem to have been more inclined to a sedentary way of life, building towns and fortresses, tilling the soil, and planting gardens and vineyards. Trade and the collection of tribute were major sources of income. But the most striking characteristic of the Khazars was the apparent adoption of Judaism by the khagan and the greater part of the ruling class in about 740. The circumstances of the conversion remain obscure, the depth of their adoption of Judaism difficult to assess; but the fact itself is undisputed and unparalleled in central Eurasian history. A few scholars have even asserted that the Judaized Khazars were the remote ancestors of many eastern European and Russian Jews. Whatever the case may be, religious tolerance was practiced in the Khazar empire, and paganism continued to flourish among the population.

The prominence and influence of the Khazar state was reflected in its close relations with the Byzantine emperors: Justinian II (704) and Constantine V (732) each had a Khazar wife. The main source of revenue for the empire stemmed from commerce and particularly from Khazar control of the east-west trade route that linked the Far East with Byzantium and the north-south route linking the Arab empire with northern Slavic lands. Income that was derived from duties on goods passing through Khazar territory, in addition to tribute paid by subordinate tribes,
maintained the wealth and the strength of the empire throughout the 9th century. But by the 10th century the empire, faced with the growing might of the Pechenegs to their north and west and of the Russians around Kiev, suffered a decline. When Svyatoslav, the ruler of Kiev, launched a campaign against the Khazars (965), Khazar power was crushed. Although the Khazars continued to be mentioned in historical documents as late as the 12th century, by 1030 their political role in the lands north of the Black Sea had greatly diminished. Despite the relatively high level of Khazar civilization and the wealth of data about the Khazars that is preserved in Byzantine and Arab sources, not a single line of the Khazar language has survived.

Notes for II Childebert, Of France:
Childebert II (b. 570--d. December 595), Merovingian king of the eastern Frankish kingdom of Austrasia and later also king of Burgundy.

Still very young on the death of his father, Sigebert I, in 575, Childebert was dominated at times by his mother, Brunhild, who was hostile to his uncle, King Chilperic of Soissons. The intervention in 575 of a second uncle, Guntram of Burgundy, to protect Childebert's southern lands against Chilperic was followed two years later by Guntram's adoption of his young nephew as his heir. The Austrasian-Burgundian alliance was briefly broken in 581, when Chilperic too adopted Childebert, but Guntram bought off Childebert by the cession of territory.

After Chilperic's death in 584, Childebert, now of age, purged the Austrasian nobility and, in ostensible alliance with the Byzantine emperor, embarked on a series of unsuccessful campaigns against the Lombards of Italy. Settling his differences with Guntram, who again recognized him as heir, he duly took over Burgundy on his uncle's death in 592. Free of Guntram's restraining hand, he immediately attacked Chilperic's young son and successor, Chlotar II, but was defeated. He was succeeded by his two young sons, Theodebert II and Theodoric II.

**5369008685. Bertrada,** born Abt. 584.

Notes for Clothaire II, King Of France:
Chlotar II (b. May or June 584--d. Oct. 18, 629), Merovingian king of Neustria and sole ruler of the Franks from 613.

An infant when his father, Chilperic I, was assassinated in 584, he was assured the succession by the power of his mother, Fredegund, and by the protection of his uncle, Guntram, king of Burgundy. Fighting off an attack by his cousin Childebert II of Austrasia-Burgundy in 592, Chlotar himself seized territory from Childebert's young successors, Theodebert II and Theodoric II, in 596 but lost

much of his realm to them in 599 or 600. In 613, however, when both were dead, Austrasian hostility toward Brunhild, great-grandmother of Theodoric's young son, Sigebert II, allowed Chlotar to seize both Austrasia and Burgundy and thus to reunite the Frankish lands. He killed both Sigebert and Brunhild.

Chlotar enjoyed a high reputation among churchmen, relations with whom were regulated in a wide-ranging edict issued at the Council of Paris in October 614 and intended to settle the problems arising from the long years of turmoil. Apart from some trouble in Burgundy, the years after 613 were in fact peaceful. Chlotar did not unify the administration, however; he maintained separate mayors of the palace for the three districts over which he ruled, and in 623 he established
his son, Dagobert I, as king of Austrasia.

ii. Ludovicus, Prince Of Angus, born Abt. 737 in Escocia; died in España.

Notes for Ludovicus, Prince Of Angus:
Angus, formerly FORFARSHIRE, former county in eastern Scotland, bounded on the east by the North Sea and on the south by the Firth of Tay. The county was abolished in the administrative reorganization of 1975 and is now largely in the district of Angus (q.v.). The chief city of the county was Dundee, which was subsequently excluded from the district of Angus.

The county of Angus was originally occupied by Picts. There are remains of Pictish hill forts at several locations in the area, notably at Finavon and on the Caterthuns near Menmuir. The Romans established temporary camps in the area in the 1st

century AD, and traces of their camps and roads are still evident. From the 6th century AD on the Picts had to defend their land against Teutonic and Danish invaders from the sea and against Angles invading from Northumbria by land, and in the 11th century an invasion of Vikings was defeated. During the 12th century, colonies of Flemings established wool and linen industries in Angus, and the county consequently enjoyed a prosperity that was little affected by the Scottish Wars of Independence in the early 14th century. The county suffered more in the English Civil War in the 17th century, when both Dundee and the town of Brechin were sacked.

APELLIDO ANGULO

Tiene su procedencia en las montañas de León, donde existieron muy antiguos y nobles solares del mismo. Los hubo también en Burgos, en la Merindad de Oteo, teniendo también solar en Espinosa de los Monteros y en lugar de Angulo, de donde parece ser tomaron el apellido. Gracia-Dei, Cronista de los Reyes de España, dice que los de este linaje provienen de un hijo del rey de Escocia, que vino a servir al rey don Alfonso el Católico, en las guerras contra los moros y que trajo con él a trescientos caballeros escoceses. Y que como premio, muchos de ellos se quedaron en tierras de Castilla ricamente heredados por el Monarca. Y que de estos caballeros descienden los del apellido Angulo.

Notes for Huneric, King Of the Vandals:
Vandal, member of a Germanic people who maintained a kingdom in North Africa from AD 429 to 534 and who sacked Rome in 455. Their name has remained a synonym for willful desecration or destruction.

Fleeing westward from the Huns at the beginning of the 5th century, the Vandals invaded and devastated parts of Gaul before settling in Spain in 409. There the Asdingi Vandals under King Gunderic became the ascendant group after attacks by allies of the Romans had dissipated the Silingi and Alani Vandals. In 429 Gunderic's brother and successor, Gaiseric (q.v.; reigned 428-477), settled his people in North Africa, where they became federates of Rome in 435. Four years later Gaiseric threw off Roman overlordship, captured Carthage, and established an independent autocracy. With their rule firmly established in what is now northern Tunisia and northeastern Algeria, the Vandals eventually annexed Sardinia, Corsica, and Sicily, and their pirate fleets controlled much of the western Mediterranean. Under Gaiseric, the Vandals even invaded Italy and captured Rome in June 455. For a fortnight they occupied the city and systematically plundered it, carrying off many valuable works of
art.

The Vandals were ardent Arian Christians, and their persecutions of the Roman Catholic church in Africa were at times fierce, particularly during the last years of the reign of Gaiseric's successor, Huneric (reigned 477-484). In 533 the Byzantines under Belisarius invaded North Africa following the deposition by the usurper Gelimer of Huneric's son, Hilderich, who was a close friend of the Byzantine emperor Justinian I. In one campaigning season the Vandal kingdom was destroyed. Rome again ruled the area and restored the churches to the Roman Catholics. The Vandals played no further role in history.

Notes for León III el Isiurico (Emperador Bizantino):

León lll. 680-741. Emperador bizantino. Primer miembro de su dinastia llamada Isiurica. Soldado que derrocó a Teodosio lll, derrotó a los musulmanes y convenció al califa Suieman de que dejara tranquila la ciudad de Constantinopla que éste trataba de tomar. Prohibió el culto a las imigenes. También reformó la economka, las leyes y el Ejército. Confiscó tierras papales. Reinó de 717 a 741.

Leo III, byname LEO THE ISAURIAN (b. c. 675-680, Germanicia, Commagene, Syria--d. June 18, 741, Constantinople), Byzantine emperor (717-741), who founded the Isaurian, or Syrian, dynasty, successfully resisted Arab invasions, and engendered a century of conflict within the empire by banning the use of religious images (icons).

Military accomplishments.

Born at Germanicia (Mar'ash) in northern Syria (modern Maras, Tur.), as a youth he was taken by his parents (who apparently were prosperous) to Mesembria, in Thrace. Emperor Justinian II appointed the young man to the prestigious rank of spatharius (attendant) as a reward for assisting him in the recovery of his throne in 705. But the Emperor soon developed a distrust of him and therefore sent him to perform a perilous mission among the Alani on the remote eastern frontier,
anticipating that he would never return. Despite the danger, Leo accomplished his assignment, managed to preserve his life, and ultimately, at the hands of a subsequent emperor, Anastasius II (713-715), received appointment as commander of the Anatolikon, the largest theme, or military-district army, in Asia Minor. As the result of a military revolt in 715, Anastasius was deposed, exiled to a monastery, and replaced by Theodosius III. Leo, in alliance with Artavasdos, the commander of the Armeniakon theme (the second largest in Asia Minor), refused to recognize the new emperor and continued to champion the cause of Anastasius. Meanwhile, Arab armies had invaded Asia Minor. Leo deceived them into believing that he would subjugate the empire for them, and thus he won their goodwill and support for his own attempt to seize the throne. After persuading them to spare Byzantine territory, he marched on Constantinople. The feeble
Theodosius III abdicated, realizing that opposition was futile. Leo became emperor on March 25, 717.

Leo's first task as emperor was the organization of the defense of Constantinople against the Arab troops under Maslamah ibn 'Abd al-Malik, who angrily perceived the deception. They besieged the city by land and sea from Aug. 15, 717, to Aug. 15, 718. Leo's skillful defense, which was aided by Greek fire (an igneous petroleum mix), a severe winter, desertions from the Arab fleet, and a
Bulgarian assault upon those Arabs who had encamped in Thrace, compelled Maslamah to abandon the siege, which was the second and supreme Arab effort to capture Constantinople. Leo's victory marked an important check to Arab expansionism, preventing their establishment of a bridgehead in southeastern Europe. His complicated negotiations with the Arabs, as well as

those earlier with the Alani, brought him a contemporary reputation for cleverness.

Leo consolidated his authority by crushing a rebellion in Sicily and a plot of army officers and officials to restore former emperor Anastasius II to the throne. Leo then sealed an alliance with his associate Artavasdos by marrying his daughter Anna to him. Throughout the reign, Artavasdos remained the second most powerful man in the empire by virtue of his control of several important military posts. Leo's wife, Maria, bore him a son, Constantine, whom he crowned in 720. An able diplomat, Leo married Constantine in 733 to a daughter of the Khagan of the Khazars; the marriage brought Leo a valuable military alliance with the Khazars in the trans-Caucasus against the Arabs.

Leo maintained peaceful relations with the Bulgarians to the north, enabling him to concentrate his military abilities against the Arab menace to Asia Minor. In 740 he won a major victory over the Arabs at Akrolnos (Afyonkarahisar). This victory freed Asia Minor from any immediate serious threat of Arab conquest, and it made possible the forceful counteroffensive and reconquest of some lost territory in the subsequent reign of his son Constantine V (741-775). He also repaired the extensive walls of Constantinople.

An energetic soldier-emperor, who personally led his troops in battle, Leo displayed great concern for the efficiency of his army. His victories improved army morale. He subdivided some of the very large military-district armies, or themes, which had proved, as his own career demonstrated, so large and powerful that their commanders might attempt to seize the throne. Whether or not this administrative reorganization was itself responsible for subsequent stability, he did succeed in halting the vulnerability of the throne to military overthrow. He unquestionably left the army a more effective instrument at his death than he had found it on his accession. It no longer seems probable, however, that he planned or established a comprehensive system of social and institutional reforms.

Religious policies.

Leo's military achievements earned him great popularity with his soldiers and the people and may have given him the confidence to pursue his religious policies forcefully. He not only held firm religious opinions but he also had a profound belief in his duty as emperor to implement them as he understood them. In 722 he ordered the forcible baptism of Jews and Montanists (a Christian heretical group). He personally investigated but did not prosecute adherents of the Paulician heresy. The origins and nature of his policy of Iconoclasm, the most singular religious development in his reign, are obscure and controversial. He was deeply religious and seems to have become genuinely convinced of the sacrilegious character of religious pictures and relics as objects of veneration in worship services. It is uncertain whether any boyhood experiences in northern Syria, including contact with Muslims, influenced his Iconoclastic views, as his critics often charged. The Iconoclastic opinions of certain bishops in western Asia Minor did, however, have some effect upon him. Thus, in 726 he began to

speak out publicly against the use of sacred pictures. Opposition to his doctrines
may have been the cause for an unsuccessful rebellion against him in the Cyclades Islands in 727.

In 730 he proclaimed Iconoclasm the official policy of the empire and ordered the removal and destruction of sacred pictures in churches. When Patriarch Germanus I of Constantinople refused his demand for approval of these policies, Leo removed him and appointed a patriarch of his own choice, Anastasius. Where necessary, Leo employed harsh penalties, such as beatings and
imprisonment, against recalcitrant ecclesiastics. His policies met particularly strong opposition from monastic circles. Popes Gregory II and Gregory III also strongly rejected his efforts to impose Iconoclasm upon Byzantine-controlled areas of Italy. Leo retaliated by halting financial contributions to the papacy from southern Italy, and he may also have removed the churches of Sicily, Calabria, and Illyria from papal jurisdiction and placed them under the patriarch of Constantinople. At any rate, his actions severely strained relations with the papacy, causing the popes to turn increasingly to the Frankish kings as alternative protectors of the Holy See in Rome and weakening the Byzantine position in the Italian peninsula. Other harsh taxation and administrative measures added to his unpopularity in Sicily and southern Italy. Although an able commander, Leo neglected to maintain strong naval forces in the western Mediterranean and thus further weakened Byzantine power there.

Legal and other accomplishments.

One of Leo's most important acts was the promulgation, in 726, of the Ecloga, a law code of modest length, which represented a revision of Roman legal practices as embodied in the 6th-century Corpus Juris Civilis (Body of Civil Law) of Emperor Justinian I. Consciously attempting torevise Roman law in accordance with Christian principles, Leo devoted much space in the Ecloga to the regulation of marriage and property rights. Amputation and mutilation often were substitutes in this new code for the former death penalties. Leo provided regular salaries for legal officials to discourage the corrupt custom of offering gifts or bribes to judges and bureaucrats. An important codification of military law, the so-called Soldiers' Law, is sometimes attributed to Leo, but its true ascription is uncertain.

Other than his sincere predilection for theological topics, Leo's intellectual interests are unknown. He possessed, doubtless from boyhood, a speaking knowledge of Arabic. Although there is little evidence of intellectual activity during his reign, the earlier charge that he halted higher education in Constantinople by closing an ecclesiastical academy (because of the faculty opposition to Iconoclasm) can no longer be credited with certainty. Similarly, there is little source material on economic or demographic developments during his reign, but the numerous earthquakes doubtless inflicted major damage on towns and the countryside.

Leo was buried in the Church of the Holy Apostles at Constantinople. There is inadequate information on internal history in the last eight years of his reign, but he certainly failed to silence opposition to his Iconoclastic policies; in fact, Iconoclasm divided the empire for another century. He had instilled his Iconoclastic opinions and his grasp for military tactics in his son Constantine V, who ably followed and even intensified the policies of his father. Although Leo's memory was reviled by those later Byzantines who deplored his Iconoclasm, he was admired, especially in certain military circles, for his forceful and generally successful efforts to strengthen the state.

Justiniano II es el sltimo de los hericlidas; su hijo Tiberio, asn nino, es degollado cuando él mismo es derrocado por segunda vez, en 711. Se suceden entonces algunos anos de competición por el trono, en la que resultan triunfadores, cada uno en su momento, Filkpico Bardanes, un armenio (diciembre 711 junio 713), Artemio, coronado con el nombre de Anastasio II (junio 13 agosto 715), Teodosio III (715-717) y por sltimo León III, proclamado el 18 de abril de 716 y coronado el 25 de marzo de 717. Cada uno de estos hombres se apoya en otras fuerzas a través de las grandes circunscripciones militares y administrativas, denominadas themas, que aparecen desde las sltimas décadas del siglo VII. León tiene a su cargo el thema de Oriente (Anatolikon) y recibe ayuda de Artavasdos, comandante del thema armeniaco y armenio, el mismo, a juzgar por su nombre; lo convertiri en su yerno tras la victoria. Con él llega al poder el sector clave del frente oriental, de donde él mismo es oriundo, ya que nació en Germaniqueia. Su descendencia masculina conserva el trono hasta 797. Su hijo Constantino V le sucede en 741, después de haber sido asociado al Imperio a partir de 720, a la edad de dos anos. En 741-742 impide un intento de usurpación por parte de Artavasdos, respaldado por los themas de Opsiquión y el armeniaco; por su parte, Constantino, cuenta con la fidelidad de los themas de Oriente y de Tracia. Constantino V reina hasta 775. Casado en 733 con la hija del kan de los jazares, bautizada con el nombre de Irene, tiene tres hijos de ella, entre los que se cuenta su sucesor, León IV; después tiene otros hijos fruto de una tercera unión. León IV, asociado a su padre desde 750, reina de 775 a 780. Se casa con una ateniense, también llamada Irene, y le sucede su hijo Constantino VI. La lucha de este sltimo con su madre y la acción de ésta tienen tanta relación con toda la historia interna de la época que no es posible extendernos aquk sobre ello. La dinastka isiurica llega de hecho a su fin cuando ella lo hace cegar en 797, aunque la propia Irene se mantiene en el poder hasta
802.

Notes for Hamazasp (III) Mamilkonian, Prince Of Armenia:
Hamazasp Mamikonian, sided with Byzantium, but after 661 Arab suzerainty was reestablished, although Byzantine-Arab rivalry, Armenian resistance, and reluctance to pay the tribute made the region difficult to govern. An unsuccessful revolt led by Mushegh Mamikonian (771-772) resulted in the virtual extinction of the Mamikonians as a political force in Armenia and in the emergence of the Bagratunis and Artsrunis as the leading noble families. The Arabs' choice in 806 of Ashot Bagratuni the Carnivorous to be prince of Armenia marked the establishment of his family as the chief power in the land. The governor Smbat Ablabas Bagratuni remained loyal to the caliph al-Mutawakkil when al-Mutawakkil sent his general Bugha al-Kabir to bring the rebellious nakharars to submission, although Smbat, too, was dispatched in 855 with the rest of the captive nobles to Samarra.

Notes for I Sigbert, Of France:
Sigebert I (b. 535--d. November? 575, Vitry, near Arras, Fr.), Frankish king of the Merovingian dynasty, son of Chlotar I and Ingund; he successfully pursued a civil war against his half brother, Chilperic I.

When Chlotar I died in 561, his kingdom was divided, in accordance with Frankish custom, among his four sons; Sigebert became king of the northeastern portion, known as Austrasia, to which he added further territory on the death of his brother, Charibert I, in 567 or 568. Incursions by the Avars, a fierce nomadic tribe related to the Huns, compelled him to move his capital from Reims to Metz; he had twice to repel their attacks (562 and c. 568). About 567 he married Brunhild, daughter of the Visigothic king Athanagild, whose other daughter, Galswintha, married Chilperic. When Chilperic had Galswintha murdered in order to marry Fredegund, Sigebert was obliged to seek revenge. The two brothers had already fought each other, but this hostility was elevated

by the incident into a long and bitter war that was continued by the descendants of both. Sigebert defeated Chilperic, conquered most of his kingdom, and compelled him to hide in
Tournai. But at his moment of triumph, when he had just been acclaimed king by Chilperic's subjects at Vitry, he was struck down by two assassins in the service of Fredegund.

Notes for Brunhild, Of Spain:
Brunhild, also spelled BRUNHILDA, BRUNHILDE, or BRUNECHILDIS, French BRUNEHAUT (b. c.534--d. 613, Rencve, Burgundy [now in France]), queen of the Frankish kingdom of Austrasia, daughter of the Visigothic king Athanagild, and one of the most forceful figures of the Merovingian Age.

In 567 Brunhild married Sigebert I, king of Austrasia, changing her religion from Arianism to Roman Catholicism. In the same year, her sister Galswintha married Sigebert's half brother Chilperic I, king of the western part of the Frankish territory, but in 567 or 568, at the instigation of his concubine Fredegund, Chilperic had Galswintha murdered. Prompted by Brunhild, Sigebert then exacted Galswintha's marriage settlement (Bordeaux, Limoges, Quercy, Béarn, and
Bigorre) as retribution from Chilperic. When Chilperic tried to recover this territory, war broke out between him and Sigebert (573). At first it ran in Sigebert's favour, but in 575 he was assassinated and Brunhild was imprisoned at Rouen. There, however, Merovech, one of Chilperic's sons, went through a form of marriage with her (576). Chilperic soon had this union dissolved, but Brunhild
was allowed to go to Metz in Austrasia, where her young son Childebert II had been proclaimed king. There she was to assert herself against the Austrasian magnates for the next 30 years.

After Childebert's death (595 or 596), Brunhild failed to set herself up as guardian over Childebert's elder son, Theodebert II of Austrasia, and thus stirred up against him his brother Theodoric II, who had succeeded to Burgundy. Theodebert was finally overthrown in 612, but Theodoric died soon afterward (613), whereupon Brunhild tried to make the latter's eldest son, the 12-year-old Sigebert II, king of Austrasia. The Austrasian magnates, reluctant to endure
her tyrannous regency, appealed to Chlotar II of Neustria against her. Brunhild tried in vain to enlist the help of the tribes east of the Rhine, then fled to Burgundy, but was handed over to Chlotar at Rencve (northeast of Dijon). She was tortured for three days, bound on to a camel and exposed to the mockery of the army, and finally dragged to death at a horse's tail (autumn 613).

Notes for Recaredo rey Visigodo de España:
Leovigild's son Recared (586-601), recognizing that the majority of the people adhered to the Catholic faith, repudiated his father's religious policy and announced his conversion to Catholicism. As the Gothic nobles and bishops followed his lead, a principal obstacle to the assimilation of Visigoths and Hispano-Romans was lifted. Thereafter, the Hispano-Romans, no longer expecting deliverance by Byzantium, developed a firm allegiance to the Visigothic monarchy. As a consequence, Swinthila (621-631) was able to conquer the remaining Byzantine fortresses in the peninsula and to extend Visigothic authority throughout Spain.

Notes for SAN HERMENEGILDO:
Hermenegild, SAINT (d. April 13, 585, Tarragona, kingdom of the Visigoths [Spain]; canonized 1585; feast day April 13), Visigothic prince, son of Leovigild of Spain.

Brought up in the Arian heresy, Hermenegild married (579) a daughter of Sigebert I of Austrasia, Ingund, a zealous orthodox Catholic. Given a separate command at his father's siege of Byzantine-held Seville, he was converted through the efforts of

his wife and of the bishop of Seville, St. Leander, and almost immediately rebelled against his father. He was aided initially by the Byzantines, but Leovigild succeeded in buying them off, and Hermenegild was captured and beheaded. Most contemporary writers suggested that Hermenegild was executed as a rebel, but Pope Gregory I, in his Dialogues, stated that he was killed for refusing to receive communion from an Arian bishop. His cult was subsequently authorized for Spain by Pope Sixtus V and for the whole church by Urban VIII.

**10738017368. Chilperico I, rey de Neustria (561-584),** born 539; died Octubre 584 in Chelles, France. He was the son of **21476034704. Clothaire I, King Of France** and **21476034737. Aregunda**. He married **10738017369. Fredegunda**.

**10738017369. Fredegunda,** born Abt. 550; died 597 in Paris.

Notes for Chilperico I, rey de Neustria (561-584):
Chilperic I (b. c. 539--d. September or October 584, Chelles, France), Merovingian king of Soissons whom Gregory of Tours, a contemporary, called the Nero and the Herod of his age.

Son of Chlotar I by Aregund, Chilperic shared with his three half brothers (sons of Ingund, Aregund's sister) in the partition that followed their father's death in 561, receiving the poorest region, the kingdom of Soissons. To this was added, however, the best part of Charibert's lands on the latter's death in 567 or 568, so that Chilperic's kingdom corresponded in large part to that later known as Neustria. In 568 he repudiated his wives in order to marry Galswintha, sister of the Visigothic princess, Brunhild, who had herself recently married his half brother, Sigebert I; but he soon had Galswintha murdered and immediately married Fredegund, an earlier mistress. The consequences of this crime constitute virtually the only clearly discernible thread in the tangled skein of Frankish history over the next four decades, as first Sigebert, whose relations with Chilperic had in fact been bad from the start, and then his descendants, incited by Brunhild, sought revenge for Galswintha's murder upon the persons of Chilperic, Fredegund, and their family.

Saved from apparent disaster by the assassination of Sigebert I in 575, Chilperic was prevented from seizing the lands of the dead king's young heir, Childebert II, by the action of Guntram, his third half brother and the king of Burgundy. Although Chilperic succeeded in forming an alliance with Childebert against Guntram by recognizing the young king as his heir (581), this was short-lived; in 583 Childebert and Guntram again came to terms. A year later Chilperic fell

victim to an unknown assassin, leaving a four-month-old son, Chlotar II.

Ambitious, brutal, and debauched, Chilperic nevertheless had pretensions to being a man of learning; he wrote poor poetry, became involved in theological matters, and ordered four letters to be added to the alphabet. Regarding the church as a major rival to his wealth, he treated the bishops with hostility and contempt; at the same time, he had a reputation for injustice toward his subjects at large and imposed heavy taxes.

Notes for Fredegunda:
Fredegund, French FRÉDÉGONDE (d. 597, Paris), queen consort of Chilperic I, the Merovingian Frankish king of Soissons.

Originally a servant, Fredegund became Chilperic's mistress after he had murdered his wife and queen, Galswintha (c. 568). Galswintha, however, was also the sister of Brunhild, the wife of Chilperic's half-brother Sigebert I, king of the eastern kingdom of Austrasia. Galswintha's murder engendered a violent animosity between Fredegund and Brunhild and an irreconcilable feud of more than 40 years' duration between the respective families. Fredegund was certainly responsible for the assassination of Sigebert in 575 and made attempts on the lives of Guntram (her brother-in-law and the king of Burgundy), Childebert II (Sigebert's son), and Brunhild.

After the mysterious assassination of Chilperic (584), Fredegund seized his riches and took refuge in the cathedral at Paris. Both she and her surviving son, Chlotar II, were at first protected by Guntram, but, when he died in 592, Childebert II, who had taken over his throne, attacked Chlotar, albeit unsuccessfully. From Childebert's death (595) until her own, Fredegund intrigued on Chlotar's behalf against Brunhild, who sought to rule through Childebert's sons, Theodebert II
of Austrasia and Theodoric II of Burgundy. Ruthlessly murderous and sadistically cruel, Fredegund can have few rivals in monstrousness.

Notes for Eochaid II (Rey de Dalriada):
[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 16 Feb, 1999]

Eugenius VII was elected KIng in 704, that the army might neither be disbanded nor want a governor. Not relying on his forces, he made a peace with the Pictish King Gerard. Eugenius married Gerard's daughter Spondana, who was soon after slain by two Atholians, who intended to have killed the King. The authors of this fact were in time taken and executed. The King, after this, spent much of his time in hunting, and ordered that that the actions of the kings should be preserved in the records of the monasteries. Having recommended Mordacus (son of his brother Amberkelethus, a peaceable Prince who built many churches and monasteries) for his successor, he died at Abernethy in 721, after reighning 17 years, buried at Icolmkill.

Notes for Fatimah Of Islam:
Fatimah, also spelled FATIMA, also called AZ-ZAHRA` (Arabic: Shining One) (b. c. 605, Mecca, Arabia--d. 633, Medina), daughter of Muhammad (the founder of Islam) who in later centuries became the object of deep veneration by many Muslims, especially the Shi'i. Muhammad had other sons and daughters, but they either died young or failed to produce a long line of descendants. Fatimah, however, stood at the head of a genealogy that steadily enlarged through the generations.

To the Shi'i she is particularly important because she was married to 'Ali, whom the Shi'i considered to be the legitimate heir of the authority of the Prophet Muhammad and the first of their imams. The sons of Fatimah and 'Ali, Hasan and Husayn, are thus viewed by the Shi'i as the rightful inheritors of the tradition of Muhammad, a further ramification of Fatimah's significance among Shi'i believers. Accordingly, many Islamic traditions give Fatimah's life majesty that it did not possess in historical reality.

Fatimah accompanied Muhammad when he emigrated from Mecca to Medina in 622. Soon after her arrival in Medina she married 'Ali, the son of one of the Prophet's uncles. Their first years were ones of material want. 'Ali was often harsh with her, and Fatimah brought her case before Muhammad himself; the Prophet took great satisfaction in being able to reconcile husband and wife. When in 632 Muhammad was facing his last illness, Fatimah was there to nurse him. In general she was timid and avoided involvement in political affairs. Yet after Muhammad's death she had a sharp clash with Abu Bakr, who succeeded Muhammad as leader of the Islamic community, over property that she claimed Muhammad had left her. Abu Bakr refused to sanction her claim, and for six months she and 'Ali refused to recognize his authority. It is not clear whether or not she had become reconciled to Abu Bakr by the time she died.

Notes for Gaiseric, King Of the Vandals:
Vindalos, antiguos grupos de pueblos de origen germinico, procedentes de Jutlandia (hoy Dinamarca), que emigraron al valle del rko Oder, hacia el siglo V a.C. Durante los siglos II y III d.C., se establecieron a lo largo del Danubio. Entraron en la Galia en el 406, invadieron Hispania en el 409, donde lucharon contra los visigodos (otro pueblo germano) y los romanos. En el 422 obtuvieron una victoria sobre las tropas romanas en Hispania, con lo que lograron el dominio de las regiones de la Bética y de la Cartaginense. Ocuparon la actual Sevilla y Cartago Nova en el 426. Genserico se convirtió en su rey en el 428, y bajo su mando alcanzaron su mixima poder. El ano siguiente se trasladaron al norte de Ifrica y derrotaron a los romanos. El emperador romano Valentiniano III reconoció la soberanka de Genserico en el 422. Dominaron lo que hoy es Argelia y el norte de Marruecos hacia el 435 (tras ser reconocidos por el Imperio romano como federados), y conquistaron Cartago en el 439. Su flota controló el Mediterrineo occidental, saqueó Italia, incluida Roma, en el 477. Fueron seguidores del arrianismo, y trataron con severidad a los cristianos católicos. Su poder comenzó a decaer después de la muerte de Genserico, en el 477, y en el 534 el general bizantino Belisario les derrotó, consiguiendo recuperar el reino vindalo al Imperio bizantino. El uso moderno del término vindalo refleja el terror y la hostilidad que causaron a otros pueblos con sus saqueos y pillajes, en particular en Roma.
Cabe distinguir, dentro del pueblo vindalo, dos grupos bien diferenciados: el de los vindalos silingos (que desaparecieron exterminados por los visigodos hispanos en el 418, junto a los alanos) y el de los vindalos asdingos, creadores del reino africano vindalo en el 435.
---
Genserico o Gaiserico (c.400-477), rey de los vindalos (428-477) en el momento de mixima poderko de este pueblo. Hijo ilegktimo de Godegiselo, rey de los vindalos durante la invasión de la Galia; Genserico sucedió a su hermano Gunderico (que era rey desde el 406) en el 428. Al ano siguiente, condujo a su pueblo desde Hispania hasta Ifrica. El general romano de Ifrica, Bonifacio, intentó hacer regresar a los vindalos, pero fue derrotado y forzado a huir a Italia. Tras una incursión triunfal por todo el norte de Ifrica, los vindalos conquistaron Cartago en el 439; Genserico convirtió esta ciudad en su capital. La flota vindala realizó diversas incursiones sobre Sicilia, Cerdena y Córcega. En el ano 455 Genserico tomó como pretexto la muerte del emperador romano Valentiniano III para invadir Roma. La ciudad se encontraba indefensa, por lo que los vindalos entraron en ella sin oposición; la saquearon durante catorce

dkas y se llevaron sus tesoros. Cuando se retiró, Genserico tomó como rehenes a la viuda de Valentiniano y a sus dos hijas, junto con una serie de ciudadanos romanos que fueron tratados como esclavos. Después, condujo a su ejército hacia el este, asolando Grecia y Dalmacia y amenazando Constantinopla.

Contando en su ejército con un gran nsmero de ostrogodos, o godos del este, a los que habka sometido, Atila invadió la Galia en el 451 en alianza con Genserico.

Los dos grandes intentos para someter a los vindalos realizados por el emperador romano de Occidente Mayoriano (457-461) en el 457, y por el de Oriente, León I en el 468, fueron un fracaso. El emperador de Oriente Zenón se vio obligado a reconocer las posesiones de Genserico (norte de Ifrica, Sicilia, Córcega, Cerdena y las islas Baleares), y a establecer la paz con él en el 476. Genserico fue sucedido por su hijo Hunerico, bajo cuyo reinado (477-484) el imperio africano de los vindalos comenzó a desintegrarse.

Gaiseric, also spelled GENSERIC (d. 477), king of the Vandals and the Alani (428-477) who conquered a large part of Roman Africa and in 455 sacked Rome.

Gaiseric succeeded his brother Gunderic at a time when the Vandals were settled in Baetica (modern Andalusia, Spain). In May 428 Gaiseric transported all his people, purported by him to number 80,000, to Africa. Evidently he was invited to Africa by the governor, Count Bonifacius, who wished to use the military strength of the Vandals in his struggle against the imperial government.

Gaiseric caused great devastation as he moved eastward from the Strait of Gibraltar across Africa. He turned on Bonifacius, defeated his army in 430, and then crushed the joint forces of the Eastern and Western empires that had been sent against him. In 435 Gaiseric concluded a treaty with the Romans under which the Vandals retained Mauretania and part of Numidia and became foederati (allies under special treaty) of Rome.

In a surprise move on Oct. 19, 439, Gaiseric captured Carthage, thus throwing off Roman overlordship and striking a devastating blow at imperial power. In a 442 treaty with Rome the Vandals were recognized as the masters of proconsular Africa, Byzacena, and part of Numidia. Gaiseric's fleet soon came to control much of the western Mediterranean, and he annexed the Balearic Islands, Sardinia, Corsica, and Sicily.

His most famous exploit, however, was the capture and plundering of Rome, June 455. Subsequently the King defeated two major efforts of the Romans to overthrow him, that of the emperor Majorian in 460 and that led by Basiliscus in 468. He was succeeded by his son Huneric.

Notes for Valentinian III, Roman Emperor:
[Hilda.ftw]

Valentinian III, Latin in full FLAVIUS PLACIDIUS VALENTINIANUS (b. July 2, 419, Ravenna--d. March 16, 455, Rome), Roman emperor from 425 to 455. At no time in his long reign were the affairs of state personally managed by Valentinian. He was the son of the patrician Flavius Constantius (who ruled as Constantius III in 421) and Galla Placidia. When his uncle, the emperor Honorius, died in 423, the usurper John ruled for two years before he was deposed. Then Placidia controlled the West in her young son's name until 437, although the powerful patrician Aetius became the effective ruler toward the end of this regency. The most important political event of these years was the landing of the Vandals in Africa in 429; 10 years later they threw off the overlordship of Valentinian's government.

On Oct. 29, 437, Valentinian married Licinia Eudoxia, the daughter of Theodosius II (Eastern emperor, 408-450) and Eudocia. Little is known of Valentinian in the years after his marriage. He spent his life in the pursuit of pleasure while Aetius controlled the government. In 444 Valentinian, acting in conjunction with Pope Leo I the Great, issued the famous Novel 17, which assigned to the bishop of Rome supremacy over the provincial churches. The most important political events of the closing years of his reign were the Hun invasions of Gaul (451) and of northern Italy (452), but it is not known whether Valentinian personally played any significant part in meeting these crises.

As a result of false information that made him doubt Aetius' loyalty, Valentinian murdered the great patrician with his own hands in the imperial palace at Rome on Sept. 21, 454. The following year, two barbarians, Optila and Thraustila, who had been retainers of Aetius, avenged their master by murdering the Emperor in the Campus Martius.

Valentiniano III (419-455), emperador romano de Occidente (425-455). Era hijo de Constancio III. Teodosio II, emperador romano de Oriente, le puso en el trono en el 425 bajo la regencia de su madre, Gala Placidia. Desde el 433 hasta el 454, su general Flavio Aecio fue el verdadero dirigente de su territorio. Durante el reinado de Valentiniano III, los invasores germinicos asolaron la mayor parte del Imperio occidental; Ifrica fue tomada en el 429 por Genserico, rey de los vindalos, y las provincias del Danubio, Galia e Italia fueron invadidas en el 441 por Atila, rey de los hunos. Aecio venció a Atila en el 451, en Chalons-sur-Marne (en la batalla conocida como de los Campos Cataliunicos o Campus Mauriacus), en la Galia. Valentiniano III mató a Aecio en el 454 y un ano después él mismo también fue asesinado por dos de sus generales.

Notes for Eochaid II (Rey de Dalriada):
[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 16 Feb, 1999]

Eugenius VII was elected KIng in 704, that the army might neither be disbanded nor want a governor. Not relying on his forces, he made a peace with the Pictish King Gerard. Eugenius married Gerard's daughter Spondana, who was soon after slain by two Atholians, who intended to have killed the King. The authors of this fact were in time taken and executed. The King, after this, spent much of his time in hunting, and ordered that that the actions of the kings should be preserved in the records of the monasteries. Having recommended Mordacus (son of his brother Amberkelethus, a peaceable Prince who built many churches and monasteries) for his successor, he died at Abernethy in 721, after reighning 17 years, buried at Icolmkill.

Notes for Constantius III, Roman Emperor:
[Hilda.ftw]

Constantius III (b. Dalmatia [now in Croatia]--d. Sept. 2, 421, Ravenna [Italy]), Roman emperor in 421.
Constantius came from Naissus (modern Nis, Yugos.) in the province of Moesia. In 411, as magister militum ("master of the soldiers") under the western Roman emperor Flavius Honorius (reigned 393-423), Constantius helped to overthrow the usurping emperor Constantine (Flavius Claudius Constantinus) at

Arelate (modern Arles, Fr.). He drove the Visigoths from southern Gaul into Spain in 415 but later recalled the tribe and settled it in southwestern Gaul. In 417 he married the emperor's half sister Galla Placidia. Appointed coemperor of the West by Honorius, with the title augustus, on Feb. 8, 421, Constantius died without having been recognized by the eastern emperor, Theodosius II. Constantius' son by Placidia ruled the West as the emperor Valentinian III from 425 to 455.

Constancio III (fallecido en el 421), emperador romano de Occidente (421). Fue general al servicio del emperador de Occidente, Honorio, y se convirtió en el verdadero dirigente de las provincias occidentales en el 414. Un ano después obligó a los visigodos a salir de la Galia y entrar en Hispania. En el 417, se casó con la hermana de Honorio, Gala Placidia, capturada por los visigodos en el 410 cuando su monarca, Alarico I, saqueó Roma, y cuya liberación fue negociada en el 416 en el marco de un pacto concluido entre el rey visigodo Valia y Constancio, por el cual los visigodos se convertkan en pueblo federado del Imperio y deberkan expulsar a los vindalos, suevos y alanos de Hispania. En el 418 se acordó el definitivo foedus (alianza) que concedió a los visigodos territorios en el sur de la Galia, donde constituyeron el reino de Tolosa. Honorio asoció a Constancio al poder en el 421, cuando le nombró coemperador, pero unos meses después éste falleció en Naissus (la actual ciudad serbia de Nis). Hijo suyo y de Gala Placidia fue el emperador Valentiniano III.

Notes for Galla Placidia:
Placidia, Aelia Galla (b. c. 390--d. Nov. 27, 450), Roman empress, the daughter of the emperor Theodosius I (ruled 379-395), sister of the Western emperor Flavius Honorius (ruled 393-423), wife of the Western emperor Constantius III (ruled 421), and mother of the Western emperor Valentinian III (ruled 425-455).

Captured in Rome when the city fell to the Goths in 410, she was carried off to Gaul and married (414) to the Visigothic chieftain Ataulphus, who was assassinated in 415. In 416 Galla Placidia was restored to the Romans, and the following year she was married to Constantius. She adorned Ravenna with a number of churches; the small chapel usually--though wrongly--known as the Mausoleum of Galla Placidia contains some of the finest examples of early Byzantine mosaics.

ii. Honoria, Roman Princess, born Abt. 420; married Attila, King Of The Huns; born Abt. 406; died 453.

Notes for Attila, King Of The Huns:
Atila (c.406-453), rey de los hunos (c.433-453), conocido en Occidente como el 'azote de Dios', llamado Etzel por los alemanes y Ethele por los húngaros.
Se sabe poco de los primeros años de la vida de Atila, excepto el hecho de ser miembro de la familia gobernante de los hunos, un pueblo nómada de origen asiático que se abalanzó desde las estepas del Caspio, en repetidas correrías, sobre el Imperio romano. Antes del nacimiento de Atila, los hunos alcanzaron el río Danubio en incursiones contra el Imperio romano de Oriente; en torno al año 432d.C. habían adquirido tal poder que el tío de Atila, el rey huno Roas, o Rugilas, recibía un gran tributo anual de Roma. Atila sucedió a su tío, compartiendo el trono al principio con su hermano Bleda, al que asesinó en el 445. En el año 447 Atila avanzó por Iliria y devastó toda la región comprendida entre el mar Negro y el Mediterráneo. Aquellos pueblos conquistados que no fueron destruidos fueron forzados a servir en su ejército. Derrotó al emperador bizantino Teodosio II, y Constantinopla se salvó por la única razón de que el ejército huno, básicamente formado por fuerzas de caballería, carecía de las técnicas de asedio a una gran ciudad. Sin embargo, Teodosio fue obligado a ceder una parte del territorio, al sur del Danubio, y pagar un tributo y un subsidio anual.
Contando en su ejército con un gran número de ostrogodos, o godos del este, a los que había sometido, Atila invadió la Galia en el 451 en alianza con Genserico, rey de los vándalos. Se encontró con el general romano Flavio Aecio y fue derrotado ese mismo año en la gran batalla de Châlons-sur-Marne (conocida como de los Campos Cataláunicos), que tuvo lugar cerca de la actual ciudad francesa de Troyes; según todos los relatos, esta fue una de las más terribles batallas de la antigüedad. Los romanos fueron ayudados por los visigodos, o godos del oeste, al mando de su rey Teodorico I. Los historiadores de la época estiman las pérdidas del ejército de Atila entre 200.000 y 300.000 bajas, un número que en la actualidad se cree altamente exagerado. Aecio, con gran juicio, permitió a los hunos retirarse, siguiéndoles de lejos hasta el Rin.
Parcialmente recuperado de la derrota, Atila dirigió al año siguiente su atención hacia Italia, donde arrasó Aquilea, Milán, Padua y otras ciudades, avanzando hacia Roma. Ésta se salvó de la destrucción exclusivamente gracias a la mediación del papa León I, quien en una entrevista personal se dice había impresionado al rey huno con su majestuosa presencia. En el

año 453 Atila se preparó una vez más para invadir Italia, pero murió antes de que pudiera llevar a cabo el plan.
Una importante consecuencia de la invasión de Italia por Atila fue que algunos de los pueblos conquistados, especialmente los vénetos, del noreste de Italia, buscaron refugio entre las islas, pantanos y lagos en la cabecera del mar Adriático, y en ese lugar fundaron un Estado que con el paso del tiempo se convirtió en la República de Venecia.

He announced that his objective in the West was the kingdom of the Visigoths (a Germanic people who had conquered parts of the two Roman empires) centred on Tolosa (Toulouse) and that he had no quarrel with the Western emperor, Valentinian III. But in the spring of 450, Honoria, the Emperor's sister, sent her ring to Attila, asking him to rescue her from a marriage that had been arranged for her. Attila thereupon claimed Honoria as his wife and demanded half the Western Empire as her dowry.

Notes for Theodosius II, Eastern Roman Emperor:
[Hilda.ftw]

Theodosius II (b. April 10, 401, Constantinople [now Istanbul, Tur.]--d. July 28, 450), Eastern Roman emperor from 408 to 450. He was a gentle, scholarly, easily dominated man who allowed his government to be run by a succession of relatives and ministers.

The son of the Eastern emperor Arcadius (reigned 383-408), he was made coemperor in 402 and became sole ruler of the East upon his father's death in 408. At first the able Anthemius, praetorian prefect of the East, was regent for young Theodosius. Anthemius dropped out of sight in 414, when the emperor's

sister Pulcheria received the title augusta and assumed the regency. Throughout his reign, control of the government remained out of Theodosius' hands.

At various times during his reign, Theodosius sent armies against the Vandals of Africa, the Persians, and the Huns. His generals defeated Persian (Sasanian) invaders in 422 and 447, but campaigns against the Vandals, who had occupied most of Roman Africa in 429, ended in failure. Theodosius' policy of appeasing the mighty Hun leader Attila did not prevent massive Hun invasions of the Danubian provinces in 441-443 and 447. His reign was also troubled by a dispute over the heretical
doctrines of Nestorius, whom Theodosius appointed patriarch of Constantinople in 428. Nestorius was deposed by a church council in 431.

Theodosius' name is associated with three important projects. The first, erection of an impregnable wall around Constantinople (413), was actually the work of Anthemius. The emperor did, however, have a hand in founding the University of Constantinople in 425 and in supervising compilation of the Theodosian Code (published 438), which codified the laws issued after 312. Theodosius died from injuries suffered during a hunting accident. His daughter Licinia Eudoxia married the Western Roman emperor Valentinian III (reigned 425-455).

BRITANICA

Notes for Eudocia (Athenais):
Eudoxia llevó el nombre de Atenais antes de convertirse al cristianismo. Era la esposa de Teodosio II, emperador de Oriente, e hija del sofista ateniense Leoncio y dedicó su juventud a elevados estudios literarios y cientkficos. Ganada por su talento y simpatka, Pulqueria la casó con su hermano, el Emperador, que concibió por ella una verdadera pasión; pero sus celos infundados ofendieron vivamente a su esposa, que dejó la corte marchando a Jerusalén.
Siguió, en un principio, la herejka de Eutiquio y reintegrada al cristianismo tomó el no nombre de Eudoxia. Se le atribuyen varias obras, unas perdidas y otras apócrifas. Se citan como suyas el Octateuco, parifrasis fiel de la escritura, en verso heroico; otra parifrasis de las profeckas de Zacarkas y Daniel; un Poema sobre el martirio de San Cipriano, bastante mediano y snico que ha llegado a nosotros, y una dudosa vida de Jesucristo en versos homéricos.

DICCIONARIO DEL MUNDO CLASICO, Ignacio Errandonea, T 1 Pg 203

Eudocia, original name ATHENAIS (d. Oct. 20, 460, Jerusalem), wife of the Eastern Roman emperor Theodosius II. She was a highly cultured woman who exercised great influence over her husband until her withdrawal from Constantinople.

Athenais, as she was then called, came from Athens, where her father, Leontius, was a pagan philosopher. Before she and Theodosius were married (in June 421), Athenais was baptized a Christian and changed her name to

Eudocia. A year later she gave birth to a daughter, Licinia Eudoxia, who married (437) the Western emperor Valentinian III (reigned 425-455). In 438 Eudocia went on a year's pilgrimage to Jerusalem. After a quarrel with Theodosius' influential sister
Pulcheria, she returned to Jerusalem in 443 and remained there for the rest of her life, directing the rebuilding of that city's fortifications and the construction of several splendid churches.

Eudocia was sympathetic to Monophysitism--a heresy that maintained that Christ's human nature is absorbed in his divine nature--but she died an orthodox Christian. In addition to religious poetry she wrote a panegyric on the Roman victory over the Persians (422).

Notes for Teodeberto I, rey de Reims (534-548):
Theodebert I (b. c. 495/500--d. 547 or 548), Merovingian king of Reims who succeeded his father, Theodoric I, in 533 or 534 and greatly expanded the area under Frankish hegemony.

A proven soldier before he came to the throne, Theodebert exploited the war in Italy between Byzantium and the Ostrogoths to gain extensive territory in the Alpine regions and the northeast of the peninsula, though most of this was lost after his death. With expansion also in the east as far as the later Brandenburg, Theodebert claimed control of peoples from the Baltic to beyond the Danube. By minting coins bearing his, rather than the Byzantine emperor's, effigy and name,
Theodebert asserted his independence of Constantinople, against which he apparently even envisaged mounting an expedition. Just and generous, especially to the church, Theodebert is the most appealing of the Merovingians and, Clovis apart, perhaps the most remarkable personality among them. He was succeeded by his son, Theodebald.

Waccho (d. c. 539), king of the Lombards in the period preceding the invasion of Italy, when they occupied territory roughly coinciding with Austria north of the Danube. Waccho assassinated his uncle Tato and usurped the throne c. 510, ruling for 30 years.

Tato's son and grandson took refuge with the king of a neighbouring people, the Gepidae, making several fruitless attempts to recover rule over the Lombards. Shortly after 536 Waccho made a treaty with the Byzantine emperor Justinian I against the Gepidae. In 539 the Ostrogoth king of Italy, Witigis, hard-pressed by Justinian's general Belisarius, sent ambassadors to Waccho, offering him money in exchange for military aid. Waccho refused, preferring to remain on good terms with Constantinople. Married successively to daughters of the kings of the Thuringians, of the Gepidae, and of the Heruli, Waccho was succeeded by a young son who died during the regency of the Lombard chief Audoin; this regent's son Alboin became the king who destroyed the Gepidae and invaded Italy.

Notes for Teodeberto I, rey de Reims (534-548):
Theodebert I (b. c. 495/500--d. 547 or 548), Merovingian king of Reims who succeeded his father, Theodoric I, in 533 or 534 and greatly expanded the area under Frankish hegemony.

A proven soldier before he came to the throne, Theodebert exploited the war in Italy between Byzantium and the Ostrogoths to gain extensive territory in the Alpine regions and the northeast of the peninsula, though most of this was lost after his death. With expansion also in the east as far as the later Brandenburg, Theodebert claimed control of peoples from the Baltic to beyond the Danube. By minting coins bearing his, rather than the Byzantine emperor's, effigy and name,
Theodebert asserted his independence of Constantinople, against which he apparently even envisaged mounting an expedition. Just and generous, especially to the church, Theodebert is the most appealing of the Merovingians and, Clovis apart, perhaps the most remarkable personality among them. He was succeeded by his son, Theodebald.

Notes for Clovis I Merovingian King:
Clovis I (b. c. 466--d. Nov. 27, 511, Paris), Merovingian founder of the Frankish kingdom that dominated much of western Europe in the early Middle Ages.

Clovis was the son, and probably the only son, of Childeric I, king of the Salian Franks of Tournai. To judge from the remains of Childeric's burial at Tournai, he seems to have been a federate chieftain of some standing and certainly a pagan. Under the same pagan gods, his son Clovis, who succeeded him in 481, advanced south to conquer northern Gaul. There survives a letter to him written by Bishop Remigius (Rémi) of Reims, congratulating him on taking over the administration of Belgica Secunda and advising him to listen to the bishops. At

Soissons, in 486, Clovis defeated Syagrius, the last Roman ruler in Gaul. This opened to him the whole area of the Somme and the Seine and in particular brought him the extensive properties of the Roman treasury in that area. Clovis appears to have met with some resistance from the cities, and Franks not of his following seem to have been slow in coming to his aid. But he established his power at least as far south as Paris between the years 487 and 494. The Armoricans of western Gaul and the Germanic peoples of the Rhineland offered more serious opposition; and at the Loire he made contact with the Visigoths, protégés of Theodoric, the formidable ruler of Ostrogothic Italy.

Of the history of these early years, virtually nothing is known that is not recorded by Bishop Gregory of Tours, who wrote toward the end of the 6th century. Gregory's aim was to depict a heroic pagan warrior who owed his success to conversion to the true faith of Christianity. The outlines of his story are acceptable as historical fact, being based partly on the epic traditions of the Merovingian family itself and partly on annalistic records kept by the Christian church. (The name Merovingian derives from Merovich, a close relative of Childeric.)

The king whom Gregory portrays is primarily a warrior--bold, subtle, and unscrupulous in dealing with possible rivals among the Frankish chieftains of the northeast. A famous story told of him by Gregory best illustrates his qualities. A splendid vase was seized by Clovis' followers from a church (perhaps Reims), and the bishop begged for its return. At the next division of booty, which took place at Soissons, the king asked for the vase in addition to his agreed share of booty. One Frank objected and smashed the vase with his axe. The king restored it, broken as it was, to the bishop and said nothing. But a year later, at a military assembly, he recognized the offending warrior and took occasion to rebuke him for his ill-kept weapons, flinging his axe to the ground. As the man bent to pick it up, the king split his skull with his own axe, remarking, "Thus you treated the vase at Soissons." Gregory entirely approved: the church was avenged and so was the king; and the rest of Clovis' following was terrified.

But Clovis was also pious and credulous, as befitted a warrior whose gods had brought him great success. Though master of a Roman province effectively controlled by dynasties of able Gallo-Roman bishops, he showed no disposition to seek conversion until after his marriage to a Catholic princess, the Burgundian Clotilda (later St. Clotilda), in about 493. Three years later he undertook a campaign against the Alamanni of the middle Rhine, and at Zülpich (Tolbiac) his forces faced defeat. Only at this point did he think of invoking the help of his wife's god; and defeat was turned to victory. Even then a period of some two years elapsed before the combined efforts of Clotilda and Bishop Remigius (later St. Remigius of Reims) persuaded him to seek baptism. This took place at Reims, after a visit to Tours and due consultation with his warriors, several of whom were baptized with him. The Frankish settlers of the countryside remained pagan, and their conversion was a slow and spasmodic business. Their grave-site goods were to betray a rustic paganism at least until the 7th century.

It was to Catholicism, not to Arianism, that Clovis had turned. This may have affected his abortive intervention in the political affairs of Burgundy shortly afterward, for the Burgundians were mostly Arians. Some Burgundian detachments followed him on his subsequent campaigns, but he cannot be said to have conquered Burgundy or annexed it to Francia. A letter to him from Avitus, bishop of Burgundian Vienne, fully recognizes the risk to his barbarian charisma that the king ran in denying the pagan gods of his ancestors. In place of pagan fortuna, the bishop urges, the king has acquired Christian sanctitas, which will equally see him to victory.

In 506 Clovis was still active in the Rhineland against both the Alamanni and the Thuringians. In 507 he finally turned against the powerful Visigoths of Gaul south of the Loire. But first he sought the patronage of St. Martin of Tours, greatest of the Gallo-Roman saints. His subsequent victory over the Arian Visigoths at Vouillé, near Poitiers, was attributed by him to that patronage. His family had acquired a spiritual patron revered by all his Gallo-Roman subjects. Though he
penetrated as far south as Bordeaux and sent his son to capture the Visigoth capital of Toulouse, he did not expel the Goths from Septimania or turn southern Gaul into a settlement area for his people. He contented himself with returning to Tours, where he gave thanks to St. Martin for victory and received the insignia of an honorary consulate from the Eastern emperor, Anastasius. He abandoned the Gallo-Roman south to its own devices and established himself at Paris, a good forward post from which to control the Armoricans of the west, the Thuringians on
the Rhine, and the still-troublesome Franks of the north and east. In Paris he built a church dedicated to the Apostles (later Sainte-Genevicve).

Two revealing actions belong to the last year or so of Clovis' life. The first was the summoning of a church council at Orléans, attended by 32 bishops. Its canons, which survive, reveal the extent to which the king personally concerned himself with its deliberations. The second was the promulgation of Lex Salica, the law of the Salian Franks who accepted his authority. This constitutes 65 clauses regulating the life of the countryside. Uninfluenced by Christianity, they are a political manifesto rather than a precise legal statement of how the Franks ordered their lives. What they certainly reveal is the enhanced authority of the king and his willingness to make use of Gallo-Roman skills in ruling his own barbarians. Clovis died at the age of 45 and was buried in his Church of the Apostles. His Christian grave has never been found.

Making every allowance for Gregory of Tours's intention to represent him as a second Constantine, Clovis still stands out as a barbarian of heroic stature. Starting from small beginnings, he had been accepted as ruler by the Gallo-Romans; with imperial approval he had made the first serious attack on the Arian-Gothic confederation of western Europe; he had taken for his people the momentous decision that they were ultimately to be converted to Catholicism, not Arianism; and, perhaps most difficult of all, he had made one political people of the various Frankish tribes of modern Belgium and the Rhineland. Henceforward, Frankish power was to penetrate and colonize east

of the Rhine. His family was secure in an unrivaled dominance that was to last until the 8th
century.

Ninguna de las dinastkas germinicas que fundaron los estados de Europa Occidental sobre las ruinas del Imperio Romano alcanzó el brillo, el poderko y la duración, sobre todo, de la Casa Real de los Francos, que nosotros llamamos merovingia. De sus orkgenes nada sabemos. Naturalmente, como en los demis pueblos birbaros, la ascendencia del monarca, persona sagrada, jefe y sacerdote a la vez, entroncaba con los dioses paganos, parentesco mkstico del que derivaba su posición. Pero con la conversión de Clodoveo en 506 se cortó la tradición y ello en forma expresa. Se Conserva el texto de la carta que San Avito escribio al rey franco con motivo de su bautismo, en la que senala: "De todo el pasado de tu antigua estirpe conserva snicamente tu nobleza de sangre; pero desde hoy todo lo demis que pueda aumentar el orgullo de linaje de tus descendientes ha de arrancar snicamente de ti mismo, porque en este mundo imperas como tus mayores, pero para tus descendientes eres ts, en adelante, la norma en el reino de Dios y su derecho y autoridad divinos han de estar en la fe católica de su antecesor Clodoveo".

Notes for St. Clotilde Of Burgundy:
Clotilda, SAINT, also spelled CLOTILDE, CHLOTHILDE, CHLOTILDE, CHRODECHILDE, CHRODIGILD, or CHROTECHILDIS (d. June 3, c. 545, Tours, Fr.; feast day June 3), queen consort of Clovis I, king of the Franks, in whose momentous conversion to Christianity she played a notable part.

Clotilda was the granddaughter of Gundioc, king of Burgundy, who was related to the Visigothic kings and shared their Arian Christian faith. At Gundioc's death his kingdom was divided between his four sons, Gundobad, Godegesil, Chilperic, and Gundomar. Clotilda's father Chilperic and her mother were murdered by Gundobad, and Clotilda and her sister took refuge with Godegesil in Geneva. Clovis, hearing good reports of Clotilda, obtained Gundobad's permission for their marriage in 493. She bore him four sons, Ingomer and the future kings Clodomir, Childebert I, and Chlotar I.

Clotilda was tireless in urging her husband to renounce his idols and acknowledge the true God; his final decision (498?) was made to honour a vow taken during a battle against the Alemanni. After Clovis' death (511), she retired to Tours and became famous for her sanctity of life, generosity to the church, and charity work. She was buried beside Clovis in the church, now Sainte-Genevicve,
that they had cofounded in Paris.

Notes for Amalarico, rey visigodo de España:
Amalaric (d. 531), king of the Visigoths (526-531), son of Alaric I.

Amalaric was a child when his father fell in battle against Clovis, king of the Franks (507). He was carried for safety into Spain, which country, with southern Languedoc and Provence, was thenceforth ruled by his maternal grandfather Theodoric the Great through his vice-regent, an Ostrogothic nobleman named Theudis. On Theodoric's death in 526, Amalaric assumed full royal power in Spain and a part of Languedoc, relinquishing Provence to his cousin Athalaric.
He married Clotilda, daughter of Clovis, but his disputes with her, he being an Arian and she a Catholic, brought on a Frankish invasion, in which he lost his life.

iii. Childebert, King Of Cologne, born Abt. 498 (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997); died 23 Diciembre 588 in París, Francia (Source: Brøderbund WFT Vol. 5, Ed. 1, Tree #1330, Date of Import: 16 Dic 1997).

Notes for Childebert, King Of Cologne:

Childebert I (b. c. 498?--d. Dec. 23, 558, Paris), Merovingian king of Paris from 511, who helped to incorporate Burgundy into the Frankish realm.

Childebert was a son of Clovis I and Clotilda. He received lands in northwestern France, stretching from the Somme down to Brittany, in the partition of his father's kingdom in 511; to these he added part of the kingdom of Orléans in the 520s (by the murder of his brother Chlodomer's young heirs), part of the kingdom of Burgundy in 534 (by conquest, with his brother Chlotar I), and Provence in 537 (by treaty). After a campaign in 531 against the Visigoths, who still held the coastal strip between the Rhône and the Pyrenees, he invaded Spain itself in 542 in alliance with Chlotar; although the expedition had no great success, he did bring back with him the tunic of the martyred St. Vincent, housing this in a new foundation at Paris that came to be called Saint-Germain-des-Prés. Childebert left no sons, and his lands were taken over by Chlotar on his death.

Notes for Amalarico, rey visigodo de Espana:
Amalaric (d. 531), king of the Visigoths (526-531), son of Alaric I.

Amalaric was a child when his father fell in battle against Clovis, king of the Franks (507). He was carried for safety into Spain, which country, with southern

Languedoc and Provence, was thenceforth ruled by his maternal grandfather Theodoric the Great through his vice-regent, an Ostrogothic nobleman named Theudis. On Theodoric's death in 526, Amalaric assumed full royal power in Spain and a part of Languedoc, relinquishing Provence to his cousin Athalaric. He married Clotilda, daughter of Clovis, but his disputes with her, he being an Arian and she a Catholic, brought on a Frankish invasion, in which he lost his life.

Notes for Leovigild Of Spain:
Leovigild, also spelled LIUVIGILD, Spanish LEOVIGILDO (d. April/May 586, Toledo, Spain), the last Arian ruler in Visigothic Spain, who did much to restore the extent and power of the Visigothic kingdom.

Brother of King Athanagild (d. 567), Leovigild succeeded (568) to that part of the Visigothic kingdom that lay south of the Pyrenees. Another brother, Liuva, ruled in Septimania, but after his death (572) Leovigild became sole king. Throughout his reign he was constantly at war. He took (569) Leon and Zamora from the Suebi in the northwest and Córdoba (571-572) from the Greeks in the south. One of Leovigild's sons, Hermenegild, married Ingund, daughter of Brunhild and of the Frankish king Sigebert, and was converted by her to Catholicism. He received
support from his father's enemies, and Leovigild had to fight on all fronts. Leovigild defeated the Suebi, ultimately annexing their kingdom, and after a two-year siege he wrested Seville from the Byzantines (581-583). Hermenegild was executed in 585, his wife fleeing to Africa. On a pretext of avenging her treatment, the Frankish kings Childebert II and Guntram attacked Septimania

and sent a fleet to help the Suebi; they were repulsed by Leovigild. At his death he
was succeeded by his remaining son Reccared.

Notes for Ali Ben Abu Talib Of Islam:
'Ali, in full 'ALI IBN ABU TALIB (b. c. 600, Mecca--d. January 661, Kufah, Iraq), son-in-law of Muhammad, the prophet of Islam, and fourth caliph (successor to Muhammad), reigning from 656 to 661. The question of his right to the caliphate resulted in the only major split in Islam (into Sunnah and Shi'ah branches). He is revered by the Shi'ah as the only true successor to the Prophet.

'Ali was the son of Abu Talib, chief of a local clan. When his father became impoverished, 'Ali was taken under the care of Muhammad, then still a businessman in Mecca, who himself had been cared for by 'Ali's father as a child. When Muhammad felt God's call to become his prophet, 'Ali, though only 10 years old, became one of the first converts to Islam and remained a lifelong devoted follower of Muhammad. According to legend 'Ali risked his life by sleeping in the Prophet's bed to impersonate him the night that Muhammad fled in 622 from Mecca to Medina from enemies who were plotting to assassinate him. In addition, 'Ali is said to have carried out Muhammad's request to restore all the properties that had been entrusted to him as a merchant to their owners in Mecca. Only then did 'Ali himself leave for Medina. There he married Muhammad's daughter Fatimah, who bore him two sons, Hasan and Husayn.

'Ali is said to have displayed rare courage in battle during the military expeditions Muhammad conducted to consolidate Islam and always obtained a lion's share of the booty. 'Ali was also one of Muhammad's scribes and was chosen to lead several important missions. When the hostile inhabitants of

Mecca finally accepted Islam without battle, it was 'Ali who smashed the pagan idols in the Ka'bah (holy shrine).

Muhammad died on June 8, 632. Some say he had unequivocally nominated 'Ali as his successor while he was returning from his "farewell pilgrimage" to Mecca. Others reject this claim, maintaining that Muhammad died without naming a successor. 'Ali, while attending the last rites of the Prophet, was confronted by the fact that Abu Bakr, Muhammad's closest friend and father of 'A`ishah, one of the Prophet's wives, had been chosen caliph. 'Ali did not submit to Abu Bakr's authority for some
time, but neither did he actively assert his own rights, possibly because he did not want to throw the Muslim community into bloody tribal strife. He retired into a quiet life in which religious works became his chief occupation. The first chronologically arranged version of the Qur`an is attributed to him, and his excellent knowledge of the Qur`an and Hadith (the sayings and deeds of Muhammad) aided the caliphs in various legal problems.

Following the murder of 'Uthman, the third caliph, 'Ali was invited by the Muslims of Medina to accept the caliphate; reluctant, he agreed only after long hesitation. His brief reign was beset by difficulties due mostly to the corrupt state of affairs he inherited. Acutely aware of the neglect of the Qur`an and the traditions of Muhammad that his predecessors had allowed to develop, he based his rule on the Islamic ideals of social justice and equality. His policy was a blow to the interests of the Quraysh aristocracy of Mecca who had grown rich in the wake of the Muslim conquests. In order to embarrass 'Ali they demanded that he bring the murderers of 'Uthman to trial, and when he rejected their request, a rebellion against him was instigated in which two prominent Meccans along with 'A`ishah, Muhammad's widow and the daughter of Abu Bakr, the first caliph, took a leading part. This rebellion, known as the Battle of the Camel (the camel ridden by 'A`ishah), was quelled. A second rebellion was on the point of being crushed when its leader, Mu'awiyah, a kinsman of 'Uthman and the governor of Syria, averted defeat by proposing arbitration. 'Ali saw through the stratagem but was forced by his army to accept adjudication, which greatly weakened his position. Soon, moreover, he had to fight some of the very people who had
earlier forced him to accept arbitration but now denounced it. Known as Khawarij (Seceders), they were defeated by Ali in the Battle of Nahrawan. Meanwhile, Mu'awiyah followed an aggressive policy, and by the end of 660 'Ali had lost control of Egypt and of the Hejaz. While praying in a mosque at Kufah in Iraq, 'Ali was struck with a poisoned sword by a Kharijite, intent on avenging the men slain at Nahrawan. Two days later 'Ali died and was buried near Kufah.

'Ali's political discourses, sermons, letters, and sayings, collected by ash-Sharif ar-Radi (d. 1015) in a book entitled Nahj al-balaghah ("The Road of Eloquence") with commentary by Ibn Abi al-Hadid (d. 1258), are well known in Arabic literature.

Notes for Fatimah Of Islam:
Fatimah, also spelled FATIMA, also called AZ-ZAHRA` (Arabic: Shining One) (b. c. 605, Mecca, Arabia--d. 633, Medina), daughter of Muhammad (the

founder of Islam) who in later centuries became the object of deep veneration by many Muslims, especially the Shi'i. Muhammad had other sons and daughters, but they either died young or failed to produce a long line of descendants. Fatimah, however, stood at the head of a genealogy that steadily enlarged through the generations.

To the Shi'i she is particularly important because she was married to 'Ali, whom the Shi'i considered to be the legitimate heir of the authority of the Prophet Muhammad and the first of their imams. The sons of Fatimah and 'Ali, Hasan and Husayn, are thus viewed by the Shi'i as the rightful inheritors of the tradition of Muhammad, a further ramification of Fatimah's significance among Shi'i believers. Accordingly, many Islamic traditions give Fatimah's life majesty that it did not possess in historical reality.

Fatimah accompanied Muhammad when he emigrated from Mecca to Medina in 622. Soon after her arrival in Medina she married 'Ali, the son of one of the Prophet's uncles. Their first years were ones of material want. 'Ali was often harsh with her, and Fatimah brought her case before Muhammad himself; the Prophet took great satisfaction in being able to reconcile husband and wife. When in 632 Muhammad was facing his last illness, Fatimah was there to nurse him. In general she was timid and avoided involvement in political affairs. Yet after Muhammad's death she had a sharp clash with Abu Bakr, who succeeded Muhammad as leader of the Islamic community, over property that she claimed Muhammad had left her. Abu Bakr refused to sanction her claim, and for six months she and 'Ali refused to recognize his authority. It is not clear whether or not she had become reconciled to Abu Bakr by the time she died.

Notes for Gundobad, King Of Burgundy:
473-516 creado "patricio romano" por el emperador Olibrio (23 Oct 472)

Gundobad, also called GUNDIBALD (d. 516), barbarian general during the last days of the Roman Empire in the west, and king of the Burgundians (c. 474-516).

The nephew of the barbarian emperor-maker Ricimer, Gundobad briefly held the supreme military command in the Roman service. In 473 he emulated his uncle when he himself placed a puppet, Glycerius, on the throne of Ravenna, but the subsequent deposition of Glycerius by Julius Nepos, the appointee of the

eastern emperor, sent Gundobad fleeing back to his Burgundians.
After becoming joint ruler (with his brothers) of the Burgundians, he murdered his brother Chilperic; the latter's daughter, Clotilda, later (c. 493) married the Frankish king Clovis. In 500 Gundobad fought off a Frankish attack and killed another brother, Godegisel, who had brought it about.

Though formally an Arian, Gundobad was in fact a secret Catholic sympathizer and enjoyed good relations with the orthodox clergy, as with the Romans in general over whom he ruled. The most important act of Gundobad's reign in Burgundy was his promulgation, early in the 6th century, of two codes of law, the Lex Gundobada, applying to all his subjects, and, somewhat later, the Lex Romana Burgundionum, applying to his Roman subjects.

His father Gundioc, king of Burgundy, was related to the Visigothic kings and shared their Arian Christian faith. At Gundioc's death his kingdom was divided between his four sons, Gundobad, Godegesil, Chilperic, and Gundomar.

Nov. 3, 361, Mopsucrenae, Honorias [now in Turkey]), Roman emperor from 337 to 361, who at first shared power with his two brothers, Constantine II (d. 340) and Constans I (d. 350), but who was sole ruler from 353 to 361. The third son of Constantine I the Great and Fausta, Constantius served under his father as caesar from 323 to 337. When Constantine died on May 22, 337, the troops massacred many of his relatives, allegedly at Constantius' instigation. Constantius then divided the empire with his brothers, taking the eastern provinces (Thrace, Macedonia, Greece, Asia, and
Egypt) for himself. Between 338 and 350 he was engaged in inconclusive but extremely bloody warfare with the Persian king Shapur II.

In 350 Constantius returned to Europe to confront two usurpers. Vetranio, commander of the Danube forces, had taken power in Illyricum (now western Yugoslavia); the rest of Europe was seized by the barbarian officer Magnentius, who in 350 executed Constans, the ruler in the West. At Naissus (modern Nis, Yugos.), Constantius persuaded Vetranio to abdicate, and in 351 he crushed Magnentius at Mursa (modern Osijek, Yugos.). During this struggle Constantius appointed his cousin, Gallus Caesar, administrator of the East. But Caesar proved to be a despotic ruler, and in 354 Constantius recalled him and had him executed. After campaigning against the Sarmatian, Suebi, and Quadi tribes on the Danube in 357-358, Constantius returned east to fight Shapur, who had renewed his attacks on the eastern frontier (359). In 361 Constantius was recalled to the West by the revolt of Julian, his caesar in Gaul, but became ill on the way and died.

As an advocate of Arian Christianity, Constantius passed laws against paganism and exiled many Roman Catholic bishops. He drove the influential anti-Arian bishop of Alexandria, Athanasius, into hiding in 356.

Notes for Theodosius I (emperor 379-395):
Teodosio I el Grande (c.346-395), emperador romano de Oriente (379-395) y de Occidente (394-395), el sltimo gobernante que dirigió un Imperio romano unido. Teodosio nació en Cauca (actual Coca, Segovia), en Hispania, hijo del general romano Flavio Teodosio (conocido como Teodosio el Viejo). De joven acompanó a su padre en sus campanas de Britania; al morir éste se retiró a Hispania. Cuando Flavio Valente, el emperador romano de Oriente, murió luchando contra los visigodos en Adrianópolis en el 378, el emperador romano de Occidente, Flavio Graciano, nombró a Teodosio para sustituirle y éste fue coronado el ano siguiente como augusto. En el 382, tras numerosas escaramuzas, Teodosio negoció con los godos un tratado de paz favorable, que les permitka residir en el territorio imperial a condición de que sirvieran en su Ejército. Después de morir asesinado Graciano en el 383, Teodosio reconoció al usurpador, Magno Clemente Miximo, como emperador de Occidente, a excepción de Italia, donde Valentiniano II continuó como sucesor

legal de Graciano. Cuando Miximo invadió Italia en el 388, Teodosio lo derrotó, y restituyó a Valentiniano como emperador romano de Occidente.
Teodosio fue defensor del cristianismo dogmitico; persiguió a los arrianos y desalentó la prictica de la vieja religión pagana romana, a veces de forma violenta: en el 390 ordenó la masacre de 7.000 ciudadanos insurrectos de Tesalónica (Grecia), y fue excomulgado el obispo Ambrosio de Milin. En el 392 Valentiniano fue asesinado por Arbogasto, general de Teodosio, y le sucedió Eugenio, aunque como dirigente tktere. De nuevo Teodosio fue a Italia, donde derrotó a Arbogasto y a Eugenio en septiembre del 394. Durante los cuatro meses siguientes gobernó Oriente y Occidente conjuntamente. El 17 de enero del 395, tras su muerte en Milin, le sucedieron sus hijos, Arcadio en Oriente y Honorio en Occidente. Arcadio gobernó en un principio bajo la breve regencia de Flavio Rufino y Honorio bajo la del general Flavio Estilicón.

Theodosius I, byname THEODOSIUS THE GREAT, in full FLAVIUS THEODOSIUS (b. Jan. 11, AD 347, Cauca [Coca], Gallaecia--d. Jan. 17, 395, Mediolanum [Milan]), Roman emperor of the East (379-392) and then sole emperor of both East and West (392-395), who, in vigorous suppression of paganism and Arianism, established the creed of the Council of Nicaea (325) as the universal norm for Christian orthodoxy and directed the convening of the second general council at Constantinople
(381) to clarify the formula.

Background and youth

Theodosius was born in the province of Gallaecia in northwestern Spain. His father was to become the general Flavius Theodosius; his mother's name is unknown. His grandparents, like his parents, were probably already Christians. Theodosius, who grew up in Spain, did not receive an extensive education but was intellectually open-minded and acquired a special interest in the study of history.

While on his father's staff, he participated in his campaigns against the Picts and Scots in Britain in 368-369, against the Alemanni in Gaul in 370, and against the Sarmatians in the Balkans in 372-373. As a military commander in Moesia, a Roman province on the lower Danube, he defeated the Sarmatians in 374. When his father was sentenced to death and executed as a result of political intrigues by enemies at court, Theodosius withdrew to his Spanish estates. At the end of 376, he married Aelia Flacilla, also a Spaniard. His first son, the future emperor Arcadius, was born in 377, and his daughter Pulcheria in 378.

Immediately after the catastrophic defeat of the emperor Valens, who perished at the hands of the Visigoths and other barbarians on Aug. 9, 378, near Adrianople, the emperor Gratian unexpectedly summoned Theodosius to his court. When Theodosius had once again proved his military ability by a victory

over the Sarmatians, Gratian proclaimed him co-emperor on Jan. 19, 379. His dominion was to be the eastern part of the empire, including the provinces of Dacia (present-day Romania) and Macedonia, which had been especially infiltrated by barbarians in the preceding few years.

Early years as emperor

In 379 and 380 Theodosius resided chiefly in Thessalonica. He sought first to rebuild the army, the discipline of which was considerably impaired, and to consolidate Rome's position on the Balkan peninsula. Military unpreparedness could not be overcome by conscription alone, which applied only to certain classes. Theodosius therefore directed that large numbers of Teutons, who had been barred from military service, be accepted by the army. By 379, however, when foreigners had already intermingled extensively with the rest of the army, both among the troops and in all ranks of the officer corps, Theodosius did no more than many of his predecessors to encourage this process. In contrast to the West, in Theodosius' provinces both Romans and Teutons were among the leading generals.

Recognizing that the barbarians, who had invaded the provinces as early as 375, could no longer be expelled by force and that he could count on Gratian for only limited assistance, Theodosius sought new possibilities for coexistence. This resulted in the friendly reception of the Visigoth Athanaric in 381 and the conclusion of a treaty of alliance, or foedus, with the main body of the Visigoths in the fall of 382. The Goths, who pledged themselves to lending military assistance, were assigned territory for settlement between the lower Danube and the Balkan mountains. Under this novel arrangement, an entire people was settled on imperial soil while retaining its autonomy. Theodosius may have hoped that the Goths would become integrated, as had a group of Goths who in c. 350 had settled near Nicopolis in Moesia; their leader, Bishop Ulfilas, undertook missionary work among the parties to the foedus of 382.

Some historians have regarded Theodosius as biassed in favour of the Goths. He has even been accused of having contributed decisively, through the treaty of 382, to the downfall of Rome. Yet, it should be noted that the policy of that treaty, which was undertaken in the justified expectation of raising Roman military strength and recultivating tracts of wasteland, by no means became customary. Instead, the Emperor took strict measures against further invasions by Teutonic bands and did not permit
any doubts to arise as to Roman claims of superiority over the barbarians.

Theodosius' situation was complicated by the sharp antagonism that arose around 379 between disciples of the Nicene Creed (according to which Jesus Christ is of the same substance as God the Father) and several other Christian groups in his part of the empire. Theodosius himself, the first emperor who did not assume the title of pontifex maximus (supreme guardian of the old Roman cults), believed in the Nicene Creed, despite his Baptism only after a serious illness in the fall of 380.

Out of political as well as religious motives, he energetically undertook to bring about unity of faith within the empire. His position was improved by the fact that during 379 the followers of the Nicene Creed gained ground, whereupon Theodosius on Feb. 28, 380, without consulting the ecclesiastical authorities, issued an edict prescribing a creed that was to be binding on all subjects. Only persons who believed in the consubstantiality of God the Father, Son, and Holy Spirit were henceforth to be
considered Catholic Christians, a designation that here appears for the first time in a document.

There is no doubt that the principle of religious intolerance was proclaimed in this edict. When assessing the edict, however--which should not be viewed simply as an isolated measure--it must be remembered that to the Christians Theodosius was emperor by the grace of God. While thus committed to defend the true faith, he by no means carried out his stated intention by force. The creed, prescribed in 380, was again defined at the beginning of 381 and ecclesiastically sanctioned, as it were, by a church council summoned to Constantinople by Theodosius in the summer of 381.
That gathering is considered the second ecumenical council.

The Symbolum Nicaeno-Constantinopolitanum (i.e., the Niceno-Constantinopolitan Creed [or Symbol]), which is still used by most Christians, along with the ranking by the council fathers of the bishop of Constantinople directly after the bishop of Rome, can thus be traced back to Theodosius. Henceforth, the emperor's authority in matters of faith was to be recognized by the bishops of the East. There is no ground, however, for speaking of a rigidly organized imperial church controlled by the emperor.

The period when Theodosius stayed mainly in Constantinople, dating from the end of 380 to 387, is that to which most of his measures to improve the capital may be attributed. The plan for the Forum Tauri, the largest public square known in antiquity, designed after the model of Trajan's Forum in Rome, is outstanding. It is unclear, however, to what extent the Emperor encouraged the flowering of art and literature in his time.

The middle years

In 383, Maximus, a Spaniard who had been proclaimed emperor by the troops in Britain, asserted himself as ruler in the Western provinces (praefectura Galliarum). Suspicions that Theodosius was in collusion with the usurper and thus implicated in the death of Emperor Gratian in August 383 are unfounded. Theodosius, who had to acknowledge the sovereignty of Gratian's stepbrother Valentinian II, born in 371 and the nominal ruler in Italy since the end of 375, could not interfere with Maximus, for he lacked both sufficient military strength and secure borders. Yet, when Maximus invaded Italy in 387 and Valentinian was forced to flee to Thessalonica, Theodosius soon decided upon countermeasures. His decision was perhaps hastened through the influence of Valentinian's mother, whose daughter Galla he had married at the end of 387, having been a widower since 386.

Theodosius' position by that time had become stronger. Long-standing negotiations with the Persians over the division of power in Armenia had resulted in a treaty that was to become the basis for a long period of peace on the eastern border. Having ordered one army division from Egypt to Africa and sent Valentinian with a fleet to Italy, Theodosius set out in the spring of 388 with the main body of troops to move against Maximus' army, which had invaded Pannonia in the Balkans. By July the enemy was defeated. When Maximus surrendered at the end of August he was branded as a usurper, but his followers were generally treated with leniency.

In the same year, Theodosius again relinquished the West to his co-emperor Valentinian but secured his own influence by placing the Frankish general Arbogast, a man he trusted, at Valentinian's side as principal adviser. By remaining in Italy until the spring of 391, where he resided mostly in Milan, Theodosius emphasized his claim to supreme authority throughout the empire. In 389 he visited Rome, where, accompanied by his four-year-old son Honorius, he made a triumphant entry.

In Milan, Theodosius found in Bishop Ambrose an ecclesiastic who was intent upon cooperating effectively with the Emperor and even upon forming a friendship with him, although Ambrose pointed out to Theodosius the limits of the power of temporal rulers more clearly than had others. A conflict had already arisen between them in 388 over Theodosius' punishment of orthodox fanatics who had set fire to a synagogue and to the shrine of a sect. As a devout Christian, Theodosius finally acceded to the Bishop's wishes in the matter but took pains to make him understand that he was not willing to grant the Bishop greater influence in affairs of government.

A new conflict arose in 390 when, following the murder of one of his generals in Thessalonica, Theodosius issued an order for brutal retaliation. It was rescinded too late, so that a horrible massacre resulted among the population there. Ambrose had the Emperor's action condemned in a church council and bade him do public penance. After a prolonged hesitation, Theodosius complied with the order and was readmitted to communion at Christmas 390.

His penance should not be construed as a victory of the church over the Emperor but only as a demonstration of the power of atonement over the penitent sinner. The claims that arose in future centuries that the church had been placed above the temporal power derived not from Theodosius' act of penance but only from the myth generated by it. Although Theodosius had gained an important ally in Ambrose, he continued intent on preserving the emperor's authority in the face of Ambrose and other bishops.

While maintaining an entirely friendly attitude toward the church, Theodosius still took care in his legislation to see that the material interests of the state were sacrificed to enforce more strongly against the pagans the religious policy he had pursued since 379. In February 391 he prohibited sacrifices and the visiting of temples. Up to that time, he had basically tolerated the pagans and had entrusted adherents of the old cults with the highest offices.

Quarrels between his second wife, Galla, and his son Arcadius, as well as his own view of the eastern capital as the centre of the empire, prompted Theodosius to move his residence back to Constantinople, where he arrived in November 391.

Victory over pagan usurpers

A new crisis arose for Theodosius three months after Valentinian's death on May 15, 392. Arbogast treacherously proclaimed as emperor of the West a former rhetoric teacher, Eugenius, who had close connections with the pagan aristocracy of the Senate. Theodosius, who did not yet dare to risk a civil war, delayed reception of a legation requesting recognition of Arbogast's puppet. On Nov. 8, 392, he made his edicts of 391 more stringent by completely prohibiting the worship of the pagan gods. He left no further doubts as to his position when he elevated his son Honorius to Augustus in January 393
and thereby demonstrated that he would no longer tolerate any emperor other than himself and his sons. Because he still refrained from military action, his enemies occupied Italy in the spring of 393. Led by Nicomachus Flavianus, the forces striving to preserve the pagan cults gathered around Eugenius.

The now inevitable struggle for power was thus at the same time a struggle that would decide whether pagan religions would once again be tolerated within the empire alongside Christianity. Theodosius did not set out from Constantinople until May 394. As in 388, he made his way toward the Danube and then the Sava with his powerful army. His force consisted largely of barbarians and their allies, one of whose leaders was Stilicho, a Vandal who had been married since 384 to the Emperor's niece Serena. Theodosius' sons Arcadius and Honorius stayed behind in the capital. Arcadius, who had been given
the right to promulgate laws independently, was supposed to direct the government in the East.

Theodosius first met the enemy at the Frigidus River on the eastern border of Italy. Although Theodosius' advance guard, composed almost entirely of Visigoths, suffered heavy losses during an attempted breakthrough on Sept. 5, 394, the emperor ventured to attack the following day and was victorious. Later Christian tradition, emphasizing Theodosius' piety and trust in God, essentially interpreted the victory as a divine judgment: the god of the Christians had triumphed over the old
Roman gods. Following the deaths of Eugenius, Arbogast, and Nicomachus Flavianus, Theodosius showed himself lenient and strove to achieve the settlement between opposing forces that was necessary to strengthen imperial unity.

Probably as a result of the exertion of the campaign, Theodosius fell ill. He went to Milan, where he summoned Honorius in order to present him formally as Augustus of the West. Because Theodosius had appeared to recover, his death in January 395 was generally unexpected. On his deathbed he had entrusted Stilicho, promoted to generalissimo after the victory at the Frigidus, with the

care of his two sons. From Ambrose's funeral oration, filled with praise of the Christian ruler, it is evident that
contemporaries had no doubt as to the continuing unity of the empire, for the question of succession seemed to have been settled in the best possible way. Yet, all too soon it was to become apparent that Theodosius had not chosen his advisers with sufficient care and that the men who were guiding the sickly Arcadius were unwilling to cooperate with Stilicho, who remained loyal to the dynasty. After his death, Theodosius' body was borne in state to Constantinople and interred in the mausoleum
erected by Constantius II.

Notes for Gala:
Gala era hija del emperador Valentiniano I. Justina, la viuda de Valentiniano, llevando consigo sus hijos, Gala y al futuro emperador Valentiniano II, se refugió en la corte de Teodosio después de la invasión de Miximo a Italia (387). Tedosio se enamoró de Gala y se casó con ella; fruto de este matrimonio fué Gala Placidia. Gala logró gran ascendiente en el inimo de su marido, pero no pudo acompanarle en el triunfo porque la muerte la sorprendió jóven asn.

Notes for Arcadius, Eastern Roman Emperor:
Arcadius (c. 377-408), Eastern Roman emperor conjointly with his father, Theodosius I, from 383 to 395, then solely till 402, when he associated his son Theodosius II with his own rule. Frail and ineffectual, he was dominated by his ministers, Rufinus, Eutropius, and Anthemius. His empire was a prey to the Goths, and his consort Eudoxia abetted the persecution of the patriarch St. John Chrysostom.

Notes for Eudoxia, Roman Empress:
Eudoxia (d. Oct. 6, 404), wife of, and a powerful influence over, the Eastern Roman emperor Arcadius (reigned 383-408).

Her father was a Frankish chieftain and one-term Roman consul (385) named Bauto. The marriage (April 27, 395) of Arcadius to Eudoxia was arranged by Arcadius' corrupt minister, the eunuch Eutropius, who had supported the match in order to undercut the

position of a political rival. But Eudoxia came to resent being dominated by Eutropius, and in 399 she helped bring about his downfall. The period of Eudoxia's most decisive influence over her ineffectual husband dates from her designation as augusta on Jan. 9, 400.

Although an earnest Christian, she quarreled bitterly with John Chrysostom, patriarch of Constantinople, who attacked her and the frivolity of her court in outspoken terms. In 404 she expelled him from his see and sent him into exile. Shortly afterward Eudoxia died from a miscarriage. But she had borne Arcadius four daughters and a son, who became the emperor Theodosius II (reigned 408-450). One of the daughters, Pulcheria, was regent for Theodosius II for several years.

Notes for Teodorico I rey de Reims:
Theodoric I (d. 533 or 534), Merovingian king of Reims from 511. Theodoric was the eldest son of Clovis I, but born of an unknown woman, unlike the other sons, whose mother was Clotilda. An able soldier, he played an important part in his father's campaigns against the Visigoths. On Clovis' death in 511 a fourfold division of his kingdom took place, each of his sons receiving some territories north of the Loire River and some to its south. No doubt as the most experienced of the four, Theodoric received those northern lands (the future Austrasia) most exposed to attack; their axis was the Rhine. In the 520s Theodoric gained a share of his brother Clodomir's kingdom when the dead king's sons were murdered by Theodoric's two other half-brothers, Childebert and Chlotar. Theodoric campaigned with Clodomir against the Burgundians in 524 and with Chlotar against the Visigoths in 532. His greatest success lay in the subjection of the Thuringians, achieved with the help of Chlotar c. 531. It was perhaps now that the Saxons were temporarily also reduced to dependence. As violent and unscrupulous as most of the other Merovingian rulers, Theodoric was arguably the most vigorous and effective of Clovis' sons. He was succeeded by his son, Theodebert I.

Notes for Ceawlin, Of Wessex:
Ceawlin (d. 593), king of the West Saxons, or Wessex, from 560 to 592, who drove the Britons from most of southern England and carved out a kingdom in the southern Midlands.

Ceawlin helped his father, King Cynric, defeat the Britons at Beranbyrg (Barbury) in 556. In 568, eight years after he assumed the West Saxon kingship, Ceawlin and his brother Cutha severely defeated King Aethelberht I of Kent. Ceawlin's victory over the Britons at Deorham (Dyrham) in 577 led to the capture of Gloucester, Cirencester, and Bath. The valley of the lower Severn River
was thereby opened to West Saxon colonists, and the Britons of Wales were cut off from their kinsmen on England's southwestern peninsula.

Nevertheless, a king named Ceol seized at least part of Ceawlin's lands in 591. After being defeated by Ceol at Woddesbeorg (or Wodnesbeorg; now Adam's Grave in Wiltshire) in 592, Ceawlin was driven into exile. He was killed the next year. The 8th-century historian Bede included him in his list of seven successive rulers who were overlords (bretwaldas) of all the lands south of the Humber.

Notes for Childeric I king of the Salian Franks:
Childeric I (d. 481/482), king of the Salian Franks, one of the first of the Merovingians and the father of Clovis I.

The Salian Franks, in treaty with the Roman Empire, had settled in Belgica Secunda, between the Meuse and Somme rivers, making their capital at Tournai. Childeric's role as a barbarian ally of the Romans was important. He

helped the Roman military commander Aegidius to repel the Visigoths near Orléans (463); at the request of Aegidius' successor, Count Paulus, he attacked the Visigoths again in 469. Soon afterward he cleared Anglo-Saxon pirates from the district southwest of Orléans around Angers. Childeric's tomb at Tournai was discovered in 1653.

Notes for Alaric II Of Spain:
Alaric II (d. 507), king of the Visigoths, who succeeded his father Euric on Dec. 28, 484.

His dominions comprised Spain (except the kingdom of Galicia), Aquitaine, Languedoc, and western Provence. Alaric, like his father, was an Arian Christian, but he mitigated the persecution of Catholics and authorized the Catholic council at Agde in 506. To provide a law code for his Roman subjects, he appointed a commission to prepare an abstract of Roman laws and imperial decrees. This code, issued in 506, is generally known as the Lex Romana Visigothorum, or
Breviary of Alaric.

Alaric tried to maintain his father's treaty with the Franks, but Clovis, the rankish king, made the Visigoths' Arianism a pretext for war. In 507 the Visigoths were defeated in the battle of the Campus Vogladensis (Vouillé, or Vouglé, in Poitou). Alaric is said to have been overtaken in flight and killed by Clovis himself.

Notes for Ottar Egilsson, rey de Upsala:
Ottar, rey de Upsala (456-460) -segsn cronologia aproximada- decimoctava generacion desde Odin segun la Yngling saga.

ASCENDENCIA ESCANDINAVA

Tanto Ias dinastias reinantes en los tres reinos nórdicos como las que gobernaron en la heptarquia sajona de Inglaterra y la de Rusia, pretenden ser y remontar su linaje hasta Odin. Los ancestros mis antiguos y mejor documentados pareceran atribuibles a dos viejas Casas: los Yngling de Suecia y los Skioldung de Dinamarca. Ambas subsisten hasta hoy por varonia en numerosos linajes de Escocia y Rusia, respectivamente. En cuanto a Odin, parte de la critica moderna acepta su existencia histórica como un jefe huido de la region del Don ante el avance de alguna tribu enemiga y refugiado en Escandinavia para ser divinizado por la posteteridad. Por el contrario, otros, analizando el caso de los Yngling que es el que aqui nos interesa, estiman que

"descendian de la encarnacion ritual de la manifestacion viril de la antigua diosa Nertha, 'La Madre Tierra', cuyo emblema era la media luna" (Moncreiffe).

En todo caso "en que momento la genealogka de la saga comienza a ser histórica no se sabe con certeza, pero Kendrick parece pensar que ello ocurre con Ottar, que vivio quizas en el siglo VI" (Wagner, 15).

Notes for CONSTANTINO I EL GRANDE:
Constantine I the Great

Introduction

Constantine I, the first Roman emperor to profess Christianity, not only initiated the evolution of the empire into a Christian state but also provided the impulse for a distinctively Christian culture that prepared the way for the growth of Byzantine and Western medieval culture. He was born on February 27, probably in the later AD 280s, at Naissus (modern Nis, Yugos.). A typical product of the military governing class of the later 3rd century, he was the son of Flavius Valerius Constantius, an army officer, and his wife (or concubine) Helena; his full Latin name was Flavius Valerius Constantinus. In AD 293 his father was raised to the rank of Caesar, or deputy emperor (as Constantius I Chlorus), and was sent to serve under Augustus (emperor) Maximian in the West. In 289 Constantius had separated from Helena in order to marry a stepdaughter of Maximian, and Constantine was brought up in the Eastern Empire at the court of the senior emperor Diocletian at Nicomedia (modern Izmit, Tur.). Constantine was seen as a youth by his future panegyrist, Eusebius, bishop of Caesarea, passing with Diocletian through Palestine on the way to a war in Egypt.

Career and conversion.

Constantine's experience as a member of the imperial court--a Latin-speaking institution--in the Eastern provinces left a lasting imprint on him. Educated to less than the highest literary standards of the day, he was always more at home in Latin than in Greek: later in life he had the habit of delivering edifying sermons, which he would compose in Latin and pronounce in Greek from professional translations. Christianity he encountered in court circles as well as in the cities of the East; and from 303, during the great persecution of the Christians that began at the court of Diocletian at Nicomedia and was enforced with particular intensity in the eastern parts of the empire, Christianity was a major issue of public policy. It is even possible that members of Constantine's family were Christians.

In 305 the two emperors, Diocletian and Maximian, abdicated, to be succeeded by their respective deputy emperors, Galerius and Constantius. The latter were replaced by Galerius Valerius Maximinus in the East and Flavius Valerius Severus in the West, Constantine being passed over. Constantius requested his son's presence from Galerius, and Constantine made his way through the territories of the hostile Severus to join his father at Gesoriacum (modern Boulogne, Fr.). They crossed together to Britain and fought a campaign in the north before Constantius' death at Eboracum (modern York) in 306. Immediately acclaimed emperor by the army, Constantine then threw himself into a complex series of civil wars in which Maxentius, the son of Maximian, rebelled at Rome; with his father's help, Maxentius suppressed Severus, who had been proclaimed Western emperor by Galerius and who was then replaced by Licinius. When Maximian was rejected by his son, he joined Constantine in Gaul, only to betray Constantine and to be murdered or forced to commit suicide (310). Constantine, who in 307 had married Maximian's daughter Fausta as his second wife, invaded Italy in 312 and after a lightning campaign defeated his brother-in-law Maxentius at the Milvian Bridge near Rome. He then confirmed an alliance that he had already entered into with Licinius (Galerius having died in 311): Constantine became Western emperor and Licinius shared the East with his rival Maximinus. Licinius defeated Maximinus and became the sole Eastern emperor but lost territory in the Balkans to Constantine in 316. After a further period of tension, Constantine attacked Licinius in 324, routing him at Adrianople and Chrysopolis (respectively, modern Edirne and Üsküdar, Tur.) and becoming sole emperor of East and West.

Throughout his life, Constantine ascribed his success to his conversion to Christianity and the support of the Christian God. The triumphal arch erected in his honour at Rome after the defeat of Maxentius ascribed the victory to the "inspiration of the Divinity" as well as to Constantine's own genius. A statue set up at the same time showed Constantine himself holding aloft a cross and the legend "By this saving sign I have delivered your city from the tyrant and restored liberty to the Senate and people of Rome." After his victory over Licinius in 324, Constantine wrote that he had come from the farthest shores of Britain as God's chosen instrument for the suppression of impiety, and in a letter to the Persian king Shapur II he proclaimed that, aided by the divine power of God, he had come to bring peace and prosperity to all lands.

Constantine's adherence to Christianity was closely associated with his rise to power. He fought the Battle of the Milvian Bridge in the name of the Christian God, having received instructions in a dream to paint the Christian monogram of an x over a p on his troops' shields. This is the account given by the Christian apologist Lactantius; a somewhat different version, offered by Eusebius, tells of a vision seen by Constantine during the campaign against Maxentius, in which the Christian sign appeared in the sky with the legend "In this sign, conquer." Despite the Emperor's own authority for the account, given late in life to Eusebius, it is in general more problematic than the other; but a religious experience on the march from Gaul is suggested also by a pagan orator, who in a speech of 310 referred to a vision of Apollo received by Constantine at a shrine in Gaul.

Yet to suggest that Constantine's conversion was "politically motivated" means little in an age in which every Greek or Roman expected that political success followed from religious piety. The civil war itself fostered religious competition, each side enlisting its divine support, and it would be thought in no way unusual that Constantine should have sought divine help for his claim for power and divine justification for his acquisition of it. What is remarkable is Constantine's subsequent development of his new religious allegiance to a strong personal commitment.

Commitment to Christianity.

Shortly after the defeat of Maxentius, Constantine met Licinius at Mediolanum (modern Milan) to confirm a number of political and dynastic arrangements. A product of this meeting has become known as the Edict of Milan, which extended toleration to the Christians and restored any personal and corporate property that had been confiscated during the persecution. The extant copies of this decree are actually those posted by Licinius in the eastern parts of the empire. But Constantine went far beyond the joint policy agreed upon at Mediolanum. By 313 he had already donated to the Bishop of Rome the imperial
property of the Lateran, where a new cathedral, the Basilica Constantiniana (now S. Giovanni in Laterano), soon rose. The Church of St. Sebastian was also probably begun at this time, and it was in these early years of his reign that Constantine began issuing laws conveying upon the church and its clergy fiscal and legal privileges and immunities from civic burdens. As he said in a letter of 313 to the proconsul of Africa, the Christian clergy should not be distracted by secular offices from their
religious duties ". . . for when they are free to render supreme service to the Divinity, it is evident that they confer great benefit upon the affairs of state." In another such letter, directed to the Bishop of Carthage, Constantine mentioned the Spanish bishop Hosius, who was important later in the reign as his adviser and possibly--since he may well have been with Constantine in Gaul before the campaign against Maxentius--instrumental in the conversion of the Emperor.

Constantine's personal "theology" emerges with particular clarity from a remarkable series of letters, extending from 313 to the early 320s, concerning the Donatist schism in North Africa. The Donatists maintained that those priests

and bishops who had once lapsed from the Christian faith could not be readmitted to the church. Constantine's chief concern was that a divided church would offend the Christian God and so bring divine vengeance upon the Roman Empire and Constantine himself.
Schism, in Constantine's view, was inspired by Satan. Its partisans were acting in defiance of the clemency of Christ, for which they might expect eternal damnation at the Last Judgment. Meanwhile, it was for the righteous members of the Christian community to show patience and long-suffering. In so doing they would be imitating Christ, and their patience would be rewarded in lieu of martyrdom--for actual martyrdom was no longer open to Christians in a time of peace for the church. Throughout, Constantine had no doubt that to remove error and to propagate the true religion were both his personal duty and a proper use of the imperial position. His claim to be "bishop of those outside the church" may be construed in this light. Other such pronouncements, expressed in letters to imperial officials and to Christian clergy, demonstrate that Constantine's commitment to Christianity was firmer and less ambiguous than some have suggested. Eusebius confirmed what Constantine himself believed: that he had a special and personal relationship with the Christian God.

Constantine's second involvement in an ecclesiastical issue followed the defeat of Licinius; but the Arian heresy, with its intricate explorations of the precise nature of the Trinity that were couched in difficult Greek, was as remote from Constantine's educational background as it was from his impatient, urgent temperament. The Council of Nicaea, which opened in the early summer of 325 with an address by the Emperor, had already been preceded by a letter to the chief protagonist, Arius of Alexandria, in which Constantine stated his opinion that the dispute was fostered only by excessive leisure and academic contention, that the point at issue was trivial and could be resolved without difficulty. His optimism was not justified: neither this letter nor the Council of Nicaea itself nor the second letter, in which Constantine urged acceptance of its conclusions, was adequate to solve a dispute in which the participants were as intransigent as the theological issues were subtle. Indeed, for more than 40 years after the death of Constantine, Arianism was actually the official orthodoxy of the Eastern Empire.

The Council of Nicaea coincided almost exactly with the celebrations of the 20th anniversary of the reign of Constantine, at which, returning the compliment paid by the Emperor's attendance at their council, the bishops were honoured participants. But Constantine's visit to the West in 326, to repeat the celebrations at Rome, brought the greatest political crisis of the reign. During his absence from the East, and for reasons that remain obscure, Constantine had his eldest son, the deputy emperor Crispus, and his own wife Fausta, Crispus' stepmother, slain. Nor was the visit to Rome a success. Constantine's refusal to take part in a pagan procession offended the Romans; and when he left after a short visit, it was never to return.

Final years.

These events set the course of the last phase of the reign of Constantine. After his defeat of Licinius he had renamed Byzantium as Constantinople:

immediately upon his return from the West he began to rebuild the city on a greatly enlarged pattern, as his permanent capital and the "second Rome." The dedication of Constantinople (May 330) confirmed the divorce, which had been in the making for more than a century, between the emperors and Rome. Rome had long been unsuited to the strategic needs of the empire: it was now to be left in splendid isolation, as an enormously wealthy and prestigious city--still the emotional focus of the empire--but of limited political importance.

It was perhaps in some sense to atone for the family catastrophe of 326 that Constantine's mother, Helena, embarked on a pilgrimage to the Holy Land. Her journey was attended by almsgiving and pious works and was distinguished by her church foundations at Jerusalem and at Bethlehem. By the initiative of Eutropia, Constantine's mother-in-law, a church was also built at Mamre, where, according to an interpretation of Genesis shared by Constantine and Eusebius, Christ had first shown himself to men in God's appearance to Abraham; but the most famous of these foundations followed the sensational discovery of the Holy Sepulchre at Jerusalem. The discovery was taken up with enthusiasm by Constantine, who instigated the building of a great new basilica at the spot, offering unlimited help with labour and materials and suggestions as to design and decoration.

Constantine's interest in church building was expressed also at Constantinople, particularly in churches of the Holy Wisdom (the original Hagia Sophia) and of the Apostles. At Rome, the great church of St. Peter was begun in the later 320s and lavishly endowed by Constantine with plate and property. Meanwhile, churches at Trier, Aquileia, Cirta in Numidia, Nicomedia, Antioch, Gaza, Alexandria, and elsewhere owed their development, directly or indirectly, to Constantine's interest.

The Emperor was an earnest student of his religion. Even before the defeat of Licinius he had summoned to Trier the theologian and polemicist Lactantius, to be the tutor of Crispus. In later years, he commissioned new copies of the Bible for the growing congregations at Constantinople. He composed a special prayer for his troops and went on campaigns with a mobile chapel in a tent. He issued numerous laws relating to Christian practice and susceptibilities: for instance, abolishing the penalty of crucifixion and the practice of branding certain criminals; enjoining the observance of Sunday and saints' days; and extending privileges to the clergy while suppressing at least some offensive pagan practices.

Constantine had hoped to be baptized in the Jordan River, but perhaps because of the lack of opportunity to do so--together possibly with the reflection that his office necessarily involved responsibility for actions hardly compatible with the baptized state--he delayed the ceremony until the end of his life. It was while preparing for a campaign against Persia that he fell ill at Helenopolis. When treatment failed, he made to return to Constantinople but was forced to take to his bed near Nicomedia.
There, Constantine received baptism, putting off the imperial purple for the white robes of a neophyte; and he died on May 22, 337. He was buried at Constantinople in his Church of the Apostles, whose memorials, six on each

side, flanked his tomb. Yet this was less an expression of religious megalomania than of Constantine's literal conviction that he was the successor of the evangelists, having devoted his life and office to the spreading of Christianity.

Assessment.

The reign of Constantine must be interpreted against the background of his personal commitment to Christianity. His public actions and policies, however, were not entirely without ambiguity. Roman opinion expected of its emperors not innovation but the preservation of traditional ways; Roman propaganda and political communication were conditioned, by statement, allusion, and symbol, to express these expectations. It is significant, for instance, not that the pagan gods and their legends survived for a few years on Constantine's coinage but that they disappeared so quickly: the last of them, the relatively inoffensive "Unconquered Sun," was eliminated just over a decade after the defeat of Maxentius.

Some of the ambiguities in Constantine's public policies were therefore exacted by the respect due to established practice and by the difficulties of expressing, as well as of making, total changes suddenly. The suppression of paganism, by law and by the sporadic destruction of pagan shrines, is balanced by particular acts of deference. A town in Asia Minor mentioned the animous Christianity of its inhabitants in support of a petition to the Emperor; while, on the other hand, one in Italy was allowed to hold a local festival incorporating gladiatorial games and to found a shrine of the imperial dynasty--although direct religious observance there was firmly forbidden. In an early law of Constantine, priests and public soothsayers of Rome were prohibited entry to private houses; but another law, of 320 or 321, calls for their recital of prayer "in the manner of ancient observance" if the imperial palace or any other public building were struck by lightning. Traditional country magic was tolerated by Constantine. Classical culture and education, which were intimately linked with paganism, continued to enjoy enormous prestige and influence; provincial priesthoods, which were as intimately linked with civic life, long survived the reign of Constantine. Constantinople itself was predominantly a Christian city, its dedication celebrated by Christian services; yet its foundation was also attended by a well-known pagan seer, Sopatros.

An objective assessment of Constantine's secular achievements is not easy--partly because of the predominantly religious significance with which the Emperor himself invested his reign, partly because the restlessly innovatory character that dissenting contemporaries saw in his religious policy was also applied by them to the interpretation of his secular achievement. Some of Constantine's contributions can, in fact, be argued to have been already implicit in the trends of the last half century. So may be judged the further development, taking place in his reign, of the administrative court hierarchy and an increasing reliance upon a mobile field army, to what was considered the detriment of frontier garrisons. The establishment by Constantine of a new gold coin, the solidus, which was to survive for centuries as the basic unit of Byzantine currency, could hardly have

been achieved without the work of his predecessors in restoring political and military stability after the anarchy of the 3rd century. Perhaps more directly linked with Constantine's own political and dynastic policies was the emergence of regional praetorian prefectures with supreme authority over civil financial administration but with no direct control over military affairs; this they yielded to new magistri, or "masters," of the cavalry and infantry forces. The reduction of the prefects' powers was seen by some as excessively innovatory, but the principle of the division of military and civil power had already been established by Diocletian. A real innovation, from which Constantine could expect little popularity, was his institution of a new tax, the collatio lustralis. It was levied every five years upon trade and business and seems to have become genuinely oppressive.

A lavish spender, Constantine was notoriously openhanded to his supporters and was accused of promoting beyond their deserts men of inferior social status. More to the point is the accusation that his generosity was only made possible by his looting of the treasures of the pagan temples as well as by his confiscations and new taxes; and there is no doubt that some of his more prominent supporters owed their success, at least partly, to their timely adoption of the Emperor's religion.

The foundation of Constantinople, an act of crucial long-term importance, was Constantine's personal achievement. Yet it, too, had been foreshadowed; Diocletian enhanced Nicomedia to an extent that was considered to challenge Rome. The city itself exemplified the "religious rapacity" of the Emperor, being filled with the artistic spoils of the Greek temples, while some of its public buildings and some of the mansions erected for Constantine's supporters soon showed signs of their hasty construction. Its Senate, created to match that of Rome, long lacked the aristocratic pedigree and prestige of its counterpart.

In military policy Constantine enjoyed unbroken success, with triumphs over the Franks, Sarmatians, and Goths to add to his victories in the civil wars; the latter, in particular, show a bold and imaginative mastery of strategy. Constantine was totally ruthless toward his political enemies, while his legislation, apart from its concessions to Christianity, is notable mainly for a brutality that became characteristic of late Roman enforcement of law. Politically, Constantine's main contribution was perhaps that, in leaving the empire to his three sons, he reestablished a dynastic succession, but it was secured only by a sequence of political murders after his death.

Above all, Constantine's achievement was perhaps greatest in social and cultural history. It was the development, after his example, of a Christianized imperial governing class that, together with his dynastic success, most firmly entrenched the privileged position of Christianity; and it was this movement of fashion, rather than the enforcement of any program of legislation, that was the basis of the Christianization of the Roman Empire. Emerging from it in the course of the 4th century were two developments that contributed fundamentally to the nature of Byzantine and Western medieval culture: the growth of a specifically Christian, biblical culture that took its place beside the traditional Classical culture of the upper classes; and the extension of new

forms of religious patronage, between the secular governing classes and bishops, Christian intellectuals and holy men. Constantine left much for his successors to do, but it was his personal choice made in 312 that determined the emergence of the Roman Empire as a Christian state. It is not hard to see why Eusebius regarded Constantine's reign as the fulfillment of divine providence--nor to concede the force of Constantine's assessment of his own role as that of the 13th Apostle.

BRITANICA

Constantino I el Grande (c.274-337), emperador romano (306-337), el primero de ellos convertido al cristianismo. Fundador de Constantinopla (la actual Estambul), capital del Imperio romano de Oriente (y mis tarde Imperio bizantino) hasta 1453.

Los primeros anos

Nacido con el nombre de Flavio Valerio Constantino, en Naissus (hoy, Nis, en la actual Serbia), hijo del prefecto del Pretorio (jefe militar de la Guardia Pretoriana) Constancio Cloro (mis tarde emperador Constancio I) y de Elena (que llegó a ser canonizada como santa Elena). Luchó contra los sirmatas y se unió a su padre en Britania, en el 306. Fue tan popular entre sus tropas que le proclamaron aug usto cuando Constancio murió ese mismo ano. Sin embargo, durante las dos siguientes décadas tuvo que luchar contra sus rivales al trono, y no logró ser emperador snico hasta el 324.
Siguiendo el ejemplo de su padre y de los anteriores emperadores del siglo III, en su juventud fue un henoteksta solar: consideraba que el dios romano Sol era la manifestación visible de un Dios Supremo invisible (summus deus), que era el principio del Universo, y que era equiparado con el emperador romano. Su adhesión a esta creencia resultó evidente tras afirmar que vio al dios Sol, en el 310, mientras estaba en una arboleda de Apolo, en la Galia, en el mismo ano en que derrotó a Maximiano. En el 312, en la vkspera de una batalla contra Majencio, su rival en la penknsula Itilica e hijo de Maximiano, se dice que sonó como se le apareció Cristo y le dijo que grabara las dos primeras letras de su nombre (XP en griego) en los escudos de sus tropas. El dka siguiente, la leyenda dice que vio una cruz superpuesta en el sol y las palabras "con esta senal seris el vencedor" (en latkn, in hoc signo vinces). Derrotó a Majencio en la batalla del Puente Milvio, cerca de Roma, en octubre de ese ano (312). El Senado aclamó al vencedor como salvador del pueblo romano y le tituló primus augustus. Constantino consideró que el Dios cristiano le habka proporcionado la victoria, por lo que abandonó sus anteriores creencias paganas. Detuvo la persecución de los cristianos, y Licinio Liciniano, su coemperador, se le unió en la proclamación del Edicto de Milin (313), que ordenó la tolerancia del cristianismo en el Imperio romano y restituyó a la Iglesia los bienes confiscados.

Snico dirigente

Pronto comenzó la lucha por el poder entre Licinio y él, de la que en el 324 emergió snico dueno del Imperio tras derrotar a aquél en Crisópolis. Como

emperador de Oriente y Occidente, comenzó a realizar reformas administrativas importantes. Reorganizó el Ejército, y completó la separación de la autoridad civil y militar, comenzada por su predecesor, Diocleciano. Dirigió el gobierno central, en companka de un consejo asesor, conocido como el sacrum consistorium. El Senado recuperó sus poderes, los cuales habka perdido en el siglo III, y comenzó a emitir el sueldo (solidus) de oro, que fue la moneda de uso hasta el final del Imperio bizantino.
Intervino en los asuntos eclesiisticos procurando establecer la unidad de la Iglesia, amenazada por el arrianismo; con este fin presidió el primer Concilio ecuménico de la Iglesia en Nicea, en el 325. También comenzó la construcción de Constantinopla, en el 326, en el emplazamiento del antiguo Bizancio griego. La ciudad se terminó en el 330 (ampliada mis tarde), y fue embellecida con antiguas obras de arte griego. Ademis, Constantino construyó iglesias en Tierra Santa, donde se supone que Elena, su madre, encontró la Vera Cruz en la que se crucificó a Jesss. El emperador fue bautizado poco antes de su muerte, el 22 de mayo del 337.

Valoración

Constantino unificó un imperio tambaleante, reorganizó el Estado romano y preparó el terreno para la victoria final del cristianismo a finales del siglo IV. Muchos eruditos modernos aceptan la sinceridad de su convicción religiosa. Su conversión fue gradual; en un principio es probable que asociara a Cristo con el victorioso dios solar. Sin embargo, en la época del Concilio de Nicea (325), era un cristiano convencido, aunque asn toleró el paganismo entre sus ssbditos. A pesar de ser criticado por sus enemigos como defensor de una religión cruel y falsa, consolidó el Imperio romano y aseguró su supervivencia en Oriente. Como primer emperador que gobernó en el nombre de Cristo, fue una de las principales figuras en el inicio de la Europa cristiana medieval.

Notes for Fausta (Flavia Maximiana):
Fausta era hija de Maximiano y su padre la casó con Constantino (307). Las relaciones entre suegro y yerno no fueron muy cordiales y Maximiano salvó la vida en alguna ocasión por la mediación de su hija.

Notes for Valentinian I, Roman Emperor (364-375):
Valentinian I, Latin in full FLAVIUS VALENTINIANUS (b. 321--d. Nov. 17, 375, Brigetio, Pannonia Inferior), Roman emperor from 364 to 375 who skillfully and successfully defended the frontiers of the Western Empire against Germanic invasions.

Valentinian, the son of an army officer stationed in Pannonia (in central Europe), joined the army and served with his father in Africa. According to some sources, when Valentinian was a tribune in the forces of Julian the Apostate (emperor 360-363), he was disgraced for refusal to renounce Christianity. He did serve, however, in Julian's Persian expedition of 363, and was promoted by Julian's successor, Jovian, who died soon afterward (Feb. 17, 364).

Nine days later the commanders of the army proclaimed Valentinian emperor at Nicaea (modern Iznik, Tur.). On March 28 he appointed his younger brother Valens as co-ruler and assigned him to govern the East, while Valentinian retained the West. Both agreed to allow religious toleration, which, unlike Valens, Valentinian maintained throughout his reign.

Displaying inexhaustible energy, Valentinian set about fortifying and defending the borders. In January 365, his generals in Gaul were defeated by the Germanic Alemanni; by October, Valentinian had set up residence in Paris from which he directed operations against the invaders. His general Jovinus defeated them three times. At Durocatalaunum (modern Chalons-sur-Marne, Fr.), the third engagement, Jovinus inflicted heavy casualties on the Alemanni, securing Gaul for years to come. Meanwhile, in 367, the Emperor moved to Ambiani (modern Amiens, Fr.) to be in closer communication with his general Theodosius (father of the later emperor Theodosius I), who was defending Britain from Saxon, Pictish, and Scottish invaders.

In order to strengthen the line of succession, Valentinian proclaimed (Aug. 24, 367) his nine-year-old son, Gratian, as co-emperor. Two months later Valentinian took up residence at Trier (now in Germany). He remained there for seven years, devoting his attention to the construction of an elaborate system of fortifications on the Rhine. Then, an invasion of Pannonia by the Quadi in 375 brought Valentinian to Sirmium (modern Sremska Mitrovica, Yugos.), where he soon fell sick and died.

Despite his achievements, Valentinian gained a reputation for irritability and cruelty. He frequently chose ministers of the worst character who ruthlessly oppressed the provincials.

Notes for Clovis I Merovingian King:
Clovis I (b. c. 466--d. Nov. 27, 511, Paris), Merovingian founder of the Frankish kingdom that dominated much of western Europe in the early Middle Ages.

Clovis was the son, and probably the only son, of Childeric I, king of the Salian Franks of Tournai. To judge from the remains of Childeric's burial at Tournai, he seems to have been a federate chieftain of some standing and certainly a pagan. Under the same pagan gods, his son Clovis, who succeeded him in 481, advanced south to conquer northern Gaul. There survives a letter to him written by Bishop Remigius (Rémi) of Reims, congratulating him on taking over the administration of Belgica Secunda and advising him to listen to the bishops. At Soissons, in 486, Clovis defeated Syagrius, the last Roman ruler in Gaul. This opened to him the whole area of the Somme and the Seine and in particular brought him the extensive properties of the Roman treasury in that area. Clovis appears to have met with some resistance from the cities, and Franks not of his following seem to have been slow in coming to his aid. But he established his power at least as far south as Paris between the years 487 and 494. The

Armoricans of western Gaul and the Germanic peoples of the Rhineland offered more serious opposition; and at the Loire he made contact with the Visigoths, protégés of Theodoric, the formidable ruler of Ostrogothic Italy.

Of the history of these early years, virtually nothing is known that is not recorded by Bishop Gregory of Tours, who wrote toward the end of the 6th century. Gregory's aim was to depict a heroic pagan warrior who owed his success to conversion to the true faith of Christianity. The outlines of his story are acceptable as historical fact, being based partly on the epic traditions of the Merovingian family itself and partly on annalistic records kept by the Christian church. (The name Merovingian derives from Merovich, a close relative of Childeric.)

The king whom Gregory portrays is primarily a warrior--bold, subtle, and unscrupulous in dealing with possible rivals among the Frankish chieftains of the northeast. A famous story told of him by Gregory best illustrates his qualities. A splendid vase was seized by Clovis' followers from a church (perhaps Reims), and the bishop begged for its return. At the next division of booty, which took place at Soissons, the king asked for the vase in addition to his agreed share of booty. One Frank objected and smashed the vase with his axe. The king restored it, broken as it was, to the bishop and said nothing. But a year later, at a military assembly, he recognized the offending warrior and took occasion to rebuke him for his ill-kept weapons, flinging his axe to the ground. As the man bent to pick it up, the king split his skull with his own axe, remarking, "Thus you treated the vase at Soissons." Gregory entirely approved: the church was avenged and so was the king; and the rest of Clovis' following was terrified.

But Clovis was also pious and credulous, as befitted a warrior whose gods had brought him great success. Though master of a Roman province effectively controlled by dynasties of able Gallo-Roman bishops, he showed no disposition to seek conversion until after his marriage to a Catholic princess, the Burgundian Clotilda (later St. Clotilda), in about 493. Three years later he undertook a campaign against the Alamanni of the middle Rhine, and at Zülpich (Tolbiac) his forces faced defeat. Only at this point did he think of invoking the help of his wife's god; and defeat was turned to victory. Even then a period of some two years elapsed before the combined efforts of Clotilda and Bishop Remigius (later St. Remigius of Reims) persuaded him to seek baptism. This took place at Reims, after a visit to Tours and due consultation with his warriors, several of whom were baptized with him. The Frankish settlers of the countryside remained pagan, and their conversion was a slow and spasmodic business. Their grave-site goods were to betray a rustic paganism at least until the 7th century.

It was to Catholicism, not to Arianism, that Clovis had turned. This may have affected his abortive intervention in the political affairs of Burgundy shortly afterward, for the Burgundians were mostly Arians. Some Burgundian detachments followed him on his subsequent campaigns, but he cannot be said to have conquered Burgundy or annexed it to Francia. A letter to him from Avitus, bishop of Burgundian Vienne, fully recognizes the risk to his barbarian

charisma that the king ran in denying the pagan gods of his ancestors. In place of pagan fortuna, the bishop urges, the king has acquired Christian sanctitas, which will equally see him to victory.

In 506 Clovis was still active in the Rhineland against both the Alamanni and the Thuringians. In 507 he finally turned against the powerful Visigoths of Gaul south of the Loire. But first he sought the patronage of St. Martin of Tours, greatest of the Gallo-Roman saints. His subsequent victory over the Arian Visigoths at Vouillé, near Poitiers, was attributed by him to that patronage. His family had acquired a spiritual patron revered by all his Gallo-Roman subjects. Though he
penetrated as far south as Bordeaux and sent his son to capture the Visigoth capital of Toulouse, he did not expel the Goths from Septimania or turn southern Gaul into a settlement area for his people. He contented himself with returning to Tours, where he gave thanks to St. Martin for victory and received the insignia of an honorary consulate from the Eastern emperor, Anastasius. He abandoned the Gallo-Roman south to its own devices and established himself at Paris, a good forward post from which to control the Armoricans of the west, the Thuringians on
the Rhine, and the still-troublesome Franks of the north and east. In Paris he built a church dedicated to the Apostles (later Sainte-Genevicve).

Two revealing actions belong to the last year or so of Clovis' life. The first was the summoning of a church council at Orléans, attended by 32 bishops. Its canons, which survive, reveal the extent to which the king personally concerned himself with its deliberations. The second was the promulgation of Lex Salica, the law of the Salian Franks who accepted his authority. This constitutes 65 clauses regulating the life of the countryside. Uninfluenced by Christianity, they are a political manifesto rather than a precise legal statement of how the Franks ordered their lives. What they certainly reveal is the enhanced authority of the king and his willingness to make use of Gallo-Roman skills in ruling his own barbarians. Clovis died at the age of 45 and was buried in his Church of the Apostles. His Christian grave has never been found.

Making every allowance for Gregory of Tours's intention to represent him as a second Constantine, Clovis still stands out as a barbarian of heroic stature. Starting from small beginnings, he had been accepted as ruler by the Gallo-Romans; with imperial approval he had made the first serious attack on the Arian-Gothic confederation of western Europe; he had taken for his people the momentous decision that they were ultimately to be converted to Catholicism, not Arianism; and, perhaps most difficult of all, he had made one political people of the various Frankish tribes of modern Belgium and the Rhineland. Henceforward, Frankish power was to penetrate and colonize east of the Rhine. His family was secure in an unrivaled dominance that was to last until the 8th
century.

BRITANICA

Ninguna de las dinastkas germinicas que fundaron los estados de Europa Occidental sobre las ruinas del Imperio Romano alcanzó el brillo, el poderko y la duración, sobre todo, de la Casa Real de los Francos, que nosotros llamamos merovingia. De sus orkgenes nada sabemos. Naturalmente, como en los demis pueblos birbaros, la ascendencia del monarca, persona sagrada, jefe y sacerdote a la vez, entroncaba con los dioses paganos, parentesco mkstico del que derivaba su posición. Pero con la conversión de Clodoveo en 506 se cortó la tradición y ello en forma expresa. Se Conserva el texto de la carta que San Avito escribio al rey franco con motivo de su bautismo, en la que senala: "De todo el pasado de tu antigua estirpe conserva snicamente tu nobleza de sangre; pero desde hoy todo lo demis que pueda aumentar el orgullo de linaje de tus descendientes ha de arrancar snicamente de ti mismo, porque en este mundo imperas como tus mayores, pero para tus descendientes eres ts, en adelante, la norma en el reino de Dios y su derecho y autoridad divinos han de estar en la fe católica de su antecesor Clodoveo".

The period was apparently one of consolidating gains climaxed by the Battle of Mount Badon (520) rather than a period of further expansion, though Cynric is said to have routed Britons in battle at least once, at a place called Searobyrg (552). Notes for Merovee, King Of France:
Merovech, also spelled MEROVICH, MEROVEUS, MERWICH, or MEROWIG, French MÉROVÉE, German MEROWECH (fl. c. AD 450), king of the Salian Franks, from whom Frankish tradition held the Merovingian dynasty to have taken its name. He was the father of Childeric I (d. 481/482) and grandfather of Clovis I (c. 466-511).

Nothing definite is known of Merovech's life. He is mentioned in Gregory of Tours's History of the Franks and, according to later sources, fought against Attila the Hun at the Battle of the Catalaunian Plains (451).

MEROVINGIAN DYNASTY,

Frankish dynasty (AD 476-750) traditionally reckoned as the "first race" of the kings of France.

A brief treatment of the Merovingians follows. For full treatment, see France: Merovingian andCarolingian age.

The name Merovingian derives from that of Merovech, of whom nothing is known except that he was the father of Childeric I, who ruled a tribe of Salian Franks from his capital at Tournai. Childeric was succeeded by his son Clovis I in 481 or 482. Clovis I extended his rule over all the Salian Franks, conquered or annexed the territories of the Ripuarian Franks and the Alemanni, and united

nearly all of Gaul except for Burgundy and what is now Provence. Of equal importance, he was converted to Christianity in either 496 or 506. At Clovis I's death in 511, his realm was divided among his four sons, Theuderic I, Chlodomer, Childebert I, and Chlotar I. Despite the frequently bloody competition among the brothers, they managed among them to extend Frankish rule over Thuringia in approximately 531 and Burgundy in 534 and to gain sway over, if not possession of, Septimania on the Mediterranean coast, Bavaria, and the lands of the Saxons to the north. By 558 Chlotar I was the last suriviving son of Clovis I, and until his death in 561 the Frankish realm was once again united.

In 561 the realm was again divided among the brothers Charibert I, Guntram, Sigebert, and Chilperic I, and again family strife and intrigue ensued, particularly between Chilperic and his wife Fredegund in the northwest of Gaul and Sigebert and his wife Brunhilda in the northeast. Dynastic struggles and increasing pressures exerted on the realm by neighbouring peoples--Bretons and Gascons in the west, Lombards in the southeast, Avars in the east--prompted a reorganization of the Frankish kingdoms. Several eastern regions were merged into the kingdom of Austrasia, with its capital at Metz; in the west Neustria emerged, with its capital first at Soissons and later at Paris; to the south was the enlarged kingdom of Burgundy, with its capital at Chalon-sur-Saone. Overall Frankish unity was again achieved in 613, when Chlotar II, son of Chilperic I and king of Neustria, inherited the other two kingdoms as well. On the death of Chlotar's son Dagobert in 639 the realm was divided yet again, but by that time the kings of the two regions, Neustria and Burgundy on the one hand and Austrasia on the other, had been forced to yield much of their power to household
officials known as mayors of the palace. The later Merovingian kings were little more than puppets and were enthroned and deposed at will by powerful mayors of the palace. The last Merovingian, Childeric III, was deposed in 750 by Pepin III the Short, one of a line of Austrasian mayors of the palace who finally usurped the throne itself to establish the Carolingian dynasty.

Eurico llegó al trono del reino visigodo de Tolosa a los 46 anos, tras ordenar el asesinato de su hermano Teodorico II. Durante su reinado, se emprendió una polktica de expansión por Espana. Eurico se benefició del débil estado del imperio para romper el vknculo de vasallaje que lo unka a Roma y proclamarse rey soberano. En el 472 se apoderó de la Tarraconense y en el 474 ocupó la Provenza. De esta forma estableció un reino independiente que se extendka entre el Loira y el Mediterrineo y que delimitaba al este con el Ródano.
El monarca fijó su corte en Burdeos, confinó a los suevos en Galicia e impidió que los romanos recuperasen su territorios
Aproximadamente en 475, Eurico ordena recopilar por escrito las mores, o costumbres, que rigen con fuerza de ley las relaciones entre los godos. El rey encomienda al parecer esta delicada tarea a su ministro León de Narbona, jurisconsulto romano de vastos conocimientos. Nace ask la primera reconstruido en parte por lo que derec ho cons uetudi n a rio vis igodo. Sele conoce como código de Eurico y es bastante extenso, con unos 400 capktulos, destinado en principio sólo a los visigodos, ya que hispanorromanos y galorromanos emplean su propio derecho. Tambien se ha avanzado la teorka de que regirka para ambos pueblos; de todos modos, sk consta que se aplicaba en los procesos mixtos entre godos y ramanes, borgonones, bivaros e innos ha llegado su texto completo, aunque se conocka su existencia por la cita que hizo san Isidoro en su Historia de los godos: «Bajo Eurico los godos comenzaron a tener por escrito las instituciones de las leyes.» También narró la reforma efectuada por Leovigildo. Modernamente, aparecieron 50 capktulos en un palimpsesto hallado en Corbie (Francia). Se ha reconstruido en parte, por lo

que puede rastrearse en el Liber y por lo aprovechado en las redacciones de la Lex Burgondiorom y en la Lex Baiuwariorom . El Código de Eurico tiene una gran importancia en el derecho europeo. Es el mis antiguo de los códigos germinicos y sirvió de modelo en la redacción de muchos de ellos para los alemanes, borgonones, bivaros e incluso en la ley silica. Se escribió en un latkn deficiente y recoge lo fundalmental del derecho romano, aunque esto no excluya el que aparezcan instituciones plenamente germinicas e incluso helénicas, fruto de sus correrias unteriores al asentamiento en Hispania y en las Galias.

CRÓNICA DE ESPANA Pgs 86 y 87

---

Euric (b. 420--d. 484), king of a great Visigothic realm (usually called the kingdom of Toulouse) in the western part of the Roman Empire that included what is now southwestern France (south of the Loire and west of the Rhone) and most of Spain. He is best known for the code of law that bears his name, the Code of Euric.

Euric ascended the throne after assassinating his brother, King Theodoric II, at the Visigothic capital of Toulouse. He ruled as a federate of the Roman Empire until 475, when he withdrew and became an independent king. He continued to defy Roman authority by extending his boundaries in Gaul and on the Iberian Peninsula for the remainder of his reign. His forces built fortifications at several key locations throughout the empire. Those at the ancient city of Carcassonne in southwestern France are among the finest remains of medieval ramparts in Europe.

The code of law that Euric had Roman jurists compile for his use was memorable in that it acknowledged the rights of his Roman as well as his Gothic subjects. The palimpsest manuscript of the code is preserved in Paris.

VISIGOTHIC SPAIN TO C. 500

Large-scale invasions during the 5th century by the Germanic tribes settled along the imperial frontiers undermined Roman rule in Spain. The Visigoths, a people located along the Danube River and converted to Arian Christianity, were authorized by the emperor Valens to settle in the empire in 376. However, they soon turned against the Romans. Their triumph over Valens in the Battle of Adrianople in 378 signaled the beginning of the barbarian onslaught against Rome. Under their king Alaric the Visigoths invaded Italy and in 410 sacked Rome, sending shock waves throughout the empire. Taking advantage of the Visigothic threat to Italy, the Vandals, Alans, and Suebi (Suevi) crossed into Gaul and then into Spain. After ravaging the country for two years, the Suebi and the Asding Vandals settled in the northwestern province of Galicia (Gallaecia). The Siling Vandals occupied Baetica in the south, and the Alans, an Iranian people, settled in the central provinces of Lusitania and Carthaginiensis. For
the time being, only Tarraconensis remained entirely under Roman control.

After abandoning Italy, the Visigothic king Athaulf moved into southern Gaul, but, failing to win recognition for his people as federati, or allies, of the empire, he was forced into Tarraconensis, where he was assassinated in 415. Under his successor, Wallia (415-418), the Romans acknowledged the Visigoths as allies and encouraged them to campaign against the other barbarian tribes in the peninsula. Those Alans and Siling Vandals who survived Visigothic attacks sought refuge with the Asdings and the Suebi in Galicia. The Roman emperor Honorius, in 418, authorized the Visigoths to settle in Gaul in the provinces of Aquitania Secunda and Narbonensis.

The Suebi and the Asding Vandals meanwhile continued to lay waste Spain. Led by King Gaiseric (Genseric), the Vandals crossed the Strait of Gibraltar into North Africa in 429. They subjugated that province and governed it and the Balearic Islands until the Byzantine reconquest in 534. In Spain, the Suebi, initially pagans, accepted Arianism, but in the middle of the 6th century they were converted to orthodox Christianity by St. Martin of Dumio, bishop of Braga. Their
independent kingdom in Galicia survived until the Visigoths subdued it in 585.

The Visigoths, as allies of Rome, aided in the defense of Gaul against Attila and the Huns. The unchecked deterioration of the Western empire, however, resulted in the rupture of the fragile alliance between Rome and the Visigoths. Under the rulership of Euric (466-484) the Visigoths founded an independent kingdom in southern Gaul, centred at Toulouse. In Spain the Visigoths drove the Suebi back into Galicia and occupied Tarraconensis and part of Lusitania. For the moment the provinces of Baetica and Carthaginiensis were left to take care of themselves.

Despite the collapse of imperial rule in Spain, Roman influence remained strong. The majority of the population, probably about 6,000,000, were Hispano-Romans, as compared to 200,000 barbarians. Hispano-Romans held many administrative positions and continued to be governed by Roman law embodied in the Theodosian Code. Euric's Code, completed about 475, was written in Latin but was probably intended for the use of the Visigoths.

In 506 Euric's son Alaric II (484-507) published a compilation, known as the Breviary of Alaric, which was based on the Theodosian Code and meant to serve the needs of the Roman population.

Visigothic dominance over southern Gaul came to an end when Clovis and the Franks defeated Alaric II at Vouillé in 507. As a consequence of Frankish expansion, the Visigoths were compelled to penetrate more deeply into Spain, where their kings eventually established themselves at Toledo (Toletum). In the meantime the Byzantine emperor Justinian took advantage of struggles among the barbarians to regain control of the southern and eastern coasts of Spain. For about 70 years the Byzantines maintained a foothold in that part of the peninsula.

Although the Visigoths had been in contact with the Roman world for more than a century before their effective settlement in Spain and had acquired a veneer of Romanization, significant legal, cultural, social, and religious differences kept them apart from the Hispano-Roman population. Aside from different languages and disparities in education, these diverse peoples were subject to distinct bodies of law. The Visigoths, while Christian, held to the Arian heresy against the
orthodoxy of the Hispano-Romans. The Visigothic king was theoretically ruler of only his own people whereas the Hispano-Romans continued to profess allegiance to a rapidly vanishing imperial authority. A Roman law that prohibited intermarriage between the two peoples was, however, abolished in the late 6th century. Still, the task of bringing the two peoples together and of achieving some sort of political and cultural unity was a formidable one.

Notes for King Theodoric Of Italy:
Italy

The Ostrogothic kingdom.

Odoacer was conquered and killed by Theoderic, king of the Ostrogoths (489-526). The decades of the Ostrogothic kingdom in Italy (489-552) can be seen as the first true period of Germanic rule in the peninsula, for an entire tribe of 100,000 to 200,000 people came with Theoderic. Still, the Ostrogothic kingdom continued to operate inside a largely Roman political system. Like Odoacer,

Theoderic courted the Roman aristocracy, both the civil administrators at Ravenna and the great landowners who made up the Senate at Rome. He needed them to run a still largely functioning tax system, which continued, in part, to pay for the army, though the latter was now entirely Ostrogothic. Roman law remained the basis of political and civil life except for the Ostrogoths, who kept themselves apart. They were encouraged in this by Theoderic, who did not want them to become Romanized. Yet such apartheid did not last. Some
Romans joined the army; many more Goths became landowners, legally or illegally, and adopted civilian Roman cultural traditions.

Theoderic's rule has always been seen as the most peaceful and prosperous period of Italian history since Valentinian, and not wrongly; but it was already in ruins a decade after his death. Theoderic himself fell out with an important, traditionalist, senatorial faction, and he executed several senators, including the philosopher-politician Boethius, in 524; the Roman elites looked increasingly to Constantinople as a result. The Goths began to split between factions representing more Roman or more German cultural traditions; when the latter faction murdered Theoderic's daughter and successor Amalasuntha (regent 526-534; queen 534-535), a crisis began that was to end the kingdom.

King Aidan (or Aedhan) succeeded his cousin Kinatellus in 570. He received the royal insignia from St. Columba, a man who at that time had such authority that neither King nor people did anything without his consent. Aidan's first expedition was against the robbers of Galloway, whom he suppressed, severely punished their chiefs, and established justice in the realm. He died in 604, after a reign of 34 years, and was buried at Icolmkill. Of his three sons Arthur, Prince of Scotland, and Dongardus, the third son, were slain in battle against the Picts and Saxons.

Notes for Banu Omeya:

Omeya, Califato, dinastka de califas que gobernó el califato irabe del islam desde el 661 hasta el 750 y la Espana musulmana desde el 929 hasta el 1031. Todos los califas de la dinastka eran descendiente de Umayya ibn Abd Shams, ciudadano de La Meca y miembro de la tribu quraysh, que vivió al menos dos generaciones antes del profeta Mahoma. El fundador de la dinastka, Muawiya, y sus dos sucesores perteneckan a la rama sufyank (descendientes de Abu Sufyan) de la familia Omeya, mientras que todos los demis califas Omeyas eran marwankes, descendientes de Marwan ibn al-Hakam, quien tomó posesión del califato en el 684.

El centro de poder Omeya y la sede del califato era Siria y su corte estuvo centrada en Damasco. El califa Omeya mejor conocido probablemente sea Abd al-Malik (685-705) que construyó la mezquita de la Roca de Jerusalén, emitió la primera moneda musulmana e inauguró la utilización del irabe como lengua oficial de la administración. La Gran Mezquita de Damasco (convertida de la iglesia bizantina de San Juan) y la mezquita Aqsa de Jerusalén fueron construcciones Omeyas; se conservan en Siria las ruinas de varios palacios y pabellones de caza.

La dinastka realizó una gran expansión de los territorios bajo el dominio irabe musulmin. Aunque no tuvieron éxito en sus intentos de conquistar Constantinopla (actual Estambul), capital del Imperio bizantino, hacia el 750 controlaron un irea que se extendka desde el sur de Francia y la mayor parte de la penknsula Ibérica hasta las fronteras de China y el norte de la India. Durante este periodo, el islam, como religión y cultura, sufrió una profunda evolución. Comenzaron a formarse las dos doctrinas principales del islam que conocemos actualmente, el sunismo y el shiksmo, aunque ninguno de ellos alcanzó un desarrollo completo hasta que concluyó el califato Omeya. Los Omeyas y la elite a quien representaba consideraban el islam como algo reservado principalmente a los irabes y, en general, estaban poco dispuestos a permitir que los pueblos conquistados no irabes se convirtieran. La snica forma de que estos pueblos pudieran entrar a formar parte de la comunidad islimica era convertirse en clientes (mawali) de los irabes, proceso que implicaba adoptar un nombre y una identidad irabe. Aquéllos que consiguieron alcanzar la categorka de cliente no eran considerados iguales por los irabes, pero, sin duda, habka incentivos (especialmente económicos) para muchos de los pueblos sometidos que deseaban entrar en el islam como clientes de los dirigentes irabes. Las preocupaciones de los califas Omeyas para mantener la hegemonka irabe en la comunidad islimica hizo que se mantuvieran los impuestos para quienes habkan conseguido el rango de clientes.

Entre aquellos irabes y no irabes que destacaban el caricter religioso del islam, y no simplemente social o polktico, era importante el principio de que deberka estar abierto a todos aquellos que desearan convertirse, y no sólo a los irabes. Para ellos, los gobernantes Omeya, con pocas excepciones, no eran auténticos musulmanes pues limitaban la ampliación de la umma (comunidad islimica). Esta tensión entre las diferentes ideas del caricter del islam (que aumentaron segsn se desarrolló el islam como religión y con su enorme desarrollo territorial) tuvieron mucho que ver con la creciente oposición al califato Omeya y con la imagen negativa de los Omeyas que se ha mantenido en la tradición histórica musulmana. En ella se retrata a Muawiya como el que habka enganado a Alk ibn Abk Talib (cunado del profeta Mahoma) en el califato, y al hijo y sucesor de Muawiya, Yazid, se le hace responsable sltimo del asesinato del hijo de Alk,

Husayn en Karbala (Irak) en el 680. Con una o dos excepciones, los califas Omeyas se consideran gobernantes tiranos, que se preocuparon poco de los intereses del islam, que sólo buscaban el control del poder mundano y que aplastaron a los musulmanes piadosos que encontraron en su camino. Frecuentemente, se les niega la consideración de califa y se refieren a ellos como una dinastka de reyes que gobernaban en tierras no musulmanas. La tradición shik rechaza la legitimidad del gobierno Omeya por completo, mientras que los sunkes tienen una actitud poco generosa y muy ambigua. Los snicos dos califas Omeyas que pudieron escapar a tal condena fueron Umar ibn Abd al-Aziz (califa 717-720) y, en menor medida, Yazid III (califa 744).
La dinastka fue derrocada por los Abaskes en el 750 en una revuelta que comenzó en la provincia de Jurasin, en el noreste de Persia. Esta revuelta se inició por la disensión entre facciones del ejército irabe, y alimentada por el resentimiento de los musulmanes irabes y no irabes que se sentkan excluidos del poder y de la riqueza que generaba la polktica Omeya. Después del derrocamiento del califato Omeya, un miembro de la familia, Abd al-Rahman I, consiguió llegar a la Espana musulmana (al-Andalus) donde fundó un emirato independiente. Una lknea de emires Omeyas gobernaron la Espana musulmana entre el 756 y el 1031 y desde el 929, en que Abd al-Rahman III tomó el tktulo de califa, constituyeron un califato independiente de Damasco, con capital en Córdoba, que vivió momentos de gran esplendor cultural y alcanzó el predominio territorial en la penknsula Ibérica debido a la debilidad de los nacientes reinos hispanocristianos. Cuando se produjo la cakda del Califato de Córdoba, la anarquka subsiguiente condujo al inicio de la desintegración del poder musulmin en Espana y a su atomización en una serie de pequenos estados denominados reinos de taifas.

Notes for Constantius I Clorus, Emperor Of Rome:
Constantius I CHLORUS ("The Pale"), original name FLAVIUS VALERIUS CONSTANTIUS (d. summer 306, Eboracum, Britain [now York, North Yorkshire, Eng.]), Roman emperor and father of Constantine I the Great. As a member of a four-man ruling body (tetrarchy) created by the emperor Diocletian, Constantius held the title caesar from 293 to 305 and caesar augustus in 305-306.

Of Illyrian descent, Constantius had a distinguished military career before serving as governor of Dalmatia (in modern Croatia). In 289 he renounced his wife, Helena, mother of Constantine, and married Theodora, the stepdaughter of the emperor Maximian. Four years later Constantius was adopted by Maximian and made his caesar. The two men, together with Diocletian and his caesar, Galerius, formed the tetrarchy.

Constantius was assigned to rule Gaul and ordered to subdue Marcus Aurelius Carausius, a usurper in Britain. In 293 he captured Carausius' mainland base, Gesoriacum (modern Boulogne, Fr.). Three years later he invaded Britain and defeated and killed Allectus, who had murdered Carausius and succeeded him in power. Constantius then set about restoring frontier defenses. He took strong measures to eliminate Frankish and Saxon piracy, and in 298 he triumphed over the Alemanni in Gaul. His enforcement of Diocletian's edicts (303) against the Christians was deliberately lax; he demolished some churches but did not execute believers. When Diocletian and Maximian abdicated on May 1, 305, Constantius became the senior emperor in the West. He died the following year, and his troops proclaimed Constantine emperor.

BRITANICA

Constancio I Cloro (c.250-306), emperador romano (305-306). Fue prefecto del Pretorio (jefe de la Guardia Pretoriana, que equivalka a la jefatura militar) durante el reinado del emperador Maximiano, quien le adoptó y le encomendó la defensa de la Galia e Hispania, y le hizo nombrar césar, en el 293, tres anos antes de que reconquistara Britania. Cuando los coemperadores Maximiano y Diocleciano abdicaron en el 305, se convirtió en emperador de Occidente y se dispuso a sofocar una rebelión de los pictos. Murió en Eboracum (la actual York, en Inglaterra), al comienzo de esta campana, después de proclamar a su hijo Constantino como su sucesor.

Notes for Helen (Of The Cross):
Helena, SAINT, also called HELEN (b. c. 248, Drepanon?, Bithynia, Asia Minor--d. c. 328, Nicomedia; Western feast day August 18; Eastern feast day [with Constantine] May 21), Roman empress who was the reputed discoverer of Christ's cross.

Helena was married to the Roman emperor Constantius I Chlorus, who renounced her for political reasons. When her son, Constantine I the Great became emperor at York (306), he made her empress dowager, and under his influence she later became a Christian. She was devoted to her eldest grandson, Crispus Caesar, whom Constantine made titular ruler of Gaul, but a mysterious embroilment in the imperial family culminated with the execution of Crispus and Fausta, Constantine's second wife and Crispus' stepmother. Thereafter, the story became current that Fausta had accused Crispus of attempting to seduce her--hence Crispus' execution (326). Fausta, in turn, was denounced by the grief-stricken Helena and was executed shortly afterward. Immediately after the double tragedy Helena made a pilgrimage to the Holy Land. She caused churches to be built on the reputed sites of the nativity and of the Ascension.

Before 337 it was claimed in Jerusalem that Christ's cross had been found during the building of Constantine's church on Golgotha. Later in the century Helena was credited with the discovery. Many subsequent legends developed, and the story of the "invention," or the finding of the cross, enhanced by romances and confusions with other Helens, became a favourite throughout Christendom.

BRITANICA

Elena, Santa (c. 248-c. 328), esposa del emperador romano Constancio I Cloro y madre de Constantino el Grande, emperador de Roma. Se cree que nació en Drepanum, mis tarde llamada Helenópolis en su honor, en la antigua provincia romana de Bitinia. Cuando Constancio fue nombrado césar y sucesor al trono del Imperio romano, en el ano 293, se divorció de ella porque no era de origen patricio. A partir de ese momento dedicó el resto de su vida a peregrinajes religiosos visitando Jerusalé n (al-Quds) hacia el ano 325, donde fundó la iglesia del Santo Sepulcro y la iglesia de la Natividad. Segsn la leyenda fue quien descubrió la Vera (verdadera) Cruz en Palestina. Su festividad se celebra el 18 de agosto.

Notes for Maximian, Emperor Of Rome:
Maximian, Latin in full MARCUS AURELIUS VALERIUS MAXIMIANUS (b. Sirmium, Pannonia Inferior--d. 310), Roman emperor with Diocletian from AD 286 to 305.

Born of humble parents, Maximian rose in the army, on the basis of his military skill, to become a trusted officer and friend of the emperor Diocletian, who made him caesar in 285 and augustus the following year. Maximian thus became in theory the colleague of Diocletian, but his role was always subordinate. Assigned the government of the West, Maximian failed to suppress revolts in Gaul and Britain; Constantius Chlorus, appointed caesar under Maximian in 293, took charge of these areas while Maximian continued to govern Italy, Spain, and Africa. Although long viewed by Christians as a persecutor of their religion, Maximian seems to have done no more than obediently execute in his part of the empire the first edict of Diocletian, which ordered the burning of the

Scriptures and the closing of the churches. On May 1, 305, the same day that Diocletian
abdicated at Nicomedia, Maximian abdicated, evidently reluctantly, at Mediolanum. As the new tetrarchy (two augusti with a caesar under each) that succeeded them began to break down, Maximian reclaimed the throne to support his son Maxentius' claim to be caesar. Persuaded to abdicate once more by Diocletian in 308, he lived at the court of Constantine, who had recently married his daughter Fausta (Flavia Maximiana). Maximian died, either by murder or by suicide, shortly after the suppression of a revolt raised by him against Constantine.

Maximiano, hijo de un colono de Panonia residente en Sirmio, era
un valiente soldado y un experto general; pero, tosco e inculto, acataba ciegamente la superioridad de Diocleciano, para el que era mis que un colega, un teniente dócil y subordinado. Diocleciano le impuso, al hacerle augusto, la condición de que si algsn dka él abdicaba, su colega habka de hacerlo también, confirmando ambos su compromiso con un juramento ante el altar de Jspiter. Como Diocleciano habia adoptado el sobrenombre de Jovio, Maximiano tomó el de Hércules. La diarquka resultó afortunada, pues Diocleciano triunfó de los persas en Mesopotamia y Maximiano concluvó, de momento, en la Galia con la amenaza de los bagaudos, francos y alamalles. Sin embargo, ambos convinieron en la necesidad de buscar nuevos colaboradores; tomaron entonces como césares a Galerio y Constancio Cloro, a los que se unieron familiarmente
haciéndoles repudiar a sus respectivas esposas. Galerio casó con Valeria Augusta, hija de Diocleciano, y Constancio Cloro, con Teodora, hija adoptiva de Maximiano. Se creó ask la tetrarquka sobre la base de la primacka, por todos acatada de Dioeleciano.

Pronto tuvieron que acudir a diferentes peligros. Maximiano desbarató a los germanos y atravesó el Rin, en la Galia sofocó la tertible rebelión de los campesinos, matando a sus jefes y tomando las plazas en que se habkan hecho
fuertes, si bien no logró dominarles por completo, pues en partidas dispersas por los partos, los bagaudos siguieron sin someterse hasta las grandes invasiones birbaras. Dioeleciano restableció la situación en Armenia, de cuyo trono habkan expulsado los persas al rey impuesto por Roma. Galerio obtuvo victorias en el Danubio, cooperando luego a la conquista de Mesopotamia. Y Constancio Cloro acabó en Bretana con Alecto, asesino y sucesor de Carausio. Sosegado el Imperio y después de haber decretado, por sugerencias de

Galerio, una terrible persecución contra los cristianos, Dioeleciano enfermó gravemente
y, hastiado del mando, decidió abdicar, como lo hizo en primero de mayo de 305, en Nicomedia; obligado por su juramento, hubo de hacerlo igualmente Maximiano, en Milin. De nuevo vuelve éste al poder, porque, habiendo los pretorianos proclamado augusto a Majencio, hijo de Maximiano, éste asoció a su padre al Imperio. Sin embargo, cansado pronto del dominio que querka ejercer sobre él, le obligó a huir pidiendo amparo a Constantino, casado con su hija Fausta, pero ésta misma descubrió a su marido que su padre conspiraba contra él. Maxixliano huyó a Arlés, para sublevar a los galos, y su yerno le sitió en Marsella tan estrechamente, que Maximiano tuvo que suicidarse en 3IO.

Notes for Constantius I Clorus, Emperor Of Rome:
Constantius I CHLORUS ("The Pale"), original name FLAVIUS VALERIUS CONSTANTIUS (d. summer 306, Eboracum, Britain [now York, North Yorkshire, Eng.]), Roman emperor and father of Constantine I the Great. As a member of a four-man ruling body (tetrarchy) created by the emperor Diocletian, Constantius held the title caesar from 293 to 305 and caesar augustus in 305-306.

Of Illyrian descent, Constantius had a distinguished military career before serving as governor of Dalmatia (in modern Croatia). In 289 he renounced his wife, Helena, mother of Constantine, and married Theodora, the stepdaughter of the emperor Maximian. Four years later Constantius was adopted by Maximian and made his caesar. The two men, together with Diocletian and his caesar, Galerius, formed the tetrarchy.

Constantius was assigned to rule Gaul and ordered to subdue Marcus Aurelius Carausius, a usurper in Britain. In 293 he captured Carausius' mainland base, Gesoriacum (modern Boulogne, Fr.). Three years later he invaded Britain and defeated and killed Allectus, who had murdered Carausius and succeeded him in power. Constantius then set about restoring frontier defenses. He took strong measures to eliminate Frankish and Saxon piracy, and in 298 he triumphed over the Alemanni in Gaul. His enforcement of Diocletian's edicts (303) against the Christians was deliberately lax; he demolished some churches but did not execute believers. When Diocletian and Maximian abdicated on May 1, 305, Constantius became the senior emperor in the West. He died the following year, and his troops proclaimed Constantine emperor.

BRITANICA

Constancio I Cloro (c.250-306), emperador romano (305-306). Fue prefecto del Pretorio (jefe de la Guardia Pretoriana, que equivalía a la jefatura militar) durante el reinado del emperador Maximiano, quien le adoptó y le encomendó la defensa de la Galia e Hispania, y le hizo nombrar césar, en el 293, tres años antes de que reconquistara Britania. Cuando los coemperadores Maximiano y Diocleciano abdicaron en el 305, se convirtió en emperador de Occidente y se dispuso a sofocar una rebelión de los pictos. Murió en Eboracum (la actual York, en Inglaterra), al comienzo de esta campaña, después de proclamar a su hijo Constantino como su sucesor.

Notes for Helen (Of The Cross):
Helena, SAINT, also called HELEN (b. c. 248, Drepanon?, Bithynia, Asia Minor--d. c. 328, Nicomedia; Western feast day August 18; Eastern feast day [with Constantine] May 21), Roman empress who was the reputed discoverer of Christ's cross.

Helena was married to the Roman emperor Constantius I Chlorus, who renounced her for political reasons. When her son, Constantine I the Great became emperor at York (306), he made her empress dowager, and under his influence she later became a Christian. She was devoted to her eldest grandson, Crispus Caesar, whom Constantine made titular ruler of Gaul, but a mysterious embroilment in the imperial family culminated with the execution of Crispus and Fausta, Constantine's second wife and Crispus' stepmother. Thereafter, the story became current that Fausta had accused Crispus of attempting to seduce her--hence Crispus' execution (326). Fausta, in turn, was denounced by the grief-stricken Helena and was executed shortly afterward. Immediately after the double tragedy Helena made a pilgrimage to the Holy Land. She caused churches to be built on the reputed sites of the nativity and of the Ascension.

Before 337 it was claimed in Jerusalem that Christ's cross had been found during the building of Constantine's church on Golgotha. Later in the century Helena was credited with the discovery. Many subsequent legends developed, and the story of the "invention," or the finding of the cross, enhanced by romances and confusions with other Helens, became a favourite throughout Christendom.

BRITANICA

Elena, Santa (c. 248-c. 328), esposa del emperador romano Constancio I Cloro y madre de Constantino el Grande, emperador de Roma. Se cree que nació en Drepanum, más tarde llamada Helenópolis en su honor, en la antigua provincia romana de Bitinia. Cuando Constancio fue nombrado césar y sucesor al trono del Imperio romano, en el año 293, se divorció de ella porque no era de origen patricio. A partir de ese momento dedicó el resto de su vida a peregrinajes religiosos visitando Jerusalén (al-Quds) hacia el año 325, donde fundó la iglesia del Santo Sepulcro y la iglesia de la Natividad. Según la leyenda fue quien descubrió la Vera (verdadera) Cruz en Palestina. Su festividad se celebra el 18 de agosto.

473-516 creado "patricio romano" por el emperador Olibrio (23 Oct 472)

Gundobad, also called GUNDIBALD (d. 516), barbarian general during the last days of the Roman Empire in the west, and king of the Burgundians (c. 474-516).

The nephew of the barbarian emperor-maker Ricimer, Gundobad briefly held the supreme military command i n the Roman service. In 473 he emulated his uncle when he himself placed a puppet, Glycerius, on the throne of Ravenna, but the subsequent deposition of Glycerius by Julius Nepos, the appointee of the eastern emperor, sent Gundobad fleeing back to his Burg undians.
After becoming joint ruler (with his brothers) of the Burgundians, he murdered his brother Chilperic; the latter's daughter, Clotilda, later (c. 493) married the Frankish king Clovis. In 500 Gundobad fought off a Frankish attack and killed another brother, Godegisel, who had brought it about.

Though formally an Arian, Gundobad was in fact a secret Catholic sympathizer and enjoyed good relations with the orthodox clergy, as with the Romans in general over whom he ruled. The most important act of Gundobad's reign in Burgundy was his promulgation, early in the 6th century, of two codes of law, the Lex Gundobada, applying to all his subjects, and, somewhat later, the Lex Romana Burgundionum, applying to his Roman subjects.

His father Gundioc, king o f Burgundy, was related to the Visigothic kings and shared their Arian Christian faith. At Gundioc's death his kingdom was divided between his four sons, Gundobad, Godegesil, Chilperic, and Gundomar.

Cerdic (d. 534), founder of the West Saxon kingdom, or Wessex. All the sovereigns of England except Canute, Hardecanute, the two Harolds, and William the Conqueror are said to be descended from him. A Continental ealdorman who in 495 landed in Hampshire, Cerdic was attacked at once by the Britons. Nothing more is heard of him until 508, when he defeated the Britons with great slaughter. Strengthened by fresh arrivals of Saxons, he gained another victory in 519 at Certicesford, a spot which has been identified with the modern Charford, and in this year took the title of king. Turning westward, Cerdic appears to have been defeated by the Britons in 520 at Badbury or Mount Badon, in Dorset, and in 527 yet another fight with the Britons is recorded. His last work was the conquest of the Isle of Wight, probably in the interest of some
Jutish allies.

# THE KINGDOM OF WESSEX

Wessex, one of the kingdoms of Anglo-Saxon England, whose ruling dynasty eventually became kings of the whole country. In its permanent nucleus, its land approximated that of the modern counties of Hampshire, Dorset, Wiltshire, Somerset, and southern Avon. At times its land extended north of the River Thames, and it eventually expanded westward to cover Devon and Cornwall. The name Wessex is an elision of the Old English form of "West Saxon."

Wessex grew from two settlements: one was founded, according to the Anglo-Saxon Chronicle, by Cerdic and his son (or grandson) Cynric, who landed in Hampshire in 494 or 495 and became kings in 500 or 519; the other, known only from archaeological evidence, was situated on the upper Thames and was probably settled from the northeast. Though the Chronicle implies that this area was in British hands in 571, when Cuthwulf (perhaps a member of the West Saxon royal house) captured Luton, Aylesbury, Bensington (now Benson, in Oxfordshire), and Eynsham, archaeological evidence proves earlier settlement.

Only a few incidents of the early expansion are recorded. These include the conquest by Cerdic and Cynric of the Isle of Wight in 530 and battles fought by Cynric at Salisbury in 552 and Barbury Castle (Wiltshire) in 556. A victory won by a successor, Ceawlin (who reigned 560-592 and is mentioned by Venerable Bede as the second English king to hold an imperium in Britain), at Dyrham, Gloucestershire, in 577, which led to the capture of Bath, Cirencester, and Gloucester, and Ceawlin's battle at a place called Fethanleag, probably in North Oxfordshire, in 584, are also recorded. Ceawlin also defeated Aethelberht of Kent at a place called Wibbandun in 568. Having extended the power of Wessex north of the Thames, Ceawlin was expelled in 592 by his nephew Ceol, who reigned for five years. Ceol was succeeded by his brother Ceolwulf (reigned 597-611), whose reign was followed by that of Ceol's son Cynegils (reigned 611-643). During this period, Wessex was threatened first by Northumbria and then by the growing midland kingdom of Mercia. Cynegils and his son Cwichelm lost the provinces of
the Hwicce (Gloucestershire, Worcestershire, and southwest Warwickshire) to Penda of Mercia. Cynegils was succeeded as king by his son Cenwalh (reigned 643-672), who married Penda's sister but soon discarded her. For this act he was driven into exile (645-648) in East Anglia by Penda. Throughout much of his reign he fought the Mercians and the Welsh, and Penda's successor seized South Hampshire and the Isle of Wight from him. These regions were held by the Mercians from 661 to 686, and, according to the Venerable Bede's Historia
ecclesiastica, Wessex was temporarily divided among subkings after Cenwalh's death.

During this period, however, kings of Wessex won victories over the Britons, expanding steadily westward. Ceadwalla (685-688) recovered the Isle of Wight and South Hampshire, and there was a Saxon monastery at Exeter before 690. Ine (reigned 688-726), the first West Saxon king to issue a code of laws, placed

a see at Sherborne (Dorset) for the western areas. Mercian dominance over Wessex, which included direct control of parts of Berkshire and Wiltshire, ended with the accession of Egbert (reigned 802-839). He gained all of Devon and Cornwall, and in 825 he defeated Beornwulf of Mercia and brought Surrey, Sussex, and Kent permanently under West Saxon rule.

The final supremacy of the West Saxon kings stemmed from their successful resistance to the Danes, whose "great army" arrived in 865 and destroyed the other Anglo-Saxon kingdoms but was withstood in Wessex by Aethelred I (reigned 865-871) and Alfred (reigned 871-899). The latter recovered London in 886 and was accepted as overlord by all the English who were not subject to the Danes. Following the reconquest of remaining Danish-held territory, completed in 927 by Alfred's grandson Athelstan, the kings of Wessex became kings of
England.

The region figures prominently in legends of King Arthur and the knights of the Round Table, and the designation "Wessex" was used by novelist Thomas Hardy to represent the region of southwestern England in which he set his works of fiction.

Chlodio, also spelled CLODION, French CHLODION (d. c. 447), king of a tribe of Salian Franks, considered the founder of the Merovingian dynasty. Chlodio's tribe renounced the suzerainty of Rome after 428 and broke across the Scheldt River, spreading southward into Gaul until they reached Tournai and Cambrai. Their defeat (c. 431) by the Roman general Aetius at Helena (Hélesme), between Tournai and Cambrai, prevented further expansion. Chlodio did occupy all the country as far as the Somme River, however, and he made Tournai the capital of the Salian Franks. His successor was Merovech.

Teodorico I (rey visigodo) (fallecido en el 451), rey visigodo (418-451). Accedió al trono en el momento de constituirse el reino visigodo de Tolosa, fundado por él. Su predecesor, Valia, habka firmado un foedus con Roma (418), en virtud del cual los visigodos se convirtieron en federados del Imperio y se les permitió asentarse en el sur de las Galias. Teodorico I ratificó el tratado con Roma (425), aunque lo quebrantó repetidamente. Durante su reinado, los visigodos intentaron abrir una salida al Mediterrineo, pero Teodorico I fracasó al pretender ocupar las ciudades de Arlés y Narbona. El monarca visigodo perdió la vida en la batalla de los Campos Cataliunicos (451), donde los hunos de Atila fueron derrotados. Con Teodorico I se inició una dinastka que se mantuvo en el trono algo mis de un siglo (531).

Godo, Pueblo, antiguo pueblo de Germania que desde el siglo III hasta el VI d.C. constituyó una importante potencia, coincidiendo con el periodo de crisis y desintegración del Imperio romano. El godo fue el primero de los pueblos germinicos en convertirse al cristianismo. De acuerdo con el historiador godo del siglo VI Jordanes, los godos procedkan de la actual Suecia y cruzaron el mar Biltico hasta llegar a la cuenca del Vkstula. Alrededor del siglo III d.C. ya se encontraban en el bajo Danubio, en torno al mar Negro. A lo largo de ese siglo los ejércitos godos asolaron Tracia, Dacia y las ciudades de Asia Menor y recorrieron la costa del Egeo. Tomaron y saquearon Atenas entre los anos 267 y 268 y amenazaron la penknsula Itilica. Las guerras entabladas entre los emperadores romanos y los gobernantes godos a lo largo de casi un siglo devastaron la región de los Balcanes y los territorios del noreste del Mediterrineo. Otras tribus se unieron a los godos y bajo el gran rey Ermanarico establecieron en el siglo IV un reino que se extendió desde el mar Biltico hasta el mar Negro.
Hacia el 370, a partir de las invasiones de los hunos, los godos se dividieron en dos ramas separadas. Los ostrogodos constituyeron un vasto reino al este del rko Dniéster, en las tierras alrededor del mar Negro (lo que hoy es parte de la actual Ucrania y Bielorrusia). Los visigodos fueron los godos del occidente, cuyo dominio territorial se extendka desde el Dniéster hasta el Danubio.
Visigodos
En el 376 los visigodos, amenazados por los hunos, buscaron la protección del emperador romano Valente, el cual les autorizó para asentarse en la provincia romana de Mesia, al sur del Danubio. Los visigodos no tardaron en rebelarse y la consiguiente guerra concluyó en 378 con la decisiva batalla de Adrianópolis (la actual Edirne, Turquka) en la que Valente cayó muerto. Los triunfantes godos amenazaron entonces Constantinopla. El sucesor de Valente en el Imperio de Oriente, Teodosio I, firmó la paz con los godos e incorporó su ejército al romano. Desde ese momento, los visigodos ejercieron una importante influencia en el Imperio romano. Muchos de los que se habkan asentado en Mesia se convirtieron en campesinos y fueron conocidos como mesogodos. El obispo godo Ulfilas tradujo la Biblia al gótico y en gran medida

fue responsable de la conversión de los godos a una desviación herética del cristianismo denominada arrianismo.
Tras la muerte de Teodosio en el 395, los visigodos rompieron su pacto con Roma y eligieron rey a Alarico I. Éste invadió Grecia y mis tarde Italia, tomando y saqueando en el 410 la ciudad de Roma. En ese mismo ano le sucedió Ataslfo, que condujo a los visigodos a través de los Pirineos hasta Hispania. Desde el 415 hasta el 418, bajo el mando de su siguiente monarca, Valia, los visigodos ampliaron su dominio territorial anexionando gran parte de Hispania y el sur de la Galia y establecieron su capital en Toulouse. A Valia le sucedió el hijo de Alarico, Teodorico I, el cual murió combatiendo, como aliado de Roma, contra los hunos en la batalla de los Campos Cataliunicos. Uno de los mis destacados reyes visigodos de la penknsula Ibérica fue el hijo de Teodorico I, Eurico, quien reinó desde el 466 hasta el 484. Bajo el gobierno de Eurico, que habka declarado su independencia de Roma, el reino de Tolosa (nombre castellanizado por la historiografka espanola para designar el Estado visigodo que tuvo su capital en la ciudad francesa de Toulouse) abarcaba una considerable extensión de la penknsula Ibérica y gran parte de la Galia al oeste del Rin y al sur del rko Loira. Eurico introdujo muchos elementos de la civilización romana y promulgó un código legal que combinaba el Derecho romano con el Derecho germinico. El reino, sin embargo, estuvo constantemente acosado tanto por problemas internos como externos. La designación del monarca era electiva y la poderosa nobleza visigoda se mostró siempre reacia a los intentos de fundar una dinastka real de caricter hereditario. En el terreno internacional, tanto el Imperio bizantino como los francos amenazaban al territorio visigodo. Con objeto de infundir una mayor lealtad entre sus rebeldes ssbditos romanos y cristianos, Alarico II llevó a cabo en 506 una recopilación de leyes, conocida como el Breviario de Alarico. Un ano mis tarde, el rey de los francos Clodoveo I derrotó a los visigodos en la batalla de Vouillé, en la que murió Alarico II, lo que supuso la desaparición del reino de Tolosa. La mayor parte de la Provenza se separó del reino visigodo y éste quedó reducido casi en su totalidad a la penknsula Ibérica, donde se fundó el nuevo reino visigodo con capital en Toledo. A pesar de los intentos de una larga sucesión de reyes para mantener unido el reino, el poderko de los visigodos empezó a decaer progresivamente. El sltimo monarca, Rodrigo, fue derrotado y probablemente muerto por los musulmanes en la batalla del rko Guadalete (que, tal vez, tuviera lugar en realidad en el rko Barbate) en el 711. Hacia el 713 la penknsula Ibérica fue ocupada en gran parte por los musulmanes y el poder visigodo tuvo por heredero al reino cristiano independiente de Asturias.

Ostrogodos

Cuando los hunos irrumpieron en Europa en torno al 370, los ostrogodos fueron derrotados y obligados a someterse a sus conquistadores. Se unieron al rey huno Atila en la expedición contra la Galia en el 451 y compartieron su derrota en la batalla de los Campos Cataliunicos a manos de visigodos y romanos. Cuando los hunos se vieron finalmente obligados a retirarse, el pueblo ostrogodo recuperó su independencia y se asentó, como federado de Roma, en Panonia, una región que en la actualidad se sitsa entre el oeste de Hungrka, el norte de Croacia, Eslovenia, Serbia y el este de Austria. A los ostrogodos se unieron otros godos que se habkan refugiado en el Imperio romano a la llegada de los asiiticos. En el 474 fue elegido rey Teodorico, el mis destacado de los

monarcas ostrogodos. Tras diversos periodos de guerra y alianza con el emperador bizantino Zenón, Teodorico invadió Italia en el 488 con el consentimiento del emperador, mató a Odoacro, rey de los hérulos, y se proclamó rey, aunque la autoridad fue conferida nominalmente a un cónsul romano. La cultura romana influyó de forma muy notable en el reino ostrogodo bajo el gobierno de Teodorico.
Tras su muerte en el 526, la ruptura fue tan violenta, que en el 535 el emperador bizantino Justiniano I envió a su general Belisario para conquistar el reino ostrogodo de Italia. Los bizantinos destruyeron el poder de los ostrogodos en el 555, cuyo antiguo reino pasó a depender de los exarcas (gobernadores bizantinos) de Ravena.
Los ostrogodos fueron absorbidos de forma gradual por otras tribus y pueblos germinicos como los alanos, los vindalos, los francos y los burgundios, que se establecieron en los territorios del viejo Imperio romano.

Notes for Gabhran (Rey de Dalriada):

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 16 Feb, 1999]

Gabhran was a wise and excellent Prince. He first instituted the office of the King's Advocate. He persuaded Loth, a Pictish King, to league with Uter Pendragon, King of the Britons (who married Pendragon's daughter Ann, sister of King Arthur, of Round Table fame), against the Anglo-Saxons in 502. When the famous King Arthur mounted the British throne he aided him against the Saxons.

Toncetus, the Supreme Judge of Capital Crimes, was a cruel and covetous man, who expected easy pardon of the King. He enraged the people who therefore cut him off. But when they could not obtain the King's mercy, they next slew the King himself, at the instigation of one Donald of Atholl, in 535. He had reigned 34 years. His Queen and children fled to Ireland. (Others say that he died after a tedious sickness and was buried at Icolmkill, the royal burying place.) He was succeeded by his nephew, Eugenius III, who, instead of revenging his uncle's death, received Donald into favor, which made him suspected of having a hand in the conspiracy. Eugenius was succeeded by his brother Congallus, who introduced heraldry. He recalled the children of Gabhran. But before they returned, Congallus died (in 568), after a reign of 10 years. He was succeeded by his younger brother Kinatellus, who courteously entertained Aidan (or Aedhan), son of Gabhran, and on his deathbed resigned to him, in 570. Gabhran was also called Goranus.

**687233110592. Alarico I, rey de los Visigodos,** born 370 in Peuce Isla en el Danubio, Rumania; died 410 in Cosentia, Bruttium, Cosenza, Italia.

Notes for Alarico I, rey de los Visigodos:
Alarico I (c. 370-c. 410), rey de los visigodos (396-410), nacido en una isla situada en el delta del rko Danubio. Durante su juventud, los visigodos emigraron al oeste, huyendo del ataque de los hunos y sirviendo como tropas mercenarias auxiliares del emperador romano Teodosio I el Grande; las primeras noticias que se tienen de Alarico le sitsan en el ano 394 como jefe de dichas fuerzas. A la muerte de Teodosio (395) los visigodos renunciaron a su lealtad a Roma, y reconocieron a Alarico como rey, el cual pronto dirigió a sus tropas hasta Grecia; saqueó Corinto, Argos y Esparta y dispensó a Atenas sólo a cambio de un importante rescate. Tras ser derrotado por el general romano Flavio Estilicón, Alarico se retiró con su botkn y consiguió del nuevo emperador romano de Oriente, Arcadio, una comisión como prefecto de la provincia romana de Iliria. En el 402, Alarico invadió la penknsula Itilica, pero fue nuevamente rechazado por Estilicón. Mis adelante, el emperador romano de Occidente, Honorio, que estaba preparando una guerra contra el Imperio romano de Oriente, convenció a Alarico para que uniera sus fuerzas a las suyas.
Cuando Arcadio murió en el 408, Roma abandonó su plan de atacar a Oriente, por lo cual Alarico exigió 1.814 kg de oro como compensación. A petición de Estilicón, el gobierno romano accedió a esta exigencia, pero poco después, Honorio ordenó la ejecución de Estilicón y canceló el acuerdo. Alarico invadió Italia, sitió Roma y exigió un gran rescate. En el ano 410, sus tropas tomaron y saquearon la capital del Imperio romano de Occidente. Una gran tormenta obligó a Alarico a abandonar su siguiente campana, la invasión de Sicilia y el norte de Ifrica. Murió poco después y le sucedió su hermano, Ataulfo.

Roma, 24 de agosto de 410. El rey godo Alarico 1, nacido en una isla del delta del Danubio hacia 370, asaltó Roma en dos ocasiones, la primera de ellas en el otono de 408. Sus tropas cortaron los suministros a la ciudad, provocando la muerte de muchos de sus habitantes por hambre y epidemias. A cambio de levantar el sitio los godos exigieron el pago de 5 000 libras de oro, 30 000 libras de plata, 4 000 trajes de seda, 3 000 pieles tenidas de psrpura y 3 000 libras de las especias mis valiosas. Ademis, Alarico quiso firmar un tratado de paz con el emperador romano de Occidente, Honorio. Los pagos se realizaron por medios psblicos y privados pero Honorio se negó a negociar con el godo. Los invasores tuvieron que retirarse por problemas de abastecimiento. El ano siguiente Alarico y Atalo, senador romano proclamado emperador por orden del visigodo, se dirigieron a Rivena, con la intención de negociar con Honorio la cesión de las provincias del norte, para establecer en ellas a su pueblo. La negativa del emperador provocó el sitio de Rivena por los godos, que acabó a causa de las desavenencias de los sitiadores.

Tras la retirada de Atalo, el emperador y Alarico se encontraron para iniciar nuevas negociaciones. Pero estas fueron interrumpidas por el ataque al campamento visigodo de Saro un godo enemigo de Alarico y Ataslfo, que estaba por entonces al servicio de Honorio.

El rey godo consideró rota la tregua con los romanos y se dirigió de nuevo contra Roma, al mando de sus tropas, por la vka Flaminia. El 24 de de agosto de 410 por la noche, los godos entraron en Roma. En esta ocasión, Ia enorme muralla de 18 837 m de longitud, mandada construir por Aureliano, no sirvió para defender la ciudad de los invasores, que entraron en el recinto por la Puerta Salaria, abierta desde adentro. Durante tres dkas los godos saquearon la ciudad,

de la que se llevaron un abundante botin y numerosos prisioneros, entre los que se encontraba la hermana de Honorio, Placidia.

Parte del tesoro del templo judko, llevado a Roma desde Jerusalén por Tito en 70, fue arrebatado por los visigodos. Sabiendo que la vida de Italia dependka totalmente de los cerea les que se importaban del norte de Africa, Alarico I intentó llegar con sus hombres a aquel continente, con la intención de cortar los suministros y evitar ask toda resistencia de los romanos.

Logró embarcar parte de sus tropas, pero una tempestad destruyó sus embarcaciones. Entonces, Alarico se dirigió de nuevo hacia el norte, aunque cayó enfermo y murió a finales de 410. Sus hombres le enterraron en el mismo lecho del rko Basentus, junto a la ciudad de Cosentia (Cosenza), en la Calabria, desviando para ello temporalmente el curso de las aguas. A pesar de que la residencia oficial del emperador de Occidente habka sido trasladada a Rivena, de ficil defensa, Roma seguka siendo un skmbolo para los pueblos occidentales.

Por eso su caida provocó oleadas de pinico en toda la cristiandad. La derrota, que hacia aparecer a los birbaros como invencibles, hizo incluso vacilar la fe en Dios de muchos, por que la catistrofe habia ocurrido durante el gobierno de emperadores cristianos.

Alaric (b. c. 370, Peuce Island [now in Romania]--d. 410, Cosentia, Bruttium [now Cosenza, Italy]), chief of the Visigoths from 395 and leader of the army that sacked Rome in August 410, an event that symbolized the fall of the Western Roman Empire.

A nobleman by birth, Alaric served for a time as commander of Gothic troops in the Roman army, but shortly after the death of the emperor Theodosius I in 395, he left the army and was elected chief of the Visigoths. Charging that his tribe had not been given subsidies promised by the Romans, Alaric marched westward toward Constantinople (now Istanbul) until he was diverted by Roman forces. He then moved southward into Greece, where he sacked Piraeus (the port of Athens) and ravaged Corinth, Megara, Argos, and Sparta. The Eastern emperor Flavius Arcadius finally placated the Visigoths in 397, probably by appointing Alaric magister militum ("master of the soldiers") in Illyricum.

In 401 Alaric invaded Italy, but he was defeated by the Roman general Flavius Stilicho at Pollentia (modern Pollenza) on April 6, 402, and forced to withdraw from the peninsula. A second invasion also ended in defeat, though Alaric eventually compelled the Senate at Rome to pay a large subsidy to the Visigoths. After Stilicho was murdered in August 408, an antibarbarian party took power in Rome and incited the Roman troops to massacre the wives and children of tribesmen who were serving in the Roman army. These tribal soldiers thereupon defected to Alaric, substantially increasing his military strength.

Although Alaric was eager for peace, the Western emperor Flavius Honorius refused to recognize his requests for land and supplies. The Visigothic chieftain thereupon laid siege to Rome (408) until the Senate granted him another subsidy and assistance in his negotiations with Honorius. Honorius remaine dintransigent, however, and in 409 Alaric again surrounded Rome. He lifted his blockade after proclaiming Attalus as Western emperor. Attalus appointed him magister utriusque militiae ("master of both services") but refused to allow him to send an army into Africa. Negotiations with Honorius broke down, and Alaric deposed Attalus in the summer of 410, besieging Rome for the third time. Allies within the capital opened the gates for him on August 24, and for three days his troops occupied the city, which had not been captured by a foreign enemy for nearly 800 years. Although the Visigoths plundered Rome, they treated its inhabitants humanely and burned only a few buildings. Having abandoned a plan to occupy Africa. Alaric died as the Visigoths were marching northward.

Notes for Fergus Mor Mac Earca, King:
[F.M.M..FTW]

[Bruderbund WFT Vol. 4, Ed. 1, Tree #1267, Date of Import: 13 Feb, 1999]

Fergus Mor Mac Earca, in 498(?) (or 424 Scottish Chronicles), crossed over into Scotland with an army to aid his grandfather Loarn, King of Dalriada, against the Picts, and upon his death, succeeded him as King of that country. Fergus was unanimously elected and chosen King, as being of the blood royal of his mother, and said Fergus was the first absolute King of Scotland of the Milesian race. Before him the Milesian Kings in Scotland were kings only of Dalriada. So the succession continued in his blood and lineage ever since to this day. (Annals of the Four Masters)

Nota:
La fecha aproximada de nacido que he puesto a Fergus Mor Mac Earca, (c 424), se ajusta a su contexto histórico y genealógico. La de muerte (501) la encontré en otra genealogka de Brotherbund y pienso que es la correcta si se tienen en cuenta las de nacimiento y muerte de sus ancestros y descendientes.

Notes for St. Sahak Souren Pahlav:
Isaac THE GREAT, SAINT, Armenian SAHAK (b. c. 345--d. probably Sept. 7, 439, Ashtishat, Armenia; feast days two weeks before Lent and early in July), celebrated catholicos, or spiritual head, of the Armenian Apostolic (Orthodox) Church, principal advocate of Armenian cultural and ecclesiastical independence and collaborator in the first translation of the Bible and varied Christian literature into Armenian.

Descended from a family of Armenian patriarchs, Isaac was educated in the Hellenistic culture of Asia Minor and at Constantinople. After the death of his

wife, he became a monk and c. 388, with royal support, was named catholicos of Armenia. He furthered Armenian monasticism and converted his residence into a monastery, integrating his patriarchal administration with the ascetical life of the monks. A reformer, Isaac tightened clerical discipline and enforced celibacy on Armenian bishops. He also established schools and churches and gained Constantinople's recognition of Armenian patriarchal rights, thus creating a distinctive and autonomous Armenian form of Christianity free from direct Greek Orthodox control. With the help of his auxiliary bishop, the monk Mesrob (Mashtots), later a saint, Isaac began c. 391 the development of a Greek-inspired Armenian alphabet and literature. The two then directed a group of scholars in translating the Greek and Syriac versions of the Bible into Armenian, completing it c. 435. This linguistic achievement and the formation of an Armenian liturgy and ritual preserved Armenian unity during its partition under Greek and Persian rule.

Although he won toleration for the Armenian Church by the Persian overlords, Isaac was forced to resign his office c. 428 because of intrigues among the Armenian princes. He resumed the church leadership in 432 in response to popular clamour. A semi-legendary 8th-century history of Armenia Major credits Isaac with writing liturgical texts and music, biblical commentaries on the Old Testament, and a series of letters to the Byzantine emperor, to Proclus, patriarch of Constantinople, and to other Eastern prelates on the Christological controversy. At the national Armenian synod of Ashtishat (435), Isaac promoted the Orthodox doctrine of Christ's personal divinity and denounced the emphasis on his humanity as expressed by Theodore of Mopsuestia. Isaac's letters have been published in the French translation (1841) of the 8th-century history of Armenia Major. Frederick C. Conybeare produced an English version (1898) of partially authentic church legislation attributed to Isaac.

Notes for St. Nersch Souren Pahlav:
KATHOLIKOS ("universal" bishop), in Eastern Christian Churches, title of certain
ecclesiastical superiors. In earlier times the designation had occasionally been used, like archimandrite and exarch, for a superior abbot; but the title eventually came to denote a bishop who, while head of a major church, was still in some way dependent on his patriarch. The titles catholicos and patriarch later became synonymous and were both applied to the heads of the Armenian, Nestorian (Assyrian), and Georgian churches. In the Armenian Church there are two catholicoi: the supreme catholicos of Ejmiadzin and the catholicos of Sis. The title catholicos patriarch is also used by the primates of the Armenian Catholic Church and the Chaldean Church.

From Prince Eoghan (or Eugene) comes the name of the territory of Tir Eoghan (now Tyrone) in Ulster. He was baptized while Prince of Ulster by St. Patrick at the Royal Palace of Aileach. The Ulster annalists state that it was his foot which was pierced by the Bachal Iosa during the ceremony. He resided at Aileach in 442.

King Loarn of Dalriada was a descendant of Fiacha Firmara, younger son of Aongus (or Eaneas) Tuirmeach-Teamroch, the 81st Monarch of Ireland, who

ruled B.C. 384-324 and was slain at Tara in B.C. 324. Loarn was the last King of Dalriada in Scotland.

This was the Loarn to assist whom, in his war against the Picts, his grandson Fergus Mor Mac Earca went to Scotland in 498 (or according to the Scottish chronicles in 424); and this Fergus was the founder of the Scottish Monarchy.

Notes for Prasutagus, Druid King Of Icenians:

ROMAN BRITAIN

The conquest.

Julius Caesar conquered Gaul between 58 and 50 BC and invaded Britain in 55 or 54 BC, thereby bringing the island into close contact with the Roman world. Caesar's description of Britain at the time of his invasions is the first coherent account extant. From about 20 BC it is possible to distinguish two principal powers: the Catuvellauni north of the Thames led by Tasciovanus, successor of Caesar's adversary Cassivellaunus, and, south of the river, the kingdom of the Atrebates ruled by Commius and his sons Tincommius, Eppillus, and Verica. Tasciovanus was succeeded in about AD 5 by his son Cunobelinus, who, during a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Beyond these kingdoms lay the Iceni in what is now Norfolk, the Corieltavi in the Midlands, the Dobuni (Dobunni) in the area of Gloucestershire, and the Durotriges in that of Dorset, all of whom issued coins and probably had Belgic rulers. Behind these again lay further independent tribes--the Dumnonii of Devon, the Brigantes in the north, and the Silures and
Ordovices in Wales. The Belgic and semi-Belgic tribes later formed the civilized nucleus of the Roman province and thus contributed greatly to Roman Britain.

The client relationships that Caesar had established with certain British tribes were extended by Augustus. In particular, the Atrebatic kings welcomed Roman aid in their resistance to Catuvellaunian expansion. The decision of the emperor Claudius to conquer the island was the result partly of his personal ambition, partly of British aggression. Verica had been driven from his kingdom and appealed for help, and it may have been calculated that a hostile Catuvellaunian
supremacy would endanger stability across the Channel. Under Aulus Plautius an army of four legions was assembled, together with a number of auxiliary

regiments consisting of cavalry and infantry raised among warlike tribes subject to the empire. After delay caused by the troops' unwillingness to cross the ocean, which they then regarded as the boundary of the human world, a landing was made at Richborough, Kent, in AD 43. The British under Togodumnus and Caratacus, sons and successors of Cunobelinus, were taken by surprise and defeated. They retired to defend the Medway crossing near Rochester but were again defeated in a hard battle. The way to Camulodunum lay open, but Plautius halted at the Thames to await the arrival of the emperor, who took personal command of the closing stages of the campaign. In one short season the main military opposition had been crushed: Togodumnus was dead and Caratacus had fled to Wales. The rest of Britain was by no means united, for Belgic expansion had created tensions. Some tribes submitted, and subduing the rest remained the task for the year 44. For this purpose smaller expeditionary forces were formed consisting of single legions or parts of legions with their auxilia (subsidiary allied troops). The best-documented campaign is that of Legion II under its legate Vespasian starting from Chichester, where the Atrebatic kingdom was restored; the Isle of Wight was taken and the hill forts of Dorset reduced. Legion IX advanced into Lincolnshire, and Legion XIV probably across the Midlands toward Leicester. Colchester was the chief base, but the fortresses of individual legions at this stage have not yet been identified.

By the year 47, when Plautius was succeeded as commanding officer by Ostorius Scapula, a frontier had been established from Exeter to the Humber, based on the road known as the Fosse Way; from this fact it appears that Claudius did not plan the annexation of the whole island but only of the arable southeast. The intransigence of the tribes of Wales, spurred on by Caratacus, however, caused Scapula to occupy the lowlands beyond the Fosse Way up to the River Severn and to move forward his forces into this area for the struggle with the Silures and Ordovices. The Roman forces were strengthened by the addition of Legion XX, released for this purpose by the foundation of a veteran settlement (colonia) at Camulodunum in the year 49. The colonia would form a strategic reserve as well as setting the Britons an example of Roman
urban organization and life. A provincial centre for the worship of the emperor was also established. Scapula's right flank was secured by the treaty relationship that had been established with Cartimandua, queen of the Brigantes. Hers was the largest kingdom in Britain, occupying the whole area between Derbyshire and the Tyne; unfortunately it lacked stability, nor was it united behind its queen, who lost popularity when she surrendered the British resistance leader, Caratacus, to the Romans. Nevertheless, with occasional Roman military support, Cartimandua was maintained in power until 69 against the opposition led by her husband, Venutius, and this enabled Roman governors to concentrate on Wales.

By AD 60 much had been achieved; Suetonius Paulinus, governor from 59 to 61, was invading the island of Anglesey, the last stronghold of independence, when a serious setback occurred: this was the rebellion of Boudicca, queen of the Iceni. Under its king PRASUTAGUS the tribe of the Iceni had enjoyed a position of alliance and independence; but on his death (60) the territory was

forcibly annexed and outrages occurred. Boudicca was able to rally other tribes to her assistance; chief of these were the Trinovantes of Essex, who had many grievances against the settlers of Camulodunum for their arrogant seizure of lands. Roman forces were distant and scattered; and, before peace could be restored, the rebels had sacked Camulodunum, Verulamium (St. Albans), and London, the three chief centres of Romanized life in Britain. Paulinus acted harshly after his victory, but the procurator of the province, Julius Classicianus, with the revenues in mind and perhaps also because, as a Gaul by birth, he possessed a truer vision of provincial partnership with Rome, brought about his recall.

In the first 20 years of occupation some progress had been made in spreading Roman civilization. Towns had been founded, the imperial cult had been established, and merchants were busily introducing the Britons to material benefits. It was not, however, until the Flavian period, AD 69-96, that real advances were made in this field. With the occupation of Wales by Julius Frontinus (governor from 74 to 78) and the advance into northern Scotland by Gnaeus Julius Agricola (78-84), troops were removed from southern Britain, and self-governing civitates, administrative areas based for the most part on the indigenous tribes, took over local administration. This involved a large program of urbanization and also of education, which continued into the 2nd century; Tacitus, in his biography of Agricola, emphasizes the encouragement given to it. Roman conquest of Wales was complete by 78, but Agricola's invasion of Scotland failed because shortage of manpower prevented him from completing the occupation of the whole island. Moreover, when the British garrison was reduced (c. AD 90) by a legion because of continental needs, it became evident that a frontier would have to be maintained in the north. After several experiments, the Solway-Tyne isthmus was chosen, and there the emperor
Hadrian built his stone wall (c. 122-130).

BRITANICA

Iceni, in ancient Britain, a tribe that occupied the territory of modern Norfolk and Suffolk and, under its queen Boudicca (Boadicea), revolted against Roman rule.

Having controlled the Iceni through a client-king, PRASUTAGUS, the Romans attempted to annex his territory after his death (AD 60), thus provoking his queen to lead a revolt of all East Anglia. After several initial successes by the Britons, the Romans ultimately defeated them and regained the province. They severely punished the Iceni, who eventually became a small tribal community with a capital at Venta Icenorum (modern Caister St. Edmund in Norfolk).

BRITANICA

Notes for Boadicea Victoria, Queen Of Britain:
Boudicca, also spelled BOADICEA (d. AD 60), ancient British queen who in AD 60 led a revolt against Roman rule.

Boudicca's husband, Prasutagus, was king of the Iceni (in what is now Norfolk) as a client under Roman suzerainty. When Prasutagus died in 60 with no male heir, he left his private wealth to his two daughters and to the emperor Nero, trusting thereby to win imperial protection for his family. Instead, the Romans annexed his kingdom, humiliated his family, and plundered the chief tribesmen. While the provincial governor Suetonius Paulinus was absent in 60, Boudicca raised a rebellion throughout East Anglia. The insurgents burned Camulodunum (Colchester), Verulamium, the mart of Londinium (London), and several military posts; massacred (according to Tacitus) 70,000 Romans and pro-Roman Britons; and cut to pieces the Roman 9th Legion. Paulinus met the Britons at a point thought to be near present-day Fenny Stratford on Watling Street and in a desperate battle regained the province. Boudicca took poison or died of shock.

Notes for Cunobelinus, King Of Britain:
Cunobelinus (d. c. AD 42), ruler of a large area of southeastern Britain from about AD 10 to 42. He is the Cymbeline in William Shakespeare's play of the same name, although the play's fanciful plot bears no relation to the events in Cunobelinus' career.

Cunobelinus succeeded his father, Tasciovanus, as chief of the Catuvellauni, a tribe centred north of what is now London. During a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Either shortly before or shortly after his accession, Cunobelinus conquered the territory of the Trinovantes, in modern Essex. He made Camulodunum (Colchester) his capital and the seat of his mint. His power and influence were so extensively felt in Britain that the Roman biographer Suetonius referred to him as "Britannorum rex." About AD 40 Cunobelinus banished his son Adminius, who thereupon fled to Rome and persuaded the emperor Caligula to make preparations to invade Britain. The expedition was assembled, but it never left the continent. After Cunobelinus' death, his two other sons, Caratacus and Togodumnus, displayed the hostility toward Rome that gave the emperor Claudius an excuse to impose Roman rule on the island.

BRITANICA

Cymbeline.

The main theme of Cymbeline--Posthumus' wager on the chastity of his wife, Imogen--Shakespeare derived from a story in Boccaccio's Decameron. But he put this Italianate intrigue into a setting that, for his audience, was authentic. Cymbeline, king of Britain, and his two sons, Guiderius and Arviragus, who succeeded him, were, for Shakespeare's audience, historical monarchs. The play is carefully set in the pre-Christian Roman world. The Romans who invade Britain are recognizably derived from the same kind of exploration of the antique world that had produced Julius Caesar, Antony and Cleopatra, and Coriolanus.

Notes for Claudius, Roman Emperor:
Claudius, in full TIBERIUS CLAUDIUS CAESAR AUGUSTUS GERMANICUS, original name (until AD 41) TIBERIUS CLAUDIUS NERO GERMANICUS (b. Aug. 1, 10 BC, Lugdunum [Lyon], Gaul--d. Oct. 13, AD 54), Roman emperor (AD 41-54), who extended Roman rule in North Africa and made Britain a province.

Early life.

The son of Nero Claudius Drusus, a popular and successful Roman general, and the younger Antonia, he was the nephew of the emperor Tiberius and a grandson of Livia Drusilla, the wife of the emperor Augustus. Ill health, unattractive appearance, clumsiness of manner, and coarseness of taste did not recommend him for a public life. The imperial family seems to have considered him
something of an embarrassment, and he was long left to his own private studies and amusements. It was the historian Livy who recognized and encouraged his inclination for historical studies. Claudius wrote a pamphlet defending the republican politician and orator Cicero, who was executed by the triumvirs; and, having discovered that it was difficult to speak freely on the civil wars toward the end of the Roman Republic, he began a history of Rome with the principate of Augustus. He composed 20 books of Etruscan and 8 books of Carthaginian history, all in Greek; an autobiography; and a historical treatise on the Roman alphabet with suggestions for orthographical reform--which as emperor he later tried not very successfully to implement. He also wrote on dice playing, of which he was fond. All his works are lost, and their importance cannot be measured. The Etruscan history may have had original material: his first wife, Plautia Urgulanilla, had Etruscan blood, and her family was probably able to put Claudius in touch with authentic Etruscan traditions. After divorcing Urgulanilla, he in turn married Aelia Paetina, Valeria Messalina, who was his wife at his accession, and, finally, Agrippina the Younger. By his first three wives he had five children, of whom Drusus and Claudia died before he became emperor. As a young man Claudius was made a member of various religious colleges, but he became consul only under the reign of his older brother's son Gaius (Caligula) in 37. There was, however, little cordiality between the two.

Emperor and colonizer

Power came to Claudius unexpectedly after Gaius' murder on Jan. 24, 41, when he was discovered trembling in the palace by a soldier. The Praetorian Guards, the imperial household troops, made him emperor on January 25. By family tradition and antiquarian inclinations, Claudius was in sympathy with the senatorial aristocracy; but soldiers and courtiers were his real supporters, while freedmen and foreigners had been his friends in the days of neglect. Initially, the

attitude of the Senate was at best ambiguous. In 42 many senators supported the ill-fated rebellion of the Governor of Dalmatia. Even later, several attempts on Claudius' life involved senators and knights. Though paying homage to the dignity of the Senate (to whose administration he returned the provinces of Macedonia and Achaea) and giving new opportunities to the knights, Claudius was ruthless and occasionally cruel in his dealings with individual members of both orders. From the very beginning he emphasized his friendship with the army and paid cash for his proclamation as emperor.

Claudius' decision to invade Britain (43) and his personal appearance at the climax of the expedition, the crossing of the Thames and the capture of Camulodunum (Colchester), were prompted by his need of popularity and glory. But concern with the anti-Roman influence of the Druid priesthood, which he tried to suppress in Gaul, and a general inclination toward expanding the frontiers were other reasons. Claudius planted a colony of veterans at Camulodunum and
established client-kingdoms to protect the frontiers of the province; these were afterward a source of trouble, such as the revolt in 47 of Prasutagus, client-king of the Iceni, and later the general revolt instigated by his wife Boudicca (also called Boadicea). He also annexed Mauretania (41-42) in North Africa, of which he made two provinces (Caesariensis in the east and Tingitana in the west), Lycia in Asia Minor (43), and Thrace (46). Though he enlarged the kingdom of Herod Agrippa I, he later made Judaea a province on Agrippa's death in 44. In 49 he annexed Iturea (northeastern Palestine) to the province of Syria. He was careful not to involve the empire in major wars with the Germans and the Parthians. Claudius supported Roman control of Armenia, but in 52 he preferred the collapse of the pro-Roman government to a war with Parthia, leaving a difficult situation to his successor.

In the civil administration, many measures demonstrate Claudius' enlightened policy. He improved in detail the judicial system, and, in his dealings with the provinces, he favoured a moderate extension of Roman citizenship by individual and collective grants: in Noricum, a district south of the Danube comprising what is now central Austria and parts of Bavaria, for instance, five communities became Roman municipalities. He encouraged urbanization and planted several
colonies, for example, at Camulodunum and at Colonia Agrippinensis (modern Cologne) in Germany in 51. In his religious policy Claudius respected tradition; he revived old religious ceremonies, celebrated the festival of the Secular Games in 47 (three days and nights of games and sacrifice commemorating the 800th birthday of Rome), made himself a censor in 47, and extended in 49 the pomerium of Rome (i.e., the boundary of the area in which only Roman gods could be worshipped and magistrates ruled with civil, not military, powers). He protected the haruspices (diviners) and probably Romanized the cult of the Phrygian deity Attis. According to the biographer Suetonius in Claudius, during a period of troubles Claudius expelled the Jews from Rome for a short time; Christians may have been involved. Elsewhere he confirmed existing Jewish rights and privileges, and in Alexandria he tried to protect the Jews without provoking Egyptian nationalism. In a surviving letter addressed to the city

of Alexandria, he asked Jews and non-Jews "to stop this destructive and obstinate mutual enmity." Although personally disinclined to accept divine honours, he did not seriously oppose the current trend and had a temple erected to himself in Camulodunum. His public works include the reorganization of the grain supply of Rome and construction of a new harbour at Ostia, which was later improved by the emperor Trajan.

Administrative innovations.

Claudius' general policy increased the control of the emperor over the treasury and the provincial administration and apparently gave jurisdiction in fiscal matters to his own governors in the senatorial provinces. He created a kind of cabinet of freedmen, on whom he bestowed honours, to superintend various branches of the administration. An impressive series of documents, such as a speech for the admission of Gauls to the Senate recorded on a partly defective inscription at Lugdunum (Lyon), the edict for the Anauni (an Alpine population who had usurped the rights of Roman citizenship and whom Claudius confirmed in these rights), and the aforementioned letter to the city of Alexandria (AD 41), survive as evidence of his personal style of government: pedantic, uninhibited, alternately humane and wrathful, and ultimately despotic. The inscription from Lugdunum is an interesting comparison with the version of the historian Tacitus in his Annals, which gives an account of the same speech. The speech as recorded in the inscription, in spite of irrelevance, inconsequence, and fondness for digression (much of which is absent in the version of Tacitus), shows that Claudius knew what he wanted and that he appreciated the latent forces of Roman tradition.

His marriage with Messalina ended in 48, when she apparently conspired against him and, according to Tacitus, conducted a public marriage ceremony with her lover, Gaius Silius. Messalina and Silius were killed, and Claudius married his niece Agrippina, an act contrary to Roman law, which he therefore changed. To satisfy Agrippina's lust for power, Claudius had to adopt her son Lucius Domitius Ahenobarbus (later the emperor Nero), to the disadvantage of his own son Britannicus. In addition, the new commander of the guards, Afranius Burrus, was protected by Agrippina. Roman tradition is unanimous in stating that Claudius was poisoned by Agrippina on Oct. 13, AD 54, though the details differ. A version of poisoning by mushrooms prevailed. Lucius Annaeus Seneca, the politician and satirist, who had been exiled by Claudius at his accession but had been recalled at Agrippina's urging to educate Nero, derided the dead emperor and his apotheosis (duly decreed by the Senate) in the satire Apocolocyntosis divi Claudii ("The Pumpkinification of the Divine Claudius"; the title and its exact meaning are both subject to dispute).

The picture of Claudius that appears in this work has much in common with that of later Roman historians who give details of the unpopular side of Claudius' administration. The Apocolocyntosis ridicules his physical appearance and his speaking ability and casts aspersions on his abilities as a judge, depicting him as arbitrary--of giving legal judgments without a fair hearing and of summarily ordering the executions of relatives, senators, and knights.

Tacitus, Suetonius, and the later historian Dio Cassius attribute Claudius' mistakes to infirmity of character and the influence of his wives and freedmen. They echo the hostility of the upper classes against an emperor who, in spite of his words, had been unfavourable to them. That this tradition is one-sided is shown by the surviving documents of the reign and the energy with which Claudius carried out the affairs of government.

Notes for Caradoc, King Of Siluria:
Birth record shows descendant of Aedd Mawr, as given above.

Siluro, Pueblo, antiguo pueblo de Britania, que habitaba lo que hoy es el sureste del Paks de Gales. Tribu poderosa y belicosa, ofreció una resistencia feroz a las fuerzas romanas que invadieron su territorio, en el ano 48d.C., pero al final, en el 78, los romanos la conquistaron después de establecer una fortaleza en Isca, la actual Caerleon. La ciudad principal de los siluros fue romanizada con el nombre de Venta Silurum, la actual Caerwent, cerca del estuario del rko Severn, al este de Newport.

Eochaidh Muigh Meadhoin was the 124th Monarch of Ireland (reigned 357-365) and in the eighth year of his reign died a natural death at Tara in 365. By his first wife, Mong Moine, he left four sons, the eldest being Brian.
She was the daughter of Felim, second Christian King of Ulster, and sister of Crimthoun, King of Munster of the Hiberian sept and successor of Eochaidh in the Monarchy. This Crimthoun was poisoned by Mong Moine in the hope that Brian, her eldest son would cucceed to the Monarchy. To avoid suspicion, she herself drank of the same poisoned cup which she presented to her brother,

but, notwithstanding she lost her life by so doing, yet her expectations were not realized, for the said Brian and her other sons were laid aside and the youngest son of Eochaidh by Carthan Cais Dublin (Casduff) was preferred to the Monarchy.

**43982616858752. Tasciovanus, King Of Britain,** born in Aprox 50 AC. He was the son of **87965233717504. Cassivellaunus, King Of Britain**.

Notes for Tasciovanus, King Of Britain:
Tasciovanus, chief of the Catuvellauni, a tribe centred north of what is now London.

Catuvellauni, probably the most powerful Belgic tribe in ancient Britain; it occupied the area directly north of the River Thames. The first capital of the Catuvellauni was located near Wheathampstead, but after their defeat by Julius Caesar in 54 BC, they expanded to the north and northwest, building anew capital at Verulamium, near St. Albans. The Catuvellauni practiced agriculture extensively and apparently had a prosperous economy.

BRITANICA

## ROMAN BRITAIN

### The conquest.

Julius Caesar conquered Gaul between 58 and 50 BC and invaded Britain in 55 or 54 BC, thereby bringing the island into close contact with the Roman world. Caesar's description of Britain at the time of his invasions is the first coherent account extant. From about 20 BC it is possible to distinguish two principal powers: the Catuvellauni north of the Thames led by Tasciovanus, successor of Caesar's adversary Cassivellaunus, and, south of the river, the kingdom of the Atrebates ruled by Commius and his sons Tincommius, Eppillus, and Verica.
Tasciovanus was succeeded in about AD 5 by his son Cunobelinus, who, during a long reign, established power all over the southeast, which he ruled from Camulodunum (Colchester). Beyond these kingdoms lay the Iceni in what is now Norfolk, the Corieltavi in the Midlands, the Dobuni (Dobunni) in the area of Gloucestershire, and the Durotriges in that of Dorset, all of whom issued coins and probably had Belgic rulers. Behind these again lay further independent tribes--the Dumnonii of Devon, the Brigantes in the north, and the Silures and
Ordovices in Wales. The Belgic and semi-Belgic tribes later formed the civilized nucleus of the Roman province and thus contributed greatly to Roman Britain.

The client relationships that Caesar had established with certain British tribes were extended by Augustus. In particular, the Atrebatic kings welcomed Roman aid in their resistance to Catuvellaunian expansion. The decision of the emperor Claudius to conquer the island was the result partly of his personal ambition, partly of British aggression. Verica had been driven from his kingdom and appealed for help, and it may have been calculated that a hostile Catuvellaunian
supremacy would endanger stability across the Channel. Under Aulus Plautius an army of four legions was assembled, together with a number of auxiliary

regiments consisting of cavalry and infantry raised among warlike tribes subject to the empire. After delay caused by the troops' unwillingness to cross the ocean, which they then regarded as the boundary of the human world, a landing was made at Richborough, Kent, in AD 43. The British under Togodumnus and Caratacus, sons and successors of Cunobelinus, were taken by surprise and defeated. They retired to defend the Medway crossing near Rochester but were again defeated in a hard battle. The way to Camulodunum lay open, but Plautius halted at the Thames to await the arrival of the emperor, who took personal command of the closing stages of the campaign. In one short season the main military opposition had been crushed: Togodumnus was dead and Caratacus had fled to Wales. The rest of Britain was by no means united, for Belgic expansion had created tensions. Some tribes submitted, and subduing the rest remained the task for the year 44. For this purpose smaller expeditionary forces were formed consisting of single legions or parts of legions with their auxilia (subsidiary allied troops). The best-documented campaign is that of Legion II under its legate Vespasian starting from Chichester, where the Atrebatic kingdom was restored; the Isle of Wight was taken and the hill forts of Dorset reduced. Legion IX advanced into Lincolnshire, and Legion XIV probably across the Midlands toward Leicester. Colchester was the chief base, but the fortresses of individual legions at this stage have not yet been identified.

By the year 47, when Plautius was succeeded as commanding officer by Ostorius Scapula, a frontier had been established from Exeter to the Humber, based on the road known as the Fosse Way; from this fact it appears that Claudius did not plan the annexation of the whole island but only of the arable southeast. The intransigence of the tribes of Wales, spurred on by Caratacus, however, caused Scapula to occupy the lowlands beyond the Fosse Way up to the River Severn and to move forward his forces into this area for the struggle with the Silures and Ordovices. The Roman forces were strengthened by the addition of Legion XX, released for this purpose by the foundation of a veteran settlement (colonia) at Camulodunum in the year 49. The colonia would form a strategic reserve as well as setting the Britons an example of Roman urban organization and life. A provincial centre for the worship of the emperor was also established. Scapula's right flank was secured by the treaty relationship that had been established with Cartimandua, queen of the Brigantes. Hers was the largest kingdom in Britain, occupying the whole area between Derbyshire and the Tyne; unfortunately it lacked stability, nor was it united behind its queen, who lost popularity when she surrendered the British resistance leader, Caratacus, to the Romans. Nevertheless, with occasional Roman military support, Cartimandua was maintained in power until 69 against the opposition led by her husband, Venutius, and this enabled Roman governors to concentrate on Wales.

By AD 60 much had been achieved; Suetonius Paulinus, governor from 59 to 61, was invading the island of Anglesey, the last stronghold of independence, when a serious setback occurred: this was the rebellion of Boudicca, queen of the Iceni. Under its king Prasutagus the tribe of the Iceni had enjoyed a position of alliance and independence; but on his death (60) the territory was forcibly annexed and outrages occurred. Boudicca was able to rally other tribes to her assistance; chief of these were the Trinovantes of Essex, who had many

grievances against the settlers of Camulodunum for their arrogant seizure of lands. Roman forces were distant and scattered; and, before peace could be restored, the rebels had sacked Camulodunum, Verulamium (St. Albans), and London, the three chief centres of Romanized life in Britain. Paulinus acted harshly after his victory, but the procurator of the province, Julius Classicianus, with the revenues in mind and perhaps also because, as a Gaul by birth, he possessed a truer vision of provincial partnership with Rome, brought about his recall.

In the first 20 years of occupation some progress had been made in spreading Roman civilization. Towns had been founded, the imperial cult had been established, and merchants were busily introducing the Britons to material benefits. It was not, however, until the Flavian period, AD 69-96, that real advances were made in this field. With the occupation of Wales by Julius Frontinus (governor from 74 to 78) and the advance into northern Scotland by Gnaeus Julius Agricola (78-84), troops were removed from southern Britain, and self-governing civitates, administrative areas based for the most part on the indigenous tribes, took over local administration. This involved a large program of urbanization and also of education, which continued into the 2nd century; Tacitus, in his biography of Agricola, emphasizes the encouragement given to it. Roman conquest of Wales was complete by 78, but Agricola's invasion of Scotland failed because shortage of manpower prevented him from completing the occupation of the whole island. Moreover, when the British garrison was reduced (c. AD 90) by a legion because of continental needs, it became evident that a frontier would have to be maintained in the north. After several experiments, the Solway-Tyne isthmus was chosen, and there the emperor Hadrian built his stone wall (c. 122-130).

ii. Caligula, Roman Emperor, born in August 31,12 DC Antium, Latium (Anzio, Italy); died in Jan 24, 41 DC, Rome; married Caesonia; born in c 35 d.c..

Notes for Caligula, Roman Emperor:
Calígula, Cayo Julio César (12-41d.C.), emperador romano (37-41d.C.), famoso por su crueldad y por su extravagancia. Nacido en Antium (ahora Anzio, en Italia), era el hijo más joven del general romano Julio César Germánico y de Agripina la Mayor, y nieto por adopción del emperador Tiberio. Su juventud en los campamentos militares le hicieron merecedor del sobrenombre de Calígula (en latín, diminutivo del calzado militar romano), debido a los pequeños zapatos militares que usaba. Tiberio le nombró, junto con su nieto, Tiberio Gemelo, coheredero al trono, pero el Senado romano y el pueblo optaron por Calígula como único emperador. Adoptó a Gemelo como hijo, pero más tarde ordenó su asesinato. Fue un dirigente clemente durante los seis primeros meses, pero se convirtió en un tirano depravado después de una enfermedad mental. Derrochó su fortuna (conseguida, en parte, por las confiscaciones de miembros del Senado) en espectáculos públicos y proyectos de construcción de edificios, desterró o asesinó a la mayoría de sus familiares, nombró a su caballo cónsul, se proclamó dios construyendo templos y realizando sacrificios en su honor. En el 41, los oficiales de su guardia conspiraron contra él y le asesinaron, nombrando como sucesor a su tío Claudio.

Notes for Odin (Woden,Moutan):
Odin, also called WODAN, WODEN, or WOTAN, one of the principal gods in Norse mythology. His exact nature and role, however, are difficult to determine because of the complex picture of him given by the wealth of archaeological and literary sources. The Roman historian Tacitus stated that the Teutons worshiped Mercury; and because dies Mercurii ("Mercury's day") was identified with Wednesday ("Woden's day"), there is little doubt that the god Woden (the earlier form of Odin) was meant. Though Woden was worshiped preeminently, there is not sufficient evidence of his cult to show whether it was practiced by all the Teutonic tribes or to enable conclusions to be drawn about the nature of the god. Later literary sources, however, indicate that at the end of the pre-Christian period Odin was the principal god in Scandinavia.

From earliest times Odin was a war god, and he appeared in heroic literature as the protector of heroes; fallen warriors joined him in Valhalla. The wolf and the raven were dedicated to him. His magical horse, Sleipnir, had eight legs, teeth inscribed with runes, and the ability to gallop through the air and over the sea. Odin was the great magician among the gods and was associated with runes. He was also the god of poets. In outward appearance he was a tall, old man, with
flowing beard and only one eye (the other he gave in exchange for wisdom). He was usually depicted wearing a cloak and a wide-brimmed hat and carrying a spear.

Notes for Tiridates III (IV) , King Of Armenia:
[MARINOS HASTA PERSIA.FTW]

Tiridates III was restored to the throne under Roman protection (c. 287); his reign determined the course of much of Armenia's subsequent history, and his conversion by St. Gregory the Illuminator and the adoption of Christianity as the state religion (c. 314) created a permanent gulf between Armenia and Persia. The Armenian patriarchate became one of the surest stays of the Arsacid monarchy and the guardian of national unity after its fall. The chiefs of Armenian clans, called nakharars, held great power in Armenia, limiting and threatening the influence of the king.

**87965233717504. Cassivellaunus, King Of Britain,** born in Aprox 80 AC.

Notes for Cassivellaunus, King Of Britain:
Cassivellaunus, also spelled CASSIVELAUNUS (fl. 1st century BC), powerful British chieftain who was defeated by Julius Caesar during his second raiding expedition into Britain (54 BC).

Cassivellaunus led his tribe, the Catuvellauni (a Belgic people who lived in modern Hertfordshire), against the Roman invaders, making effective use of guerrilla tactics and chariot warfare. Finally Caesar captured the principal fortified settlement, since identified as a site in present-day Wheathampstead, Hertfordshire. The British leader was granted peace when he agreed to provide hostages and pay an annual tribute to Rome. These promises, however, were probably not meant to be kept, and it appears certain that the tribute was never paid.

She was the daughter of **175930467435026. Marcus Livius Drusus Claudianus**.

Notes for Livia Drusilla:
Livia Drusilla, also called (from AD 14) JULIA AUGUSTA (b. Jan. 30, 58 BC--d. AD 29), Caesar Augustus' devoted and influential wife who counselled him on affairs of state and who, in her efforts to secure the imperial succession for her son Tiberius, was reputed to have caused the deaths of many of his rivals.

Her father was Marcus Livius Drusus Claudianus, an adoptive son of the tribune of 91, Marcus Livius Drusus. She married her cousin Tiberius Claudius Nero and in 42 bore him Tiberius. Livia Drusilla, may have been only 13 years old when Tiberius was born. She was still pregnant with her second son, Nero Claudius Drusus, when early in 38, Octavian (later Augustus) compelled her to divorce Nero and marry him. Her second marriage was childless. After the death of Augustus (Aug. 19, AD 14) she assumed the name Julia Augusta.

Livia's power and ambition proved embarrassing to Tiberius after his accession. He forbade her to accept certain honours and even refused to carry out the terms of her will. She was, however, deified (42) by her grandson Claudius. Surviving portraiture confirms her reputation for dignified beauty.

Notes for Tiberius, Emperor Of Rome:
Tiberio Julio César (42a.C.-37d.C.), segundo emperador de Roma (14-37d.C.), instituyó de forma permanente la magistratura que había ejercido su antecesor. Era el hijo mayor de Tiberio Claudio Nerón y de Livia Drusilla.
Nació en Roma el 16 de noviembre del 42a.C. Cuatro años después su madre se divorció y se casó con el triunviro Octavio, más tarde el emperador Augusto, quien supervisó la educación de Tiberio. Mandó una expedición a Armenia en el 20a.C., y

luchó contra los retios y los panonios (12-9a.C.). En el 11a.C., siguiendo órdenes de su padrastro, disolvió su feliz matrimonio con Vipsania Agripina, hija del general romano Marco Vipsanio Agripa, y se casó con la hija de Augusto, Julia, viuda de Agripa. Desde el 6a.C., vivió en exilio virtual, en la isla de Rodas, donde se dedicó a estudiar.

Campañas militares

Cuando regresó a Roma en el 2d.C., Julia estaba desterrada por adulterio, y Augusto tras la muerte de sus dos nietos, Lucio y Cayo, se vio obligado a reconocer a Tiberio como único posible sucesor al título imperial y a adoptarle oficialmente en el 4d.C. Ese mismo año partió para dirigir una expedición en el norte de Germania contra los marcomanos. También tuvo éxito al sofocar los levantamientos de Panonia y Dalmacia, y finalmente afianzó la frontera y se vengó de los germanos, que habían destruido el ejército del general romano Varo, en los bosques de Teutoburgo, en el 9d.C. Acompañado de Julio César Germánico, su sobrino e hijo adoptivo, realizó otras dos marchas al corazón de Germania; regresó a Roma varios años más tarde para recibir los honores del triunfo, el tributo oficial más alto que se daba a un guerrero victorioso.

Su reinado

Cuando Augusto murió en Nola, cerca de Nápoles, en el 14d.C., Tiberio heredó el trono. Mejoró los servicios civiles, impuso al Ejército una disciplina estricta y dirigió las finanzas del Imperio con gran habilidad; también ejerció un mayor control sobre los gobernadores de las provincias. Sin embargo, estallaron sublevaciones y revueltas en Panonia, Germania, Galia, y otros territorios. La última época de su reinado estuvo marcada por las conspiraciones y las ejecuciones. Durante su reinado se crucificó a Jesucristo.

En el 26d.C. abandonó Roma, a la que llegó a tener una gran aversión, y se retiró a la región de Campania. El año siguiente se fue a la isla de Capreae (la actual Capri), dejando Roma bajo el mando de Lucio Elio Sejano, el prefecto de la Guardia Pretoriana. Finalmente se dio cuenta de que Sejano intentaba hacerse con el poder imperial, por lo que mandó ejecutarle junto con sus partidarios en el 31. Continuó viviendo en Capri hasta el 37. Murió el 16 de marzo del 37, en Misena, cerca de Nápoles, tras lo cual se rumoreó que había sido asfixiado por el prefecto de la Guardia Pretoriana.

Notes for Marcus Vipsanius Agrippa:
Agrippa, Marcus Vipsanius (b. 63 BC?--d. March, 12 BC, Campania [Italy]), powerful deputy of Augustus, the first Roman emperor. He was chiefly responsible for the victory over Mark Antony at the Battle of Actium in 31 BC, and during Augustus' reign he suppressed rebellions, founded colonies, and administered various parts of the Roman Empire. Of modest birth but not a modest man, Agrippa was disliked by the Roman aristocracy. In his own interest he scrupulously maintained a subordinate role in relation to Augustus, but he felt himself inferior to no one else.

Virtually nothing is known of his early life until he is found as the companion of Octavian (the future emperor Augustus) at Apollonia, in Illyria, at the time of Julius Caesar's murder in 44. Octavian, the adopted son of Caesar, returned with Agrippa to Italy to make his political claim as Caesar's heir. In 43 Agrippa is thought to have held the office of tribune of the plebs; presumably in this capacity he prosecuted the tyrannicide Cassius, then absent in the East.

In the struggle for power after Julius Caesar's death, Agrippa served as one of Octavian's key military commanders. In 41-40 he fought against Mark Antony's brother Lucius. In 40 he held the post of praetor urbanus (magistrate mainly in charge of administration of justice at Rome) and was a major figure in negotiating a settlement between Octavian and Antony at Brundisium. During the next two years he was away on campaigns in Aquitania and on the Rhine River. When
he returned to Italy, he conspicuously refused to celebrate a triumph for his successes in the north, but in 37 he held the office of consul. In the spring of 37 Octavian and Antony came to an agreement at Tarentum, and it must have been then that Antony arranged the marriage of Agrippa to the daughter of Titus Atticus, a wealthy friend of Cicero.

Octavian's efforts to resist at sea the son of the republican general Gnaeus Pompey, Sextus Pompeius, had not met with success. Agrippa therefore took charge of the operations. He constructed a fine harbour at Puteoli in the Bay of Naples and then won, in 36, two decisive naval victories (at Mylae and Naulochus), ending the threat from Pompeius. For this achievement
Agrippa was awarded a golden crown. In 35-34 Octavian waged a vigorous campaign in Dalmatia, and in this Agrippa had a distinguished military role. In 33 Agrippa served as curule aedile (magistrate of public buildings and works) at Rome, even though it was a much lower post than the consulate that he had

already held. He used the opportunity to win favour for Octavian by spending his own funds lavishly on building baths, cleaning sewers, and improving the water
supply. When Octavian and Antony finally came into direct conflict at the Battle of Actium in 31, Agrippa commanded the fleet and was primarily responsible for Octavian's victory.

During Octavian's absence from Rome after Actium, Agrippa managed affairs in the city together with Maecenas, the great patron of poets. In 29-28 Agrippa and Octavian jointly conducted a census and carried out a purge of the Senate; in 28 and 27 Agrippa held the consulate again, both times with Octavian (from 27, Augustus) as his colleague. In 23, a year of constitutional crisis, Augustus fell ill and presented his signet ring to Agrippa, who seemed thus to be designated the
emperor's successor. Agrippa took Augustus' daughter Julia as his wife after divorcing a niece of Augustus (Marcella the Elder), who had replaced Atticus' daughter as his wife some four or five years previously.

Agrippa went immediately to Mytilene on the island of Lesbos, from which he administered affairs in the East. The nature of Agrippa's constitutional power (imperium) at this time is controversial. It has been argued whether the Senate in 23 gave him an imperium greater than that of any other provincial governor in the East (imperium majus). After Augustus' death Roman historians claimed that Agrippa's sojourn at Mytilene was a kind of exile as a result of Augustus' preference for his own nephew Marcellus. This appears implausible. Agrippa was soon back in Rome to act on behalf of the emperor, who himself left for the East in 22. Before Augustus' return, in 19, Agrippa had left for Gaul and Spain. In Spain he finally subdued the recalcitrant Cantabrians.

Returning to Rome in 18, Agrippa received the power of a tribune (tribunicia potestas), which Augustus also possessed. Perhaps, too, he received an imperium majus, if he had not been granted it in 23. He participated in Augustus' celebration of the Secular Games at Rome in 17, after which he returned to the East as vicegerent of the emperor. In 15 he accepted an invitation from Herod I the Great to visit Judaea; while in the East, he established colonies of veterans
at Berytus and Heliopolis, in Lebanon. He next settled an uprising in the Bosporan kingdom on the Black Sea and set up the cultivated dynast Polemo as king. Herod led a fleet to support Agrippa in the Bosporan affair, and, when it was over, the two traveled together along the coast of western Asia Minor.

In 13 Agrippa's tribunicia potestas was renewed, and at this time without doubt he received (or had renewed) a grant of imperium majus. Troubles in Pannonia required his presence, but the rigours of the winter of 13-12 caused a fatal illness; he died in March of 12 BC. Augustus delivered a funeral oration in honour of his colleague; a fragment of that oration, in Greek translation, has recently come to light.

Agrippa deserved the honours Augustus heaped upon him. It is conceivable that without Agrippa, Octavian would never have become emperor. Rome

remembered him for his generosity in attending to aqueducts, sewers, and baths; and in the mid-20s he completed the celebrated Pantheon. One of Agrippa's five children by Julia, Agrippina the Elder, was the mother of one emperor (Caligula) and the grandmother of another (Nero). Agrippa's autobiography is lost,
but an extensive geographical commentary that he wrote influenced the extant works of the geographer Strabo and of Pliny the Elder.
